A Theory of Domestic and International Trade Finance Mr.JaeBin Ahn.2011-11-01 This paper provides a theory model of trade finance to explain the great trade collapse. The model shows that, first, the riskiness of international transactions rises relative to domestic transactions during economic downturns, and second, the exclusive use of a letter of credit in international transactions exacerbates a collapse in trade during a financial crisis. The basic model considers banks' optimal screening decisions in the presence of counterparty default risks. In equilibrium, banks will maintain a higher precision screening test for domestic firms and a lower precision screening test for foreign firms, which constitutes the main mechanism of the model.

International Marketing Hans Mühlbacher, Lee Dahringer, Helmuth Leih.1999 In the age of globalism, international marketers need to adopt a global perspective if they are to compete successfully. *International Marketing: A Global Perspective* starts from the premise that any firm - regardless of size - can compete globally. The challenge for today's manager is to identify and seize the opportunities most appropriate to their company. *International Marketing: A Global Perspective* examines the main issues facing companies that want to compete successfully in the global marketplace. It combines extensive coverage of the relevant theories with a practical approach to the issues. Written in a clear and accessible style, it is divided into several sections covering: assessing a potential market economically, culturally and politically; identifying cultural similarities and differences; deciding which products to market internationally and how to price and promote them; motivating marketing managers to compete globally; building and implementing successful marketing strategies - from making strategic decisions and choosing market positions and entry methods to developing a marketing plan. Using real-world case studies and vignettes centred on contemporary problems and issues, *International Marketing: A Global Perspective* will be ideal for undergraduates, MBA students and students following executive courses in international marketing or strategy.

Brothers at War Tekeste Negash, Kjetil Tronvoll.2000 The war between Eritrea and Ethiopia, which began in May 1998, took the world by surprise. During the war, both sides mobilized huge forces along their common borders and spent several hundred million dollars on military equipment. Outside observers found it difficult to evaluate the highly polarized official statements and proclamations issued by the two governments in conflict. *Brothers at War* presents important, contextual aspects to explain the growing discord between the two formerly friendly governments. It looks at the

historical relations between the two countries since the late nineteenth century, the historical border issues from local perspectives, and the complicated relations between the former liberation fronts that subsequently formed the current governments of the two countries.

Rethinking Pastoralism in Africa Tekeste Negash.2000 Hodgson (anthropology, Rutgers U.) presents 11 contributions by feminist scholars which challenge conventional theories of pastoralism in Africa that assume a static society in which men invariably dominate the economies and political spheres. Major themes addressed are the ways in which pastoralist women produce items of material culture that are central to the expression, elaboration, and negotiation of aspects of pastoralist society; gender roles and relations in domains of power such as property ownership, conflict resolution, and the use of the environment; the mistaken conflation of patrilineality and patrilocality of pastoralism as indicators of patriarchy; and the ways in which pastoralist women negotiate the many changes brought about by their encounters with the ideas, practices, and agents of development and society. c. Wages of Crime R.T. Naylor.2002-02-15 Outraged by recent encroachments on citizens' rights that have been justified by claims that new and more restrictive laws will combat the ravages of international crime, Naylor contends that no police campaign that fails to address the demand for illegal goods and services has ever succeeded. He supports this claim with detailed - and often entertaining - accounts of past criminal operations and law enforcement's attempts to stop them. *Wages of Crime* makes a persuasive case for the need to address the underlying economic and political factors that encourage criminal enterprises rather than relying on restrictive laws.
