Illiberal Liberal States Elspeth Guild, Kees Groenendijk.2016-05-13 Understanding the dynamics of the illiberal practices of liberal states is increasingly important in Europe today. This book examines the changing relationship between immigration, citizenship and integration at the European and national arenas. It studies some of the main effects and questions the comprehensiveness of the exchange and coordination of public responses to the inclusion of third country nationals in Europe, as well as their compatibility with a common European immigration policy driven by a rights-based approach and the respect of the principles of fair and equal treatment of third country nationals. The volume reviews key national experiences of immigration and citizenship laws, the use of integration and the 'moving of ideas' between national arenas. The framing of integration in immigration and citizenship law and the ways in which policy convergence is being achieved through the EU framework on integration raises a number of conceptual dilemmas and a set of definitional premises in need of reflection and consideration.

Language Testing, Migration and Citizenship Guus Extra, Massimiliano Spotti, Piet Van Avermaet.2011-10-27 What is required to achieve civic integration and citizenship in nation states across the world? Should language testing be a part of it? This book addresses the urgent need to develop a fuller conceptual and theoretical basis for language testing than is currently available, to enable widespread discussion of this theme and the concomitant linguistic and cultural requirements. The policy proposals for civic integration have so far been conducted almost entirely at a national level, and with little regard for the experiences of a countries with long traditions of migration, such as the USA, Canada, the UK or Australia. At the same time, EU enlargement and the ongoing rise in the rate of migration into and across Europe suggest that these issues will continue to grow in importance. This book raises the level of discussion to take account of international developments and to promote a more coherent and soundly based debate. It will appeal to researchers and academics working in sociolinguistics and language education, as well as those working on language policy.

Text Complexity and Reading Comprehension Tests Erik Castello.2008 Based on the analysis of a specially compiled corpus of internationally recognized English as a foreign language (EFL) reading tests at different levels of proficiency, this volume explores the relation between the complexity of written texts and the difficulty of reading comprehension tests. It brings together linguistic investigations into the text-inherent complexity of the tests and a study of the data derived from their administration to groups of Italian university students. The study of text complexity draws on corpus linguistics, text linguistics and systemic functional linguistics. Both quantitative and qualitative analyses are carried out on the language used in the reading texts and in the related tasks that make up the corpus of tests. The assessment of test difficulty, on the other hand, is informed by research on language testing, and, in particular, by findings and methodologies of Classical Test Theory and Item Response Theory. Relevant aspects of these theories are used to analyze and interpret both the data obtained from the administration of the tests and the data collected by means of feedback questionnaires completed by test takers. The application of such diverse methodologies and the subsequent comparison of the results of the analyses has brought out interesting correlations between text-inherent complexity, perceived test difficulty and actual test difficulty.

Multilingualism, Discourse, and Ethnography Sheena Gardner, Marilyn Martin-Jones.2012-06-14 Over the last twenty years, sociolinguistic research on multilingualism has been transformed. Two processes have been at work: first, an epistemological shift to a critical ethnographic approach, which has contributed to a larger turn toward post-structuralist perspectives on social life. Second, the effects of globalization—transnational population flows, new communication technologies, transformations in the political and economic landscape—have sparked increasing concern about the implications of these changes for our understanding of the relationship between language and society. A new sociolinguistics of multilingualism is being forged: one that takes account of the new communicative order, while retaining a central concern with the processes in the construction of social difference. The contributors to this volume have been at the forefront of these epistemological shifts. They write here about the conceptual and methodological challenges posed by these shifts, and the profound changes that we are witnessing in the late modern era.

Uncertain citizenship Anne-Marie Fortier. 2021-04-13 Uncertainty is central to the governance of citizenship, but in ways that erase, even deny, this uncertainty. This book investigates uncertain citizenship from the unique vantage point of 'citizenisation': twenty-first-century integration and naturalisation measures that make and unmake citizens and migrants, while indefinitely holding many applicants for citizenship in what Fortier calls the 'waiting room of citizenship'. Fortier's distinctive theory of citizenisation foregrounds how the full achievement of citizenship is a promise that is always deferred: if migrants and citizens are continuously citizenised, so too are they migratised. Citizenisation and migratisation are intimately linked within the structures of racial governmentality that enables the citizenship of racially minoritised citizens to be questioned and that casts them as perpetual migrants. Drawing on multi-sited fieldwork with migrants applying for citizenship or settlement and with intermediaries of the state tasked with implementing citizenisation measures and policies, Fortier brings life to the waiting room of citizenship, giving rich empirical backing to her original theoretical claims. Scrutinising life in the waiting room enables Fortier to analyse how citizenship takes place, takes time and takes hold in ways that conform, exceed, and confound frames of reference laid out in both citizenisation policies and taken-for-granted understandings of 'the citizen' and 'the migrant'. Uncertain Citizenship's nuanced account of the social and institutional function of citizenisation and migratisation offers its readers a grasp of the array of racial inequalities that citizenisation produces and reproduces, while providing theoretical and empirical tools to address these inequalities.

Life in the United Kingdom Great Britain: Home Office. 2007-03-26 Since 2005, everyone who applies to become a British citizen has to show their knowledge of the English language and of life in the UK in one of two ways: by taking a special ESOL (English for Speakers of Other Languages) course, or by taking the Life in the UK test. From April 2007, everyone who applies for permanent residence in the UK will also be required to take one of these two tests. This is the second edition of the official handbook which covers all the questions that may be asked in the test, and it is valid for all tests taken from April 2007. The handbook contains chapters on: the making of the United Kingdom, summarising its history; a changing society, including issues of migration and the changing role of women; a profile of Britain today, including its nations and regions, religion, customs and traditions; how Britain is governed, including the British Constitution and its role in Europe and the world; everyday needs, covering topics of housing, health, education, money, leisure and travel; employment issues; knowing the law, including the civil and criminal legal system; sources of help and information, including public libraries and the police service; and building better communities, including participating in the local community and opportunities for volunteering.

From Migrant to Citizen: Testing Language, Testing Culture C. Slade, M. Möllering. 2010-05-28 In this impressive volume a combination of theorists - linguists, historians and lawyers - address the subject of citizenship testing for language proficiency and 'cultural' knowledge. Discussing themes of identity and cultural belonging, they draw out the implications for Australia and the wider international community.
