In Cold Blood Truman Capote.2013-02-19 Selected by the Modern Library as one of the 100 best nonfiction books of all time From the Modern Library's new set of beautifully repackaged hardcover classics by Truman Capote—also available are *Breakfast at Tiffany's* and *Other Voices, Other Rooms* (in one volume), *Portraits and Observations*, and *The Complete Stories* Truman Capote's masterpiece, *In Cold Blood*, created a sensation when it was first published, serially, in *The New Yorker* in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the "new journalism." Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. "I thought he was a very nice gentleman," he says of Herb Clutter. "Soft-spoken. I thought so right up to the moment I cut his throat." Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case and the killers' flight, Capote's account is so detailed that the reader comes to feel almost like a participant in the events.

amazing things and make us happy. And some words can really hurt us (we all know what sort of words those are). Our words have power, and we can choose to use them to make the world a better place. Simple, direct, and emotive, Words and Your Heart's message is that words have extraordinary power—to harm and to heal, to create and to destroy, and to spread love.

Letters from the Ministry Phillip Donnelly.2013-05-24 Something is rotten in the Ministry of Mammals. S. Fox, a recent recruit, finds that his new life in the office block is every bit as dangerous as in his native forest. In a set of letters written to his cousin, Arctic Fox, we follow his trials, as he tries to navigate a way through the forests of bureaucracy. Before his eyes, factions tear the office world apart. S. Fox must keep his head off the paper guillotine, when waves of oppression, revolution and counter-revolution engulf the ministry. His world is complicated further by messengers from another. The un-dead headless chicken, a transdimensional cat and a phantom Afghan hound, stalk the sleepless fox. All call on him to avenge them, and to grab power for himself. This satire of everything from political history to corporate management is witty and entertaining, making Letters from the Ministry the Animal Farm for the 21st century.

Mathematical Lives CLAUDIO BARTOCCI, Renato Betti, Angelo Guerraggio, Roberto Lucchetti.2010-10-01 Steps forward in mathematics often reverberate in other scientific disciplines, and give rise to innovative conceptual developments or find surprising technological applications. This volume brings to the forefront some of the proponents of the mathematics of the twentieth century, who have put at our disposal new and powerful instruments for investigating the reality around us. The portraits present people who have impressive charisma and wide-ranging cultural interests, who are passionate about defending the importance of their own research, are sensitive to beauty, and attentive to the social and political problems of their times. What we have sought to document is mathematics' central position in the culture of our day. Space has been made not only for the great mathematicians but also for literary texts, including contributions by two apparent interlopers, Robert Musil and Raymond Queneau, for whom mathematical concepts represented a valuable tool for resolving the struggle between 'soul and precision.'

The Man of Numbers Keith Devlin.2012-11-01 In 1202, a 32-year old Italian finished one of the most influential books of all time, which introduced modern arithmetic to Western Europe. Devised in India in the seventh and eighth centuries and brought to North Africa by Muslim traders, the Hindu-Arabic system helped transform the West into the dominant force in science, technology, and commerce, leaving behind Muslim cultures which had long known it but had failed to see its potential. The young Italian, Leonardo of Pisa (better known today as Fibonacci), had learned the Hindu number system when he traveled to North Africa with his father, a customs agent. The book he created was

Liber abacci, the 'Book of Calculation', and the revolution that followed its publication was enormous. Arithmetic made it possible for ordinary people to buy and sell goods, convert currencies, and keep accurate records of possessions more readily than ever before. Liber abacci's publication led directly to large-scale international commerce and the scientific revolution of the Renaissance. Yet despite the ubiquity of his discoveries, Leonardo of Pisa remains an enigma. His name is best known today in association with an exercise in Liber abacci whose solution gives rise to a sequence of numbers - the Fibonacci sequence - used by some to predict the rise and fall of financial markets, and evident in myriad biological structures. In *The Man of Numbers*, Keith Devlin recreates the life and enduring legacy of an overlooked genius, and in the process makes clear how central numbers and mathematics are to our daily lives.
