The Optimist's Guide to Letting Go Amy E. Reichert.2018-05-15

Three generations. Seven days. One big secret. The author of *The Coincidence of Coconut Cake* unfolds a mother-daughter story told by three women whose time to reckon with a life-altering secret is running out. Gina Zoberiski wants to make it through one day without her fastidious mother, Lorraine, cataloguing all her faults, and her sullen teenage daughter, May, snubbing her. Too bad there's no chance of that. Her relentlessly sunny disposition annoys them both, no matter how hard she tries. Instead, Gina finds order and comfort in obsessive list-making and her work at Grilled G's, the gourmet grilled cheese food truck built by her late husband. But when Lorraine suffers a sudden stroke, Gina stumbles upon a family secret Lorraine's kept hidden for forty years. In the face of her mother's failing health and her daughter's rebellion, this optimist might find that piecing together the truth is the push she needs to let go...

Cognition and Tool Use Christopher Baber.2003-07-24

The ability to use tools is a distinguishing feature of human beings. It represents a complex psychomotor activity that we are only now beginning to comprehend. Robust new theoretical accounts allow us to better understand how people use tools and explain

differences in human and animal tool use from the perspective of cognitive science. Our understanding needs to be grounded upon research into how people use tools, which draws upon many disciplines, from ergonomics to anthropology to cognitive science to neuropsychology. *Cognition and Tool Use: Forms of Engagement in Human and Animal Use of Tools* presents a single coherent account of human tool use as a complex psychomotor activity. It explains how people use tools and how this activity can succeed or fail, then describes the design and development of usable tools. This book considers contemporary tool use in domains such as surgery, and considers future developments in human-computer interfaces, such as haptic virtual reality and tangible user interfaces. No other single text brings together the research from the different disciplines, ranging from archaeology and anthropology to psychology and ergonomics, which contribute to this topic. Graduate students, professionals, and researchers will find this guide to be invaluable.

Moral Progress in Dark Times Markus Gabriel.2022-11-15 The challenges we face today are unprecedented, from the existential crisis of climate change to the global security threats posed by aggression in Ukraine and elsewhere. Add to this the crisis of liberal democracy and we seem to be swirling in a state of moral disarray, unsure whether there are any principles to which we can appeal today that would be anything other than particularistic. In contrast to this view, Markus Gabriel puts forward the bold argument that there are guiding moral principles for human behaviour. These guiding principles extend across cultures; they are universally valid and form the source of universal values in the twenty-first century. In developing what he calls a 'New Moral Realism', Gabriel breathes fresh life into the idea that humanity's task on our planet is to enable moral progress through cooperation. It is only by achieving moral progress in a way that incorporates universal values - and thus embraces all of humanity - that we can avoid the abyss into which we will otherwise slide. Written with verve, wit and imagination, Gabriel's call for a new enlightenment is a welcome antidote to the value relativism and nihilism of our times, and it lays out a moral framework within which we can work together - as surely

we must - to deal with the great challenges we now face.

Company Laws of the EU Andrea Vicari, Alexander Schall. 2020

This book aims to fill a gap in the process of confrontation between the disciplines, case laws and literature of the central EU member states. In particular it aims to address the difficulty of finding sources for scholars and professionals explaining the rules and guidelines of corporate law in the different European states. The main features of the discipline of Corporate Law in Germany, England, France, Italy, Spain, Poland, Romania and the Netherlands are illustrated. The objective of the work is not only to describe the main features of the discipline, but especially to highlight the most important critical profiles, and particularly those under the scrutiny of the case law and most studied (as problematic) by the doctrine.--Bloomsbury Publishing.

The Farm in the Green Mountains Alice Herdan-

Zuckmayer. 2017-05-02 The Farm in the Green Mountains is a story of a refugee family finding its true home—thousands of miles from its homeland. Alice and Carl Zuckmayer lived at the center of Weimar era Berlin. She was a former actor turned medical student, he was a playwright, and their circle of friends included Stefan Zweig, Alma Mahler, and Bertolt Brecht. But then the Nazis took over and Carl's most recent success, a play satirizing German militarism, impressed them in all the wrong

ways. The couple and their two daughters were forced to flee, first to Austria, then to Switzerland, and finally to the United States. Los Angeles didn't suit them, neither did New York, but a chance stroll in the Vermont woods led them to Backwoods Farm and the eighteenth-century farmhouse where they would spend the next five years. In Europe, the Zuckmayers were accustomed to servants; in Vermont, they found themselves building chicken coops, refereeing fights between fractious ducks, and caring for temperamental water pipes "like babies." But in spite of the endless work and the brutal, depressing winters, Alice found that in America she had at last discovered her "native land." This generous, surprising, and witty memoir, a best seller in postwar Germany, has all the charm of an unlikely romantic comedy.

eIDAS-Regulation Alessio Zaccaria, Martin Schmidt-Kessel, Reiner Schulze, Alberto M. Gambino. 2020-03-05 This book provides rule-by-rule commentaries on the Regulation (EU) No 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market. The eIDAS regulation aims at providing a framework for secure and trustworthy electronic transactions in the EU. This volume offers comprehensive comments on all provisions of this regulation containing references to European scholarly writing. As a cross-border project this book is written by an international group of contributors and provides analysis from different European countries. In order to assess the arising legal issues the contributions to this book reflect both aspects of the eIDAS regulation: On one hand the technological-neutral approach intended by this regulation, but also the nevertheless technically determined definitions and provisions of this very specific field of law.

Big Data and Law Maria Cristina Caldarola, Joachim Schrey. 2022 Caldarola/Schrey Big Data and Law “Big Data” refers to large amounts of data originating from various sources which are stored, processed and analysed with specific applications to obtain all kind of (inter-) dependency analyses, environmental and trend research, and for system and production control purposes. As in data mining, knowledge discovery is a priority for Big Data applications. Big Data is now seen as a new

source and a “reserve” of additional revenue. When dealing with Big Data, it is not enough to have the necessary technical expertise and infrastructure. Rather, the legal scope must also be observed. As a result of the applicability of the EU General Data Protection Regulation since 25 May 2018 and the associated potentially substantial fines for data protection infringements, data protection supervisory authorities in particular will intensify their supervisory measures and also focus their attention on Big Data applications. With numerous guidelines and graphics, this book is a practical legal guide to gathering, storing and analysing personal and other types of data in Big Data applications. It provides comprehensive, practice-oriented assistance and reliability for planning everyday business in a Big Data environment.

European Preventive Restructuring Christoph G Paulus, Reinhard Dammann, Tom Braegelmann. 2021-05-20 The European Directive (Directive (EU) 2019/1023 of the European Parliament and of the Council of 20 June 2020 on preventive restructuring frameworks, on discharge of debts and disqualification, and on measures to increase the efficiency of procedures concerning restructuring,

insolvency and discharge of debt) has to be transposed into national legislation by 26 June 2021. The main features of the Directive are: - the obligatory making available of early warning systems; - the obligatory creation of an insolvency avoidance mechanism; - the determination of certain insolvency related officers' duties; - the uniformisation of discharge rules among member states; and - measures to increase the national insolvency laws' efficiency In this book a team of European-wide recognised, experienced insolvency law experts, some of whom had been involved in the drafting process of the Directive, analyse the Directive. The authors focus not only on the officials tasked in the national surroundings with drafting the national statutes but also on the wider implications which, one way or the other, will be national law. The commentary, thus, serves also the purposes of practitioners and judges in the field of restructuring.

Library Design for the 21st Century Diane Koen,Traci Engel Lesneski.2018-12-03 Library design in the 21st century has one common theme: collaboration is at the heart of innovation.

Designing modern libraries is a complex process involving many stakeholders and participants. Libraries of all types work with an

almost limitless range of constituent groups for input, buy-in and successful implementation. Securing support for new library buildings and renovations of libraries engages many people: library clients, community members, faculty, funding agencies, donors, governing authorities, librarians, architects, interior designers and planners. Telling the right story and getting to the end game demand carefully crafted approaches, wide-ranging skills, a unified vision and productive teamwork. The IFLA Library Buildings and Equipment Section has selected the best papers presented by award-winning architects and international thought leaders from the academic and public library sector at our recent satellite conferences and seminars: Collaborative Strategies for Successful Library Design (Chicago, Illinois), What comes after the Third Place? (Columbus, Ohio); Key Issues for Library Space: International Perspectives (Maynooth, Ireland); Storage, the final frontier (Munich, Germany) and Telling and selling the space story (Wrocław, Poland). The stories by the library and design professionals within this publication illustrate how powerful a role partnerships, outreach and cooperation play in a library project's success.

WJP Rule of Law Index 2016 .2016-10-20 The World Justice Project (WJP) joins efforts to produce reliable data on rule of law through the WJP Rule of Law Index 2016, the sixth report in an annual series, which measures rule of law based on the experiences and perceptions of the general public and in-country experts worldwide. We hope this annual publication, anchored in actual experiences, will help identify strengths and weaknesses in each country under review and encourage policy choices that strengthen the rule of law. The WJP Rule of Law Index 2016 presents a portrait of the rule of law in each country by providing scores and rankings organized around eight factors: constraints on government powers, absence of corruption, open government, fundamental rights, order and security, regulatory enforcement, civil justice, and criminal justice. A ninth factor, informal justice,

is measured but not included in aggregated scores and rankings. These factors are intended to reflect how people experience rule of law in everyday life. The country scores and rankings for the WJP Rule of Law Index 2016 are derived from more than 110,000 households and 2,700 expert surveys in 113 countries and jurisdictions. The Index is the world's most comprehensive data set of its kind and the only to rely solely on primary data, measuring a nation's adherence to the rule of law from the perspective of how ordinary people experience it. These features make the Index a powerful tool that can help identify strengths and weaknesses in each country, and help to inform policy debates, both within and across countries, that advance the rule of law.

Experiments in Ethics Kwame Anthony Appiah. 2010-03-30 In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics.

Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of experimental philosophy, provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

Pangolin is enjoying himself on the royal swing in the bright summer sunshine when suddenly, the ropes break and--OW!--he falls to the ground. What will I tell the queen?! Pangolin worries. He races to the stables to ask his friend Badger. Tell her the musicians needed the swing's rope for their lutes! the stablemaster advises. Fox, the castle guard, has a different idea: Might you say that the King needed to repair his royal jump rope? Pug, Cat, and Goose all have suggestions, too. But which story will Pangolin tell the queen?! Here is a charming picture book, full of delightful animal friends, about finding the courage to be honest with those around you--and with yourself.
