Damnation Marked SM Reine.2014-03-01 There's something in the earth deep below Elise Kavanagh's territory. A shadow is falling upon local demons to devour their flesh and harvest their souls. And it's coming for Elise next. The Union has an easy way out. They want to send Elise into hiding again with her former partner, James Faulkner. All she has to do is surrender the territory and trust that they can protect the ethereal ruins, the dark gate, and the city she's come to know as home. Greater powers have other plans for Elise and her fabled power as Godslayer--plans that mean surrendering her life and blood to the most powerful demon alive. But if she descends, there's no turning back. Once she gazes into the abyss, it will gaze back into her...and Elise will be damned forever.

The IoT Physical Layer Ibrahim (Abe) M. Elfadel,Mohammed Ismail.2018-09-03 This book documents some of the most recent advances on the physical layer of the Internet of Things (IoT), including sensors, circuits, and systems. The application area selected for illustrating these advances is that of autonomous, wearable systems for real-time medical diagnosis. The book is unique in that it adopts a holistic view of such systems and includes not only the sensor and processing subsystems, but also the power, communication, and security subsystems. Particular attention is paid to the integration of these IoT subsystems as well as the prototyping platforms needed for achieving such integration. Other unique features include the discussion of energy-harvesting subsystems to achieve full energy autonomy and the consideration of hardware security as a requirement for the integrity of the IoT physical layer. One unifying thread of the various designs considered in this book is that they have all been fabricated and tested in an advanced, low-power CMOS process, namely GLOBALFOUNDRIES 65nm CMOS LPe.

Criminal Competency on Trial Mark C. Bardwell,Bruce A. Arrigo.2002 Criminal Competency on Trial examines the legal standards by which one can stand trial, and the psychological instruments by which one's mental health status is assessed. Acknowledging that determinations of trial fitness represent the most significant mental health inquiry pursued in the system of criminal law today, this book carefully explains and thoroughly reviews the legal and psychological limits of competency to stand trial (CST). To highlight these limits, authors Bardwell and Arrigo systematically investigate the controversial and high profile case of Colin Ferguson. Mr. Ferguson was identified as the New York City railway killer who, following a competency finding, elected to represent himself and was found guilty of all criminal charges. The text proposes a series of clear, practical, and concise justice policy reforms, designed to improve how the CST doctrine is understood and employed by lawyers, judges, psychologists, and other forensic mental health professionals. The book concludes by demonstrating where and how these policy recommendations would substantially change the application of the CST doctrine, especially in the case of Colin Ferguson and with other high stakes defendants, including that of Theodore Kaczynski (a.k.a. the una-bomber).
