The Afterlives of the Terror Ronen Steinberg.2019-09-15 The Afterlives of the Terror explores how those who experienced the mass violence of the French Revolution struggled to come to terms with it. Focusing on the Reign of Terror, Ronen Steinberg challenges the presumption that its aftermath was characterized by silence and enforced collective amnesia. Instead, he shows that there were painful, complex, and sometimes surprisingly honest debates about how to deal with its legacies. As The Afterlives of the Terror shows, revolutionary leaders, victims' families, and ordinary citizens argued about accountability, retribution, redress, and commemoration. Drawing on the concept of transitional justice and the scholarship on the major traumas of the twentieth century, Steinberg explores how the French tried, but ultimately failed, to leave this difficult past behind. He argues that it was the same democratizing, radicalizing dynamic that led to the violence of the Terror, which also gave rise to an unprecedented interrogation of how society is affected by events of enormous brutality. In this sense, the modern question of what to do with difficult pasts is one of the unanticipated consequences of the eighteenth century's age of democratic revolutions. Thanks to generous funding from Michigan State University and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access (OA) volumes, available on the Cornell University Press website and other Open Access repositories.

Approaching Monumentality in Archaeology James F. Osborne.2014-10-24 Interdisciplinary study of monumental art and architecture in human history. Monumentality is a human phenomenon that has occurred in nearly all times and places. Because of its ubiquity, monumentality is something that has been studied by a large number of disciplines and individuals. Approaching Monumentality in Archaeology explores the phenomenon of monumental art and architecture from humankind's most ancient past to recent history, and does so using an interdisciplinary approach that incorporates the research of anthropological archaeologists, art historians, classicists, and sociologists working in a wide variety of historical and cultural contexts. The volume seeks to define what is meant by the terms "monument" and "monumentality," and to understand the social and political significance of monument-building as it has manifested around the world. By advocating for a relational approach to the topic that seeks to find monumentality in the ongoing relationship between object and person, this book offers the opportunity to begin the process of uniting these varied interests into a unified discourse.

Digital Scholarly Editing Matthew James Driscoll,Elena Pierazzo.2016-08-15 This volume presents the state of the art in digital scholarly editing. Drawing together the work of established and emerging researchers, it gives pause at a crucial moment in the history of technology in order to offer a sustained reflection on the practices involved in producing, editing and reading digital scholarly editions—and the theories that underpin them. The unrelenting progress of computer technology has changed the nature of textual scholarship at the most fundamental level: the way editors and

scholars work, the tools they use to do such work and the research questions they attempt to answer have all been affected. Each of the essays in Digital Scholarly Editing approaches these changes with a different methodological consideration in mind. Together, they make a compelling case for re-evaluating the foundation of the discipline—one that tests its assertions against manuscripts and printed works from across literary history, and the globe. The sheer breadth of Digital Scholarly Editing, along with its successful integration of theory and practice, help redefine a rapidly-changing field, as its firm grounding and future-looking ambit ensure the work will be an indispensable starting point for further scholarship. This collection is essential reading for editors, scholars, students and readers who are invested in the future of textual scholarship and the digital humanities.

Size Matters Federico Buccellati, Sebastian Hageneuer, Sylva Van Der Heyden, Felix Levenson. 2019-08 Bringing together researchers from fields such as archaeology, museology, history, sociology, Mesoamerican studies, and art history, this book discusses terminological and methodological approaches to monumentality in both theoretical contributions and case studies.

People from Our Side Peter Pitseolak, Dorothy Eber. 1975 The text of *People from Our Side* consists of Peter Pitseolak's manuscript -- originally written in syllabics -- and a narrative drawn from interviews conducted by Dorothy Eber with the help of young Inuit interpreters. Peter Pitseolak learned the system of reading and writing brought by the missionaries and from an early age formed the habit of keeping a diary. He took his first photograph for a white man who was afraid to approach a polar bear and later, in the early 1940s, acquired his own camera and taught himself, with the help of his wife Aggeok, to develop films in igloo, tent, and hut. His pictures catch, as no white photographer's could, the authentic quality and detail of Eskimo life in the last days of the camp system. Sweeping from nomadic times to the early 1970s, Peter Pitseolak provides a frank and vigorous account of how change came to Baffin Island. A realist who knew he was providing a social history of a vanishing way of life, his story is a farewell to traditional camp life and to Seekooseelak -- where the people of Cape Dorset once had their camps. -- from google books.

The Nuptial Mystery Angelo Scola. 2005-05-12 Translated by Michelle K. Borrás The idea of love pervades our society, yet it is nearly impossible to answer the question What is love? especially as we witness the divorce of love from sexuality and of sexuality from procreation. Aware that many people today are skeptical about marriage, Angelo Cardinal Scola nevertheless suggests that only in the category of nuptial mystery do we find a way to adequately describe the phenomenon of love. A bright new leader in the Catholic Church, Cardinal Scola argues that the male-female relationship lies near the heart of what it means to bear the image of God. Scola's book explores the essential sexual differences that both separate and unite men and women, and it shows how men and women can realize their purpose in marriage or celibacy. Conversant with papal teaching and Catholic writers from Aquinas to von Balthasar, Cardinal Scola writes with a deep regard for marriage and the family. His *Nuptial Mystery* will leave readers with a thoroughly Christian appreciation for incarnate love.

Cultural Organizations, Networks and Mediators in Contemporary Ibero-America Diana Roig-Sanz, Jaume Subirana. 2020-01-03 This book proposes an innovative conceptual framework to explore cultural organizations at a multilateral level and cultural mediators as key figures in cultural and institutionalization processes. Specifically, it analyzes the role of Ibero-American mediators in the institutionalization of Hispanic and Lusophone cultures in the first half of the 20th century by means of two institutional networks: PEN (the non-governmental writer's association) and the International Institute of Intellectual Cooperation (predecessor to UNESCO). Attempting to combine cultural and global history, sociology, and literary studies, the book uses an analytical focus on intercultural networks and cultural transfer to investigate the multiple activities and roles that these mediators and cultural organizations set in motion. Literature has traditionally studied major figures and important centers of cultural production, but other regions and localities also played a crucial role in the development of intellectual cooperation. This book reappraises the place

of Ibero-America in international cultural relations and retrieves the lost history of key secondary actors. The book will appeal to scholars from international relations, global and cultural history, sociology, postcolonial Studies, world and comparative literature, and New Hispanisms. Ancient Nets and Fishing Gear Tønnes Bekker-Nielsen, Darío Bernal Casasola. 2010 The fishing technology of the Classical world has so far received little systematic attention, neither from historians nor from archaeologists. In this volume, the reader will find a series of studies offering a wide range of approaches to the topic of ancient fishing technology, based on detailed studies of the available literary, archaeological, pictorial and ichthyological evidence as well as on diachronic comparisons with fishing techniques of the Early Medieval and Modern periods. The articles included in the present volume are based on the authors' presentations at an international, interdisciplinary workshop in Cadiz, covering the history of fishing from Pre-history to the present day, with a special emphasis on the Roman period.

The linguistic integration of adult migrants: from one country to another, from one language to another. 2014-01-01 The linguistic integration of migrants affects every aspect of settling in a new country (employment, health, etc.). The aim of this collection of texts is to propose a number of specific measures member states can take to help adult migrants become acquainted with the language of the host country. The main focus is on organising language courses that meet migrants' real communication needs. It is not enough for authorities simply to consider the technical aspects of such courses, they should also design and conduct them in accordance with the fundamental values of the Council of Europe. A number of issues concerning the linguistic integration of adult migrants are presented here, beginning with the notion of linguistic integration itself. Family reunion, the nature of citizenship and the function of language tests, among others, are dealt with from the point of view of language and language use. Readers are invited to reflect on the type of language competences that need to be acquired as well as an appropriate use of the Common European Framework of Reference for Languages. The collection also sets out approaches and instruments designed to assist in implementing effective policies.

Roman Butrint Inge Lyse Hansen, Richard Hodges. 2022-01-15 Butrint, ancient Buthrotum, has taken many forms in different ages, shaped by the near-constant interaction between the place, its lagoonal landscape and the Mediterranean. Though Butrint does not appear on any of the records of early Greek colonization to identify it as a Corcyrean settlement, strong links must have existed between it and the metropolitan Corinthian colony of Corfu. Blessed with springs that possessed healing qualities, a small polis was created - extended to incorporate a healing sanctuary dedicated to Asclepius. Julius Caesar, harboring at Butrint in urgent need of supplies to sustain his struggle against Pompey, must have viewed the sanctuary, ringed by largely dried-out marshland, as the perfect site to settle veterans as a colony. It was an obvious cornerstone in controlling the passage from the Adriatic to the Aegean. The early settlers seem to have been limited in number and possibly mainly of civilian status. However, the political changes to the city's magistrature were immediate, and within a relatively short time-span fundamental changes to the physical make-up of the city were set in motion. Its new Roman status also located Butrint as a directly before the highest authorities in Rome, and within fifteen years or so, under Augustus's guidance following his victory at Actium, the city was refounded as a colony and awarded a pivotal role in Virgil's court-sponsored foundation epic, *The Aeneid*. Now linked to the Victory City of Nicopolis rather than in the shadow of Corfu, Butrint prospered. The urban fabric evolved, sometimes faltered, but was essentially sustained until the later 6th century A.D. This present volume is an assessment of the Roman

archaeology, a compilation of studies and field reports that focuses upon the foundation and early history of the colony.

Material Aspects of Letter Writing in the Graeco-Roman World Antonia Sarri. 2017-11-20 Letter writing was widespread in the Graeco-Roman world, as indicated by the large number of surviving letters and their extensive coverage of all social categories. Despite a large amount of work that has been done on the topic of ancient epistolography, material and formatting conventions have remained underexplored, mainly due to the difficulty of accessing images of letters in the past. Thanks to the increasing availability of digital images and the appearance of more detailed and sophisticated editions, we are now in a position to study such aspects. This book examines the development of letter writing conventions from the archaic to Roman times, and is based on a wide corpus of letters that survive on their original material substrates. The bulk of the material is from Egypt, but the study takes account of comparative evidence from other regions of the Graeco-Roman world. Through analysis of developments in the use of letters, variations in formatting conventions, layout and authentication patterns according to the sociocultural background and communicational needs of writers, this book sheds light on changing trends in epistolary practice in Graeco-Roman society over a period of roughly eight hundred years. This book will appeal to scholars of Epistolography, Papyrology, Palaeography, Classics, Cultural History of the Graeco-Roman World.

Superdiversity Steven Vertovec. 2022-11-15 Superdiversity explores processes of diversification and the complex, emergent social configurations that now supersede prior forms of diversity in societies around the world. Migration plays a key role in these processes, bringing changes not just in social, cultural, religious, and linguistic phenomena, but also in the ways that these phenomena combine with others like gender, age, and legal status. The concept of superdiversity has been adopted by scholars across the social sciences in order to address a variety of forms, modes, and outcomes of diversification. Central to this field is the relationship between social categorization and social organization, including stratification and inequality. Increasingly complex categories of social “difference” have significant impacts across scales, from entire societies to individual identities. While diversification is often met with simplifying stereotypes, threat narratives, and expressions of antagonism, superdiversity encourages a perspective on difference as comprising multiple social processes, flexible collective meanings, and overlapping personal and group identities. A superdiversity approach encourages the re-evaluation and recognition of social categories as multidimensional, unfixed, and porous as opposed to views based on hardened, one-dimensional thinking about groups. Diversification and increasing social complexity are bound to continue, if not intensify, in light of climate change. This will have profound impacts on the nature of global migration, social relations, and inequalities.

Superdiversity presents a convincing case for recognizing new social formations created by changing migration patterns and calls for a re-thinking of public policy and social scientific approaches to social difference. This introduction to the multidisciplinary concept of superdiversity will be of considerable interest to students and researchers in a range of fields in the humanities and social sciences. The Poems in Verse Stéphane Mallarmé.2012 Poetry. Translated from the French by Peter Manson. THE POEMS IN VERSE is Peter Manson's translation of The Poésies of Stéphane Mallarmé. Long overshadowed by Mallarmé's theoretical writings and by his legendary visual poem Un coup de Dés jamais n'abolira le Hasard, the Poésies are lyrics of a uniquely prescient and generative modernity. Grounded in a scrupulous sounding of the complex ambiguities of the original poems, Manson's English translations draw on the resources of the most innovative poetries of our own time these may be the first translations really to trust the English language to bear the full weight of Mallarméan complexity. With THE POEMS IN VERSE, Mallarmé's voice is at last brought back, with all its incisive strangeness, into the conversation it started a hundred and fifty years ago, called contemporary poetry.

Design as Learning Jan Boelen.2019-02-19 Why do design? What is design for? These are forward-looking questions for a creative discipline that seems more slippery to define than ever. In a world of dwindling natural resources, exhausted social and political systems, and an overload of information there are many urgent reasons to reimagine the design discipline, and there is a growing need to look at design education. Learning and unlearning should become part of an on-going educational practice. We need new proposals for how to organise society, how to structure our governments, how to live with, not against, the planet, how to sift fact from fiction, how to relate to each other, and frankly, how to simply survive. The 4th Istanbul Design Biennial, and this publication *Design as Learning* ask: can design and design education provide these critical ideas and strategies? -- Back cover.
