Garretts & Pretenders Albert Parry. 2005-05-01 Published in 1933, the first edition of this classic narrative chronicled the lives of America's bohemians, from Edgar Allan Poe in the early 1800s to Walt Whitman and Ambrose Bierce. The book caused a sensation when it was released in March 1933, with reviews and excerpts printed in magazines such as Esquire, American Mercury, and other popular titles of the time. Complete with a comprehensive index, the book was a major historical source for many years. This updated edition, first published in 1960, includes a meticulous and well-researched account of the Beat Generation, from Jack Kerouac to Allen Ginsberg, and their literary achievements. Not merely a sentimental collection of tales of days gone by, this is a fascinating study of vibrant and eccentric times. Complete with cartoons, illustrations, and photographs, this is an accurate depiction of the lives and manners of America's bohemians. AUTHOR BIO: Albert Parry was the author of the landmark 1933 book *Tattoo, Secrets of a Strange Art as Practised by the Natives of the United States*, and was an early contributor to the reefer madness craze with his article *The Menace of Marijuana* in the December 1935 issue of American Mercury.

The Art of Education Rabbi Yitzchak Ginsburgh. 2005 With so much information readily available today, the educator's role must go beyond simply transferring knowledge to students. Drawing from the deep wisdom found in the classic teachings and stories of Kabbalah and Chassidut, *The Art of Education* focuses the educator on creating a lasting impression on students by opening their spirits to their own higher realms of consciousness and by helping them integrate newly found energy, will, and insights into everyday life. *The Art of Education* surveys the seven skills of the accomplished educator: communication, self-criticism, recognition, flexibility, attention to details, prioritization, and the correct use of reward and punishment. Together, these seven skills form a Kabbalistic structural model that when properly understood functions like a neurological key unlocking the inner educator in each of us.

The Wandering Intan Paramaditha. 2020-04-21 *The most unusual novel you will read all year, where you create your own story* 'An ingenious choose-your-own-adventure challenge... Questions such as: "Where am I going?"... "Which choice will make my life worthwhile?" feel existential and urgent... Who can travel, and on what conditions, is one of the primary human rights questions of our era, and *The Wandering* skilfully takes it on.' Guardian You've grown roots, you're gathering moss. You're desperate to escape your boring life teaching English in Jakarta, to go out and see the world. So you make a Faustian pact with a devil, who gives you a gift, and a warning. A pair of red shoes to take you wherever you want to go. You're forever wandering, everywhere and nowhere, but where is your home? And where will you choose to go? To New York, to follow your dreams? To Berlin or Amsterdam? Lima or Tijuana? Or onto a train that will never stop? The choices you make about which pages to turn to may mean you'll become a tourist or an undocumented migrant, a mother or a murderer, and you will meet many travellers with their own stories to tell. As your paths cross and intertwine, you'll soon realise that no story is ever new. *The Wandering* is a novel about the highs and lows of global nomadism, the politics and privileges of travel and desire, and the freedoms and limitations of the choices we make, by one of Asia's most exciting writers. It's a reminder that borders are real, and a playful experiment that turns the traditional adventure story on its head. Winner of an English PEN Translates Award, and a Heim Translation Fund Grant from PEN America

The Art of Wandering Merlin Coverley. 2022-09-28 *The Art of Wandering* is a history of that curious

hybrid, the writer as walker. From the Ancient world to the modern day, the role of the walker continues to evolve, from philosopher and pilgrim, vagrant and visionary, to experimentalist and radical. From Rousseau and De Quincey to Virginia Woolf and Werner Herzog, this seemingly innocuous activity has inspired a literary tradition encompassing philosophy and poetry, the novel and the manifesto. Today, this figure has returned to the forefront of the public imagination, as writers and walkers follow in the footsteps of earlier generations. For the walker is once again on the march, seeking out new territory and recording new impressions of the landscape. Newly revised and updated, *The Art of Wandering* explores these adventures on foot. Every walk can be expressed as a story narrated by the walker; it is these stories and the lives of those who walked them which are examined here.

Mobile Home Megan Harlan.2020-09-15 Uprooting ourselves and putting down roots elsewhere has become second nature. Americans are among the most mobile people on the planet, moving house an average of nine times in adulthood. *Mobile Home* explores one family's extreme and often international version of this common experience. Inspired by Megan Harlan's globe-wandering childhood—during which she lived in seventeen homes across four continents, ranging in location from the Alaskan tundra to a Colombian jungle, a posh flat in London to a doublewide trailer near the Arabian Gulf—*Mobile Home* maps the emotional structures and metaphysical geographies of home. In ten interconnected essays, Harlan examines cultural histories that include Bedouin nomadic traditions and modern life in wheeled mobile homes, the psychology of motels and suburban tract housing, and the lived meanings within the built landscapes of Manhattan, Stonehenge, and the Winchester Mystery House. More personally, she traces the family histories that drove her parents to seek so many new horizons—and how those places shaped her upbringing. Her mother viewed houses as a kind of large-scale plastic art ever in need of renovating, while her father was a natural adventurer and loved nothing more than to travel, choosing a life of flight that also helped to mask his addiction to alcohol. These familial experiences color Harlan's current journey as a mother attempting to shape a flourishing, rooted world for her son. Her memoir in essays skillfully explores the flexible, continually inventive natures of place, family, and home.

The Wandering P. M. Barnes.2014-11-09 *The Wandering I*, is a poetic and visual journey, through the stages of self discovery. The stages have been broken down into three sections, titled Chagrin, Angst and Temper. Each section explores the complexities of trying to understand the purpose of ones life. From the confusions and failure associated with the onset of all personal journeys, to the awakening and revelry, of finally finding a groove that fits your being. Those growing pains and the subsequent "golden days", are played out within these pages.

Exoplanets Michael E. Summers,James Trefil.2017-03-14 The past few years have seen an incredible explosion in our knowledge of the universe. Since its 2009 launch, the Kepler satellite has discovered more than two thousand exoplanets, or planets outside our solar system. More exoplanets are being discovered all the time, and even more remarkable than the sheer number of exoplanets is their variety. In *Exoplanets*, astronomer Michael Summers and physicist James Trefil explore these remarkable recent discoveries: planets revolving around pulsars, planets made of diamond, planets that are mostly water, and numerous rogue planets wandering through the emptiness of space. This captivating book reveals the latest discoveries and argues that the incredible richness and complexity we are finding necessitates a change in our questions and mental paradigms. In short, we have to change how we think about the universe and our place in it, because it is stranger and more interesting than we could have imagined.

Drifters Thomas Shostak.2017-05-15 In addition to being natural story tellers, we human beings

are, and always have been, drifters, wanderers, seekers, and searchers. In a global sense, we are drifting through space on a large sphere of water and rock. In a more specific sense, we move from place to place, or simply from one village to the next; sometimes it is just wandering -- with no direction, no purpose -- and other times we know exactly where we are going. And it is often from this searching and wandering that our stories, whether personal or communal, are developed and passed along. *Drifters* is a book about searchers, drifters, and -- basically, travelers of all stripes, each with a unique set of outcomes. Some have found what they were looking for, but most have found something unanticipated, as it not only is with most of our travels and searches, but with a good short story as well. We continue to wander, and we learn to expect the unexpected.

Already a fan and wishing to immerse yourself in a fun, engaging, informative and informed read that will refresh and top up your Art History 101 and Introduction to Art courses from college? *The 12-Hour Art Expert: Everything You Need to Know about Art in a Dozen Masterpieces* avoids the common approach of throwing hundreds of images at a reader and expecting them to learn from and memorize them all. Instead, the book will guide its readers through a brief series of masterpieces of Western art—from cave paintings to sharks in formaldehyde. This book twelve chapters teach readers about art, the art trade, and art history in a thorough (though concise) fashion. Each chapter is linked to one notable masterpiece, with references to others, giving readers a fixed, digestible number of objects that they will get to know in depth, and which they can use as a lens to understand the thousands of other, related objects that they might encounter in the future. Museums can be daunting, and art presents a strange new language, one that certainly intrigues but is often intimidating and foreign. This book, written by one of the world’s best-known art historians uses entertaining stories to break down intimidating barriers and invites readers of all ages for a one-stop immersion into art.

Phenomenology/Ontopoiesis Retrieving Geo-cosmic Horizons of Antiquity Anna-Teresa Tymieniecka.2011-08-10 The controversy of flux and stasis as the groundwork of reality of Greek ancient philosophy reached its crux in the all encompassing doctrine of the logos by Heraclitus of Ephesus. It centers upon human soul in its role with the cosmos. Philosophy of the Occident corroborating Greek insights with the progress of culture in numerous interpretations (Kant, Kierkegaard, Husserl, Merleau-Ponty, Ricoeur...), presented in this collection has neglected the cosmic sphere. While contemporary development of science revealed its grounding principles (papers by Grandpierre, Kule and Trutty-Coohill) the ancient logos fully emerges. Thus, logos hitherto hidden in our commerce with earth is revealed in its intertwinings with the cosmos through the trajectories of the phenomenology/ontopoiesis of life (Tymieniecka). The crucial link between the soul and the cosmos, in a new geo-cosmic horizon, is thus being retrieved.

Ibn al-Haytham, New Astronomy and Spherical Geometry Roshdi Rashed.2020-10-12 This volume provides a unique primary source on the history and philosophy of mathematics and science from the mediaeval Arab world. The fourth volume of A History of Arabic Sciences and Mathematics is complemented by three preceding volumes which focused on infinitesimal determinations and other chapters of classical mathematics. This book includes five main works of the polymath Ibn al-Haytham (Alhazen) on astronomy, spherical geometry and trigonometry, plane trigonometry and studies of astronomical instruments on hour lines, horizontal sundials and compasses for great circles. In particular, volume four examines: the increasing tendency to mathematize the inherited astronomy from Greek sources, namely Ptolemy's Almagest; the development of celestial kinematics; new research in spherical geometry and trigonometry required by the new kinematical theory; the study on astronomical instruments and its impact on mathematical research. These new historical materials and their mathematical and historical commentaries contribute to rewriting the history of mathematical astronomy and mathematics from the 11th century on. Including extensive commentary from one of the world's foremost authorities on the subject, this fundamental text is essential reading for historians and mathematicians at the most advanced levels of research.

Ink Art Maxwell K. Hearn.2013 Featuring 70 works in various media--paintings, calligraphy, photographs, woodblock prints, video, and sculpture--that were created during the past three decades, *Ink Art: Past as Present in Contemporary China* will demonstrate how China's ancient pattern of seeking cultural renewal through the reinterpretation of past models remains a viable creative path. Although all of the artists have transformed their sources through new modes of expression, visitors will recognize thematic, aesthetic, or technical attributes in their creations that have meaningful links to China's artistic past. The exhibition will be organized thematically into four parts and will include such highlights as Xu Bing's dramatic *Book from the Sky* (ca. 1988), an installation that will fill an entire gallery; *Family Tree* (2000), a set of vivid photographs documenting a performance by Zhang Huan in which his facial features--and his identity--are obscured gradually by physiognomic texts that are inscribed directly onto his face; and *Map of China* (2006) by Ai Weiwei, which is constructed entirely of wood salvaged from demolished Qing dynasty temples. --
