Negative Effekte von Coaching und ihre Ursachen aus der Perspektive der Organisation Oellerich, Katrin.2017 Coaching in Business-Kontexten boomt. Doch kann es aus organisationaler Perspektive auch unerwünschte Wirkungen nach sich ziehen? Und wo werden die Ursachen dafür verortet? Diesen Fragen geht die vorliegende Mixed Methods-Studie nach. Neben dem Auffinden diverser negativer Effekte wurden als Ursachen zur Entstehung dieser vor allem organisationale Einflussfaktoren, wie die Einbettung von und die Einstellungen zu Coaching in den jeweiligen Organisationen gefunden. Auf Basis dieser Erkenntnisse konnte ein neues Konzept der Coachingkultur als prägnanter Wirkfaktor entwickelt werden. Regressionsanalytische Auswertungen zeigten zudem, dass insbesondere der Ruf von Coaching einen signifikanten Einfluss auf die Wahrnehmung von Nebenwirkungen hat - je besser der Ruf von Coaching in einer Organisation, desto weniger negative Effekte werden wahrgenommen. Als am Häufigsten erlebte unerwünschte Wirkungen konnten eine fehlende bzw. ungenügende Zielerreichung und eine mangelnde Nachhaltigkeit der Wirkungen identifiziert werden. Die Erkenntnisse der Studie legen nahe, dass ein Ansetzen an der Coachingkultur die Wirkfähigkeit des Formats erhöht und somit das Erleben negativer Effekte reduziert werden kann.

Health Economics Peter Zweifel, Friedrich Breyer, Mathias Kifmann.2009-07-14 This is the most complete text available on the economics of health behavior and health care delivery. Appropriate both for advanced undergraduate and beginning graduate students of economics, this text provides the key

analytical tools required to understand current research. Issues discussed include the cost explosion in health care, the power of medical associations, the search for remuneration systems with favorable incentives, and technological change in medicine. Rather than simplifying the issues facing today's healthcare systems, the book models existing complexities as they are, adapting economics to reflect the views of the average person.

*Management Between Strategy and Finance* Burkhard

Schwenker, Klaus Spremann. 2008-11-21 Companies' decision-making and planning systems find themselves in a constant tug of war between strategic and financial considerations. The authors analyze these two opposing currents in business thinking, dissecting their differences and identifying their best practices.

They also develop an approach that reconciles the two conflicting schools of thought - without watering down their differences.

Schwenker und Spremann argue that both strategic and financial perspectives can serve as a compass in management's decision-making processes: Which perspective to choose depends on the phase of business. The authors distinguish four phases in the company lifecycle - phases in which the business must find the proper position, develop, grow and, ultimately, earn. In the first two phases, strategic considerations should take priority; in the latter two phases, financial considerations rule the day.

Social Behavior: Its Elementary Forms George Caspar

Homans. 1961

**In Vitro Fertilisation in the 1990s** Elisabeth Hildt, Dietmar

Mieth. 2018-12-21 Published in 1998, this book is a collected volume of papers from the first conference of the European Network for Biomedical ethics. The main subject of this conference is the ethical assessment of IVF in view of its concrete application as an infertility treatment and the consideration of possible alternatives for use. Twenty years after the introduction and the establishment of this therapy a more concrete evaluation of its medical indications, social conditions and consequences, the

psychological consequences for the women involved and the parent-child relationship becomes possible. The legal and ethical evaluation of the reproduction technology as regards for example the legal and moral status of supernumery embryos in cryo-conservation has also to be considered in a European perspective. The ethical evaluation concentrates today on the new evolution that IVF technology takes in relation to the extension of diagnostics possibilities due to genetic research. Little work has been done on the connection between IVF and genetic diagnostics and therapy, so the medical and ethical evaluation of the connecting lines are also included in the book.

**Organizational Communication** Cynthia Stohl.1995-04-05  
Recipient of the 1995 Best Book Award from the Organizational Communication division of the Speech Communication Association I have just finished reading Organizational Communication. This is a magnificent piece of work bringing together current and past scholarship to form a persuasive argument for awareness. I will bring this work to the attention of a graduate class I'm teaching on organizational change and team building. . . . Above all, I recommend it to instructors of organizational communication. --William Gorden, Kent State University The lines between our personal and professional lives are blurred--naturally, one affects the other. Organizational Communication is the first book on the subject to take into account the personal context we bring into an organization. In addition to the connections between home life, social life, and

professional activities, author Cynthia Stohl asserts that we must pay close attention to the linkages that individuals develop and maintain within their organizational contexts. Each chapter illustrates the ways in which today's changing social patterns, the increasing diversity of the workforce, the introduction of new communication technologies, and the challenges of global integration and competition create organizational and interpersonal networks that are intricately interwoven and complex. By reframing the network metaphor, the author challenges us to examine the ways in which organizational communication is always embedded in, and influenced by, overlapping systems of relationships. Organizational Communication is the ideal text for courses in organizational communication that focus on the organization as an integrated aspect of our lives, our culture, and our global society.

*Predicting Outdoor Sound* Keith Attenborough, Timothy Van Renterghem. 2021-03-03 The second edition of *Predicting Outdoor Sound* is an up-to-date reference on the propagation of sound close to the ground and its prediction. New content includes comparisons between predictions and data for road traffic, railway and wind turbine noise; descriptions of source characteristics in the HARMONOISE model; propagation over rough seas, parallel low walls, and lattices; outlines of numerical methods; gabion (caged stones) and sonic crystal noise barriers; meteorological effects on noise barrier performance; and the prediction requirements for auralization. The book brings together relevant theories, prediction schemes, and data, thereby providing a basis for determining what model or scheme might be applicable for any situation. It also offers a background on useful analytical approximations and the restrictions, as well as difficulties and limitations associated with engineering prediction schemes. The text should be of considerable interest to researchers in outdoor sound propagation and, more generally, it should provide a comprehensive primer on the topic for lecturers,

consultants and students in acoustics and noise control.

*Responsible Investment Banking* Karen Wendt. 2015-06-15 This book provides evidence on the relevance of environmental and social factors in decision making. It discusses the Gold Standard Frameworks for integrating extra-financial risks into the philosophy, culture, strategies, products and value chain management procedures of investment and banking and highlights the current emergence of global administrative law. New emerging topics like positive impact investing and finance, climate friendly markets, human rights, the enhanced role of fiduciary duties and shared values are approached with a lot of examples for practical application. Steps towards a new banking culture, a new climate for double loop learning and sustainable financial innovation are outlined and the additional benefits of robust stakeholder engagement explained. The anthology paves the way from robust impact and risk management to positive impact creation and a new investment culture. As well, challenges for the implementation and ways to overcome them are broadly discussed. The book is rooted in the fact that institutions and investors which fail to professionally integrate the management of extra-financial risk into their whole lending and investment chain and fail to move to positive impact creation may well lose positions and mandates and finally the trust of their clients, partners and stakeholders. The contributing authors of this anthology are internationally renowned experts in the field of ESG and impact investing. The compendium brings together practitioners and academics to allow a confluence of thoughts, concepts and viewpoints. This huge variety of perspectives and approaches makes this volume a comprehensive compendium on responsible investment and banking.

Insurance Economics Peter Zweifel, Roland Eisen. 2012-02-24

Presenting theoretical foundations and empirical research, this

text introduces the reader to the core issues and analytical tools of insurance economics, examining in detail a host of key factors including supply and demand, regulation and social insurance. Killing and Letting Die Bonnie Steinbock, Alastair Norcross. 1994 This collection contains twenty-one thought-provoking essays on the controversies surrounding the moral and legal distinctions between euthanasia and letting die. Since public awareness of this issue has increased this second edition includes nine entirely new essays which bring the treatment of the subject up-to-date. The urgency of this issue can be gauged in recent developments such as the legalization of physician-assisted suicide in the Netherlands, how-to manuals topping the bestseller charts in the United States, and the many headlines devoted to Dr. Jack Kevorkian, who has assisted dozens of patients to die. The essays address the range of questions involved in this issue pertaining especially to the fields of medical ethics, public policymaking, and social philosophy. The discussions consider the decisions facing medical and public policymakers, how those decisions will affect the elderly and terminally ill, and the medical and legal ramifications for patients in a permanently vegetative state, as well as issues of parent/infant rights. The book is divided into two sections. The first, Euthanasia and the Termination of Life-Prolonging Treatment includes an examination of the 1976 Karen Quinlan Supreme Court decision and selections from the 1990 Supreme Court decision in the case of Nancy Cruzan. Featured are articles by law professor George Fletcher and philosophers Michael Tooley, James Rachels, and Bonnie Steinbock, with new articles by Rachels, and Thomas Sullivan. The second section, Philosophical Considerations, probes more deeply into the theoretical issues raised by the killing/letting die controversy, illustrating exceptionally well the dispute between two rival theories of ethics, consequentialism and deontology. It also includes a corpus of the standard thought on the debate by Jonathan Bennet, Daniel Dinello, Jeffrie Murphy, John Harris,

Philipa Foot, Richard Trammell, and N. Ann Davis, and adds articles new to this edition by Bennett, Foot, Warren Quinn, Jeff McMahan, and Judith Lichtenberg.

*Foreign Direct Investment in Russia* P. Fischer.2016-05-02  
Russia's post-reform crisis can be alleviated. The country has the market, the abundant natural resources and the human skills that foreign investors seek. What it needs is policies that enhance FDI inflows. Policy-makers can learn from the other large emerging markets like China, India, and Mexico, where FDI has revitalized the economy.

**Pharmaceutical Supply Chains - Medicines Shortages** Ana Paula Barbosa-Povoa,Helena Jenzer,João Luís de Miranda.2019-06-01 This book provides an insight of relevant case studies and updated practices in “PharmaceuticalSupply Chains” (PharmSC) while addressing the most relevant topics within the COST Action “Medicines Shortages” (CA15105).The volume focuses on the most recent developments in the design, planning and scheduling ofPharmSC, broadening from the suppliers’ selection to the impact on patients and healthcaresystems, addressing uncertainty and risk mitigation, and computational issues. It is directed at MSc/PhD students and young researchers (Post-Docs) in Pharmaceutics/Pharmaceutical sciences, Engineering fields, Economics/Management, as well as pharmaceutical decision makers, managers, and practitioners, and advanced readers demanding a fresh approach to decision making for PharmSC. The contributed chapters are associated with the homonymous COST Training Schools (TS), and the book creates a better understanding of the Action “Medicines

Shortages” challenges and opportunities.

**Natural Disasters** Ms.Nicole Laframboise,Mr.Boileau

Loko.2012-10-09 This paper reviews the literature on the macroeconomic impact of natural disasters and presents the IMF’s role in assisting countries coping with natural catastrophes. Focusing on seven country cases, the paper describes the emergency financing, policy support, and technical assistance provided by the Fund to help governments put together a policy response or build a macro framework to lay the foundation for recovery and/or unlock other external financing. The literature and experience suggests there are ways to strengthen policy frameworks to increase resilience to natural disaster shocks, including identifying the risks and probability of natural disasters and integrating them more explicitly into macro frame-works, increasing flexibility within fiscal frameworks, and improving coordination amongst international partners ex post and ex ante.

**Toward Sustainable Agricultural Systems in the 21st**

**Century** National Research Council,Division on Earth and Life Studies,Board on Agriculture and Natural Resources,Committee on Twenty-First Century Systems Agriculture.2010-07-25 In the last 20 years, there has been a remarkable emergence of innovations and technological advances that are generating promising changes and opportunities for sustainable agriculture, yet at the same time the agricultural sector worldwide faces numerous daunting challenges. Not only is the agricultural sector expected to produce adequate food, fiber, and feed, and contribute to biofuels to meet the needs of a rising global population, it is expected to do so under increasingly scarce natural resources and climate change. Growing awareness of the unintended impacts associated with some agricultural production practices has led to heightened societal expectations for improved environmental, community, labor, and animal welfare standards

in agriculture. *Toward Sustainable Agricultural Systems in the 21st Century* assesses the scientific evidence for the strengths and weaknesses of different production, marketing, and policy approaches for improving and reducing the costs and unintended consequences of agricultural production. It discusses the principles underlying farming systems and practices that could improve the sustainability. It also explores how those lessons learned could be applied to agriculture in different regional and international settings, with an emphasis on sub-Saharan Africa. By focusing on a systems approach to improving the sustainability of U.S. agriculture, this book can have a profound impact on the development and implementation of sustainable farming systems. *Toward Sustainable Agricultural Systems in the 21st Century* serves as a valuable resource for policy makers, farmers, experts in food production and agribusiness, and federal regulatory agencies.

**Public Relations Research** Ansgar Zerfaß, A. A. van Ruler, Krishnamurthy Sriramesh. 2008-05-08 This volume is a major contribution to the trans-national debate on public relations research and communication management. It presents dominant concepts and findings from the scientific community in Germany in English language. At the same time, the compilation contains a selection of the most influential and relevant approaches from European and international researchers. Editors and contributors are renowned academics from all over the world. This book honours Guenter Bentele, one of the international spearheads of public relations research, and gives academics, students and communication managers a focussed insight into the field.

*Social Acceleration* Hartmut Rosa. 2013-05-14 Hartmut Rosa advances an account of the temporal structure of society from the perspective of critical theory. He identifies in particular three categories of change in the tempo of modern social life: technological acceleration, evident in transportation, communication, and production; the acceleration of social

change, reflected in cultural knowledge, social institutions, and personal relationships; and acceleration in the pace of life, which happens despite the expectation that technological change should increase an individual's free time. According to Rosa, both the structural and cultural aspects of our institutions and practices are marked by the shrinking of the present, a decreasing time period during which expectations based on past experience reliably match future results and events. When this phenomenon combines with technological acceleration and the increasing pace of life, time seems to flow ever faster, making our relationships to each other and the world fluid and problematic. It is as if we are standing on slipping slopes, a steep social terrain that is itself in motion and in turn demands faster lives and technology. As Rosa deftly shows, this self-reinforcing feedback loop fundamentally determines the character of modern life.

*Plug&Play Places* Robert Nadler.2014-10-08 In post-industrial societies more and more people earn an income in creative knowledge work, a highly flexible labour market segment that demands a geographically mobile workforce. Creative knowledge work is based on an understanding of language, culture and symbolic meanings. This can best be obtained through local and national embeddedness. Yet, this necessity for embeddedness stands in contrast to the demand in geographical mobility. How is this contradiction solved by individuals? What new forms of place attachment does this bring about? This book introduces a showcase of 25 multilocal creative knowledge workers, who live in different countries at the same time. It investigates how continuous mobility becomes part of their lifeworld, and how it changes their feelings of belonging and practices of place attachment. Applying an innovative methodological mix of social phenomenology, hermeneutics and mental mapping, this book takes a detailed look at biographies and the role of places in mobile lifeworlds. *Plug&Play Places* brings forth the idea that places have to be understood as individual items, which are

configured and then plugged into the 'system' of the own lifeworld. They can be 'played' without great effort once an individual needs to make use of them. This new type of place attachment is a form of subjective standardization of place, which complements the well-known models of objective standardization of places. Plug&Play Places is relevant for scientists who deal with mobility and its impact on individual lifeworlds, with transnational multilocality and with flexibilized labour markets. Furthermore, the book provides a detailed qualitative perspective which can enrich the explanations of quantitative research in the same field. It is an interesting reading also for practitioners engaged in urban planning, housing and real estate development. Robert Nadler holds a doctoral degree in Urban and Local European Studies from the University of Milan-Bicocca. He is a researcher at the Leibniz Institute for Regional Geography and published on creative industries, multilocality and labour mobility.

**The Fundamentals of Workplace Learning** Knud

Illeris.2010-12-14 Fundamentals of Workplace Learning is a comprehensive guide to how people learn in the workplace, and the issues and challenges involved. Examining the essential aspects of workplace learning and unravelling the various influences which affect the success of work-based learners, Knud Illeris presents a holistic model to explain how diverse individuals can be encouraged and invited to learn at work. Approaching workplace learning from the perspective of learners as human beings, with complex social and psychological needs, as opposed to resources to be managed, this book examines in detail the key issues surrounding workplace learning, including: The workplace environment as a learning space Workplace learning as competence development A multitude of different kinds of workplace learning arrangements Job-transcending learning

initiatives The interaction between formal and informal learning environments The challenges presented by specific groups: early school leavers, elderly workers and the new young generation. Presenting conclusions on workplace learning and possibilities for the future this book focuses on a way forward while detailing the fundamentals of successful workplace learning. It will appeal to everyone involved in understanding and improving learning in the workplace including educationalists, business students, managers, personnel and educational leaders.

**Computerization and Controversy** Rob Kling.1996-02-28 The Second Edition of *Computerization and Controversy: Value Conflicts and Social Choices* is a collection of 78 articles that examine the social aspects of computerization from a variety of perspectives, many presenting important viewpoints not often discussed in the conventional literature. A number of paired articles comprise thought-provoking head-on debate. Fields represented include computer science, information systems, management, journalism, psychology, law, library science, and sociology. This volume introduces some of the major controversies surrounding the computerization of society and helps readers recognize the social processes that drive and shape computerization. Division into eight provocatively titled sections facilitates course planning for classroom or seminar use. A lead article for each section frames the major controversies, locates the selections within the debates, and points to other relevant literature. Key Features \* A fully revised and updated version of the first anthological treatment of the subject \* Organized to facilitate course planning for classroom or seminar use \* Provides coverage of the influence of computers on a wide variety of fields including computer science, information systems, management, journalism, psychology, law, library science, and sociology \* Includes discussion of the following issues related to computerization: \* Does computerization demonstrably improve the productivity of organizations? \* Should computer systems be

designed to empower workers? \* Does electronic mail facilitate the formation of new communities, or does it undermine intimate interaction? \* Is computerization likely to reduce privacy and personal freedom?

### **Business Innovation and Disruption in the Music Industry**

Patrik Wikström, Robert DeFillippi. 2016-01-29 Patrik Wikström and Robert DeFillippi bring together innovative, multidisciplinary perspectives on business innovation and disruption in the music industry. Authors from fields such as cultural studies, economics, management, media studies, musicology and human geography in North America, Europe and Asia focus on the “second wave” of digital disruption and the transformation of the music industry. The chapters are structured into three parts: the first part contextualizes changes in the music industry that have been driven by digital technologies since the end of the 1990s. The second part unpacks the impact of these disruptive technologies on business models in specific industry sectors and geographies, and the third and final part examines questions related to the emergence of subscription music services. Concluding chapters link back to the role of hackers as a subversive and innovative force in the music economy and examine how hacker creativity can be facilitated and encouraged to generate the next big music industry innovation. This multifaceted look at the music business will serve as a resource for both undergraduate and graduate students, as well as established scholars and industry professionals.

### **Der kompetente und professionelle Unternehmensberater**

Tanja-Vera Herking. 2015-01-14 Was ist kompetentes und professionelles Beratungshandeln? Zur Klärung dieser Frage hat Tanja-Vera Herking im Rahmen von tiefenanalytischen Interviews mit Unternehmensberatern die Kompetenz- und Professionalitätsstrukturen sowie deren Entwicklungsprozesse innerhalb ihrer Beraterbiographien erhoben. Hierdurch werden die spezifischen Strukturen u.a. der Beratungsinteraktion,

Wissensgenese und -applikation, aber auch Inszenierungserfordernisse und paradoxe Handlungsanforderungen deutlich, welche die Autorin in einem Strukturmodell von Beratungskompetenz und -professionalität zusammenfasst. Ausgehend von diesem Modell arbeitet sie Parameter der Kompetenzentwicklung und Professionalisierung von Unternehmensberatern heraus. Die aufgezeigten Prozesse lassen sich in einem Stufenmodell mit spezifischen Entwicklungsaufgaben darstellen, die Unternehmensberater auf ihrem Karriereweg zu lösen haben. Dabei werden Ansätze einer sogenannten Meta-Beratung erkennbar, welche die Entwicklungsprozesse der Unternehmensberater sowie der Unternehmensberatung als Eliteschmiede befördern können.

Handbook of Sociology of Aging Richard A. Settersten, Jr., Jacqueline L. Angel. 2011-05-11 The Handbook of Sociology of Aging is the most comprehensive, engaging, and up-to-date treatment of developments within the field over the past 30 years. The volume represents an indispensable source of the freshest and highest standard scholarship for scholars, policy makers, and aging professionals alike. The Handbook of Sociology of Aging contains 45 far-reaching chapters, authored by nearly 80 of the most renowned experts, on the most pressing topics related to aging today. With its recurring attention to the social forces that shape human aging, and the social consequences and policy implications of it, the contents will be of interest to everyone who cares about what aging means for individuals, families, and societies. The chapters of the Handbook of Sociology of Aging illustrate the field's extraordinary breadth and depth, which has never before been represented in a single volume. Its contributions address topics that range from foundational matters, such as classic and contemporary theories and methods, to topics of longstanding and emergent interest, such as social diversity and inequalities, social relationships, social institutions, economies and governments, social vulnerabilities, public health,

and care arrangements. The volume closes with a set of personal essays by senior scholars who share their experiences and hopes for the field, and an essay by the editors that provides a roadmap for the decade ahead. The Handbook of Sociology of Aging showcases the very best that sociology has to offer the study of human aging.

**Design Research Now** Ralf Michel.2012-12-21 Design is becoming a recognised academic discipline, and design research is the driving force behind this transformation. *Design Research Now - Essays and Selected Projects* charts the field of design research with introductory essays and selected research projects. The authors of the essays, all leading international design scholars, stake out positions on the most important issues of design research. They locate the significance of design research at the interface with technological development, describe what makes it a necessary ingredient of the continued development of the design disciplines, and assign it a seminal role in the relevant developments of society. The essays are supplemented by the presentation of recently completed research projects from universities in the Netherlands, the UK and Italy.

**Making the Connections** Mr Bill Quirke.2012-09-28 Bill Quirke demonstrates practically how businesses can use internal

communication to achieve differentiation, to improve their quality, customer service, and innovation, and to manage change more effectively. He describes the why, the what and the how of internal communication - why business needs better communication to achieve its objectives, what internal communication needs to deliver to add value, and how organizations need to manage their communication for best results.

**Public Relations Theory** Jae-Hwa Shin, Robert L.

Heath.2020-12-07 Explore a wide range of theoretical frameworks and themes for public relations in this comprehensive and authoritative work *Public Relations Theory: Capabilities and Competencies* is a comprehensive overview of the major theoretical perspectives in public relations, considering the evolution, diversification and merger of approaches that have been spurred by rapid changes in society, cultural boundaries, technology, and media environments. Authors Jae-Hwa Shin and Robert Heath explain both organizational and social theories of public relations, including cases and challenges to help students bring theory and research to bear on solving the daily challenges of public relations practice. Rather than advocate in favor of a particular theoretical view or position, *Public Relations Theory: Capabilities and Competencies* covers a broad range of theoretical perspectives and themes in public relations, including: An examination of excellence theory, contingency theory, rhetorical theory, and critical theory as these perspectives apply to public relations Issues management, crisis management, risk management and conflict management with respect to public relations Combining theory and practice for conceptualization and strategic execution of robust public relations programs and campaigns The importance of public relations ethics to serve the public good How to define “the public” or “relationships” in the field of public relations The book closes with discussion of emerging topics and the recent transformation of public relations

theory to take diversity, technology, and global identity into account and offers insight into future direction. This book is perfect for upper level undergraduate and graduate students of public relations in journalism and communication. It will also be useful for public relations practitioners who hope to improve their understanding of the theoretical background and principles of their work and serve as an excellent reference for doctoral students and researchers in the area.

**Sustainable Logistics** Wolf-Rüdiger Bretzke, Karim

Barkawi. 2012-12-14 Currently the notion of sustainability is used in an inflationary manner. Therefore the authors start with a definition which is stable to serve as an anchor for further research as well as for discussions among scientists, managers and politicians, ideally across different disciplines. The character of this book is purely conceptual. The argumentation is based on comparison of new and demanding requisites with existing models (process and network architectures in the field of logistics). Formerly neglected impacts on the environment will be included. Main features of a new approach will be developed which are capable to avoid these impacts and to align logistics with the requirements of sustainability. In order to make logistics sustainable large parts will have to be reinvented. The focus needs to be on decoupling transportation activities from economic growth rates.

Vaccines Stanley A. Plotkin, Walter Orenstein, Paul A.

Offit. 2008-02-11 Completely revised and updated, this respected reference offers comprehensive and current coverage of every aspect of vaccination—from development to use in reducing disease. It provides authoritative information on vaccine production, available preparations, efficacy, and safety...recommendations for vaccine use, with rationales...data on the impact of vaccination programs on morbidity and mortality...and more. And now, as an Expert Consult title, it includes a companion web site offering this unparalleled guidance

where and when you need it most! Provides a complete understanding of each disease, including clinical characteristics, microbiology, pathogenesis, diagnosis, and treatment, as well an epidemiology and public health issues. Offers comprehensive coverage of both existing vaccines and vaccines currently in the research and development stage. Examines vaccine stability, immunogenicity, efficacy, duration of immunity, adverse events, indications, contraindications, precautions, administration with other vaccines, and disease control strategies. Analyses the cost-benefit and cost-effectiveness of vaccines. Discusses the proper use of immune globulins and antitoxins. Illustrates concepts and objective data with approximately 600 tables and figures. Includes access to a companion web site offering the complete contents of the book - fully searchable - for rapid consultation from anyplace with an Internet connection.

**Introduction to Food- and Airborne Fungi** Robert A.

Samson.2000 The increasing interest among microbiologists in fungal contaminants of food and air has created the need to study these micro-organisms in more detail. Although fungi, producing toxins or which cause health hazards, are ubiquitous and belong to the common contamination flora, their recognition is hampered by incomplete and often confusing literature. This book, published by the Centraalbureau voor Schimmelcultures in the Netherlands and now available from ASM Press, serves as a guide to food- and airborne fungi and contains keys and morphological descriptions of the most common species.

Topics in Public Economics David Pines, Efraim Sadka, Itzhak

Zilcha.1998 The evolving modern world is characterized by two opposing trends: integration and segregation. On the one hand, we witness strong forces for segregation on the basis of nationality, ethnicity, religion, and culture in the former Soviet Union, the former Czechoslovakia, the former Yugoslavia, as well as in Northern Ireland, Spain, and Canada. These forces are quite strong and, in some cases, violent. On the other hand, the

European Union and NAFTA represent the tendency for integration motivated primarily by economic considerations (such as gains from trade and scale economies). In fact, these opposing trends can be explained by the concepts developed in modern club theory, local public finance, and international trade.

**Case Studies in the Beer Sector** Roberta Capitello, Natalia Maehle. 2020-09-09 Case Studies in the Beer Sector investigates managerial and marketing dynamics in the beer sector. It explores the relevance of consumer science and its use as a tool for marketing strategies, putting special focus on small craft breweries. The book provides a variety of case studies from several countries to outline the global context within which the beer industry is developing. Real-life examples on how innovation and differentiation strategies affect consumer perceptions of beer are included, along with the relationship among breweries throughout the supply chain. Sections cover business strategy, sustainability, and how breweries are meeting the increasing demand for sustainable production processes. While this book provides a thorough reference for scholars and practitioners who work in the beer sector, it is also ideal for those studying business, agriculture, food engineering, technology, applied marketing and business strategy. Investigates contemporary managerial and marketing dynamics in the beer sector Explores the relevance of consumer science and its use as a tool for marketing strategies for both multinational players and small craft breweries Includes case studies that provide the reader with real-life examples on how to apply concepts discussed Offers a global, cross-cultural perspective on the beer sector in different countries and continents

**IFLA Library Building Guidelines: Developments & Reflections**

Karen Latimer, Hellen Niegaard, IFLA. 2007-01-01 The information society and the information age are changing library services as well as library premises. This raises questions about what needs to be considered when planning and designing new library

buildings in order to achieve attractive, efficient and future-oriented new library spaces. This new publication provides information and guidelines for the building planning process, whether you are planning a new public or academic library building. It reflects on fundamental issues, on new development trends and on the planning process. The library building process is seen from both the library manager's perspective as well as that of the architect and designer. Issues covered include what to consider when investigating the need for space, library design from a marketing viewpoint, green management and sustainability relating to library buildings and a layman's guide to reading plans. This publication and the IFLA guidelines provided are not seen as a traditional set of recommendations to be rigidly adhered to since this would be unrealistic in a fast-changing and global context. Rather, library managers and architects should read them in order to inform their thinking on key issues and establish a planning programme. They must then relate them to their own countries and circumstances by making the relevant local adjustments.
