Desert Island Discs: 70 Years of Castaways Sean Magee.2012-09-13 'For seventy years now Desert Island Discs has managed that rare feat - to be both enduring and relevant. By casting away the biggest names of the day in science, business, politics, showbiz, sport and the arts, it presents a cross-sectional snapshot of the times in which we live. As the decades have passed, the programme has kept pace; never frozen in time yet always, somehow, comfortingly the same.' Kirsty Young BBC Radio 4's Desert Island Discs celebrates its seventieth birthday in 2012. Since the programme's deviser Roy Plomley interviewed comedian Vic Oliver in January 1942, nearly 3,000 distinguished people from all walks of life have been stranded on the mythical island, accompanied by only eight records, one book and a luxury. Here the story of one of BBC Radio 4's favourite programmes is chronicled through a special selection of castaways. Roy Plomley, inventor of the programme as well as its presenter for over forty years, quizzes the young Cliff Richard about 'these rather frenzied movements' the 1960s pop sensation makes on the stage. Robert Maxwell tells Plomley's successor Michael Parkinson that 'I will have left the world a slightly better place by having lived in it.' Diana Mosley assures Sue Lawley that Adolf Hitler was 'extraordinarily fascinating' and had mesmeric blue eyes. And Johnny Vegas tugs Kirsty Young's heart-strings with his account of a childhood so impoverished that family pets were fair game: 'My dad had always claimed that rabbits were

livestock, but we'd never eaten one before.' Desert Island Discs is much more than a radio programme. It is a unique and enduringly popular take on our lives and times - and this extensively illustrated book tells in rich detail the colourful and absorbing story of an extraordinary institution.

How to Get Rich Felix Dennis.2008-06-12 Felix Dennis is an expert at proving people wrong.

Starting as a college dropout with no family money, he created a publishing empire, founded Maxim magazine, made himself one of the richest people in the UK, and had a blast in the process. How to Get Rich is different from any other book on the subject because Dennis isn't selling snake oil, investment tips, or motivational claptrap. He merely wants to help people embrace entrepreneurship, and to share lessons he learned the hard way. He reveals, for example, why a regular paycheck is like crack cocaine; why great ideas are vastly overrated; and why ownership isn't the important thing, it's the only thing.

Radio Fun and the BBC Variety Department, 1922—67 Martin Dibbs.2018-09-17 This book provides a narrative history of the BBC Radio Variety Department exploring, along chronological lines, the workings of, tensions within and the impact of BBC policies on the programme-making department which generated the organisation's largest audiences. It provides an insight into key events, personalities, programmes, internal politics and trends in popular entertainment, censorship and anti-American policy as they individually or collectively affected the Department. Martin Dibbs

examines how the Department's programmes became markers in the daily and weekly lives of millions of listeners, and helped shape the nation's listening habits when radio was the dominant source of domestic entertainment. The book explores events and topics which, while not directly forming part of the Variety Department's history, nevertheless intersected with or had an impact on it. Such topics include the BBC's attitude to jazz and rock and roll, the arrival of television with its impact on radio, the pirate radio stations, and the Popular Music and Gramophone Departments, both of whom worked closely with the Variety Department.

The Home of the Blizzard Sir Douglas Mawson.1915 This account, so profusely illustrated by the magnificent photographs of Frank Hurley is a classic of Polar literature, describing the first major scientific exploring venture by an Australian beyond their shores. Mawson's lone survival after the fatal tragedy of his two companions (Ninnis and Mertz) was to become the most extraordinary epic of survival in Antarctica. He was undoubtedly one of the most outstanding explorers of the 20th century and ranks high among our national icons -- abebooks website.

Film Remakes NA NA.2016-10-03 This is the first book to provide a comprehensive and systematic

account of the phenomenon of cinematic remaking. Drawing upon recent theories of genre and intertextuality, *Film Remakes* describes remaking as both an elastic concept and a complex situation, one enabled and limited by the interrelated roles and practices of industry, critics, and audiences. This approach to remaking is developed across three broad sections: the first deals with issues of production, including commerce and authors; the second considers genre, plots, and structures; and the third investigates issues of reception, including audiences and institutions.

Stress R Us Greeley Miklashek. 2018-04-20 This book is a compilation of what a neuropsychiatrist learned about the causes and cures of human diseases in his 41 year medical practice. I treated 25,000 of my fellows and wrote 1,000,000 Rx in the process. The book is divided into 51 Topics (chapters) and contains over 100 references. It serves as an historical review of the field of stress research as well as animal crowding research, as the two morphed together in my theory of population density stress. Human overpopulation is a fact, as we have far exceeded the earth's carrying capacity for our species and mother nature is attempting to cull our numbers through our multitude of diseases of civilization. Our hunter-gatherer contemporaries, living in their traditional manner in their clan social groups widely distributed in their ecosystem, have none of our diseases. As our extreme gene based altruism has brought us tremendous compassion and technological advances in caring for the diseases of our fellows, it has also brought us tremendous overpopulation and brought us near to ecological collapse. We must face our need to restrict our reproduction or mother nature will do it for us. A case in point: infertility in America has increased 100% in just 34 years, from 1982 to 2016. During the same period, our sperm counts have fallen 60%. No-one is willing to look at the obvious cause: neuro-endocrine inhibition of human reproduction resulting from population density stress. If any of this touches a nerve, please find the time in your busy,

stressful day to stop for an hour and read this ground-breaking book. You may never have heard any of this information from any of your healthcare providers or the mass media. Big Pharma rules the minds of your healthcare providers and the mass media. At the end of my career as a practicing psychiatrist, I had become little more than a prescription writing machine and was actually instructed to stop wasting time talking to your patients and just write their prescriptions. So, I retired and spent the next 5 years writing this book. I hope you find it as illuminating as I did doing the research on our epidemic of stress diseases. No wonder that we are ever more anxious and depressed, in spite of taking our 4,300,000,000 Rx every year! The real cure for our diseases of civilization must be a worldwide reduction in family size and a concerted effort to increase the opportunities for women to access education and work, as well as birth control. The alternative is increasing human disease and infertility from population density stress. Please read this book and tell me if you don't agree with my surprising conclusions. Good luck and God bless us one and all!

Unconventional Methodology in Organization and Management Research Alan Bryman,David A. Buchanan.2018-03-21 Most researchers in organization and management studies stick to two or three traditional research methods like surveys and interviews. Sticking with the familiar is seen as a safe bet, and innovation is discouraged by academic incentives and rewards. But research participants are now suffering from 'survey fatigue', and using the same old methods runs the risk of generating the same old findings. This book describes twelve unconventional methodologies in organization and management research. These include unconventional research settings and data

sources, unconventional research designs and data collection methods, unconventional analytic approaches, and designs and methods that exploit new technology developments. The aim is to encourage dialogue and experimentation with regard to the development of innovative, unconventional approaches to organization and management research. Several commentators have criticized the way in which research methods have become more formulaic, and have argued for greater diversity in research approaches. The methodological perspective that we adopt shapes our interpretation of the information that we gather. Different methods generate different kinds of information, leading to different ways of understanding the phenomena that we are investigating. Our methods influence our styles of theorizing, ways of thinking and reasoning, and forms of writing and reporting research. This book will be of value to academic researchers in organization and management studies, Doctoral candidates, and Masters students on MBA and similar programmes.

Kabbalah, Magic, and the Great Work of Self-transformation Lyam Thomas Christopher.2006

Advancing to higher levels of ritual magic with purpose and power requires an exaltation of consciousness-a spiritual transformation that can serve as an antidote to the seeming banality of modern life. Based on Kabbalistic techniques, the teachings of the Hermetic Order of the Golden Dawn, and an Hermetic tradition spanning nearly two thousand years, this innovative new work introduces the history of the Golden Dawn and its mythology, the Tree of Life, Deities, demons, rules for practicing magic, and components of effective ritual. A comprehensive course of self-initiation using Israel Regardie's seminal Golden Dawn as a key reference point, Kabbalah, Magic and the Great Work of Self-Transformation guides you through the levels of the Golden Dawn system of ritual magic. Each grade in this system corresponds with a sphere in the Kabbalistic Tree of Life and includes daily rituals, required reading, written assignments, projects, and additional exercises.

Knowledgeable and true to tradition, author Lyam Thomas Christopher presents a well-grounded and modern step-by-step program toward spiritual attainment, providing a lucid gateway toward a more awakened state. Finalist for the Coalition of Visionary Resources Award for Best Magick/Shamanism Book

The Spanish Lake Oskar Hermann Khristian Spate.2004-11-01 This work is a history of the Pacific, the ocean that became a theatre of power and conflict shaped by the politics of Europe and the economic background of Spanish America. There could only be a concept of &◆the Pacific once the limits and lineaments of the ocean were set and this was undeniably the work of Europeans. Fifty years after the Conquista, Nueva Espaa and Peru were the bases from which the ocean was turned into virtually a Spanish lake.

The Value of the Humanities Helen Small.2013-10-04 The Value of the Humanities provides a critical account of the principal arguments used to defend the value of the Humanities. The claims considered are: that the Humanities study the meaning-making practices of culture, and bring to their work a distinctive understanding of what constitutes knowledge and understanding; that, though useful to society in many ways, they remain laudably at odds with, or at a remove from, instrumental use value; that they contribute to human happiness; that they are a force for democracy; and that they are a good in themselves, to be valued 'for their own sake'. Engaging closely with contemporary literary and philosophical work in the field from the UK and US, Helen Small distinguishes between arguments that retain strong Victorian roots (Mill on happiness; Arnold on use value) and those that have developed or been substantially altered since. Unlike many works in this field, The Value of the Humanities is not a polemic or a manifesto. Its purpose is to explore

the grounds for each argument, and to test its validity for the present day. Tough-minded, alert to changing historical conditions for argument and changing styles of rhetoric, it promises to sharpen the terms of the public debate.

The Purple Cloud M. P. Shiel.2014-06-22 If now a swell from the Deep has swept over this planetary ship of earth, and I, who alone chanced to find myself in the furthest stern, as the sole survivor of her crew... What then, my God, shall I do?. The Purple Cloud is widely hailed as a masterpiece of science fiction and one of the best last man novels ever written. A deadly purple vapor passes over the world and annihilates all living creatures except one man, Adam Jeffson. He embarks on an epic journey across a silent and devastated planet, an apocalyptic Robinson Crusoe putting together the semblance of a normal life from the flotsam and jetsam of his former existence. As he descends into madness over the years, he becomes increasingly aware that his survival was no accident and that his destiny - and the fate of the human race - are part of a profound, cosmological plan.
