**The Prague Spring 1968** Jaromir Navr til.1998-01-01 In addition to revealing the events surrounding the invasion of Czechoslovakia in 1968, this is the first book to document a Cold War crisis from both sides of the Iron Curtain. It is based on unprecedented access to the previously closed archives of each member of the Warsaw Pact, as well as once highly classified American documents from the National Security Council, CIA, and other intelligence agencies. Presented in a highly readable volume, the book offers top-level documents from Kremlin Politburo meetings, multilateral sessions of the Warsaw Pact leading up to the decision to invade, transcripts of KGB-recorded telephone conversations between Leonid Brezhnev and Alexander Dubcek. To provide a historical and political context, the editors have prepared essays to introduce each section of the volume. A chronology, glossary and bibliography offer further background information for the reader. The editors have a unique perspective to offer to foreign audiences since they are members of the commission appointed by Vaclav Havel to investigate the events of 1967-1970.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. part of the Habsburg Empire. The Habsburg Empire and its successor states were home to developments that shaped Central Europe's scholarship well into the twentieth century. Universities became centers of both state- and nation-building, as well as of confessional resistance, placing scholars if not in conflict, then certainly at odds with the neutral international orientation of academe. By going beyond national narratives, Surman reveals the Empire as a state with institutions divided by language but united by legislation, practices, and other influences. Such an approach allows readers a better view to how scholars turned gradually away from state-centric discourse to form distinct language communities after 1867; these influences affected scholarship, and by examining the scholarly record, Surman tracks the turn. Drawing on archives in Austria, the Czech Republic, Poland, and Ukraine, Surman analyzes the careers of several thousand scholars from the faculties of philosophy and medicine of a number of Habsburg universities, thus covering various moments in the history of the Empire for the widest view. *Universities in Imperial Austria 1848-1918* focuses on the tension between the political and linguistic spaces scholars occupied and shows that this tension did not lead to a gradual dissolution of the monarchy's academia, but rather to an ongoing development of new strategies to cope with the cultural and linguistic multitude.

always evolving. These influences have contributed to the need for more socialemotional support and the desire of students and teachers alike to find and express their voices. Since the publication of the 2002 Handbook volume focusing on curriculum, instruction, and assessment, the ideas, approaches, and practices of middle school educators and researchers have also needed to evolve and change in many ways to meet these changing realities and the needs of students, teachers, and schools. This volume includes chapters focusing on varying aspects of curriculum, instruction, and assessment currently being implemented in middle grades classrooms across the country.

**Connexity** Geoff Mulgan.2011-09-30 CONNEXITY is the philosophical counterpart to Will Hutton's essentially political book. It looks at the profound tension that exists between two recent achievements of humanity: greater freedom (over how to live, who to love, what to believe and say, where to trade), and greater interdependence, or 'connexity' (through the financial markets, military structures, the internet, the ecosystem). This tension has led to crisis: institutions, including governments, sense themselves to be inadequate; individuals are faced with a mass of conflicting information and values. The issue we face, which will ultimately determine human survival in our densely packed planet, is how the tension between these two can be resolved, and a new order established. Mulgan presents his own powerful solution to this crisis. It is based around the notion of 'connexity': breaking down our rigid sense of ourselves as isolated units and seeing our lives as part of a system, a positive network of co-responsibility.
