**The Use of Coercive Measures in Forensic Psychiatric Care** Birgit Völlm, Norbert Nedopil. 2018-05-26 This book presents the legal context and describes the ethical and practical challenges when using coercive measures in forensic psychiatric settings. A wide range of aspects relevant to the use of such measures, including environmental, patient-related, and staff-related factors, are explored, and the experience of coercive interventions is described from the staff and the patient perspective. Differences in jurisdictions and examples of good practice are highlighted. The authors are from a range of professional backgrounds, ensuring breadth as well as depth in discussion of the topic. The use of coercive measures, in particular restraint, seclusion, and involuntary medication, for the control of aggression in psychiatry remains controversial. Forensic mental health care deals with individuals who pose a risk to others and often present with significant management problems within institutions. The care of patients in these settings gives rise to debates about the balance between care and safety, and between the interests of the patients and those of the wider society to be protected. Despite these tensions, limited research has been conducted specifically on the use of coercive measures in forensic mental health care. This volume aims to fill the gap and will be of value to all professionals working in forensic psychiatric settings as well as to those working in general psychiatric and custodial settings, law professionals, and patients.

The main aim of the report is to provide a comprehensive and up-to-date assessment of the TB epidemic, and of progress in prevention, diagnosis and treatment of the disease, at global, regional and country levels. This is done in the context of recommended global TB strategies and targets endorsed by WHO's Member States, broader development goals set by the United Nations (UN) and targets set in the political declaration at the first UN high-level meeting on TB (held in September 2018). The 2019 edition of the global TB report was released on 17 October 2019. The data in this report are updated annually. Please note that direct comparisons between estimates of TB disease burden in the latest report and previous reports are not appropriate. The most recent time-series of estimates are published in the 2019 global TB report.

**Managing Emotions in the Workplace** Neal M. Ashkanasy, Wilfred J. Zerbe, Charmine E. J. Hartel. 2016-09-16 The modern workplace is often thought of as cold and rational, as no place for the experience and expression of emotions. Yet it is no more emotionless than any other aspect of life. Individuals bring their affective states and emotional buttons to work, leaders try to engender feelings of passion and enthusiasm for the organization and its mission, and consultants seek to increase job satisfaction, commitment, and trust. This book advances the understanding of the causes and effects of emotions at work and extends existing theories to consider implications for the management of emotions. The international cast of authors examines the practical issues raised when organizations are studied as places where emotions are aroused, suppressed, used, and avoided. This book also joins the debate on how organizations and individuals ought to manage emotions in the workplace. *Managing Emotions in the Workplace* is designed for use in graduate level courses in Organizational Behavior, Human Resource Management, or Organizational Development - any course in which the role of emotions in the workplace is a central concern. Scholars and consultants will also find this book to be an essential resource on the latest theory and practice in this emerging field.
