Is This Wi-Fi Organic? Dave Farina.2021-03-30 How to separate facts from fake science in the Disinformation Age: “Cuts through the chaos . . . sure to keep you laughing while also keeping you thinking.” —Matt Candeias, PhD, author of *In Defense of Plants* We live in an era when scams, frauds, fake news, fake stories, fake science, and false narratives are everywhere. Fortunately, you don't need a BS in Science to spot science BS. This guide from educator Dave Farina, aka YouTube's Professor Dave, is a playful yet practical investigation of popular opinions and consumer trends that permeate our society. Shoppers insist on “organic” everything even if they're unable to define the term. Healers and quantum mystics secure a foothold alongside science-based medicine in an unregulated and largely unchallenged landscape. Misleading marketing is used to sell you products and services that range from ineffectual to downright dangerous. With the knowledge gained from Dave Farina's simple explanations of basic scientific principles, you can learn to spot misinformation and lies on the internet before they spot you. Learn the real science behind such semi-controversial subjects as drugs, vaccines, energy, and biotechnology—and most importantly, arm yourself with the critical-thinking skills everyone needs in a world filled with nonsense. “Scientific literacy is our best defense in an age of increasing disinformation.” —Kellie Gerardi, aerospace professional and author of *Not Necessarily Rocket Science*

Language Learning in Intercultural Perspective Michael Byram,Michael Fleming.1998-06-11 Language Learning in Intercultural Perspective addresses the ways in which language learning is related to learning about other cultures and to acquiring an ability to communicate across cultural frontiers. It argues that language learners need to develop sensitivity to cultural difference and its impact on communication, and to acquire the skills of discovering and interpreting other cultures, other values, beliefs and behaviours which lie beneath the surface of cross-cultural communication. Contributors show how drama can be used to develop cultural awareness and how learners can acquire ethnographic skills to help them investigate and understand socio-cultural aspects of language which play an important role in second language acquisition. The contributors are all respected educationalists from a range of countries and different cultural contexts.

Poetics of the Iconotext Professor Liliane Louvel.2013-05-28 Poetics of the Iconotext makes available for the first time in English the theories of the respected French text/image specialist, Professor Liliane Louvel. A consolidation of the most significant theoretical materials of Louvel's two acclaimed books, L'Oeil du Texte: Texte et image dans la littérature anglophone and Texte/Image: Images à lire, textes à voir, this newly conceived work introduces English readers to the most current thinking in French text/image theory and visual studies. Focusing on the full spectrum of text/image relations, from medieval illuminated manuscripts to digital books, Louvel begins by introducing key terms and situating her work in the context of significant debates in text/image studies. Part II introduces Louvel's s typology of pictorial saturation through which she establishes a continuum along which to measure the effect of the most figurative to the most literal images upon writerly and readerly textual 'spaces.' Part III adopts a phenomenological approach towards the reading-viewing experience as expressed in conceptual categories that include the trace, focal range, synesthesia, and rhythm and speed. The result is a provocative interplay of the categorical and the subjective that invites readers to think at once more precisely and more inventively about texts, images, and the intersections between the two.
