Analyzing Multimodality in Specialized Discourse Settings Veronica Bonsignori, Belinda Crawford Camiciottoli, Denise Filmer. 2021-12-21

Contemporary society has witnessed radical changes in the field of communications in terms of how messages and meanings are disseminated. Digitalization and the Internet have signalled an exponential rise in the circulation of multimodal texts in which different semiotic resources are orchestrated together to construct meaning in all areas of social life, across languages and cultures, and in diverse specialized discourse domains. This has foregrounded the need to examine the semiotic functions, affordances, and issues at stake in a range of multimodal discourse forms, while simultaneously highlighting the importance of critical multimodal literacy in audiences and learners. This volume develops and extends pioneering research on the intersection between multimodality and specialized discourse. Eight newly commissioned studies offer innovative perspectives on multimodal research methodologies and applications in a variety of ESP (English for Specific Purposes) contexts for practitioners and scholars alike. The volume offers a glimpse at future directions in this dynamic and ever-evolving area of investigation focusing on the synergy between verbal and non-verbal modes of communication in the digital age. Each chapter explores an original area of application: academic, economic, scientific, marketing, legal, medical, political, and tourism. The contributors approach multimodality from a range of theoretical and methodological viewpoints including synchronic and diachronic corpus-based and corpus-aided studies, critical discourse analysis, and systemic functional linguistics. Analytical tools such as multimodal (critical) discourse analysis, multimodal transcription, and multimodal annotation software capable of representing the interplay of different semiotic modes - speech, intonation, direction of gaze, facial expressions, gesturing, and spatial positioning of interlocutors - are employed. The diversity of research strands contained in the volume illustrates just some of the vast areas of multimodal knowledge dissemination that are still unmapped. As a cornerstone of communication, multimodality needs exploring in all its facets. These contributions aim to further that cause.

*English Historical Linguistics 2006: Lexical and semantic change* Maurizio Gotti, Marina Dossena, Richard Dury. 2008 The papers collected in this volume were first presented at the 14th International Conference on English Historical Linguistics (Bergamo, 2006). Alongside studies of syntax, morphology, and dialectology, published in two sister volumes, many innovative contributions focused on semantics, pragmatics and register variation. A rich variety of state-of-the-art studies and plenary lectures by acknowledged world experts in the field bears witness to the quality of the scholarly interest in this field of research. In all the contributions, well-established methods combine with new theoretical approaches, in an attempt to shed more light on phenomena that have hitherto remained unexplored, or have only just begun to be investigated. The accurate peer-reviewed selection ensures the methodological homogeneity of the papers.

**The Discourses of Dispute Resolution** Vijay Kumar Bhatia, Christopher Candlin, Maurizio Gotti. 2010 This volume presents some of the findings from a project on various aspects of Alternative Dispute Resolution (ADR), including conciliation, mediation, and arbitration. To study the discursive practices of ADR today, an international initiative has been undertaken by a group of specialists in discourse analysis, law, and arbitration from more than twenty countries. The chapters in this volume draw on discourse-based data (narrative, documentary and interactional) to investigate the extent to which the 'integrity' of ADR principles is maintained in practice, and to what extent there is an increasing level of influence from litigative processes and procedures. The primary evidence for such practices comes from textual and discourse-based studies, ethnographic observations, and narratives of experience on the part of experts in the field, as well as on the part of some of the major corporate stakeholders drawn from commercial sectors.

**Explorations in Specialized Genres** Vijay Kumar Bhatia, Maurizio Gotti. 2006 Genre analysis has become firmly established as one of the most popular frameworks for the study of specialized genres in academic, professional and institutional as well as other workplace contexts. In recent years, genre theory has also developed in the direction of a more comprehensive and powerful multi-dimensional and multi-perspectived framework to examine not only the text but also the context in a much more meaningful manner than had ever been done earlier. The theoretical perspectives and the individual case studies of this volume testify to the wide range of methodological tools made available by genre theory, enabling researchers to handle problems relating to the description of variations in language use. Moreover, the following relevant issues are addressed: how are specialized genres constructed, interpreted and exploited in the achievement of specific goals in highly specialized contexts?

Conceptual Metaphors as an Organisational Framework of the Specialist Language of IT Magdalena Krawiec. 2022-06-13 Magdalena Krawiec provides insight into the underlying conceptual structure of information technology and gives a plausible account of the patterns of metaphorical conceptualisation manifested in the specialist language of IT. Conceptual metaphors map our concrete experience onto abstract experiences, so as to effortlessly get hold of new emergent concepts. On the one hand, our ability to make our world thinkable rests on the use of our past experiences, whereas on the other hand, IT specialists familiarise themselves with yet unknown conceptual structures through the interaction with the specialist scenery. Specialists' thinkability of the specialist surroundings is grounded in their perception of similarity which enables them to adapt both conceptually and linguistically to their specialist practice.

**Communicating Specialized Knowledge** Marina Bondi, Silvia Cacchiani, Silvia Cavalieri. 2019-06-13 This book was born out of the idea that domain-specific knowledge has two major dimensions, since, on the one hand, peer-to-peer communication is primarily intended to further research within specific disciplines, while, on the other, domain-external, asymmetric communication of 'filtered' knowledge caters to different types of lay-audiences. Collectively, the chapters in the volume take the reader on a journey through knowledge communication and knowledge (re)presentation strategies that are able to successfully disseminate and communicate. The domains under scrutiny are medicine and health, corporate communication, cultural heritage and tourism. A number of issues are addressed at the interface of corpus linguistics, genre studies and multimodal analysis. The variety of questions posed and methods used to explore corpus data will contribute to further debate among scholars in applied linguistics, sociolinguistics, multimodality, media studies and computer-mediated communication.

**Legal Discourse across Cultures and Systems** Vijay K. Bhatia, Christopher N. Candlin, Jan Engberg. 2008-01-01 What exactly is legal about legal language? What happens to legal language when it is used across linguistic, national, socio-political, cultural, and legal systems? In what way is generic integrity of legal documents maintained in multilingual and multicultural legal contexts? What happens when the same rule of law is applied across legal systems? By bringing together scholars and practitioners from more than ten countries, representing various jurisdictions, languages, and socio-political backgrounds, this book addresses these key issues arising from the differences in legal or sociocultural systems. The discussions are based not only on the analysis of the legal texts alone, but also on the factors shaping such constructions and interpretations. Given the increasing international need for accurate and authoritative translation and use of legal documents, this important volume has considerable contemporary relevance in a globalized economy. It will appeal to discourse analysts, commercial consultants, legal trainers, translators, and applied researchers in professional communication, especially in the field of legal writing and languages for specific purposes.

*New Approaches to Specialized English Lexicology and Lexicography* Marián Alesón, Isabel Balteiro. 2010-10-12 This book gathers some of the latest approaches to Lexicology and Lexicography, which span from research on language for specific purposes to the study of lexical constellations and translation. It aims to present a multifaceted insight on current trends and, thus, includes papers that explore lexical processes in several areas, which comprise fields so diverse and riveting such as the language of cinema, fashion, tourism, and even comics. In addition, other papers examine the lexicon of well-established professional languages, such as the language of law, medicine and business, by revealing leading-edge perspectives on topics such as translation, word-formation, cultural clashes, or lexical selection. Key issues on learning and teaching are also considered, as part of a long tradition in the study of professional and academic languages that posits users' learning needs as the cornerstone to the study of these languages. Therefore, this work proposes a strong emphasis on lexis and terminology, which are highlighted as the fundamental core of the definition and analysis of specialized languages. All in all, this publication intends, on the one hand, to embrace current trends in the study of specialized lexicon and terminology from the perspective of both Lexicology and Lexicography, and, on the other hand, to open new possibilities for future research.

**Concise Encyclopedia of Pragmatics** J.L. Mey. 2009-08-07 Concise Encyclopedia of Pragmatics, Second Edition (COPE) is an authoritative single-volume reference resource comprehensively describing the discipline of pragmatics, an important branch of natural language study dealing with the study of language in its entire user-related theoretical and practical complexity. As a derivative volume from Encyclopedia of Language and Linguistics, Second Edition, it comprises contributions from the foremost scholars of semantics in their various specializations and draws on 20+ years of development in the parent work in a compact and affordable format. Principally intended for tertiary level inquiry and research, this will be invaluable as a reference work for undergraduate and postgraduate students as well as academics inquiring into the study of meaning and meaning relations within languages. As pragmatics is a centrally important and inherently cross-cutting area within linguistics, it will therefore be relevant not just for meaning specialists, but for most linguistic audiences. Edited by Jacob Mey, a leading pragmatics specialist, and authored by experts The latest trends in the field authoritatively reviewed and interpreted in context of related disciplines Drawn from the richest, most authoritative, comprehensive and internationally acclaimed reference resource in the linguistics area Compact and affordable single volume reference format

**Design Discourse** David Franke, Alex Reid. 2010-10-06 Design Discourse: Composing and Revising Programs in Professional and Technical Writing addresses the complexities of developing professional and technical writing programs. The essays in the collection offer reflections on efforts to bridge two cultures—what the editors characterize as the “art and science of writing”—often by addressing explicitly the tensions between them. Design Discourse offers insights into the high-stakes decisions made by program designers as they seek to “function at the intersection of the practical and the abstract, the human and the technical.”

**Keyness in Texts** Marina Bondi, Mike Scott. 2010-01-01 This is corpus linguistics with a text linguistic focus. The volume concerns lexical inequality, the fact that some words and phrases share the quality of being key—and thereby reflect or promote important themes in some textual contexts, while others do not. The patterning of words which differ in their centrality to text meaning is of increasing interest to corpus linguistics. At the same time software resources are yielding increasingly more detailed ways of identifying and studying the linkages between key words and phrases in text databases. This volume brings together work from some of the leading researchers in this field. It presents thirteen studies organized in three sections, the first containing a series of studies exploring the nature of keyness itself, then a set of five studies looking at keyness in specific discourse contexts, and then three studies with an educational focus. Edited by two central figures in the development of keyword analysis, and with contributions from leading specialists in the field, this unique collection brings together a wide range of insights into how keyword analysis can contribute both to linguistic and cultural analysis and to language education. It deserves a place on the bookshelves of anyone with an interest in these areas—Christopher Tribble, King's College, London This is a fascinating volume addressing both methodological and theoretical questions in the study of keywords. It pushes forward the exploration of the nature of keyness and the interpretation of keywords in their textual contexts. An inspiring contribution to a central area of corpus linguistics. ---Michaela Mahlberg, University of Nottingham

**Discursive Strategies in Multicultural Business Meetings** Gina Poncini. 2007 Winner of the Association for Business Communication Award for Distinguished Publication on Business Communication. This book explores multiparty, multicultural interaction at international business meetings. It investigates discourse at an Italian company's meetings of its international distributors, conducted mainly in English and attended by participants from different countries in Europe, Asia and North America. Data come from audio recordings of the meetings, normally lasting two to three days, and are supplemented by the author's observations of the meetings. The study uses a series of approaches to analyze selected linguistic and interactional features, presenting an in-depth analysis and discussion of data extracts that draws on both qualitative and quantitative approaches. It highlights the way the main company speaker and some of the multilingual participants use discursive strategies to build common ground, to construct a cooperative business relationship or to negotiate or avert conflict. The study questions the role of cultural differences in approaching multicultural, multilingual meetings and argues that organizational roles, the business context and individual differences must also be considered.

**The Ins and Outs of Business and Professional Discourse Research** Glen Alessi, Geert Jacobs. 2015-10-19 Winner of the Association for Business Communication's Distinguished Publication on Business Communication Award 2016 This edited volume offers a collection of original chapters focusing on the Ins and Outs of professional discourse research. Drawing on insights from LSP, ethnography and discourse analysis, it covers a wide range of issues, ranging from gaining access and collecting data to feeding results back in the form of recommendations to practitioners.

**Advances in Medical Discourse Analysis** Maurizio Gotti, Françoise Salager-Meyer. 2006 The focus of this volume is on medical discourse, a domain of language which deserves closer scrutiny by academics as well as practitioners, due to its increasing relevance and pervasiveness in modern society. Despite the wealth of publications dealing with specialized or academic discourse and its rhetoric, few of these are devoted specifically to medical discourse. This book seeks to redress the balance by bringing together a number of studies that bear witness to the widespread interest in medical texts shown by linguists and professional communities around the world. The volume is divided into two main parts: the first targets medical discourse in its spoken dimension, while the second contains various analyses of written texts. The theoretical perspectives and individual case studies presented here reflect the wide range of methodological approaches and theoretical issues that characterise current research in the field.

**Investigating Specialized Discourse** Maurizio Gotti. 2008 Maurizio Gotti analyses the various features of specialized discourse in order to assess its degree of specificity and diversification, as compared to general language. Prior to any analysis of such traits, the notion of specialized discourse and its distinctive properties are clarified.

*Insights Into Specialized Translation* Maurizio Gotti, Susan Sarcevic, Susan Šarčević. 2006 This volume focuses on specialist translation - one of the areas of translation in greatest demand in our age of globalization. The 16 chapters deal not only with the classical domains of science and technology, law, socio-politics and medicine but also with lesser researched areas such as archeology, geography, nutrigenomics and others. As a whole, the book achieves a blend of theory and practice. It addresses a variety of issues such as translation strategy based on text type and purpose, intercultural transfer and quality assessment, as well as textual and terminological issues in bilingual and multilingual settings, including

international organizations and the European Union. Today translation competence presupposes multidisciplinary skills. Whereas some chapters analyze the linguistic features of special-purpose texts and their function in specialized communication, others show how specialized translation has changed as a result of globalization and how advances in technology have altered terminology research and translation processing.

**Features of Naturalness in Conversation** Martin Warren.2006-01-01 The study describes a detailed and original piece of research work, investigating a very important genre of human communication, and that is conversation. It provides a definition of the genre of conversation by describing nine features of conversation, namely multiple sources, discourse coherence, language as doing, co-operation, unfolding, open-endedness, artifacts, inexplicitness and shared responsibility. These nine features of naturalness in conversation serve to distinguish conversation from specialized discourse types. The study illustrates the nine defining features of conversation with authentic conversational data collected surreptitiously in England. While this study is of native speakers of English, the nine defining features of naturalness of English conversation are applicable to conversations conducted in other languages.

**Innovative Perspectives on Tourism Discourse** Bielenia-Grajewska, Magdalena,Cortes de los Rios, Enriqueta.2017-08-10 The application of linguistic optimization methods in the tourism, travel, and hospitality industry has improved customer service and business strategies within the field. It provides an opportunity for tourists to explore another culture, building tolerance and overall exposure to different ways of life. Innovative Perspectives on Tourism Discourse is a pivotal reference source for the latest research findings on the role of language and linguistics in the travel industry. Featuring extensive coverage on relevant areas such as intercultural communication, adventure travel, and tourism marketing, this publication is an ideal resource for linguists, managers, researchers, economists, and professionals interested in emerging developments in tourism and travel.

*Metapragmatics in Use* Wolfram Bublitz,Axel Hübler.2007-12-12 This collection of papers fills a gap in current research on both metapragmatics and pragmatics in that it combines data-based pragmatic analysis with metapragmatic theory and focuses on the ways in which metadiscourse is actually used. The 12 contributions investigate speech acts and verbal (as well as non-verbal) expressions which highlight (meta-)linguistic aspects of ongoing discourse and thus provoke a deviation from the latter's original direction and purpose. All case studies discuss ways and means which interactants employ to resolve diverging pragmatic expectations in communication. The papers analyze authentic examples from English and other languages (and cultures), including Thai, Chinese and Japanese, and center around three principal domains of communication: ordinary everyday interaction, interaction in educational contexts and in specialized discourse. The introductory chapter locates the various contributions within a systematically broader theoretical framework. The wide scope of the collection, its empirical orientation and the reader-friendly form of presentation should appeal to anyone interested in pragmatics, whether scholar or student.

*Investigating Specialized Discourse* Maurizio Gotti.2005-01-01 *Investigating Specialized Discourse* is a shortened and revised textbook edition of the monograph *Specialized Discourse* (2003). This book analyses the various features of specialized discourse in order to assess its degree of specificity and diversification, as compared to general language. Prior to any analysis of such traits, the notion of specialized discourse and its distinctive properties are clarified. The presence of such properties is accounted for not only in linguistic but also in pragmatic terms since the approach is interpretative rather than merely descriptive. Indeed, the complexity of this discourse calls for a multidimensional analysis, covering both lexis and morpho-syntax as well as textual patterning. Some lexical aspects, morpho-syntactic features and textual genres are also examined from a diachronic perspective, thus showing how various conventions concerning specialized discourse have developed over the last centuries.

*Variations in Specialized Genres* Vijay K. Bhatia,Eleonora Chiavetta,Silvana Sciarrino.2015-09-16 The book is an edited volume of carefully selected articles by eminent scholars focusing on the specialist knowledge transmission through genre variation, particularly on the issues of standardization and hybridity. The main focus was to analyse discursive popularization in the contexts and domains of natural sciences, law, and commerce, viewed in a diachronic perspective. The scholars involved have concentrated their studies on the creative transformation, hybridization, and even bending of genres used to popularise scientific, legal and commercial discourse for different communicative purposes and audiences, thus extending the conventional genre boundaries to disseminate specialized knowledge. The proliferation of specialized knowledge has indeed created a growing need to convey expert knowledge to a variety of addressees, with different levels of shared understanding and expertise. Such disciplinary knowledge can only be conveyed through various subtle manipulations of generic conventions keeping in mind the aims, the users, the media, the social contexts, and the domain with which specific knowledge is associated.

**Investigating Specialized Discourse** Maurizio Gotti.2011 Rev. ed. of: *Investigating specialized discourse*. c2006.

**Specialized Discourse** Maurizio Gotti.2003 This book analyses the various features of specialized discourse in order to assess its degree of specificity and diversification, as compared to general language. Prior to any analysis of such traits, the notion of specialized discourse and its distinctive properties are clarified, also as compared to other features frequently occurring in specialized texts which cannot be considered distinctive. The presence of such properties are accounted for not only in linguistic but also in pragmatic terms since the approach is interpretative rather than merely descriptive. The complexity of this discourse calls for a multidimensional analysis, covering both lexis and morpho-syntax as well as textual patterning. Some lexical aspects, morphosyntactic features and textual genres are also examined from a diachronic perspective, thus showing how various conventions concerning specialized discourse have developed over the last few centuries.

*Metaphor in Specialist Discourse* J. Berenike Herrmann,Tony Berber Sardinha.2015-12-15 *Metaphor in Specialist Discourse* presents multiple perspectives on metaphor use in specialist and popularized discourse contexts. Using genre and register as starting parameters for deeper exploration, and pushing the boundaries further to open up new areas and possibilities, ten independent articles investigate metaphor use across a range of specialist domains of discourse, such as biology research articles, psychological counseling, soccer commentaries, workfloor communication, and penal policy documents. Framed by two theoretical chapters, the book is a contribution to the study of metaphor use in distinct discourse settings that will be of value to linguists and metaphor scholars of different persuasions, graduate students of linguistics and related disciplines, and practitioners of specialized areas with an interest in (verbal or gestural) language use in their areas of expertise. It shows that aspects of discourse variation are the beginning of, not an afterthought to, accurate empirical metaphor studies.

*The Anglicization of European Lexis* Cristiano Furiassi, Virginia Pulcini,Félix Rodríguez González.2012-08-22 This volume explores the lexical influence of English on European languages, a topical theme with linguistic and cultural implications. It provides an extensive introductory background to a cross-national view of English-induced lexical borrowing, posing crucial analytical questions such as what counts as an Anglicism. It also offers a typology of borrowings with examples from the languages represented: Armenian, Danish, French, German, Italian, Norwegian, Polish, Serbian, Spanish, and Swedish. The articles in this volume address general and language-specific issues related to the analysis and collection of Anglicisms, extending the scope to the largely unexplored area of phraseology and bringing new insights into corpus-based and corpus-driven methodologies. This volume fits into a well-established and constantly developing research field and will appeal to scholars interested in the spread of English as an international language, contact and contrastive linguistics, lexicology and lexicography, and computer corpus lexicography.

**Investigating English Legal Genres in Academic and Professional Contexts** Girolamo Tessuto.2013-01-11 This volume contributes to the latest studies in legal discourse studies by presenting a descriptive and interpretive analysis of English legal genres used in academic and professional writing contexts. The results of corpora-driven data are discussed through (meta)discourse, genre and other theoretical perspectives, and offer insights into the ways the writers' discursive practices and meanings shape their membership of the legal community and discipline. The volume attempts to show these id ...

*Professional Discourse* Kenneth Kong.2014-08-14 Using a wide range of examples such as research papers, business reports, performance commentaries, professional guidebooks and legal documents, this book examines the discourse of professional writing. Employing a number of analytic paradigms including systemic functional linguistics, pragmatics, text analysis and sociological and anthropological linguistics, the author explores a wide range of professional genres. He argues that while professions use different sets of practices, their use of language displays many

universals, and demonstrates this through examples and data from a broad cross section of professional settings such as medicine, law, business, mass media, and engineering. This examination of professional discourse, and its important role in society, will be of interest to researchers in linguistics, applied linguists, and those working on the teaching of English for specific purposes--

Studies in Specialized Discourse John Flowerdew, Maurizio Gotti. 2006-01-01 This volume brings together a selection of papers originally presented at the Language for Specific Purposes Symposium which took place in Bergamo, Italy from 29 August to 2 September, 2005. In selecting from papers on specialized discourse presented at this conference, the editors have tried to create a thematic unity by grouping the papers according to four disciplinary areas: academic and scientific discourse, business discourse, institutional discourse, and legal discourse. Within these fields, a diversity of approaches has been maintained in order to represent the eclectic nature of studies in specialized discourse as they are carried out today. It is no coincidence that the papers fall into these four areas, as these are fields with a very international dimension and hence the use of English, as the increasingly global language, is naturally very important. Indeed, all the papers included in this publication are in English and mainly focus on English. On the other hand, the contributors to this volume come from a range of different countries and mother tongues. This diversity represents the international interest in English as a language of specialized discourse and communication.

Concise Encyclopedia of Applied Linguistics Margie Berns. 2010-03-20 Concise Encyclopedia of Applied Linguistics formalizes, organizes and analyzes the relation of knowledge about language to decision-making in practice. It synthesizes research in psycholinguistics, educational linguistics and sociolinguistics, freely crossing subject fields to establish innovative and expert responses to some of the key debates in the field. Authored and compiled by leaders in their various specialties and collated and extensively re-edited from the award-winning Encyclopedia of Language and Linguistics, Second Edition, this collection will be an ideal one-stop desk reference solution for any linguistics professional and researcher interested in how language operates at the leading edge. Authoritative review of this dynamic field placed in an interdisciplinary context Over 100 articles by leaders in the field Compact and affordable single-volume format

Encyclopedia of Language and Linguistics . 2005-11-24 The first edition of ELL (1993, Ron Asher, Editor) was hailed as the field's standard reference work for a generation. Now the all-new second edition matches ELL's comprehensiveness and high quality, expanded for a new generation, while being the first encyclopedia to really exploit the multimedia potential of linguistics. \* The most authoritative, up-to-date, comprehensive, and international reference source in its field \* An entirely new work, with new editors, new authors, new topics and newly commissioned articles with a handful of classic articles \* The first Encyclopedia to exploit the multimedia potential of linguistics through the online edition \* Ground-breaking and International in scope and approach \* Alphabetically arranged with extensive cross-referencing \* Available in print and online, priced separately. The online version will include updates as subjects develop ELL2 includes: \* c. 7,500,000 words \* c. 11,000 pages \* c. 3,000 articles \* c. 1,500 figures: 130 halftones and 150 colour \* Supplementary audio, video and text files online \* c. 3,500 glossary definitions \* c. 39,000 references \* Extensive list of commonly used abbreviations \* List of languages of the world (including information on no. of speakers, language family, etc.) \* Approximately 700 biographical entries (now includes contemporary linguists) \* 200 language maps in print and online Also available online via ScienceDirect - featuring extensive browsing, searching, and internal cross-referencing between articles in the work, plus dynamic linking to journal articles and abstract databases, making navigation flexible and easy. Language Online David Barton, Carmen Lee. 2013-04-17 In Language Online, David Barton and Carmen Lee investigate the impact of the online world on the study of language. The effects of language use in the digital world can be seen in every aspect of language study, and new ways of researching the field are needed. In this book the authors look at language online from a variety of perspectives, providing a solid theoretical grounding, an outline of key concepts, and practical guidance on doing research. Chapters cover topical issues including the relation between online language and multilingualism, identity, education and multimodality, then conclude by looking at how to carry out research into online language use. Throughout the book many examples are given, from a variety of digital platforms, and a number of different languages, including Chinese and English. Written in a clear and accessible style, this is a vital read for anyone new to studying online language and an essential textbook for undergraduates and postgraduates working in the areas of new media, literacy and multimodality within language and linguistics courses.

Persuasion in Specialised Discourses Olga Dontcheva-Navratilova, Martin Adam, Renata Povolná, Radek Vogel. 2020-12-10 This book examines the concept of persuasion in written texts for specialist audiences in the English and Czech languages. By exploring a corpus of academic research articles, corporate reports, religious sermons and user manuals the authors aim to reveal similarities and differences in rhetorical strategies across cultures and genres. They draw on Biber and Conrad's (2009) model for contextualising interaction in specialised discourses, Bell's (1997) framework for the analysis of participants roles, Swales' (1990) genre analysis approach for considering genre constraints and Hyland's (2005) metadiscourse model for investigating writer-reader interaction. The result is a book which will appeal to researchers and students in Discourse Studies, especially those with an interest in genre and rhetorical strategies.

**Language, Culture and the Law** Vijay Kumar Bhatia, Christopher Candlin, Paola Evangelisti Allori. 2008 The volume presents a set of invited papers based on analyses of legal discourse drawn from a number of international contexts where often the English language and legal culture has had to adjust to legal concepts very different from those of the English law system. Many of the papers were inspired by two major projects on legal language and inter-multiculturalism: Generic Integrity in Legislative Discourse in Multilingual and Multicultural Contexts based in Hong Kong and carried out by an international team and Interculturality in Domain-specific English, a national project supported by the Italian Ministry for Education and Research, involving research units from five Italian universities

An Introduction to Discourse Analysis James Paul Gee. 2014-02-03 Discourse analysis considers how language, both spoken and written, enacts social and cultural perspectives and identities. Assuming no prior knowledge of linguistics, An Introduction to Discourse Analysis examines the field and presents James Paul Gee's unique integrated approach which incorporates both a theory of language-in-use and a method of research. An Introduction to Discourse Analysis can be used as a stand-alone textbook or ideally used in conjunction with the practical companion title How to do Discourse Analysis: A Toolkit. Together they provide the complete resource for students studying discourse analysis. Updated throughout, the fourth edition of this seminal textbook also includes two new chapters: 'What is Discourse?' to further understanding of the topic, as well as a new concluding section. A new companion website [www.routledge.com/cw/gee](http://www.routledge.com/cw/gee) features a frequently asked questions section, additional tasks to support

understanding, a glossary and free access to journal articles by James Paul Gee. Clearly structured and written in a highly accessible style, *An Introduction to Discourse Analysis* includes perspectives from a variety of approaches and disciplines, including applied linguistics, education, psychology, anthropology and communication to help students and scholars from a range of backgrounds to formulate their own views on discourse and engage in their own discourse analysis. This is an essential textbook for all advanced undergraduate and postgraduate students of discourse analysis.

*Medical Discourse in Professional, Academic and Popular Settings* Pilar Ordóñez-López, Nuria Edo-Marzá. 2016-08-09 This volume investigates the features and challenges of medical discourse between medical professionals as well as with patients and in the media. Based on corpus-driven studies, it includes a wide variety of approaches including cognitive, corpus and diachronic linguistics. Each chapter examines a different aspect of medical communication, including the use of metaphor referring to cancer, the importance of ethics in medical documents addressed to patients and the suitability of popular science articles for medical students. The book also features linguistic, textual and discourse-focused analysis of some fundamental medical genres. By combining sociological and linguistic research applied to the medical context, it illustrates how linguists and translation specialists can build bridges between health professionals and their patients.

**Languages for Special Purposes** John Humbley, Gerhard Budin, Christer Laurén. 2018-10-22 This handbook gives an overview of language for special purposes (LSP) in scientific, professional and other contexts, with particular focus on teaching and training. It provides insights into research paradigms, theories and methods while also highlighting the practical use of LSPs in concrete discourse situations. The volume is transdisciplinary oriented with a firm basis in the language sciences, including terminology, knowledge transfer, multilingual and cross-cultural exchange.

*Developing Courses in English for Specific Purposes* H. Basturkmen. 2015-12-11 Presented in two parts, this book firstly introduces core considerations in ESP course development drawing on examples from a wide range of ESP and EAP courses. Secondly four case studies show how experienced ESP teachers and course developers went about developing courses to meet the needs of their particular learners.
