*Project Manager Competency Development Framework* Project Management Institute.2007 Project Manager Competency Development (PMCD) Framework Second Edition provides general context for the definition, assessment and development of project manager competency. The framework outlines the key dimensions of project management competency and identifies those competencies that are most likely to impact project manager performance. Project manager competency consists of three separate dimensions: Knowledge what a project manager

knows about the application of processes, tools and techniques in project activities Performance how a project manager applies project management knowledge to meet project requirements Personal how a project manager behaves when performing activities in a project environment In order to be recognized as fully competent, a project manager must satisfy each of these three dimensions. An individual can demonstrate knowledge competency by obtaining an appropriately credentialed assessment, such as the Project Management Professional (PMP) credential. Since the elements of knowledge competency are detailed in the PMP Examination Specification, the PMCD Framework focuses on the assessment of Performance and Personal competencies.

**Project Management Certification** Alexej Antropov.2011-09 Seminar paper from the year 2011 in the subject Business economics - Business Management, Corporate Governance, grade: 1,7, University of applied sciences, Munich, course: Projektmanagement, language: English, abstract: More than a quarter of enterprises are organising most of their work in

projects. Because of the growing acceptance of project work there is growing need for qualified staff for managing projects. But there has been much debate within the field of project management as to whether it satisfies criteria for status as a profession. Morris and Pinto reported that development and recognition of a distinct profession of project management has certainly been a strong driver in the development of standards for project management. A body of knowledge, standards and related assessment and qualification processes can therefore be seen as essential building blocks in the formation and recognition of a profession. According to Kuster et al. there are two main organisations certifying project management skills: International Project Management Association (IPMA) and Project Management Institute (PMI). The scope of this term paper is to verify the truth of this statement and to provide a critical and comparative market overview about different project management certifications as well as certification methods.
