The Manual introduces accrual accounting, balance sheets, and complete coverage of government economic and financial activities. To the extent possible, the Manual has been harmonized with the System of National Accounts 1993.

International Politics of Recognition Thomas Lindemann, Erik Ringmar. 2015-11-17 The origins of international conflict are often explained by security dilemmas, power-rivalries or profits for political or economic elites. Common to these approaches is the idea that human behaviour is mostly governed by material interests which principally involve the quest for power or wealth. The authors question this truncated image of human rationality. Borrowing the concept of recognition from models developed in philosophy and sociology, this book provides a unique set of applications to the problems of international conflict, and argues that human actions are often not motivated by a pursuit of utility maximisation as much as they are by a quest to gain recognition. This unique approach will be a welcome alternative to the traditional models of international conflict.
