*Let's Explore Earth* Helen Orme, David Orme. 2007 Presents information about the Earth and its relationship to the Sun and other celestial bodies.

**Planet Ocean** Patricia Newman. 2021-03-02 Books like this one help lead the way to a better climate future for all inhabitants of Mother Earth. We are all in this together! — Jeff Bridges, Academy Award winner and environmentalist A little more than 70 percent of Planet Earth is ocean. So wouldn't a better name for our global home be Planet Ocean? You may be surprised at just how closely YOU are connected to the ocean. Regardless of where you live, every breath you take and every drop of water you drink links you to the ocean. And because of this connection, the ocean's health affects all of us. Dive in with author Patricia Newman and photographer Annie Crawley—visit the Coral Triangle near Indonesia, the Salish Sea in the Pacific Northwest, and the Arctic Ocean at the top of the world. Find out about problems including climate change, ocean acidification, and plastic pollution, and meet inspiring local people who are leading the way to reverse the ways in which humans have harmed the ocean. Planet Ocean shows us how to stop thinking of ourselves as existing separate from the ocean and how to start taking better care of this precious resource.

Atlantic Ocean Emily Rose Oachs. 2016 Simple text and full-color photography introduce beginning readers to the Atlantic Ocean. Developed by literacy experts for students in kindergarten through third grade--

*Let's Explore Coral Reefs* Michael Patrick O'Neill. 2005 Charlie the crab takes children on a tour of a coral reef, home to a variety of marine life, from the clownfish to the tiger shark, and explains the importance of this diverse ecosystem to humanity.

Let's Explore the Ocean! Nicole Horning.2020-07-15 More than 70 percent of the earth's surface is covered by water, which makes studying the ocean an integral part of early Earth science lessons. Through full-color photographs and age-appropriate scientific information, readers dive deep into the world's oceans to learn about this important part of the planet. They're presented with fun and fascinating facts about the ocean, such as its role in the water cycle and the animals and creatures that call it home. Readers are encouraged to think about ways to protect the ocean, as this volume fosters a spirit of environmental conservation and appreciation.

Field Trip to the Ocean Deep John Hare.2022-02-08 Come join the fun as students take a submarine bus on a field trip to explore the ocean deep, in this wordless picture book from the creator of *Field Trip to the Moon!* Students dressed in deep sea helmets travel to the ocean deep in a yellow school-bus submarine. When they get there, they frolic with fish, chase luminescent squid, and discover an old shipwreck. But when it's time to return to the submarine bus, one student lingers to take a photo of a treasure chest and falls into a deep ravine. Luckily, the child makes an unexpected friend-- a maybe-not-so-extinct sea creature called a Pleiosaur- that's happy to entertain the young explorer until the teacher returns. In his follow-up to *Field Trip to the Moon*, John Hare's rich, atmospheric art in this wordless picture book invites all children to imagine themselves in the story- a tale full of mysteries, surprises, and adorable aquatic friends. Named a LITA Golden Duck Picture Book A Junior Library Guild Selection

**Alien Oceans** Kevin Hand. 2021-09-21 Inside the epic quest to find life on the water-rich moons at the outer reaches of the solar system Where is the best place to find life beyond Earth? We often look to Mars as the most promising site in our solar system, but recent scientific missions have revealed that some of the most habitable real estate may actually lie farther away. Beneath the frozen crusts of several of the small, ice-covered moons of Jupiter and Saturn lurk vast oceans that may have existed for as long as Earth, and together may contain more than fifty times its total volume of liquid water. Could there be organisms living in their depths? Alien Oceans reveals the science behind the thrilling quest to find out. Kevin Peter Hand is one of today's leading NASA scientists, and his pioneering research has taken him on expeditions around the world. In this captivating account of scientific discovery, he brings together insights from planetary science, biology, and the adventures of scientists like himself to explain how we know that oceans exist within moons of the outer solar system, like Europa, Titan, and Enceladus. He shows how the exploration of Earth's oceans is informing our understanding of the potential habitability of these icy moons, and draws lessons from what we have learned about the origins of life on our own planet to consider how life could arise on these distant worlds. Alien Oceans describes what lies ahead in our search for life in
