Working Together Apart Judy S. Olson, Gary Olson. 2013-11-01 Increasingly, teams are working together when they are not in the same location, even though there are many challenges to doing so successfully. Here we review the latest insights into these matters, guided by a framework that we have developed during two decades of research on this topic. This framework organizes a series of factors that we have found to differentiate between successful and unsuccessful distributed collaborations. We then review the kinds of technology options that are available today, focusing more on types of technologies rather than specific instances. We describe a database of geographically distributed projects we have studied and introduce the Collaboration Success Wizard, an online tool for assessing past, present, or planned distributed collaborations. We close with a set of recommendations for individuals, managers, and those higher in the organizations who wish to support distance work.

The Balancing Act Sharon Seivert. 2001-10-01 • Highly effective strategies that help people and businesses succeed using the five elements of water, air, earth, fire, and ether. • The five elements

represent emotion, mind, body, drive, and soul. • Presents case studies from Seivert's organizational and executive clients in financial services, health care, government, academics, technology, retail, and marketing. • The unique tools in *The Balancing Act* can be applied equally well to businesses, families, or personal relationships. Have you ever had one of those days when everything went right? When the initiatives you started at work came together like clockwork, when a family outing seemed like fun and not labor, when you and that special someone felt your relationship taking off under its own power? Those times were not accidental. They happen when the key elements of any system--a business, a family, a relationship--come into balance, and then function in a state of synergy where the whole becomes much more than the sum of the parts. In *The Balancing Act*, consultant and personal coach Sharon Seivert shows how you can create this magical state of affairs in your life, love, and work on a daily basis. Starting with an extensive questionnaire that lets you evaluate the health of your business, relationships, and self, Seivert teaches you how to recognize which of the five traditional elements that make up any system are in balance and which need more of your attention. Exercises and tips for nourishing each element demonstrate how you can take a proactive role in bringing your life successfully into a state of balanced harmony.

Mastering the Marketplace Anne O'Neil-Henry. 2017 *Mastering the Marketplace* examines the origins of modern mass-media culture through developments in the new literary marketplace of nineteenth-century France and how literature itself reveals the broader social and material conditions in which it is produced. Anne O'Neil-Henry examines how French authors of the nineteenth century navigated the growing publishing and marketing industry, as well as the dramatic rise in literacy rates, libraries, reading rooms, literary journals, political newspapers, and the advent of the serial novel. O'Neil-Henry places the work of canonical author Honoré de Balzac

alongside then-popular writers such as Paul de Kock and Eugène Sue, acknowledging the importance of low authors in the wider literary tradition. By reading literary texts alongside associated advertisements, book reviews, publication histories, sales tactics, and promotional tools, O'Neil-Henry presents a nuanced picture of the relationship between high and low literature, one in which critics and authors alike grappled with the common problem of commercial versus cultural capital. Through new literary readings and original archival research from holdings in the United States and France, O'Neil-Henry revises existing understandings of a crucial moment in the development of industrialized culture. In the process, she discloses links between this formative period and our own, in which mobile electronic devices, internet-based bookstores, and massive publishing conglomerates alter--once again--the way literature is written, sold, and read.

No More Teams Michael Schrage.1995-04-01 For organizations that care about innovation, individual creativity isn't enough anymore -- people need to be in creative, collaborative relationships. But without the knowledge and tools for building these relationships, innovation expert Michael Schrage argues, one will not be successful in the offices of today and even less so in the virtual offices of tomorrow. No More Teams gives readers the tools and techniques to go beyond the lazy cliches of teamwork to the practical benefits of collaboration. When Schrage studied the world's greatest collaborations -- including Wozniak and Jobs, Picasso and Braque, Watson and Crick -- he found that instead of relying on charisma, they all created shared spaces where they could play with their ideas. By effectively using technological tools available in most workplaces -- anything from a felt tip pen and a napkin to specialized computer software - -you can literally map your discussion as it is happening, making it possible to keep all the good ideas, cope with every objection, handle conflicts as they arise, and, ultimately, master the unknown.

The Gourmands' Way Justin Spring. 2017-10-10 A biography of six writers on food and wine whose lives and careers intersected in mid-twentieth-century France During les trente glorieuses—a thirty-year boom period in France between the end of World War II and the 1974 oil crisis—Paris was not only the world’s most delicious, stylish, and exciting tourist destination; it was also the world capital of gastronomic genius and innovation. The Gourmands’ Way explores the lives and writings of six Americans who chronicled the food and wine of “the glorious thirty,” paying particular attention to their individual struggles as writers, to their life circumstances, and, ultimately, to their particular genius at sharing awareness of French food with mainstream American readers. In doing so, this group biography also tells the story of an era when America adored all things French. The group is comprised of the war correspondent A. J. Liebling; Alice B. Toklas, Gertrude Stein’s life partner, who reinvented herself at seventy as a cookbook author; M.F.K. Fisher, a sensualist and fabulist

storyteller; Julia Child, a television celebrity and cookbook author; Alexis Lichine, an ambitious wine merchant; and Richard Olney, a reclusive artist who reluctantly evolved into a brilliant writer on French food and wine. Together, these writer-adventurers initiated an American cultural dialogue on food that has continued to this day. Justin Spring's *The Gourmands' Way* is the first book ever to look at them as a group and to specifically chronicle their Paris experiences.

Lavorare è collaborare Sebastiano Zanolli.2024-02-28T00:00:00+01:00 Chiunque abbia la minima esperienza di gestione di un gruppo (un team aziendale, una squadra sportiva dilettantistica e, perché no, persino una famiglia) sa bene che la capacità di collaborare bene è un asset fondamentale, forse il più importante. Quando un gruppo è affiatato i risultati arrivano, le qualità dei singoli vengono esaltate e il valore che il gruppo riesce a esprimere supera quello della somma dei suoi singoli componenti. In molti ambienti lavorativi, però, la collaborazione viene spesso affidata all'intuito (dei singoli o collettivo), viene data per scontata, viene sottostimato il suo potenziale. Questo libro cambia la prospettiva evidenziando le due principali dimensioni della collaborazione: l'essere e il fare insieme. In *Lavorare è collaborare* Zanolli esplora l'arte del feedback, la chiarezza comunicativa e gli strumenti essenziali per lavorare condividendo. Dalla teoria alla psicologia, alla pratica, indaga le migliori strategie alla base della collaborazione per affrontare le sfide del lavoro virtuale. Una guida indispensabile per chiunque intenda comprendere e applicare dinamiche collaborative in modo efficace nel contesto lavorativo.

This book will look at how the physical library space and the culture and philosophy of the library can help to cultivate collaboration in learners and educators--

Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.
