Contemporary Drawing Margaret Davidson.2014-01-07 Drawing is experiencing an unparalleled surge in the art world. Passé notions that once defined drawing as being a preparatory stage for painting or sculpture have long since been cast aside. Drawing is now fully recognized as its own art form—in the biennials, art fairs, museum exhibitions, and beyond. Drawing has come of age. Contemporary artists are increasingly discovering that drawing is something unique and different from painting. It is an intense, sensitive, compelling, personal, and utterly direct art form, one with its own concepts, characteristics, and techniques. In addition, contemporary drawing is not governed by any particular imagery, but rather encompasses a variety of approaches, including realist, abstract, modernist, and post-modernist. Contemporary Drawing delves into the essential and far-reaching concepts of this medium, exploring surface, mark, space, composition, scale, materials, and intentionality in turn. Key techniques, such as using nature to induce marks and working with a checklist to determine a drawing's problems, are introduced throughout. Plus, an in-depth chapter examines a number of artists, such as William Kentridge and Gego, who are breaking traditional boundaries that separate one artistic discipline from another. Lushly illustrated by a wide range of highly accomplished contemporary artists, Contemporary Drawing offers a broad perspective on this expansive and energized field of art.

The Drawing Book Tania Kovats.2007 The works in The Drawing Book, by artists, architects, sculptors, scientists, filmmakers and thinkers of all descriptions, attest to the versatility and immediacy of drawing. From first thoughts to finely wrought, elaborate artworks, from the lightest sketch in pencil to bold, gallery-wall installations, the medium is shown as an essential vehicle for creativity. The recent prominence of artists such as Louise Bourgeois, Eva Hesse, Chris Ofili, Rachel Whiteread, Ellen Gallagher, and a host of others who use drawing as a final means of expression, is addressed in both the works shown and essays by curators Kate Macfarlane and Katharine Stout, and art historian Charles Darwent. The Drawing Book takes us on a journey through five themes -- measurement, nature, the city, dreams, and the body. Each is richly illustrated with a diverse range of images, from the old masters -- Leonardo da Vinci, Botticelli, Dürer -- through great Modernist pieces by Rodin, Picasso, Matisse, and on to the contemporary artists who are reviving drawing today. A new and unique approach to an age old medium.

Drawing Investigations Sarah Casey, Gerry Davies.2020-06-11 Using close visual analysis of drawings, artist interviews, critical analysis and exegesis, Drawing Investigations examines how artists use drawing as an investigative tool to reveal information that would otherwise remain unseen and unnoticed. How does drawing add shape to ideas? How does the artist accommodate to challenges and restraints of a particular environment? To what extent is a drawing complementary and continuous with its subject and where is it disruptive and provocative? Casey and Davies address these questions while focusing on artists working collaboratively and the use of drawing in challenging or unexpected environments. Drawing Investigations evaluates the emergence of a way of thinking among an otherwise disconnected group of artists by exploring commonalities in the application of analytical drawing to the natural world, urban environment, social forces and lived experience. Examples represent a spectrum of research in international contexts: an oceanographic Institute in California, the archives of Amsterdam's Rijksmuseum, the Antarctic Survey, geothermal research in Japan and the Kurdish diaspora in Iraq. Issues are situated in the contemporary theory and practice of drawing including relationships to historical precedents. By exploring drawing's capacity to capture and describe experience, to sharpen visual faculties and to bridge embodied and conceptual knowledge, Drawing Investigations offers a fresh critical perspective on contemporary drawing practice.

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen. 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Hyperdrawing Russell Marshall, Phil Sawdon. 2012-08-07 In hyperdrawing: beyond the lines of contemporary art, authors and artists come together to explore the potential of what drawing in contemporary art theory and practice might become. In this follow-up to 2007's *Drawing Now: between the lines of contemporary art*, Phil Sawdon and Russell Marshall, two of the current directors of TRACEY, curate contemporary drawing within fine art practice from 2006 through to 2010. Four essays and images from 33 international artists collectively explore the boundaries of the hyperdrawing space, investigating in essence what lies beyond drawing - images that use traditional materials or subjects whilst also pushing beyond the traditional, employing sound, light, time, space and technology. Over and above traditional views and practices, the authors and artists in this book recognise and embrace the opportunities inherent in the essential ambiguity of drawing. Practitioners of hyperreal works, 2D3D4D pieces and installations that push beyond photorealism all find their place within this new conception of hyperdrawing as *techne*, a productive space no longer limited by spatial boundaries. Artists including Catherine Bertola, Layla Curtis, Garrett Phelan, Suzanne Treister and Ulrich Vogl alongside the essays of Emma Cocker, Siun Hanrahan and Marsha Meskimmon provide a contemporary view in both visual and written form of how ambiguity can be used as a strategic approach in drawing research and practice. A gallery in book form, hyperdrawing takes drawing beyond the interaction of pencil and paper and traces contemporary adventures in multiple dimensions and alternate realities.

Drawing the Global Colour Line Marilyn Lake, Henry Reynolds. 2008 At last a history of Australia in its dynamic global context. In the late nineteenth and early twentieth centuries, in response to the mobilisation and mobility of colonial and coloured peoples around the world, self-styled 'white men's countries' in South Africa, North America and Australasia worked in solidarity to exclude those peoples they defined as not-white--including Africans, Chinese, Indians, Japanese and Pacific Islanders. Their policies provoked in turn a long international struggle for racial equality. Through a rich cast of characters that includes Alfred Deakin, WEB Du Bois, Mahatma Gandhi, Lowe Kong Meng, Tokutomi Soho, Jan Smuts and Theodore Roosevelt, leading Australian historians Marilyn Lake and Henry Reynolds tell a gripping story about the circulation of emotions and ideas, books and people in which Australia emerged as a pace-setter in the modern global politics of whiteness. The legacy of the White Australia policy still casts a shadow over relations with the peoples of Africa and Asia, but campaigns for racial equality have created new possibilities for a more just future. Remarkable for the breadth of its research and its engaging narrative, *Drawing the Global Colour Line* offers a new perspective on the history of human rights and provides compelling and original insight into the international political movements that shaped the twentieth century.

Drawing Fritz Drury, Joanne Stryker. 2009 Viewing drawing as a unique art form, this book was designed to simplify and clarify the instruction of drawing for beginning learners in a manner that allows for specificity in instrumentation and concept. It discusses drawing as an underlying structural principle in relation to other art forms, with its own particular language rooted in direct tactile experience of media and the analytical investigation of the visible. Readers will gain an understanding of the basic workings of drawing by finding connections between natural visual phenomena and the more abstract principles of design and pictorial construction.

The Artist's Complete Guide to Figure Drawing Anthony Ryder. 2014-03-02 Many of us want to learn "how to draw." But as artist Anthony Ryder explains, it's much more important to learn what to draw. In other words, to observe and draw what we actually see, rather than what we think we see. When it comes to drawing the human figure, this means letting go of learned ideas and expectation of what the figure should look like. It means carefully observing the interplay of form and light, shape and line, that combine to create the actual appearance of human form. In *The Artist's Complete Guide to Figure Drawing*, amateur and experienced artists alike are guided toward this new way of seeing and drawing the figure with a

three-step drawing method. The book's progressive course starts with the block-in, an exercise in seeing and establishing the figure's shape. It then build to the contour, a refined line drawing that represents the figure's silhouette. The last step is tonal work on the inside of the contour, when light and shadow are shaped to create the illusion of form. Separate chapters explore topics critical to the method: gesture, which expresses a sense of living energy to the figure; light, which largely determines how we see the model; and form, which conveys the figure's volume and mass. Examples, step-by-steps, and special "tips" offer helpful hints and practical guidance throughout. Lavishly illustrated with the author's stunning artwork, *The Artist's Complete Guide to Figure Drawing* combines solid instruction with thoughtful meditations on the art of drawing, to both instruct and inspire artists of all levels.
