The Genealogy of Psychoanalysis Michel Henry.1998 The certainty of the Cogito is more an I feel (an auto-affection), which on principle eludes the ek-stasis of representation in its modern sense. In such representation, subjectivity is always posed outside the self, whereas affectivity is felt in itself, immanently, without the mediation of any representation. In this sense, affectivity remains profoundly inaccessible to representation - not because it could only ever manifest itself as a representation, but because it manifests itself otherwise, in a manner anterior to the shown/hidden opposition that characterizes representational ek-stasis. The book traces this heritage from Descartes through Malebranche, Leibniz, Kant, and Schopenhauer to Freud. It also discusses Nietzsche, who the author argues stands outside this genealogy.

Kartashkova.2015-09-04 This book brings together papers presented at the Tenth International School on Lexicography, titled "Life Beyond Dictionaries" and held in Ivanovo, Russia, and Florence, Italy, in September 2013. It continues the series of edited volumes dealing with the theoretical and practical aspects of lexicography, published by Cambridge Scholars Publishing in 2007, 2009, 2010, and 2013. The book is divided into three sections, "Lexicography Worldwide: Historical and Modern Perspectives", "Tourism and Heritage Dictionaries with Special Reference to Culture", and "Projects of New Dictionaries". Borrowed Morphology Francesco Gardani,Peter Arkadiev,Nino Amiridze.2014-12-11 By integrating novel developments in both contact linguistics

and morphological theory, this volume pursues the topic of borrowed morphology by recourse to sophisticated theoretical and methodological accounts. A Taste for Corpora Fanny Meunier, Gaëtanelle Gilquin, Magali Paquot. 2011 The eleven contributions to this volume, written by expert corpus linguists, tackle corpora from a wide range of perspectives and aim to shed light on the numerous linguistic and pedagogical uses to which corpora can be put. They present cutting-edge research in the authors' respective domains of expertise and suggest directions for future research. The main focus of the book is on learner corpora, but it also includes reflections on the role of other types of corpora, such as native corpora, expert users corpora, parallel corpora or corpora of New Englishes. For readers who are already familiar with corpora, this volume offers an informed account of the key role that corpus data play in applied linguistics today. As for readers who are new to corpus linguistics, the overview of approaches, methods and domains of applications presented will undoubtedly help them develop their own taste for corpora. This volume has been edited in honour of Sylviane Granger, who has been one of the pioneers of learner corpus research.

Warhol-isms Andy Warhol.2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—“In the future, everyone will be world-famous for 15 minutes.” *Warhol-isms* separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well.I went to [a psychiatrist] once, and he never called me back.They always say that time changes things, but you actually have to change them yourself.I’ve never met a person I couldn’t call a beauty.New things are always better than old things.I’m still a commercial artist. I was always a commercial artist.

Tacky Rax King.2021-11-02 An irreverent and charming collection of deeply personal essays about the joys of low pop culture and bad taste, exploring coming of age in the 2000s in the age of Hot Topic, Creed, and frosted lip gloss—from the James Beard Award-nominated writer of the Catapult column *Store-Bought Is Fine*—Tacky is about the power of pop culture—like any art—to imprint itself on our lives and shape our experiences, no matter one's commitment to good taste. These fourteen essays are a nostalgia-soaked antidote to the millennial generation's obsession with irony, putting the aesthetics we hate to love—snakeskin pants, *Sex and the City*, Cheesecake Factory's gargantuan menu—into kinder and sharper perspective. Each essay revolves around a different maligned (and yet, Rax would argue, vital) cultural artifact, providing thoughtful, even romantic meditations on desire, love, and the power of nostalgia. An essay about the gym-tan-laundry exuberance of Jersey Shore morphs into an excavation of grief over the death of her father; in *You Wanna Be On Top*, Rax writes about friendship and early aughts girlhood; in another, Guy Fieri helps her heal from an abusive relationship. The result is a collection that captures the personal and generational experience of finding joy in caring just a little too much with clarity, heartfelt honesty, and Rax King's trademark humor. E-Lexicography Pedro A. Fuertes-Olivera, Henning Bergenholtz.2011-10-20 This book looks at current research and future directions in e-lexicography. Online dictionaries and reference tools are increasingly prevalent in a digitized and internet-led era in language study that has embraced computational linguistics. This book responds with theoretical and practical analysis of key topics, from a global range of contributors. Since COBUILD in the 1980s, lexicographers have found it essential to engage with and utilize electronic computational tools. Internet dictionaries,

online reference tools and even search engine optimization demand a knowledge of electronic lexicography and force a reassessment of the field. This volume looks at, amongst other topics: • Polyfunctional versus monofunctional dictionary tools • Developing theories of lexicography for electronic mediums • Distinguishing between the database and the dictionary • Online dictionaries not as data repositories but as sophisticated search engines This volume will appeal to scholars in lexicography and to practicing lexicographers.

Lexical Analysis Patrick Hanks.2013-01-25 A lexically based, corpus-driven theoretical approach to meaning in language that distinguishes between patterns of normal use and creative exploitations of norms. In *Lexical Analysis*, Patrick Hanks offers a wide-ranging empirical investigation of word use and meaning in language. The book fills the need for a lexically based, corpus-driven theoretical approach that will help people understand how words go together in collocational patterns and constructions to make meanings. Such an approach is now possible, Hanks writes, because of the availability of new forms of evidence (corpora, the Internet) and the development of new methods of statistical analysis and inferencing. Hanks offers a new theory of language, the Theory of Norms and Exploitations (TNE), which makes a systematic distinction between normal and abnormal usage—between rules for using words normally and rules for exploiting such norms in metaphor and other creative use of language. Using hundreds of carefully chosen citations from corpora and other texts, he shows how matching each use of a word against established contextual patterns plays a large part in determining the meaning of an utterance. His goal is to develop a coherent and practical lexically driven theory of language that takes into account the immense variability of everyday usage and that shows that this variability is rule governed rather than random. Such a theory will complement other theoretical approaches to language, including cognitive linguistics, construction grammar, generative lexicon theory, priming theory, and pattern grammar.
