Red Skin, White Masks Glen Sean Coulthard.2014-08-15 WINNER OF: Frantz Fanon Outstanding Book from the Caribbean Philosophical Association Canadian Political Science Association's C.B. MacPherson Prize Studies in Political Economy Book Prize Over the past forty years, recognition has become the dominant mode of negotiation and decolonization between the nation-state and Indigenous nations in North America. The term "recognition" shapes debates over Indigenous cultural distinctiveness, Indigenous rights to land and self-government, and Indigenous peoples' right to benefit from the development of their lands and resources. In a work of critically engaged political theory, Glen Sean Coulthard challenges recognition as a method of organizing difference and identity in liberal politics, questioning the assumption that contemporary difference and past histories of destructive colonialism between the state and Indigenous peoples can be reconciled through a process of acknowledgment. Beyond this, Coulthard examines an alternative politics—one that seeks to revalue, reconstruct, and redeploy Indigenous cultural practices based on self-recognition rather than on seeking appreciation from the very agents of colonialism. Coulthard demonstrates how a "place-based" modification of Karl Marx's theory of "primitive accumulation" throws light on Indigenous-state relations in settler-colonial contexts and how Frantz Fanon's critique of colonial recognition shows that this relationship reproduces itself over time. This framework strengthens his exploration of the ways that the politics of recognition has come to serve the interests of settler-colonial power. In addressing the core tenets of Indigenous resistance movements, like Red Power and Idle No More, Coulthard offers fresh insights into the politics of active decolonization.

Risk and Culture Mary Douglas,Aaron Wildavsky.1983-10-27 Can we know the risks we face, now or in the future? No, we cannot; but yes, we must act as if we do. Some dangers are unknown; others are known, but not by us because no one person can know everything. Most people cannot be aware of most dangers at most times. Hence, no one can calculate precisely the total risk to be faced. How, then, do people decide which risks to take and which to ignore? On what basis are certain dangers guarded against and others relegated to secondary status? This book explores how we decide what risks to take and which to ignore, both as individuals and as a culture.

The Cultural Turn in U. S. History James W. Cook,Lawrence B. Glickman,Michael O'Malley.2012-06-12 A definitive account of one of the most dominant trends in recent historical writing, The Cultural Turn in U.S. History takes stock of the field at the same time as it showcases exemplars of its practice. The first of this volume's three distinct sections offers a comprehensive genealogy of American cultural history, tracing its multifaceted origins, defining debates, and intersections with adjacent fields. The second section comprises previously unpublished essays by a distinguished roster of contributors who illuminate the discipline's rich potential by plumbing topics that range from nineteenth-century anxieties about greenback dollars to confidence games in 1920s Harlem, from Shirley Temple's career to the story of a Chicano community in San Diego that created a public park under a local freeway. Featuring an equally wide ranging selection of pieces that meditate on the future of the field, the final section explores such subjects as the different strains of cultural history, its relationships with arenas from mass entertainment to public policy, and the ways it has been shaped by catastrophe. Taken together, these essays represent a watershed moment in the life of a discipline, harnessing its vitality to offer a glimpse of the shape it will take in years to come.

Language Daniel L. Everett.2012-03-13 A bold and provocative study that presents language not as an innate component of the brain—as most linguists do—but as an essential tool unique to each culture worldwide. For years, the prevailing opinion among academics has been that language is embedded in our genes, existing as an innate and instinctual part of us. But linguist Daniel Everett argues that, like other tools, language was invented by humans and can be reinvented or lost. He shows how the evolution of different language forms—that is, different grammar—reflects how language is influenced by human societies and experiences, and how it expresses their great variety. For example, the Amazonian Pirahã put words together in ways that violate our long-held understanding of how language works, and Pirahã grammar expresses complex ideas very differently than English grammar does. Drawing on the Wari' language of Brazil, Everett explains that speakers of all languages, in constructing their stories, omit things that all members of the culture understand. In addition, Everett discusses how some cultures can get by without words for numbers or counting, without verbs for "to say" or "to give," illustrating how the very nature of what's important in a language is culturally

determined. Combining anthropology, primatology, computer science, philosophy, linguistics, psychology, and his own pioneering—and adventurous—research with the Amazonian Pirahã, and using insights from many different languages and cultures, Everett gives us an unprecedented elucidation of this society-defined nature of language. In doing so, he also gives us a new understanding of how we think and who we are.

Cultural Selection Gary Taylor.1996-04-04 What is worth remembering? What gets passed down from one generation to another? What does it mean to be human? Culture, Gary Taylor argues, is not what was done but what is remembered, and the social competition among different memories is as dynamically complicated as the struggle for biological survival. That struggle for culture - driven by emotions as basic as grief, pride, and resentment - is the foundation of personal and national identity. Taylor illustrates his arguments by reintroducing us to imaginative achievements that continue to stimulate us long after their creation, from Stonehenge to Hollywood - including Oedipus, Casablanca, the paintings of Velazquez, Michelangelo's sculptures, Japanese literature, Native American narratives, science fiction, the music of Stravinsky, Shakespeare's plays, the Vietnam Veterans Memorial. He also discusses the endurance of social phenomena as disparate as the global impact of the Old Testament and the evolving reputation of Richard Nixon.

The Cultural Wealth of Nations Nina Bandelj, Frederick F. Wherry.2011-07-25 Symbolic resources affect social, cultural, and economic development. The value of being Made in America or Made in Italy, for example, depends not only on the material advantages each place offers but also on the symbolic resources embedded in those places of production. Drawing on case studies that range from the vineyards of South Africa and the textiles of Thailand to the Mundo Maya in Latin America and tourist destinations in Tuscany, this volume examines the various forms that cultural wealth takes, the processes involved in its construction, and the ways it is deployed. Leading scholars from a range of disciplinary backgrounds examine how symbolic resources and cultural understandings help firms and regions develop. Through a thoughtful analysis of current-day cases, as well as historical developments, *The Cultural Wealth of Nations* offers an exciting new alternative to standard economic explanations about the wealth and poverty of nations.

Representing Black Music Culture Bill Banfield.2011-10-07 In this collection of essays, interviews, and profiles, William Banfield reflects on his life as a musician and educator, weaving together pieces of cultural criticism that pay homage to artists who have created and sustained Black music for more than forty years.

Considering Cultural Difference Pauline Uchmanowicz.2004 Part of the Longman Topics reader series, *Considering Cultural Difference* features multiethnic writing from contemporary U.S. authors centered around issues of ritual, representation, and rights. This brief collection of readings examines cultural identity and difference with respect to race, class, gender, and nationality. Thought-provoking selections ask students to think about timely and relevant issues: integration in schools; affirmative action in the workplace, women in sports; living in a multilingual society. Three main sites of cultural difference are addressed: Ritual, Representation, and Rights, each divided into two chapters of five or six essays apiece. Brief apparatus helps students write more thoughtfully in response to the selections. Longman Topics are brief, attractive readers on a single complex, but compelling, topic. Featuring about 30 full-length selections, these volumes are generally half the size and half the cost of standard composition readers.

The Acceleration of Cultural Change R. Alexander Bentley, Michael J. O'Brien.2017-08-25 How culture evolves through algorithms rather than knowledge inherited from ancestors. From our hunter-gatherer days, we humans evolved to be excellent throwers, chewers, and long-distance runners. We are highly social, crave Paleolithic snacks, and display some gendered difference resulting from mate selection. But we now find ourselves binge-viewing, texting while driving, and playing Minecraft. Only the collective acceleration of cultural and technological evolution explains this development. The evolutionary psychology of individuals—the drive for “food and sex”—explains some of our current habits, but our evolutionary success, Alex Bentley and Mike O'Brien explain, lies in our ability to learn cultural know-how and to teach it to the next generation. Today, we are following social media bots as much as we are learning from our ancestors. We are radically changing the way culture evolves. Bentley and O'Brien describe how the transmission of culture has become vast and instantaneous across an Internet of people and devices, after millennia of local ancestral knowledge that evolved slowly. Long-evolved cultural knowledge is aggressively discounted by online algorithms, which prioritize popularity and recency. If children are learning more from Minecraft than from tradition, this is a profound shift in cultural evolution. Bentley and O'Brien examine the broad and shallow model of cultural evolution seen today in the science of networks, prediction markets, and the explosion of digital information. They suggest that in the future, artificial intelligence could be put to work to solve the problem of information overload, learning to integrate concepts over the vast idea space of digitally stored information.

Cultural Capital John Guillory.2013-09-15 “[A] landmark work . . . which showed how literary evaluation draws authority from the institutions—principally universities—within which it is practiced.” —The New Yorker Winner of the René Wellek Prize of the American Comparative Literature Association John Guillory challenges the most fundamental premises of the canon debate by resituating the problem of canon formation in an entirely new theoretical framework. The result is a book that promises to recast not only the debate about the literary curriculum but also the controversy over “multiculturalism” and the current “crisis of the humanities.” Employing concepts drawn from Pierre Bourdieu’s sociology, Guillory argues that canon formation must be understood less as a question of the representation of social groups than as a question of the distribution of “cultural capital” in the schools, which regulate access to literacy, to the practices of reading and writing. “A brilliant analysis of a debate that has come to define our cultural moment. Ceding nothing to sentiment, Guillory has written an intellectually severe and uncompromising study that will leave few of our comfortable commonplaces quite intact. This is, in short, a landmark work; one that will outrage and inform in equal measure.” —Henry Louis Gates, Jr. “This is the very best account I’ve read of how and why literary canons are formed and what can be gained from an understanding of the process of formation. Guillory’s analysis is highly sophisticated, his learning prodigious, and his judgment excellent. *Cultural Capital* is a major study in every way and will be discussed for years to come.” —Marjorie Perloff

Selected Political Writings Stuart Hall.2017-02-02 *Selected Political Writings* gathers Stuart Hall's best-known and most important essays that directly engage with political issues. Written between 1957 and 2011 and appearing in publications such as *New Left Review* and *Marxism Today*, these twenty essays span the whole of Hall's career, from his early involvement with the New Left, to his critique of Thatcherism, to his later focus on neoliberalism. Whether addressing economic decline and class struggle, the Cuban Missile Crisis, or the politics of empire, Hall's singular commentary and theorizations make this volume essential for anyone interested in the politics of the last sixty years.

Varieties of Cultural History Peter Burke.2013-07-08 The aim of this book is both to illustrate and to discuss some of the main varieties of cultural history which have emerged since the questioning of what might be called its classic form, exemplified in the work of Jacob Burckhardt and Johan Huizinga. Among the themes of individual chapters are the history of popular culture, the history of Carnival, the history of mentalities, the history of gestures, the history of jokes, and even the history of dreams. The emphasis of both the introduction and the case-studies which follow is on the variety of forms taken by cultural history today. The classic model has not been replaced by any new orthodoxy, despite the importance of approaches inspired by social and cultural anthropology. Variety is to be found in the cultures studied as well as among their historians. The case-studies included in the volume come not only from Europe (and in particular from Italy) but also from the New World, especially Brazil. Particular emphasis is placed on the importance of cultural encounters, cultural conflicts, and their consequences, whether these consequences should be described in terms of mixing, syncretism or synthesis. Written by one of the leading cultural historians in Europe today, this book will be of particular interest to students of early modern Europe, of the encounters between European culture and the New World, and to students and scholars interested in problems of historiography.

Selected Critical Writings Vol 2 Santayana.1968-09-02 George Santayana (1863-1952) was one of the leading philosophers of his era. His range of interests was wide; in addition to books and essays on philosophical subjects, he wrote literary criticism of the first rank, cultural criticism that remained fresh and valid up to the time of this book's publication in 1968, and autobiographical works which reveal a man of great charm with a deep interest and affection for his acquaintances. This two volume selection of Santayana's writing is exceptionally comprehensive; the editor has been careful to provide passages which adequately illustrate Santayana's views on a wide variety of subjects and his selection includes essays and excerpts from books that had long been unavailable. Volume two contains selections of cultural and social criticism and philosophical writing.

The Cultural Front Michael Denning.1998 As garment workers, longshoremen, autoworkers, sharecroppers and clerks took to the streets, striking and organizing unions in the midst of the Depression, artists, writers and filmmakers joined the insurgent social movement by creating a cultural front. Disney cartoonists walked picket lines, and Billie Holiday sang 'Strange Fruit' at the left-wing cabaret, Café Society. Duke Ellington produced a radical musical, *Jump for Joy*, New York garment workers staged the legendary Broadway revue *Pins and Needles*, and Orson Welles and his Mercury players took their labor operas and anti-fascist Shakespeare to Hollywood and made *Citizen Kane*. A major reassessment of US cultural history, *The Cultural Front* is a vivid mural of this extraordinary upheaval which reshaped American culture in the twentieth century.

Selections from the Prison Notebooks of Antonio Gramsci Antonio Gramsci.1971 ...[I]n the autumn of 1926, on the pretext of an alleged attempt on his life, Mussolini decided to make an end of even the semblance of bourgeois democracy that still survived. All remaining opposition organisations and their publications were banned, and a new, massive series of arrests was launched throughout the country. Among those arrested was Antonio Gramsci. Gramsci was a member of parliament -- but the régime was no longer interested in niceties about parliamentary immunity. He had also, since August 1924, been the general secretary of the Communist Party -- though of course under such political conditions the identity of party officials was kept secret. He was 35 years old. At his trial in 1928, the official prosecutor ended his peroration with the famous demand to the judge: We must stop this brain working for twenty years! But, although Gramsci was to be dead long before those twenty years were up, released, his health broken, only in time to die under guard in a clinic rather than in prison, yet for as long as his physique held out his jailers did not succeed in stopping his brain from working. The product of those years of slow death in prison were the 2,848 pages of handwritten notes which he left to be smuggled out of the clinic and out of Italy after his death, and of which this volume is a selection. -- Pages xvii-xviii of Introduction.

Encyclopedia of Contemporary Literary Theory Irene Rima Makaryk.1993-01-01 The last half of the twentieth century has seen the emergence of literary theory as a new discipline. As with any body of scholarship, various schools of thought exist, and sometimes conflict, within it. I.R. Makaryk has compiled a welcome guide to the field. Accessible and jargon-free, the *Encyclopedia of Contemporary Literary Theory* provides lucid, concise explanations of myriad approaches to literature that have arisen over the past forty years. Some 170 scholars from around the world have contributed their expertise to this volume. Their work is organized into three parts. In Part I, forty evaluative essays examine the historical and cultural context out of which new schools of and approaches to literature arose. The essays also discuss the uses and limitations of the various schools, and the key issues they address. Part II focuses on individual theorists. It provides a more detailed picture of the network of scholars not always easily pigeonholed into the categories of Part I. This second section analyses the individual achievements, as well as the influence, of specific scholars, and places them in a larger critical context. Part III deals with the vocabulary of literary theory. It identifies significant, complex terms, places them in context, and explains their origins and use. Accessibility is a key feature of the work. By avoiding jargon, providing mini-bibliographies, and cross-referencing throughout, Makaryk has provided an indispensable tool for literary theorists and historians and for all scholars and students of contemporary criticism and culture.

Subaltern Social Groups Antonio Gramsci.2021-08-10 Antonio Gramsci is widely celebrated as the most original political thinker in Western Marxism. Among the most central aspects of his enduring intellectual legacy is the concept of subalternity. Developed in the work of scholars such as Gayatri Spivak and Ranajit Guha, subalternity has been extraordinarily influential across fields of inquiry stretching from cultural studies, literary theory, and postcolonial criticism to anthropology, sociology, criminology, and disability studies. Almost every author whose work touches upon subalterns alludes to Gramsci's formulation of the concept. Yet Gramsci's original writings on the topic have not yet appeared in full in English. Among his prison notebooks, Gramsci devoted a single notebook to the theme of subaltern social groups. Notebook 25, which he entitled "On the Margins of History (History of Subaltern Social Groups)," contains a series of observations on subaltern groups from ancient Rome and medieval communes to the period after the Italian Risorgimento, in addition to discussions of the state, intellectuals, the methodological criteria of historical analysis, and reflections on utopias and philosophical novels. This volume presents the first complete translation of Gramsci's notes on the topic. In addition to a comprehensive translation of Notebook 25 along with Gramsci's first draft and related notes on subaltern groups, it includes a critical apparatus that clarifies Gramsci's history, culture, and sources and contextualizes these ideas against his earlier writings and letters. *Subaltern Social Groups* is an indispensable account of the development of one of the crucial concepts in twentieth-century thought.

Potential History Ariella Aïsha Azoulay.2019-11-19 A passionately urgent call for all of us to unlearn imperialism and repair the violent world we share, from one of our most compelling political theorists In this theoretical tour-de-force, renowned scholar Ariella Aïsha Azoulay calls on us to recognize the imperial foundations of knowledge and to refuse its strictures and its many violences. Azoulay argues that the institutions that make our world, from archives and museums to ideas of sovereignty and human rights to history itself, are all dependent on imperial modes of thinking. Imperialism has segmented populations into differentially governed groups, continually emphasized the possibility of progress while it tries to destroy what came before, and voraciously seeks out the new by sealing the past away in dusty archival boxes and the glass vitrines of museums. By practicing what she calls potential history, Azoulay argues that we can still refuse the original imperial violence that shattered communities, lives, and worlds, from native peoples in the Americas at the moment of conquest to the Congo ruled by Belgium's brutal King Léopold II, from dispossessed Palestinians in 1948 to displaced refugees in our own day. In *Potential History*, Azoulay travels alongside historical companions—an old Palestinian man who refused to leave his village in 1948, an anonymous woman in war-ravaged Berlin, looted objects and documents torn from their worlds and now housed in archives and museums—to chart the ways imperialism has sought to order time, space, and politics. Rather than looking for a new future, Azoulay calls upon us to rewind history and unlearn our imperial rights, to continue to refuse imperial violence by making present what was invented as "past" and making the repair of torn worlds the substance of politics.

Cultural Capital Robert Hewison. 2014-11-11 Britain began the twenty-first century convinced of its creativity. Throughout the New Labour era, the visual and performing arts, museums and galleries, were ceaselessly promoted as a stimulus to national economic revival, a post-industrial revolution where spending on culture would solve everything, from national decline to crime. Tony Blair heralded it a “golden age.” Yet despite huge investment, the audience for the arts remained a privileged minority. So what went wrong? In *Cultural Capital*, leading historian Robert Hewison gives an in-depth account of how creative Britain lost its way. From Cool Britannia and the Millennium Dome to the Olympics and beyond, he shows how culture became a commodity, and how target-obsessed managerialism stifled creativity. In response to the failures of New Labour and the austerity measures of the Coalition government, Hewison argues for a new relationship between politics and the arts.
