Poison Candy Elizabeth Parker,Mark Ebner.2014-02-04 In August 2009, former madam Dalia Dippolito conspired with a hit man to arrange her ex-con husband's murder. Days later, it seemed as if all had gone according to plan. The beautiful, young Dalia came home from her health club to an elaborate crime scene, complete with yellow tape outlining her townhome and police milling about. When Sgt. Frank Ranzie of the Boynton Beach, Florida, police informed her of her husband Michael's apparent murder, the newlywed Dippolito can be seen on surveillance video collapsing into the cop's arms, like any loving wife would—or any wife who was pretending to be loving would. The only thing missing from her performance were actual tears. ... And the only thing missing from the murder scene was an actual murder. Tipped off by one of Dalia's lovers, an undercover detective posing as a hit man met with Dalia to plot her husband's murder while his team planned, then staged the murder scenario—brazenly inviting the reality TV show Cops along for the ride. The Cops video went viral, sparking a media frenzy: twisted tales of illicit drugs, secret boyfriends, sex-for-hire, a cuckolded former con man, and the defense's ludicrous claim that the entire hit had been staged by the intended victim for reality TV fame. In Poison Candy, case prosecutor Elizabeth Parker teams with bestselling crime writer Mark Ebner take you behind and beyond the courtroom scenes with astonishing never-before-revealed facts, whipsaw plot twists, and exclusive photos and details far too lurid for the trial that led to 20 years in state prison for Dalia Dippolito.

Advances in Evolutionary and Deterministic Methods for Design, Optimization and Control in Engineering and Sciences David Greiner,Blas Galván,Jacques Périaux,Nicolas Gauger,Kyriakos Giannakoglou,Gabriel Winter.2014-11-14 This book contains state-of-the-art contributions in the

field of evolutionary and deterministic methods for design, optimization and control in engineering and sciences. Specialists have written each of the 34 chapters as extended versions of selected papers presented at the International Conference on Evolutionary and Deterministic Methods for Design, Optimization and Control with Applications to Industrial and Societal Problems (EUROGEN 2013). The conference was one of the Thematic Conferences of the European Community on Computational Methods in Applied Sciences (ECCOMAS). Topics treated in the various chapters are classified in the following sections: theoretical and numerical methods and tools for optimization (theoretical methods and tools; numerical methods and tools) and engineering design and societal applications (turbo machinery; structures, materials and civil engineering; aeronautics and astronautics; societal applications; electrical and electronics applications), focused particularly on intelligent systems for multidisciplinary design optimization (mdo) problems based on multi-hybridized software, adjoint-based and one-shot methods, uncertainty quantification and optimization, multidisciplinary design optimization, applications of game theory to industrial optimization problems, applications in structural and civil engineering optimum design and surrogate models based optimization methods in aerodynamic design.

The Problem with Survey Research George Beam. 2017-09-08 The Problem with Survey Research makes a case against survey research as a primary source of reliable information. George Beam argues that all survey research instruments, all types of asking-including polls, face-to-face interviews, and focus groups-produce unreliable and potentially inaccurate results. Because those who rely on survey research only see answers to questions, it is impossible for them, or anyone else, to evaluate the results. They cannot know if the answers correspond to respondents' actual behaviors (objective phenomena) or to their true beliefs and opinions (subjective phenomena). Reliable information can only be acquired by observation, experimentation, multiple sources of data, formal model building and testing, document analysis, and comparison. In fifteen chapters divided into six parts-Ubiquity of Survey Research, The Problem, Asking Instruments, Asking Settings, Askers, and Proper Methods and Research Designs-The Problem with Survey Research demonstrates how asking instruments, settings in which asking and answering take place, and survey researchers themselves skew results and thereby make answers unreliable. The last two chapters and appendices examine observation, other methods of data collection and research designs that may produce accurate or correct information, and shows how reliance on survey research can be overcome, and must be.

Serger Repair for the Home Sewer Reuben O. Doyle. 2016-12-21 Do it yourself Serger machine repair!!! Sound like a far fetched idea? Not so, according to Reuben O. Doyle, a sewing machine repairman of 25 years and author of Serger Repair for the Home Sewer. In over 75% of the repair jobs I get, the home sewer/crafter could easily have handled the job if only they'd known what to look for. In about 25% of the repair jobs I go out on, the problem is such a minor one that anyone with a checklist of what to look for could fix it in seconds, but I have to charge them the same service fee as on any repair job. Of course any broken parts need to be taken to an authorized service repairman for repair or replacement, but those types of service calls are by far the minority! Written in step by step instructional style, this book takes the serger machine owner through problem/solution scenarios allowing them to fix problems that can cause a lot of frustration for those who sew. Whether you have an older model machine, or one of the newer models, this book will help keep your general repair costs to a minimum. The home sewer can now just look up the problem in this handy guide book and follow the instructions on how to fix it. YES, it's now as easy to fix your serger machine as picking up a book!

Linux in a Nutshell Ellen Siever, Aaron Weber, Stephen Figgins, Robert Love, Arnold Robbins. 2005 Over the last few years, Linux has grown both as an operating system and a tool for personal and business use. Simultaneously becoming more user friendly and more powerful as a back-end system, Linux has achieved new plateaus: the newer filesystems have solidified, new commands and tools have appeared and become standard, and the desktop--including new desktop environments--have proved to be viable, stable, and readily accessible to even those who don't consider themselves computer gurus. Whether you're using Linux for personal software projects, for a small office or home office (often termed the SOHO environment), to provide services to a small group of colleagues, or to administer a site responsible for millions of email and web connections each day, you need quick access to information on a wide range of tools. This book covers all aspects of administering and making effective use of Linux systems. Among its topics are booting, package management, and revision control. But foremost in Linux in a Nutshell are the utilities and commands that make Linux one of the most powerful and flexible systems available. Now in its fifth edition, Linux in a Nutshell brings users up-to-date with the current state of Linux. Considered by many to be the most complete and authoritative command reference for Linux available, the book covers all substantial user, programming, administration, and networking commands for the most common Linux distributions. Comprehensive but concise, the fifth edition has been updated to cover new features of major Linux distributions. Configuration information for the rapidly growing commercial network services and community update services is one of the subjects covered for the first time. But that's just the beginning. The book covers editors, shells, and LILO and GRUB boot options. There's also coverage of Apache, Samba, Postfix, sendmail, CVS, Subversion, Emacs, vi, sed, gawk, and much more. Everything that system administrators, developers, and power users need to know about Linux is referenced here, and they will turn to this book again and again.

Pale Horse Brett Battles. 2012 A simple push of a button and the world will never be the same. Martina Gable returns home to spend Christmas break with her family, but the relaxing vacation she expects is not even close to what she'll get. Sanjay knows more than he should about Project Eden's plan, and will do whatever he can to keep the girl he loves alive and safe. A boy named Brandon Ash runs for his life in the hills of Montana, wanting only to see his family again. But first there is Daniel, the boy's father, who watches Olivia Silva's finger hover over the enter key that will decide the fate of humanity. Do you think you're safe? -- p. [4] of cover.

Twist of Time Karen Michelle Nutt, Erin E. M. Hatton, Jean Adams. 2014-08-18 Time = the fourth dimension and a measure in which events can be ordered from the past through the present into the future But what happens when two of those dimensions collide? Six stories of love past and present: from the breathtaking fjords and conquering Vikings of Norway to the lush green isles of Ireland and its ever-battling lairds; from the white sand dunes and sculptures of Egypt and the vanquishing Rome to a simpler life in the early USA, including the iconic Route 66.
