International Conference on Education and Management Science (ICEMS2014) .2014-09-24

2014 International Conference on Education and Management Science (ICEMS2014) will be held in Beijing, China on August 19-20, 2014. The main purpose of this conference is to provide a common forum for researchers, scientists, and students from all over the world to present their recent findings, ideas, developments and application in the border areas of Education and Management Science. It will also report progress and development of methodologies, technologies, planning and implementation, tools and standards in information systems. Education is an internal topic. It is a process of delivering knowledge in a basic meaning. Humans are hard to define the actual definition of education. But it is the key point for our society to step forward. Management science is the discipline that adapts the scientific approach for problem solving to help managers making informed

decisions. The goal of management science is to recommend the course of action that is expected to yield the best outcome with what is available.

A First Course in Applied Mathematics Jorge Rebaza.2021-04-27 Explore real-world applications of selected mathematical theory, concepts, and methods Exploring related methods that can be utilized in various fields of practice from science and engineering to business, A First Course in Applied Mathematics details how applied mathematics involves predictions, interpretations, analysis, and mathematical modeling to solve real-world problems. Written at a level that is accessible to readers from a wide range of scientific and engineering fields, the book masterfully blends standard topics with modern areas of application and provides the needed foundation for transitioning to more advanced subjects. The author utilizes MATLAB® to showcase the presented theory and illustrate interesting real-world applications to Google's web page ranking algorithm, image compression, cryptography, chaos, and waste management systems. Additional topics covered include: Linear algebra Ranking web pages Matrix factorizations Least squares Image compression Ordinary differential equations Dynamical systems Mathematical models Throughout the book, theoretical and applications-oriented problems and exercises allow readers to test their comprehension of the presented material. An accompanying website features related MATLAB® code and additional resources. A First Course in Applied Mathematics is an ideal book for mathematics, computer science, and engineering courses at the upper-undergraduate level. The book also serves as a valuable reference for practitioners working with mathematical modeling, computational methods, and the applications of mathematics in their everyday work.

Language and Literacy Rachel Whittaker, Anne McCabe, Mick O'Donnell. 2006-12-08 This volume examines the relationship between language and literacy from a systemic functional perspective. The book starts with a retrospective view on the development of language education practices, written by eminent linguistics Michael Halliday and Ruqaiya Hasan, and then shows how this approach is implemented today. The second section presents a detailed analysis of how considerations of literacy education are approached in educational systems around the world. The contributors examine issues such as metadiscourse, genre, cultural politics, and how systemic functional grammar can help to raise literacy standards. The final section looks at literacy in more specific disciplines, including history, literature, science and student writing. The essays collected here present a comprehensive analysis of language and literacy from a systemic functional

perspective, written by academics at the forefront of the field. It will be of interest to researchers in systemic functional linguistics, or language and education.

Innovation and change in English language education Ken Hyland, Lillian L C Wong. 2013-06-19

Questions about what to teach and how best to teach it are what drive professional practice in the English language classroom. Innovation and change in English language education addresses these key questions so that teachers are able to understand and manage change to organise teaching and learning more effectively. The book provides an accessible introduction to current theory and research in innovation and change in ELT and shows how these understandings have been applied to the practical concerns of the curriculum and the classroom. In specially commissioned chapters written by experts in the field, the volume sets out the key issues in innovation and change and shows how these relate to actual practice offers a guide to innovation and change in key areas grounded in research relates theory to practice through the use of illustrative case studies and examples brings together the very best scholarship in TESOL and language education from around the world This book will be of interest to upper undergraduate and graduate students in applied linguistics, language education and TESOL as well as pre-service and in-service teachers, teacher educators, researchers and administrators keen to create and manage teaching and learning more effectively.

What English Language Teachers Need to Know Volume III MaryAnn Christison, Denise E.

Murray. 2021-10-25 Designed for pre-service and novice teachers in ELT, What English Language Teachers Need to Know Volumes I, II, and III are companion textbooks organized around the key

question: What do teachers need to know and be able to do in order to help their students to learn English? Thoroughly revised and updated, the second edition of Volume III explores the contexts for ELT curricula; explains key processes in curriculum design; and sets out approaches to curricula that are linguistic-based, content-based, learner centered, and learning centered. Organized around the three pillars of teaching—planning, instructing, and assessing—chapters in the second edition are updated to include current research and theory to meet the needs of today’s teachers, and feature new or revised vignettes and activities. New chapters help teachers understand both the technological and multilingual approaches that learners need to succeed today. The comprehensive texts of this series are suitable resources for teachers across different contexts—where English is the dominant language, an official language, or a foreign language; for different levels—elementary/primary, secondary, university, or adult education; and for different learning purposes—general English, workplace English, English for academic purposes, or English for specific purposes.

Applied Languages: Theory and Practice in ESP Jordi Piqué Angordans,David J. Viera.1997 Today more and more linguists and language specialists the world over are acknowledging the vital role of ESP within the English language teaching and learning area. Consequently, teachers and learners alike are discovering that there is a wider scope available to them in the field. Hopefully,

the joint effort that went into the publishing of this volume will serve to motivate others to continue working in this direction.

Global TESOL for the 21st Century Heath Rose, Mona Syrbe, Anuchaya Montakantiwong, Natsuno Funada. 2020-05-27 This book explores the impact of the spread of English on language teaching and learning. It provides a framework for change in English language teaching to better reflect global realities and current research. The authors examine the pedagogical implications of the global spread of English, drawing on world Englishes, English as a lingua franca, and global Englishes research. The book proposes key innovations for teaching English as an international language, and outlines key areas for future classroom-based research. The book is essential reading for postgraduate researchers, teachers and teacher trainers in TESOL and second language education programmes.

Language Curriculum Design John Macalister, I.S.P. Nation. 2009-09-10 Crystal-clear and comprehensive yet concise, this text describes the steps involved in the curriculum design process, elaborates and justifies these steps, and provides opportunities for practicing and applying them. The description of the steps is done at a general level so that they can be applied in a wide range of particular circumstances. The process comes to life through plentiful examples of actual applications of the steps. Each chapter includes: examples from the authors' experience and from published research tasks that encourage readers to relate the steps to their own experience case studies and suggestions for further reading that put readers in touch with others' experience Curriculum, or course, design is largely a 'how-to-do-it' activity that involves the integration of knowledge from many of the areas in the field of Applied Linguistics, such as language acquisition research, teaching methodology, assessment, language description, and materials production. Combining sound

research/theory with state-of-the-art practice, Language Curriculum Design is widely applicable for ESL/EFL language education courses around the world.

Proceedings of the 19th International Conference of the Asia Association of Computer-Assisted Language Learning (AsiaCALL 2022) Vu Phi Ho Pham, Andrew Lian, Ania Lian, Ngoc Tue Hoang. 2023-04-07 This is an open access book. We really appreciate the contributions to the success of the 18th AsiaCALL from participants from the United States, Spain, Australia, Japan, South Korea, Austria, Indonesia, India, Philippines, Thailand, Bangladesh, Taiwan, Saudi Arabia, and Palestine, and Vietnam. We also acknowledge the efficient local organizers from Hoa Sen University who paid great efforts and time to run the 18th AsiaCALL International Conference online. Without you, such effective colleagues, AsiaCALL could not gain such good prestigious fame. AsiaCALL is honored and delighted to announce that AsiaCALL2022, the 19th International Conference of the Asia Association of Computer-Assisted Language Learning, will be held on November 26-27, 2022. It will be hosted by the Hanoi University of Industry (HaUI), Ha Noi, Vietnam, at 298 Cau Dien street, Bac Tu Liem district, Hanoi, Vietnam. The Conference will be hybrid - both virtual mode (delegates outside of VN) and face-to-face mode (local delegates). Aims and Scope The mission of the AsiaCALL International Conference (AsiaCALL) is to give researchers, educators, and teachers from all over the world a place to share their teaching experience and classroom research. This is done through conferences and seminars. Selected full papers presented at the AsiaCALL International Conference will be published in the Conference Proceedings, and Journals with Open Access to share the participants' research, teaching experiences. Furthermore, ASIACALL is a place where its members can be able to network and share work and research interests with other professionals in the field to maintain collaboration and advocate the use of technology in your educational environments.

Applied English Course: a Practical Hand Book of Spoken and Written English Manjunatha Bedre N.1999

Introducing English for Specific Purposes Laurence Anthony.2018-05-15 Introducing English for Specific Purposes presents the key concepts and practices of ESP in a modern, balanced, and comprehensive way. This book defines ESP and shows how the approach plays a crucial role in the world of English language teaching. Explaining how needs analysis, language and learning objectives, materials and methods, and evaluation combine to form the four main pillars of ESP, the book includes: practical examples that illustrate how the core theories and practices of ESP can be applied in real-world academic and occupational settings; discussion of some of the most hotly debated issues in ESP; insights on how ESP courses can be organized and integrated to form a complete program; reflection boxes, practical tasks, extension research questions, and resources for further reading in each chapter. Introducing English for Specific Purposes serves as an ideal textbook for graduate and advanced undergraduate students studying courses on English for Specific Purposes or English for Academic Purposes, as part of degrees in English for Specific Purposes, Education, ELT, Applied Linguistics, TESOL or TEFL. This comprehensive publication is also an invaluable reference resource for pre-service and in-service teachers of ESP, and for English program managers and administrators.

Task-Based Instruction in Foreign Language Education Betty Lou Leaver,Jane R. Willis.2004-12-30 Task-based language instruction has proven to be highly effective, but surprisingly underutilized. Theory can only go so far and hands-on experience can greatly speed and enhance the learning of a second language. Nineteen talented instructors who have successfully implemented task-based programs explain the principles behind the programs, discuss how problems were resolved, and

share details on class activities and program design. Each chapter takes the reader through the different stages in designing and setting up such programs, adjusting them, and appraising and testing them in normal classroom conditions. This book covers TBI syllabus and program design and is based on actual classroom experience. Any one of the courses or programs discussed can serve as models for others. Many of the contributors are highly respected practitioners who are presenting their programs for the first time, while others are regular participants in today's ongoing dialogue about teaching methods. Full of concrete, adaptable models of task-based language teaching drawn from a number of countries and eleven different languages—including Arabic, Chinese, Czech, English, French, German, Korean, Spanish, and Ukrainian—Task-Based Instruction in Foreign Language Education presents proven, real-world, practical courses and programs; and includes web-based activities. It demonstrates useful and practical ways to engage students far beyond what can be learned from reading textbook dialogue. TBI involves the student directly with the language being taught via cognitively engaging activities that reflect authentic and purposeful use of language, resulting in language-learning experiences that are pleasurable and effective. For all instructors seeking to help their learners enhance their understanding and grasp of the foreign language they are learning, Task-Based Instruction in Foreign Language Education is a rich and rewarding hands-on guide to effective and transformative learning.

Improving Large-Scale Assessment in Education Marielle Simon, Kadriye Ercikan, Michel Rousseau. 2012-08-21 Large-scale assessments (LSAs) play a growing role in education policy decisions, accountability, and education planning worldwide. This book focuses on central issues that are key components of successful planning, development and implementation of LSAs. The book's main distinction is its focus on practice-based, cutting-edge research. This is achieved by having chapters co-authored by world-class researchers in collaboration with measurement practitioners. The result is a how-to book whose language is accessible to practitioners and graduate students as well as academics. No other book so thoroughly covers current issues in the field of large-scale assessment. An introductory chapter is followed by sixteen chapters that each focus on a specific issue. The content is prescriptive and didactic in nature but based on the most recent scientific research. It includes successful experiences, exemplary practices, training modules, interesting breakthroughs or alternatives, and promising innovations regarding large-scale assessments. Finally, it covers meaningful topics that are currently taking center stage such as motivating students, background questionnaires, comparability of different linguistic versions of assessments, and cognitive modeling of learning and assessment.

Course Design for TESOL Florin Mihai, Kerry L. Purmensity. 2016 Course Design for TESOL offers a unique approach of integrating curriculum with teaching activities to allow language educators to utilize the text in a variety of courses in a TESOL program. Although the authors assume readers have a basic knowledge of English grammar, this textbook/resource is designed to be comprehensible to those who have not had an SLA or Applied Linguistics course. Because each language skill is discussed in detail in terms of important theories and concepts and actual teaching activities are included, the book can also be used in a Methods course or a combined Curriculum Design-Methods (or Methods and Materials) course. Part I explores the basic language acquisition theories and their influences on current teaching practices in the field. Part II then moves on to the core elements of designing a curriculum or course: conducting the needs analysis, setting of course goals/objectives, designing the syllabus, and writing lesson plans. Part III: Instructional Activities and Assessment Techniques features chapters on the teaching of listening, speaking, reading, writing, grammar, and culture. Within each of these chapters, the authors address the fundamental issues related to the teaching of each skill and then discuss the components of a good activity for that skill (and how to design one), and then offer four sample activities (one for each type of syllabus) and guidance on assessing that skill. The activities can be adapted for use in a variety of classrooms and settings. Part IV addresses contemporary trends--curriculum issues in North America and Europe (standards and educational policy), practices in teaching in Asia (particularly China and Korea), and technology-enhanced learning.

Applied Linguistics in Language Education Steven McDonough. 2017-07-05 'Applied Linguistics for Language Education' covers those areas of applied language study that are most directly relevant to language teaching, testing, and teacher education. It focuses on the fundamental questions raised

for research by the practice of language teaching and research. The reader is thus introduced to the current research climate through consideration of germane controversial issues. If any conclusion about applied linguistic research in the last twenty years is possible, it is that we cannot take anything for granted! Steven McDonough opens with examples of language teaching, teaching materials, and learning a foreign language, which teachers and language learners will recognise, drawing out questions from these which are addressed throughout the rest of the text. Arguments and data from research of all kinds are brought to bear on these and other background issues that are raised, for example: the nature and effects of classroom discourse; the challenges and utility of linguistic theory and linguistic descriptions; what knowing a second language means for proficiency and for processing; nature and nurture in second language learning; how people process language in classrooms and beyond; the role of instruction and the roles of teachers; and measuring achievement. Complex issues are laid out in a clear and accessible style, and many examples are used, mainly, but not exclusively, from English and learning English as a second language. However, the principles apply to learning or teaching any language as a second or foreign language, and 'Applied Linguistics for Language Education' is the most concise overview of current linguistics presently available.

Introducing Course Design in English for Specific Purposes Lindy Woodrow. 2017-11-06

Introducing Course Design in English for Specific Purposes is an accessible and practical introduction to the theory and practice of developing ESP courses across a range of disciplines. The book covers the development of courses from needs analysis to assessment and evaluation, and also comes with samples of authentic ESP courses provided by leading ESP practitioners from a range of subject and global contexts. Included in this book are: The basics of ESP course design The major

current theoretical perspectives on ESP course design Tasks, reflections and glossary to help readers consolidate their understanding Resources for practical ESP course development Examples of authentic ESP courses in areas such as business, aviation and nursing Introducing Course Design in English for Specific Purposes is essential reading for pre-service and in-service teachers, and students studying ESP and applied linguistics.

English in the Disciplines Christoph A Hafner, Lindsay Miller. 2018-08-06 The context for the teaching and learning of English for specific disciplinary purposes is undergoing profound changes under the influence of economic globalization and new digital communication technologies. English in the Disciplines demonstrates how fundamental principles of ESP, to tailor language learning materials to the needs of specific groups of learners, can be adapted to new contexts of learning in the digital age. Based on sustained research into students' experiences in an ESP context in Hong Kong, this volume provides an empirically grounded and practical methodology to ESP learning and course design and features: • mixed-method case studies; • links between theory and practice, with plentiful examples of teaching materials and learning activities; • recognition of the effect of new technologies and globalization on the practice of ESP, highlighting problems and providing practical

solutions; • a new pedagogical model for ESP course design, addressing multiple dimensions relevant to today's ESP learners including learner autonomy, genre, multimodality and digital literacies, plurilingual practices, and project-based learning and collaboration. English in the Disciplines provides key reading for anyone studying and researching this topic.

The Cambridge Introduction to Applied Linguistics Susan Conrad,Alissa Hartig,Lynn Santelmann.2020-07-30 Written by a global team, this up-to-date introduction to applied linguistics helps students learn what it's like to do applied linguistics, and not just read about theoretical concepts. First, it provides frameworks for understanding both the shared characteristics of work in applied linguistics and the diversity of topics and analyses. Each chapter then highlights a topic area, covering key concepts, a specific project undertaken by the authors, and their personal reflections on entering the field. Hands-on analysis and other application activities also encourage students to test different skills related to each chapter. Finally, students are introduced to the tools they need to continue in applied linguistics: how to read and write empirical research, how to evaluate primary literature, and starting points for expanding their interest in specific subject areas. The authors provide examples from different geographical regions and languages to engage an international audience. At the same time, multilingualism, interdisciplinarity, and technology are integrated as themes within the text to reflect how these areas are now interwoven throughout

applied linguistics.
