The Rejection of Consequentialism Samuel Scheffler.1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Marilyn Manson by Perou .2020-05-19 'I often get asked, 'Who was your favorite person to photograph?' or 'Who is the best person you've photographed?' says photographer Perou. 'It's always 'Marilyn Manson.' Which is just as well, considering how many times I've photographed him.' Perou has been photographing Marilyn Manson since a 1998 magazine cover shoot. Twenty-one years of collaborating have resulted in this unique book, featuring over 350 photographs including previously unpublished work, conceptual portraits, onstage and informal behind-the-scenes images, giving a rare insight into Manson's world.

Peter Hujar Paul Kasmin Gallery.2016 It's a vanished world, and Peter Hujar was right there in it. The Lower East Side between 1972 and 1985 - filled with artists, wannabe artists and hangers-on - was a community of the misbegotten gathered from every town in America and relocated in the mean streets between Broadway and the Bowery. Nothing but their talent, their flamboyance, their rank gender-bending mockery and their arch irony supported them. Some made their names. Many came to grief. A few made art. In those days, the gutted streets of the Lower East Side looked like a war zone. Everyone lived and worked on the extreme outer margins of money and art, penniless and unknown. As a community, Downtown was a counterstatement to the rich New York of the banks, museums, media, corporations ... and the art world itself. That Downtown is forever gone. Time, gentrification, disease and death have taken their toll and turned this vibrant epoch into a chapter of art history. But before it vanished, its extravagant cast sat for Peter Hujar's camera - and is now alive again in front of our eyes. Featured among others: Joe Brainard, William Burroughs, Remy Charlip, Edwin Denby, Divine, Ray Johnson, Fran Lebowitz, Charles Ludlum, Susan Sontag, Paul Thek, John Waters, Robert Wilson, David Wojnarowicz.

Strong Bonds. Child-animal Relationships in Comics .2021 Snoopy and Charlie Brown, Calvin and Hobbes, Tintin and Snowy? comics are home to many memorable child and animal figures. Many cultural productions, especially children's literature and cartoons, stress the similarities between children and animals, similarities that have their limits and often place the child, as human, above the animal. Still, these fictional situations offer opportunities for thinking of child-animal relationships in diverse ways through, for instance, considering the possibilities of privileged contact between children and animals or of animals that are more knowledgeable and powerful than children and even adults.0Despite the prevalence and success of child-animal tandems in comics and culture, we know very little about these relationships. What makes them so popular? How do they work? How much do they vary across time and cultures? What do they tell us about the place of animals and children in comics and in the real world?0'Strong Bonds: Child-animal Relationships in Comics' takes a first, important step in this direction. Bringing together scholars with a diverse range of comics expertise, the volume's chapters combine contextualized readings of comics with relevant theories for interrogating childhood and animalhood, their overlaps and divergences. The strong bonds between children and animals mapped out here point towards alternative modes of conceptualizing family and identity and, ultimately, alternative means of reading, interpreting and imagining.0With chapters on early comics (the Italian children's magazine 'Corriere dei Piccoli' during WWI, Harold Gray's 'Little Orphan Annie') international and regional classics ('Tintin', the Flemish 'Jommeke') and contemporary graphic novels (Bryan Talbot's 'A Tale of One Bad Rat', Brecht Even's 'Panther'), this critical anthology sheds light on a vast array of child-animal relationships in comics from Europe and North America.000.

Indigenous and Decolonizing Studies in Education Linda Tuhiwai Smith, Eve Tuck, K. Wayne Yang. 2018-06-14 Indigenous and decolonizing perspectives on education have long persisted alongside colonial models of education, yet too often have been subsumed within the fields of multiculturalism, critical race theory, and progressive education. Timely and compelling, *Indigenous and Decolonizing Studies in Education* features research, theory, and dynamic foundational readings for educators and educational researchers who are looking for possibilities beyond the limits of liberal democratic schooling. Featuring original chapters by authors at the forefront of theorizing, practice, research, and activism, this volume helps define and imagine the exciting interstices between Indigenous and decolonizing studies and education. Debussy Stefan Jarociński. 1976 From the first, Debussy's music lent itself to all kinds of convenient critical labels, of which the most fashionable has always been 'impressionist'. In this book the doyen of Polish musicologists examines Debussy's output against the twin backgrounds of his upbringing and of contemporary movements in the other arts besides music. He concludes that the 'impressionist' analogy between music and painting has been too deceptively obvious, and that the movement with which Debussy's art is most deeply impregnated is Symbolism. This he shows by a review of the general aesthetic ferments of this age, by close analysis of Debussy's music, his early works in particular, and by well-directed quotation from Debussy's own many writings on the subject. In the course of his argument he leads the reader down many unexpected bypaths in aesthetics; his book is both an original contribution to musicology and a philosophical meditation on the whole of the art of this unusually fertile and adventurous

period.

Modern Mathematics Education for Engineering Curricula in Europe Seppo Pohjolainen,Tuomas Myllykoski,Christian Mercat,Sergey Sosnovsky.2018-07-16 This open access book provides a comprehensive overview of the core subjects comprising mathematical curricula for engineering studies in five European countries and identifies differences between two strong traditions of teaching mathematics to engineers. The collective work of experts from a dozen universities critically examines various aspects of higher mathematical education. The two EU Tempus-IV projects - MetaMath and MathGeAr - investigate the current methodologies of mathematics education for technical and engineering disciplines. The projects aim to improve the existing mathematics curricula in Russian, Georgian and Armenian universities by introducing modern technology-enhanced learning (TEL) methods and tools, as well as by shifting the focus of engineering mathematics education from a purely theoretical tradition to a more applied paradigm. MetaMath and MathGeAr have brought together mathematics educators, TEL specialists and experts in education quality assurance from 21 organizations across six countries. The results of a comprehensive comparative analysis of the entire spectrum of mathematics courses in the EU, Russia, Georgia and Armenia has been conducted, have allowed the consortium to pinpoint and introduce several modifications to their curricula while preserving the generally strong state of university mathematics education in these countriesThe book presents the methodology, procedure and results of this analysis. This book is a valuable resource for teachers, especially those teaching mathematics, and curriculum planners for engineers, as well as for a general audience interested in scientific and technical higher education.
