Executive Functions and the Frontal Lobes Vicki Anderson,Rani Jacobs,Peter J. Anderson.2010-10-18

This volume has as its primary aim the examination of issues concerning executive function and frontal lobe development. While many texts have addressed these issues, this is the first to do so within a specifically developmental framework. This area of cognitive function has received increasing attention over the past decade, and it is now established that the frontal lobes, and associated executive functions, are critical for efficient functioning in daily life. It is also clear, and of particular relevance to this text, that these functions develop gradually through childhood, and then deteriorate during old age. These developmental trajectories, and the impact of any interruption to them, are the focus of this volume.

He highlights the role of mind in health in *The Spiritual Heart of Tibetan Medicine*, delving into the practices of 'lojong' - training the mind - and meditation, and the ultimate healing that comes through recognizing the nature of mind. Finally, Rinpoche gives advice on how to survive the spiritual path in *View and Wrong View and Misunderstandings*. Destructive Emotions Daniel Goleman.2008-11-19 *Why do seemingly rational, intelligent people commit acts of cruelty and violence? *What are the root causes of destructive behavior? *How can we control the emotions that drive these impulses? *Can we learn to live at peace with ourselves and others? Imagine sitting with the Dalai Lama in his private meeting room with a small group of world-class scientists and philosophers. The talk is lively and fascinating as these leading minds grapple with age-old questions of compelling contemporary urgency. Daniel Goleman, the internationally bestselling author of Emotional Intelligence, provides the illuminating commentary—and reports on the breakthrough research this historic gathering inspired. Destructive Emotions Buddhist philosophy tells us that all personal unhappiness and interpersonal conflict lie in the “three poisons”: craving, anger, and delusion. It also provides antidotes of astonishing psychological sophistication—which are now being confirmed by modern neuroscience. With new high-tech devices, scientists can peer inside the brain centers that calm the inner storms of rage and fear. They also can demonstrate that awareness-training strategies such as meditation strengthen emotional stability—and greatly enhance our positive moods. The distinguished panel members report these recent findings and debate an exhilarating range of other topics: What role do destructive emotions play in human evolution? Are they “hardwired” in our bodies? Are they universal, or does culture determine how we feel? How can we nurture the compassion that is also our birthright? We learn how practices that reduce negativity have also been shown to bolster the immune system. Here, too, is an enlightened proposal for a school-based program of social and emotional learning that can help our children increase self-awareness, manage their anger, and become more empathetic. Throughout, these provocative ideas are brought to life by the play of personalities, by the Dalai Lama’s probing

questions, and by his surprising sense of humor. Although there are no easy answers, the dialogues, which are part of a series sponsored by the Mind and Life Institute, chart an ultimately hopeful course. They are sure to spark discussion among educators, religious and political leaders, parents—and all people who seek peace for themselves and the world. The Mind and Life Institute sponsors cross-cultural dialogues that bring together the Dalai Lama and other Buddhist scholars with Western scientists and philosophers. Mind and Life VIII, on which this book is based, took place in Dharamsala, India, in March 2000.

A Great Deception Western Shugden Society.2010 A courageous and compelling account of Tibetan history and the activities of the current Dalai Lama that stand in stark contrast to popular perceptions of a holy politician. With an extensive compilation of news stories, documents, personal accounts, and chronologies, a tangle of religion and politics is revealed that plays out in Tibetan exile communities and across the international stage, embodied in the person of the 14th Dalai Lama. The aims of this book are religious--to end an illegal ban on a mainstream Buddhist practice that the Dalai Lama has personally rejected and maligned. However, to get to the heart of this human rights issue and to gain the support of those who can affect its resolution, the book endeavors to follow knotted threads of political ambitions, deception, greed, and betrayal to unravel the popular mythology that surrounds the iconic Dalai Lama of Tibet.

A Geography Of Time Robert N. Levine.2008-08-01 In this engaging and spirited book, eminent social psychologist Robert Levine asks us to explore a dimension of our experience that we take for granted—our perception of time. When we travel to a different country, or even a different city in

the United States, we assume that a certain amount of cultural adjustment will be required, whether it's getting used to new food or negotiating a foreign language, adapting to a different standard of living or another currency. In fact, what contributes most to our sense of disorientation is having to adapt to another culture's sense of time. Levine, who has devoted his career to studying time and the pace of life, takes us on an enchanting tour of time through the ages and around the world. As he recounts his unique experiences with humor and deep insight, we travel with him to Brazil, where to be three hours late is perfectly acceptable, and to Japan, where he finds a sense of the long-term that is unheard of in the West. We visit communities in the United States and find that population size affects the pace of life—and even the pace of walking. We travel back in time to ancient Greece to examine early clocks and sundials, then move forward through the centuries to the beginnings of “clock time” during the Industrial Revolution. We learn that there are places in the world today where people still live according to “nature time,” the rhythm of the sun and the seasons, and “event time,” the structuring of time around happenings (when you want to make a late appointment in Burundi, you say, “I’ll see you when the cows come in”). Levine raises some fascinating questions. How do we use our time? Are we being ruled by the clock? What is this doing to our cities? To our relationships? To our own bodies and psyches? Are there decisions we have made without conscious choice? Alternative tempos we might prefer? Perhaps, Levine argues, our goal should be to try to live in a “multitemporal” society, one in which we learn to move back and forth among nature time, event time, and clock time. In other words, each of us must chart our own geography of time. If we can do that, we will have achieved temporal prosperity.

Assuming no prior knowledge the text offers a clear introduction to the traditional topics of structural linguistics (theories of sound, form, meaning, and language change), and in addition provides full coverage of contextual linguistics, including separate chapters on discourse, dialect variation, language and culture, and the politics of language. There are also up-to-date separate chapters on language and the brain, computational linguistics, writing, child language acquisition, and second-language learning. The breadth of the textbook makes it ideal for introductory courses on language and linguistics offered by departments of English, sociology, anthropology, and communications, as well as by linguistics departments.

The Arts of India, Southeast Asia, and the Himalayas at the Dallas Museum of Art Dallas Museum of Art, Anne R. Bromberg.2013 In recent years, the Dallas Museum of Art has expanded its collection of South Asian art from a small number of Indian temple sculptures to nearly 500 works, including Indian Hindu and Buddhist sculptures, Himalayan Buddhist bronze sculptures and ritual objects, artwork from Southeast Asia, and decorative arts from India's Mughal period. Artworks in the collection have origins from the former Ottoman empire to Java, and architectural pieces suggest the grandeur of buildings in the Indian tradition. This volume details the cultural and artistic significance of more than 140 featured works, which range from Tibetan thangkas and Indian miniature paintings to stone sculptures and bronzes. Relating these works to one another through interconnecting narratives and cross-references, scholars and curators provide a broad cultural history of the region. Buddhism and Science Donald S. Lopez Jr..2009-05-15 Beginning in the nineteenth century and

continuing to the present day, both Buddhists and admirers of Buddhism have proclaimed the compatibility of Buddhism and science. Their assertions have ranged from modest claims about the efficacy of meditation for mental health to grander declarations that the Buddha himself anticipated the theories of relativity, quantum physics and the big bang more than two millennia ago. In *Buddhism and Science*, Donald S. Lopez Jr. is less interested in evaluating the accuracy of such claims than in exploring how and why these two seemingly disparate modes of understanding the inner and outer universe have been so persistently linked. Lopez opens with an account of the rise and fall of Mount Meru, the great peak that stands at the center of the flat earth of Buddhist cosmography—and which was interpreted anew once it proved incompatible with modern geography. From there, he analyzes the way in which Buddhist concepts of spiritual nobility were enlisted to support the notorious science of race in the nineteenth century. Bringing the story to the present, Lopez explores the Dalai Lama's interest in scientific discoveries, as well as the implications of research on meditation for neuroscience. Lopez argues that by presenting an ancient Asian tradition as compatible with—and even anticipating—scientific discoveries, European enthusiasts and Asian elites have sidestepped the debates on the relevance of religion in the modern world that began in the nineteenth century and still flare today. As new discoveries continue to reshape our understanding of mind and matter, *Buddhism and Science* will be indispensable reading for those fascinated by religion, science, and their often vexed relation.

The Persianate World Nile Green.2019-04-09 A free open access ebook is available upon publication. Learn more at www.luminosoa.org. Persian is one of the great lingua francas of world history. Yet despite its recognition as a shared language across the Islamic world and beyond, its scope, impact, and mechanisms remain underexplored. A world historical inquiry into pre-modern

cosmopolitanism, *The Persianate World* traces the reach and limits of Persian as a Eurasian language in a comprehensive survey of its geographical, literary, and social frontiers. From Siberia to Southeast Asia, and between London and Beijing, this book shows how Persian gained, maintained, and finally surrendered its status to imperial and vernacular competitors. Fourteen essays trace Persian's interactions with Bengali, Chinese, Turkic, Punjabi, and other languages to identify the forces that extended "Persographia," the domain of written Persian. Spanning the ages of expansion and contraction, *The Persianate World* offers a critical survey of both the supports and constraints of one of history's key languages of global exchange.

thematic parts, spanning four centuries of Botticelli's artistic fame and reception from the fifteenth century. Each part comprises a number of essays and includes a short introduction which positions them within the wider scholarly literature on Botticelli. The parts are organised chronologically beginning with discussion of the artist and his working practice in his own time, moving onto the progressive rediscovery of his work from the late eighteenth to the turn of the twentieth century, through to his enduring impact on contemporary art and design. Expertly written by researchers and eminent art historians and richly illustrated throughout, the broad range of essays in this book make a valuable contribution to Botticelli studies.

Architects of Buddhist Leisure Justin Thomas McDaniel.2018-04-30 Buddhism, often described as an austere religion that condemns desire, promotes denial, and idealizes the contemplative life, actually has a thriving leisure culture in Asia. Creative religious improvisations designed by Buddhists have been produced both within and outside of monasteries across the region—in Nepal, Japan, Korea, Macau, Hong Kong, Singapore, Laos, Thailand, and Vietnam. Justin McDaniel looks at the growth of Asia's culture of Buddhist leisure—what he calls “socially disengaged Buddhism”—through a study of architects responsible for monuments, museums, amusement parks, and other sites. In conversation with noted theorists of material and visual culture and anthropologists of art, McDaniel argues that such sites highlight the importance of public, leisure, and spectacle culture from a Buddhist

perspective and illustrate how “secular” and “religious,” “public” and “private,” are in many ways false binaries. Moreover, places like Lek Wiriyaphan’s Sanctuary of Truth in Thailand, Suối Tiên Amusement Park in Saigon, and Shi Fa Zhao’s multilevel museum/ritual space/tea house in Singapore reflect a growing Buddhist ecumenism built through repetitive affective encounters instead of didactic sermons and sectarian developments. They present different Buddhist traditions, images, and aesthetic expressions as united but not uniform, collected but not concise: Together they form a gathering, not a movement. Despite the ingenuity of lay and ordained visionaries like Wiriyaphan and Zhao and their colleagues Kenzo Tange, Chan-soo Park, Tadao Ando, and others discussed in this book, creators of Buddhist leisure sites often face problems along the way. Parks and museums are complex adaptive systems that are changed and influenced by budgets, available materials, local and global economic conditions, and visitors. Architects must often compromise and settle at local optima, and no matter what they intend, their buildings will develop lives of their own. Provocative and theoretically innovative, *Architects of Buddhist Leisure* asks readers to question the very category of “religious” architecture. It challenges current methodological approaches in religious studies and speaks to a broad audience interested in modern art, architecture, religion, anthropology, and material culture.

Descartes' Error Antonio Damasio.2005-09-27 Since Descartes famously proclaimed, I think, therefore I am, science has often overlooked emotions as the source of a person’s true being. Even modern neuroscience has tended, until recently, to concentrate on the cognitive aspects of brain

function, disregarding emotions. This attitude began to change with the publication of Descartes' Error in 1995. Antonio Damasio—one of the world's leading neurologists (The New York Times)—challenged traditional ideas about the connection between emotions and rationality. In this wondrously engaging book, Damasio takes the reader on a journey of scientific discovery through a series of case studies, demonstrating what many of us have long suspected: emotions are not a luxury, they are essential to rational thinking and to normal social behavior.
