Paradise on the Hudson Caroline Seebohm.2020-03-03 “Through her prodigious research and evocative prose, Caroline Seebohm recreates an era of New York life seen through the history and dazzling beauty of the restored Untermyer Gardens.” —Paula Deitz, author, *Of Gardens* On a single day in 1939, more than 30,000 people visited the Untermyer Garden—at the time, one of the world’s grandest landscapes. Thirty years later, most of the site had been sold or abandoned. Who was the eccentric visionary behind the estate’s original glory? What triggered the garden’s decline and sparked its restoration? In *Paradise on the Hudson*, Caroline Seebohm brings to light the remarkable story of a larger-than-life figure lost mostly to history, and the impact of his horticultural obsession. It is a fascinating tale about the role of passion in both creating and rescuing one of America’s greatest gardening achievements.

Mirrors of Paradise Guy Cooper, Gordon Taylor, Dan Kiley.2000-12-18 Now back in stock, this highly sought after monograph represents the gardens and landscapes of the Spanish designer Fernando Caruncho. Renowned internationally for

serene compositions based on timeless principles of natural forms and geometry, Caruncho has recently completed two landscapes in the United States, one in the rolling farmland of New Jersey and the other in Florida. Caruncho draws inspiration from a wide spectrum of precedents—the garden-academies of ancient Greek philosophers as well as important historic gardens in Spain, Italy, France, and Japan; in *Mirrors of Paradise*, Caruncho discusses his design philosophy and influences in a substantial interview with the authors. Caruncho's gardens range from small urban spaces to grand country estates, and his design trademarks include geometric grids, rolling waves of the shrub *escallonia*, refined and playful pavilions and gazebos, calm reflecting pools, and vistas that capitalize on the contrasts inherent in his plant palette. In their inventive and evocative fusion of the historic and contemporary, Caruncho's garden designs are masterful compositions that exemplify the formal garden for the new millennium.

Visionary Landscapes Kendall H. Brown. 2017-10-31 Japanese gardens are found throughout the world today—their unique forms now considered a universal art form. This stunning Japanese gardening book examines the work of five leading landscape architects in North America who are exploring the extraordinary power of Japanese-style garden design to create an immersive experience promoting personal and social well-being. Master garden designers Hoichi Kurisu, Takeo Uesugi, David Slawson, Shin Abe and Marc Keane have each interpreted the style and meaning of the Japanese garden in unique ways in their innovative designs for private, commercial and public spaces. Several recent Japanese-style gardens by each designer are featured in this book with detailed descriptions and sumptuous color photos. Hoichi Kurisu—transformative spaces for spiritual and physical equilibrium. Takeo Uesugi—bright, flowing gardens that evoke joyful living. David Slawson—evocations of native place that fuse with the surrounding landscape. Shin

Abe—dynamically balanced visual stories that produce meaning and comfort. Marc Keane—reflections on human connections with nature through the art of gardens. Also included are essays on the designers and mini-essays by them about gardens in Japan which have most inspired their work, as well as commentaries by patrons and visitors to their North American gardens. The book focuses on recently-created gardens to suggest how the art form is currently evolving, and to understand how Japanese garden design principles and practices are being adapted to suit the needs and ways of people living and working outside Japan today.

The Golden Age of American Gardens Mac Griswold, Eleanor Weller, Helen E. Rollins. 1991-09-30 An engaging tribute to America's grand era of private estate gardens and their illustrious owners, this book sweeps across the country to present over 500 of the nation's most exquisite gardens and the people who built them. In addition to a wealth of horticultural details, we learn of the garden-maker's flamboyant private and public lives--of the gossip, parties, dreams, politics, and economic one-upmanship of the period. 280 illustrations, 130 in full color.

Paradise Transplanted Pierrette Hondagneu-Sotelo. 2014-08-15 Gardens are immobile, literally rooted in the earth, but they are also shaped by migration and by the transnational movement of ideas, practices, plants, and seeds. In *Paradise Transplanted*, Pierrette Hondagneu-Sotelo reveals how successive conquests and diverse migrations have made Southern California gardens, and in turn how gardens influence social inequality, work, leisure, status, and our experiences of nature and community. Drawing on historical archival research, ethnography, and over one hundred interviews with a wide range of people including suburban homeowners, paid Mexican immigrant gardeners, professionals at the most elite botanical garden in the West, and immigrant community gardeners in the poorest neighborhoods of inner-city Los Angeles, this book offers insights into the ways that diverse global migrations and garden landscapes shape our social world.

American Gardens, 1890-1930 Sam Watters.2006-01-01

American Gardens, 1890 -1930: Northeast, Mid-Atlantic, and Midwest Regions is the first of three volumes to be published by Acanthus Press as the landscape component of its residential architecture series, Suburban Domestic Architecture. Presenting perio

Foreign Trends in American Gardens Raffaella Fabiani

Giannetto.2017-02-08 Foreign Trends in American Gardens

addresses the influence of foreign, designed landscapes on the development of their American counterparts. Including essays from an array of significant scholars in landscape studies, this collection examines topics ranging from the importation of Western and Eastern styles of design and theoretical literature to the adaptation of specific plant types. As the variety of topics and influences discussed demonstrates, the essence of American gardens defies simple definition. Examining the translation, imitation, adaptation, and naturalization of stylistic trends and horticultural specimens into American gardens, the book also dwells on the juxtaposition of the foreign and the native. The volume's contributors consider the experiences both of immigrants, who contributed through their writing, planting, and design efforts to enhance the character of regional gardens, and of Americans, who traveled abroad and brought back with them a passion for naturalizing exotics for scientific as well as aesthetic reasons. The complexity of American gardens—their combination of the historic and the modern, and of foreign cultures and local values—is also their most distinctive characteristic.

Outstanding American Gardens: A Celebration Page

Dickey, Marion Brenner.2015-09-22 The Garden Conservancy is celebrating its 25th anniversary with this beautifully illustrated book that documents a selection of the outstanding public and private gardens it has worked with since its founding in 1989. The book showcases eight gardens the conservancy has helped preserve and 43 of the more than 3,000 private gardens across

the country that have been opened to the public through its Open Days Program. The private gardens cover a wide variety of regions, habitats, designs, and plants, from early spring through autumn. Featured private gardens include Panayoti Kelaidis's rock garden in Denver, Colorado; Deborah Whigham and Gary Ratway's collection of native and Mediterranean plants and earth walls in Albion, California; and James David's imaginative mix of heat-tolerant plants, rills, and pools in Austin, Texas.

Paradise by Design Kathryn Phillips.1998 A biography of the landscape architect describes the challenges she faces with nervous clients, stubborn nursery owners, plant diseases and pests, and creating designs using native plants

Paradise Transformed Guy Cooper, Gordon I. Taylor.1996 The last two decades have seen a great explosion in the diversity, functionality, and beauty of modern garden design. The first major survey of contemporary private gardens, this book explores the imaginative ideas behind landscape design today. Lush color photographs, supported by plans, drawings, and lively commentary, thoroughly document gardens by twenty-eight leading landscape architects, featuring work in the United States, Europe, Japan, and Australia. An international roster of designers is represented here, illustrating acknowledged masters, such as Dan Kiley and Ian Hamilton Finlay, in addition to vital young talents, including Kathryn Gustafson and Susan Child. In each of the categories in *Paradise Transformed* -- tradition, abstraction, innovation, and exploration -- a distinct approach to the private landscape is revealed, achieved in original ways by each designer. The modernist aesthetic, translated from architecture, painting, and sculpture, gives form to these marvelous private spaces. Architectural and artistic influences displayed in these gardens include Art Deco, Cubism, Surrealism, Modernism, Postmodernism, Minimalism, and the Earthworks of the 1960s and 1970s. Some of the main tenets of the contemporary garden are: greater emphasis on gardens for personal use, not just plant

display; the rejection of historical styles as total models and the incorporation of new concepts involving technology, architecture, and site; a variety of design themes, including symmetrical, asymmetrical, and curvilinear modes and their interplay; and a breakthrough to an ecological and regional awareness of the landscape.

Grounds for Pleasure Denise Otis.2002-11-01 An illustrated survey of four centuries of gardening in America covers the subject from pre-Columbian Native American designs to the private gardens of America's suburban landscape.

Ellen Shipman and the American Garden Judith B.

Tankard.2018-05-01 Describes Shipman's remarkable life and fifty of her major works, including the Stan Hywet Gardens in Akron, Ohio; Longue Vue Gardens in New Orleans; and Sarah P. Duke Gardens at Duke University. Richly illustrated, this expanded edition reveals her ability to combine plants for dramatic impact and create spaces of the utmost intimacy.

American Home Landscapes Denise Wiles Adams,Laura L. S. Burchfield.2013-05-07 While there's no shortage of information on restoring and maintaining the historical integrity of period homes, until now there has been no authoritative reference that provides comparable information for landscapes. *American Home Landscapes* is a comprehensive, fully illustrated guide to recreating nearly 400 years of historical landscape design and adapting them to modern needs. You will first learn how to research design elements for a particular property. Each of the following chapters focuses on the design characteristics of six well-defined historical periods, beginning with the Colonial period and ending with the last decades of the twentieth century. Each section features the most prominent landscape features of each era, such as paths, driveways, fences, hedges, seating, and accessories. Extensive bibliographic resources and historically accurate plant lists round out the text. Whether the goal is to create a meticulously accurate period landscape or simply to

evoke the look of a bygone era, you'll find the tools you need in American Home Landscapes.

American Gardens Peter H. Loewer, Peter Loewer. 1995
New Garden Design: Inspiring Private Paradises Zahid Sardar. 2009-09 From vegetable and succulent gardens to sculpture and rose gardens to mountain and waterfront gardens, *New Garden Design* covers a range of interpretations incorporating walls, fountains, pavilions, canals, pools, terraces and groves in unexpected ways. The resulting new garden is a pleasure garden vested with spiritual, symbolic and ecological intent. A modernist interpretation of Roman stone furniture and freestanding walls punctuate the space behind a 1970s ranch house. A home designed by Bernard Maybeck is accented with a freehand composition of urns, cement pipes and rusty objects, as well as over a thousand species of plants. A grove of olive trees underplanted with rosemary and lavender fields gives personality to two acres surrounding a house designed by modernist Mexican architect Ricardo Legorreta.

Modern American Gardens James Rose, Marc Snow. 1967
Hamptons Gardens Jack Delashmet. 2011 The Hamptons are known as a glamorous playground of the rich and famous, but since its earliest days as a sleepy summer colony, the area has also been at the epicenter of American garden design, boasting a vast collection of lushly innovative, private landscapes-and a staggering assemblage of creative gardeners, designers, and landscape architects. *Hamptons Gardens* invites you behind the private hedges and into the picturesque landscapes, showing work by groundbreaking designers such as Edwina von Gal, Oehme, van Sweden and Associates, and Miranda Brooks. From the sustainable and native to the over-the-top and avant garde, these gardens frame or transform houses-both modern and traditional-and extend the living space outdoors. *Hamptons Gardens* makes stops at the estates of Southampton, the cliffs of Montauk, East Hampton's Georgica Pond, and even the famed

Grey Gardens. In collaboration with photographers Mary Ellen Bartley and Doug Young, author and Hamptons-insider Jack deLashmet open the garden gates to the Hamptons' most exciting private gardens in this visually stunning edition.

American Gardens of the Nineteenth Century Ann Leighton.1987
American Gardens of the Nineteenth Century is the final of three authoritative volumes of garden history by Ann Leighton. This witty and detailed book focuses on nineteenth-century gardens and gardening. Leighton's material for the book was drawn from letters, books, and other primary sources. Throughout the book are reproductions of contemporary illustrations and descriptive listings of native and new plants that were cultivated during the nineteenth century. Leighton gives much attention to influential people such as plant explorers and designers of public parks. Not only does she record the development of gardening, but she also shows the historical growth and change in nineteenth-century America. Companion volumes by Ann Leighton *Early American Gardens For Meate or Medicine* *American Gardens in the Eighteenth Century For Use or for Delight*

Innisfree Lester Collins.1994 Inspired by the scroll paintings of eighth-century Chinese poet-painter Wang Wei's garden, Beck created a series of self-contained landscapes using natural elements to frame and fill exquisite pictures. Collins followed the practical directives of the *Sensai Hisho*, or *Secret Garden Book*, an ancient Japanese handbook, to transform these individual gardens into a stroll that allows the visitor to move seamlessly from one scene to the next. By the time he died in 1993, he had doubled the size of an already vast and elaborate private garden, needing 20 full-time gardeners, while converting it into a public garden that is maintained by a staff of five.

Paradise of Exiles Katie Campbell.2009 DIVThe crumbling, abandoned villas above Florence proved irresistible to an eccentric colony of late 19th-century English and American expatriates. This entertaining book features 20 of these

characters and the unusual gardens they created. They include bereaved philosopher Charles Strong, whose Rockefeller in-laws financed his villa retreat; crossdressing English essayist Violet Paget; beautiful Serbian Princess Jeanne Ghika, who lived in seclusion with her American companion Miss Blood; and eccentric English romance writer Ouida. These Anglo-Florentines injected new life into Tuscany's decrepit gardens, touring the countryside for inspiration and trawling old libraries for treatises and manuals. Some smothered their walls with scented climbers, replaced gravel terraces with emerald lawns, and stuffed box parterres with bright bedding plants and orchards with exotic shrubs. Gorgeous photography, archival images, literary references, and gossipy tidbits bring this irresistible intersection of bohemia and nature to life.

The Authentic Garden Richard Hartlage, Sandy

Fischer. 2015-11-17 In contemporary American garden design, beauty for beauty's sake is making a comeback. The sixty gardens featured here trace current planting trends across the country, showcasing the best designs of recent years from the verdant Pacific Northwest to the tailored Eastern Seaboard, as well as prairies in Denver and Texas and exquisitely detailed private gardens in the Southwest that create a sense of lushness even while working exclusively within the vocabulary of cactuses and succulents. Plants are used to reinforce meaningful content, ecological strategies, and, most importantly, to create immersive and emotional experiences. As the movements of architectural, naturalistic, meadow, matrix, graphic, and ecological planting design have been adopted in such notable incarnations as the High Line in New York and Citygarden in St. Louis, they have rekindled interest in using plants that suit a given site's ecology—and in letting plants, rather than hardscape elements, lead design. Residential as well as public gardens are featured, and all are united by an immediately perceptible, intelligent selection of plants that create an enthralling, memorable, and

fitting sense of place: this is what makes a garden truly authentic. Over 250 full-color images reveal gardens created by the top American firms working today, including Andrea Cochran, Jack deLashmet, Doyle Herman, Elysian Landscapes, Gustafson Guthrie Nichol, Hoerr Schaudt, Ron Lutsko, Steve Martino, Nelson Byrd Woltz, Nievera Williams, Oehme van Sweden, OLIN, Raymond Jungles, Christine Ten Eyck, Bernard Trainor, and Michael Vergason, as well as beautiful gems of gardens by lesser known regional firms. Detail as well as overview images of gardens throughout the seasons and abundant plant identifications make this volume a valuable reference for all home gardeners as well as landscape design professionals interested in tracing the themes prevalent in contemporary American gardens.

Impressionism Linda S. Ferber, Todd A. Forrest, David Park Curry, Susan G. Larkin, Elaine Kilmurray. 2016-05-14

Rescuing Eden .2015-10-06 From simple 18th- and early 19th-century gardens to the lavish estates of the Gilded Age, the gardens started by 1930s inmates at Alcatraz in San Francisco Bay to the centuries-old camellias at Middleton Place near Charleston, South Carolina—Rescuing Eden celebrates the history of garden design in the United States, with 28 examples that have been saved by ardent conservationists and generous private owners, and opened to the public. The United States has a rich tradition of landscape design, with gardens on a scale that rivaled the great gardens of Europe, but in the absence of specific institutions dedicated to their preservation, many of these “ephemeral collaborations between man and nature” were lost—during the wars, economic depressions, and social upheavals that swept the country in the mid-20th-century, or to creeping development and urban sprawl. The surviving gardens presented here were selected for the drama of their original creation and rescue and for their historical and horticultural importance. Ranging from wonderful to woebegone, each has its own character, and each has been brought back from the brink

through a combination of imagination and tenacity. Discover The Kampong in Miami, Florida, planted with hundreds of tropical rarities from Southeast Asia by legendary plant explorer Dr. David Fairchild; Barnsley Gardens in Georgia, one of the few antebellum gardens surviving in the South, planted with 200 varieties of roses; the Lynchburg, Virginia garden created by Harlem Renaissance poet and civil rights activist Anne Spencer; the eccentric Ladew Topiary Gardens, with 15 garden rooms and a topiary foxhunt; the Belle Epoque grandeur of the Untermyer Garden in Yonkers, New York; and many others across the country, in Kentucky, Texas, Michigan, Maine, Rhode Island, and California. Each garden has been specially photographed by noted landscape and garden photographer Curtice Taylor, and introduced with authoritative and engaging text from design historian Caroline Seebom, encouraging readers to appreciate the landscapes that serve not only as windows on American history, but living, flourishing pleasure grounds for botanists, horticulturalists, and nature lovers throughout the United States.

Private Gardens of the Hudson Valley Jane

Garmey.2013-10-15 Private Gardens of the Hudson Valley surveys the majestic landscape that borders the Hudson River, an area rich in history and unique garden designs. The scenery, which encompasses riverfront meadows, craggy hills, and long open valleys, is inherently dramatic. Twenty-six private gardens are presented here, chosen to establish a sense of place and to convey the romance of the landscape. John Hall's photographs give a privileged view of the life within, while Jane Garmey's warm and engaging narrative traces the development of the gardens and the great pleasure their owners take in nurturing them. As Garmey notes in her introduction, each of these gardens has been made by the owner, and special attention given to the transition between the cultivated garden and the grandeur of the larger landscape beyond. The splendid setting of the Hudson Valley encompasses an almost infinite variety of design approaches from formal and traditional to naturalistic and an equal range of scale from multiple gardens within a vast estate to charmingly diminutive spaces between historic village houses. All have much to tell us about the complexity, challenges, and finally the unforgettable pleasure of making a garden.

The New Garden Paradise Dominique Browning.2005 A visual tour of thirty-five landscapes created by some of today's preeminent designers includes coverage of Jacques Vitz's misty and undulating beech hedges, Penelope Hobhouse's interpretation of a traditional English garden, and Martha Schwartz's Texas creation of painted garden rooms. 20,000 first printing.

Private Landscapes Pamela Burton,Marie Botnick.2002 When we think of the gardens of Southern California, we tend to think of the enormous semiarid landscapes of the Huntington and Rancho Los Alamitos, often built on the sprawling grounds of former ranches. But there is another garden tradition in Southern California: the modest, rectangular suburban plots designed by

the most famous architects of mid-century modernism: Richard Neutra, Rudolph Schindler, Gregory Ain, Raphael Soriano, Harwell Hamilton Harris, A. Quincy Jones, and John Lautner. These architects saw the garden as an outdoor extension of the space of the houses they designed, rather than a neo-Spanish fantasy to be added later by a landscapist. Their modern gardens made use of low-maintenance, drought-resistant plants, and made room for informal outdoor living by children and adults with an emphasis on recreation and exercise. The first book of its kind, *Private Landscapes* profiles twenty significant gardens-and their accompanying houses-by these celebrated architects. Using contemporary photographs by Julius Shulman and newly commissioned color images, along with plans and plant lists, *Private Landscapes* provides a never-before-seen look at these gardens. As beautiful and practical now as they were 50 years ago, these designs continue to provide inspiration for gardeners and designers everywhere.

The Modern Garden Jane Brown.2000-10 *The Modern Garden* is the first fully illustrated overview of the great gardens of the twentieth century. It examines hundreds of gardens created throughout the century and around the world, from the works of Geoffrey Jellicoe to Roberto Burle Marx, Russell Page to Dan Kiley.--BOOKJACKET.
