**Proceedings of the 2nd International Conference on Internet, Education and Information Technology (IEIT 2022)** Ahmed El-Hashash, Fony Dameaty Hutagalung, Ahmed Said Ghonim, Kun Zhang. 2023-01-14 This is an open access book. As a leading role in the global megatrend of scientific innovation, China has been creating a more and more open environment for scientific innovation, increasing the depth and breadth of academic cooperation, and building a community of innovation that benefits all. These endeavors have made new contribution to globalization and creating a community of shared future. To adapt to this changing world and China's fast development in this new area, the 2nd International Conference on Internet, Education and Information Technology (IEIT 2022) is to be held in April 15-17, 2022. This conference takes "bringing together global wisdom in scientific innovation to promote high-quality development as the theme and focuses on research fields including information technology, education, big data, and Internet. This conference aims to expand channels of international academic exchange in science and technology, build a sharing platform of academic resources, promote scientific innovation on the global scale, improve academic cooperation between China and the outside world. It also aims to encourage exchange of information on research frontiers in different fields, connect the most advanced academic resources in China and abroad, turn research results into industrial solutions, bring together talents, technologies and capital to boost development.

### Cases on Inquiry through Instructional Technology in Math and Science

Lennox, Lesia.2012-01-31 There exists a wealth of information about inquiry and about science, technology, engineering, and mathematics (STEM), but current research lacks meaningfully written, thoughtful applications of both topics.Cases on Inquiry through Instructional Technology in Math and Science represents the work of many authors toward meaningful discourse of inquiry used in STEM teaching. This book presents insightful information to teachers and teacher education candidates about using inquiry in the real classroom, case studies from which research suggests appropriate uses, and tangible direction for creating their own inquiry based STEM activities. Sections take the reader logically through the meaning of inquiry in STEM teaching, how to use technology in modern classrooms,

STEM projects which successfully integrate inquiry methodology, and inquiry problem solving within STEM classrooms with the aim of creating activities and models useful for real-world classrooms.

*Uses of Technology in Primary and Secondary Mathematics Education* Lynda Ball, Paul Drijvers, Silke Ladel, Hans-Stefan Siller, Michal Tabach, Colleen Vale.2018-05-14 This book provides

international perspectives on the use of digital technologies in primary, lower secondary and upper secondary school mathematics. It gathers contributions by the members of three topic study groups from the 13th International Congress on Mathematical Education and covers a range of themes that will appeal to researchers and practitioners alike. The chapters include studies on technologies such as virtual manipulatives, apps, custom-built assessment tools, dynamic geometry, computer algebra systems and communication tools. Chiefly focusing on teaching and learning mathematics, the book also includes two chapters that address the evidence for technologies' effects on school mathematics. The diverse technologies considered provide a broad overview of the potential that digital solutions hold in connection with teaching and learning. The chapters provide both a snapshot of the status quo of technologies in school mathematics, and outline how they might impact school mathematics ten to twenty years from now.

**Education in the Global City** Aaron Koh, Terence

Chong. 2017-10-02 Education in the Global City examines

education in Singapore through the critical lens of

'manufacturing'. The book brings together two disparate fields which inform each other, education and the 'global city'; and the book's contributors analyse and critique the manufacturing of Singapore education and Singapore's global city formation. The collection covers vocational education, language policies, Higher Education, English education, critical thinking, sex education, creativity, and critical feminist scholarship. Collectively, the book pries open the ideology of the manufacturing education system, and points out the tension between the nation and its ideologies, and the 'global city' aspirations. It also asks how education contributes to, and is shaped by, the market realities of

Singapore's global city ambitions - which are at odds with the nationalistic local agenda and priorities of nation-building. In interrupting and speaking against the prevailing (and narrow) manufacturing of education for a teleological end, in spite of Singapore's successful nation-building, this book is an important contribution to critical education scholarship. This book was originally published as a special issue of *Discourse: Studies in the Cultural Politics of Education*.
