Tomy and the Planet of Lies Erich von Däniken.2011-08-31 Erich von Daniken claims to have never seen a UFO. But in the fall of 1987, on a desert ride, he experienced a close encounter of a very different kind. A being materialized before his eyes, and since the thing had no name, von Däniken called it Tomy. This book is the story of Tomy. Some say that Tomy is a scientific impossibility. Yet Tomy was there, science or not. After all, Tomy had for a few weeks lived among us, and that was enough for plenty of interpersonal relationships. God knows that von Däniken was not the only one who had known Tomy; others could see him, as well. Now, after nineteen years of silence, von Däniken has decided to make public the incredible story of Tomy. Here, the bestselling author of *Chariots of the Gods* makes his foray into the world of fiction. *Tomy and the Planet of Lies* is a thrilling adventure novel that will keep listeners on the edge of their seats.

From Dawn till Dusk Evangelos D. Protopapadakis.2019-11-15 *From Dawn till Dusk* embraces the conceptual challenges often associated with Bioethics by taking the reader on a journey that embodies the circle of life and what it means to be human. The beginning and the end of life have always been an impossible riddle to humans. Bioethics does not aspire to unveil utter truths regarding the purpose of our existence; on the contrary, its task is to settle controversial issues that arise within this finite, very fragile and vulnerable life, yet a life we still have to live. This book discusses thorny ethical issues that transcend time and are related to the dawn and the dusk of life: abortion and infanticide, genetic engineering, human reproductive cloning, the fear of death, rational suicide, and the right to die. The book's highest aspiration, though, is to both provide the reader with an opportunity to see the world from different perspectives and to showcase the irresistible charms of bioethical debates. ``This book brings contemporary issues in bioethics into conversation with different philosophical views, both ancient and modern. The result is a rewarding and very readable discussion on a range of important questions about life and death." Peter Singer, Princeton University & University of Melbourne ``Evangelos D. Protopapadakis' book is a philosophically rich discussion of major topics in bioethics about issues of life and death. The work is original and important. I believe the author is correct to argue that the central issues of bioethics at its core in these areas should be understood as moral in nature and should not be framed as principally legal or scientific." Tom L. Beauchamp, Georgetown University ``Bioethics is - in philosophical terms - a new field. But it builds on centuries of thought on the human condition, the meaning of life, and the fundamental ethical question: What should we do? Evangelos D. Protopapadakis' masterful volume traces modern bioethical debates, with all their increasing scientific complexity, back through ancient and modern philosophical thought. The result is a sparkling and engaging journey through the history of ideas and the current ethical challenges at the beginning and end of life." Julian Savulescu, Uehiro Chair in Practical Ethics, University of Oxford ``As the Head of the Greek Unit of the Chair, but also as an ethicist and a bioethicist, Professor Protopapadakis has never been weary to contribute to philosophically nuanced bioethical debates. This inspiring book is the manifestation of his attitude towards Bioethics." Amnon Carmi, Holder of the UNESCO Chair in Bioethics (Haifa) ``This book presents important connections between current positions and classical approaches in ethics, written in a lively way." Hans-Werner Ingensiep, Universität Duisburg-Essen ``Evangelos Protopapadakis' book provides nuanced insights describing the complex ethical problems which clinicians and society must address. This creative analysis incorporates ancient and contemporary historical examples to illuminate the disparate arguments used to justify conflicting philosophical responses." Susan M. Miller MD, MPH

Ontology Engineering with Ontology Design Patterns: Foundations and Applications P. Hitzler, A. Gangemi, K. Janowicz.2016-09-16 The use of ontologies for data and knowledge organization has become ubiquitous in many data-intensive and knowledge-driven application areas, in science, industry, and the humanities. At the same time, ontology engineering best practices continue to evolve. In particular, modular ontology modeling based on ontology design patterns is establishing itself as an approach for creating versatile and extendable ontologies for data management and integration. This book is the very first comprehensive treatment of Ontology Engineering with Ontology Design Patterns. It contains both advanced and introductory material accessible for readers with only a minimal background in ontology modeling. Some introductory material is written in the style of tutorials, and specific chapters are devoted to examples and to applications. Other chapters convey the state of the art in research regarding ontology design patterns. The editors and the contributing authors include the leading contributors to the development of ontology-design-pattern-driven ontology engineering.

Colour Liane Collot d'Herbois.2008-01-01 Colour is both a constant and dynamic force in our world. Liane Collot D'Herbois was a pioneer of spiritual colour theory who explored the artistic and therapeutic qualities of light and darkness in painting. This book is a combination of her original works *Colour, Part One* (1979) and *Colour, Part Two* (1981), in which she presented her remarkable ideas. Preferring to write in 'pictures' rather than 'chapters', she explains the principles behind her work and demonstrates how each colour has its own unique movement and inherent quality. Her third book, *Light, Darkness and Colour in Painting Therapy* is also available from Floris Books.

The Enemy of All Daniel Heller-Roazen. 2009 The philosophical genealogy of a remarkable antagonist: the pirate, the key to the contemporary paradigm of the universal foe. The pirate is the original enemy of humankind. As Cicero famously remarked, there are certain enemies with whom one may negotiate and with whom, circumstances permitting, one may establish a truce. But there is also an enemy with whom treaties are in vain and war remains incessant. This is the pirate, considered by ancient jurists considered to be the enemy of all. In this book, Daniel Heller-Roazen reconstructs the shifting place of the pirate in legal and political thought from the ancient to the medieval, modern, and contemporary periods presenting the philosophical genealogy of a remarkable antagonist. Today, Heller-Roazen argues, the pirate furnishes the key to the contemporary paradigm of the universal foe. This is a legal and political person of exception, neither criminal nor enemy, who inhabits an extra-territorial region. Against such a foe, states may wage extraordinary battles, policing politics and justifying military measures in the name of welfare and security. Heller-Roazen defines the piracy in the conjunction of four conditions: a region beyond territorial jurisdiction; agents who may not be identified with an established state; the collapse of the distinction between criminal and political categories; and the transformation of the concept of war. The paradigm of piracy remains in force today. Whenever we hear of regions outside the rule of law in which acts of indiscriminate aggression have been committed against humanity, we must begin to recognize that these are acts of piracy. Often considered part of the distant past, the enemy of all is closer to us today than we may think. Indeed, he may never have been closer.

Arthur Schopenhauer Dan Farrelly. 2015-04-01 This book is a translation of David Asher's text *New Material* by Schopenhauer and about Schopenhauer. Readers who are interested in Schopenhauer the man (and his philosophy) can see, from the 24 letters written to David Asher, clear evidence of the philosopher's struggle to gain recognition in a Germany where Fichte, Schelling, and Hegel - and their disciples - were the dominant forces. The letters show Schopenhauer, after 30 years of being ignored by the universities in Germany, coming into his own. He is enormously appreciative of the dedicated service of Asher, who seeks out and relays to him all that he can find about the resonance of his work in Germany and abroad. Asher himself, as a Jew, was largely ignored after Schopenhauer's death. In the book by Lindner and Frauenstädt, *Schopenhauer: By him and about him*, Asher was dismissively referred to as the "little apostle", whereas in fact he was the main "apostle". Apart from the letters he received from Schopenhauer, Asher also includes the essay he published about Schopenhauer's theory of music, along with a musicologist's sober assessment of its value. Another essay on the Jewish thinker Salomon Ibn-Gebirol indicates Asher's conviction that Schopenhauer's thought is not radically removed from that of Judaism (of a particular kind). A further essay - on individual character - indicates the affinity of Schopenhauer's thought to that of Kant. The final section of the book gathers material that indicates the reception of Schopenhauer's philosophy in France, England and Germany.

Light, Darkness and Colour in Painting Therapy Liane Collot D'Herbois. 2000 'One should try to see health and disease in the light of the theory of colour.' -- Rudolf Steiner Through her work as an art teacher, Liane Collot d'Herbois discovered that an individual's constitution, temperament and illnesses were often revealed through their painting. Using Rudolf Steiner's remark as a starting point, together with her own observations, she went on to develop therapeutic painting. Art therapy helps bring about balance and health in the human being through working with an understanding of the relationship between the opposing tendencies of light and darkness in art and in the human constitution.

Assessing Biblical and Classical Sources for the Reconstruction of Persian Influence, History and Culture Anne Fitzpatrick-McKinley. 2015 This volume brings together the views of biblical scholars, Achaemenid historians and classicists in relation to the problems of reconstructing the history of the Persian empire. It addresses the ways in which scholars of each of these disciplines have struggled with the complexity and limitations of the ancient sources. Some of the essays in this volume discuss issues surrounding the identification of authorial biases and evaluate what - if anything - remains as possible 'historical' evidence, while others examine the scholarly consensus on the question of Persian policy on the religion and laws of its subjects. What unites the essays in this volume is the commitment of their authors to recognise the difficulties with the sources and to constantly engage in new appraisals of them in dialogue with scholars in their own fields, but also in dialogue with scholars in related fields.

Conflicts, Machines, Beliefs, and Decisions Thomas Gil. 2019-09-02 The following essays are about what it is to believe something, how we make up our minds and decide, what it means that conflicts and disagreements are not eliminable, and the fact that new technological developments are substantially changing the way we live.

Christina, Book 1: Twins Born as Light Bernadette von Dreien. 2019-01-19 Book 1 of the best selling book series about Christina von Dreien - now in English translation: Christina (born 2001) is a young woman from Toggenburg, Switzerland. She was born with greatly expanded consciousness and thus belongs to a new generation of young evolutionary thinkers who recognise, describe and live human existence as a complexity of quantum physics, neuropsychology and spirituality. She has always shown remarkable insight into today's world events and one cannot help but be astonished by her high ethics, her wisdom and inner peace that hint at a new dimension of being human. Without being overchallenged in any way, Christina displays a completely natural handling of a multitude of paranormal gifts such as multi-dimensional perception, aura perception, clairvoyance, telepathy, telekinesis, contact with other levels of existence, animal and plant communication and the like. From birth, she has also been consciously connected to higher dimensional spheres and civilisations of light. A harbinger of a new stage in human evolution, Christina, together with her twin sister Elena, incarnated on Earth to spread light and peace. She says, The lights are already here, all over the world. It just needs someone to press the 'On' button. The first book tells the story of Christina's extraordinary birth, childhood and youth up to the age of 16, from the perspective of her mother, Bernadette. For Christina, it was a time of becoming accustomed to three-dimensionality, of being trained and tested in order to prepare

herself for her life's task. Christina summarises this task with the three core concepts of freedom, truth and love.

Christina, Book 2: The Vision of the Good Bernadette von Dreien,Hilary Snellgrove.2019-10-01 The second book continues the story again from the perspective of her mother, Bernadette of Christinas development: the end of her school days, the revelation of her life plan and the impressive start of her work in public.Further topics in Book 2 are: the universal rules of life; how to follow our individual soul path and unfold our personal potential; support from our spiritual companions; practical tips for increasing individual and collective vibration frequency; the silent revolution of unconditional love; the importance of grounding for time-change people; the essential link between lateral thinking and spirituality; holistic science and positive technology; four possible consciousness orientation choices; the five-dimensional future of humanity on earth and the approaching golden age.I am here to help human beings to reach a state of expanded consciousness. With an expanded horizon, they will be able to see what is not working properly on this planet today for themselves. Then they can develop new solutions and perspectives in every area of life that will be successful in the long term. But human beings have free will. The decision is theirs alone. (Christina von Dreien)We are all equal in our innermost core. No one is more advanced than anyone else, no light is brighter than any other, and no task in life is more important than any other. We are all divine beings who are experiencing being human, and not human beings who are becoming divine. (Christina von Dreien)

Medieval Textual Cultures Faith Wallis,Robert Wisnovsky.2016-08-22 Understanding how medieval textual cultures engaged with the heritage of antiquity (transmission and translation) depends on recognizing that reception is a creative cultural act (transformation). These essays focus on the people, societies and institutions who were doing the transmitting, translating, and transforming -- the agents. The subject matter ranges from medicine to astronomy, literature to magic, while the cultural context encompasses Islamic and Jewish societies, as well as Byzantium and the Latin West. What unites these studies is their attention to the methodological and conceptual challenges of thinking about agency. Not every agent acted with an agenda, and agenda were sometimes driven by immediate needs or religious considerations that while compelling to the actors, are more opaque to us. What does it mean to say that a text becomes "available" for transmission or translation? And why do some texts, once transmitted, fail to thrive in their new milieu? This collection thus points toward a more sophisticated "ecology" of transmission, where not only individuals and teams of individuals, but also social spaces and local cultures, act as the agents of cultural creativity.
