Threatened Island Nations Michael B. Gerrard, Gregory E. Wannier. 2013-01-21 This book addresses legal issues of rising seas endangering the habitability and existence of island nations in the Pacific and Indian oceans.

Historic Waters in the Law of the Sea Clive Ralph Symmons. 2008 This work reassesses the doctrine, and status, of historic waters in the law of the sea, particularly in the light of recent developments, such as in *Alaska v. US* (2005), which case forms a continuous theme throughout the book. Detailed and critical examination is made of the alleged rules in international customary law on the topic, including matters such as burden of proof.

*Water and Power in West Maui* Jonathan L. Scheuer, Bianca Isaki. 2021 *Water and Power in West Maui* draws our attention to the ways control of water resources, in West Maui and across Hawai'i, has been key to the creation and perpetuation of political and economic power and privilege. This volume, by two leading advocates for progressive change in Hawai'i, highlights what has been only touched on by previous volumes on water law or land tenure in the islands, and with specific attention to the environment, history, and communities of West Maui. Individually, chapters on physical and legal infrastructure are invaluable stand-alone guides to key aspects of water management in the state and this area. For instance, one chapter covers recent efforts by the state to restore stream flows, a topic that is otherwise little addressed in published literature. This volume also dives into the inherent failures and unsustainability of the state of Hawai'i's management of groundwater by sustainable yield, which will have profound implications for the future of Hawai'i water supplies in a changing climate. As a whole, with clear explanations of historical transformation and ongoing bureaucratic practice, the authors identify liberating paths forward. Rather than another treatise on how past bad practices set up a beleaguered present, they suggest how water and power in West Maui and Hawai'i can be better shared for an enduring prosperity for the diverse people within these communities. This volume will be of interest to scholars and historians, and a must-read for practitioners in water management and control, and contemporary environmental and indigenous struggles in Hawai'i and the Pacific.

*International Law and the Arctic* Michael Byers, James Baker. 2013-08 Sets out the international law relevant to the Arctic, from indigenous peoples to environmental protection to oil and gas exploration.

**Historic Titles in International Law** Yehuda Z. Blum. 2012-12-06 The question of Historic Titles in International Law has been much discussed in recent years. In particular, it was an issue of some importance in several international arbitrations, such as the *Gulf of Fonseca* case, decided by the Central American Court of Justice; the *Island of Palmas* case, decided by Judge Huber as sole arbitrator, under the auspices of the Permanent Court of Arbitration; the case concerning the *Legal Status of Eastern Greenland* before the Permanent Court of International Justice; and, more recently still, the cases concerning *Fisheries (United Kingdom v. Norway)*; *Minquiers and Ecrehos Islets (United Kingdom v. France)*; *Certain Frontier Land (Belgium v. Netherlands)*; and *Temple of Preah Vihear (Cambodia v. Thailand)*, before the International Court of Justice. Historic Titles are probably also a relevant factor in a number of territorial disputes that have not yet been submitted to arbitration or judicial settlement. The recent controversies over the proper breadth for the territorial sea and the exclusive fishing limits of coastal States have brought to the fore new aspects of the problem.

**Baselines under the International Law of the Sea** Coalter G. Lathrop, J. Ashley Roach, Donald R. Rothwell. 2019-03-27 *Baselines under the International Law of the Sea* brings together two reports produced by the International Law Association (ILA) Committee on Baselines under the International Law of the Sea between 2008 - 2018: *The Sophia Report* (2012) and *The Sydney Report* (2018).

The World Ocean in Globalisation Davor Vidas, Peter Johan Schei. 2011-08-11 This book addresses emerging challenges for the World Ocean in the Anthropocene epoch and the effects of increasing globalisation on the seas. The issues explored in particular include climate change, sustainable fisheries, biodiversity, shipping and regional seas adjoining Europe.

*The Sea Is My Country* Joshua L. Reid. 2015-05-26 For the Makahs, a tribal nation at the most northwestern point of the contiguous United States, a deep relationship with the sea is the locus of personal and group identity. Unlike most other indigenous tribes whose lives are tied to lands, the Makah people have long placed marine space at the center of their culture, finding in their own waters the physical and spiritual resources to support themselves. This book is the first to explore the history and identity of the Makahs from the arrival of maritime fur-traders in the eighteenth century through the intervening centuries and to the present day. Joshua L. Reid discovers that the "People of the Cape" were far more involved in shaping the maritime economy of the Pacific Northwest than has been understood. He examines Makah attitudes toward borders and boundaries, their efforts to exercise control over their waters and resources as Europeans and Americans arrived, and their embrace of modern opportunities and technology to maintain autonomy and resist assimilation. The author also addresses current environmental debates relating to the tribe's customary whaling and fishing rights and illuminates the efforts of the Makahs to regain control over marine space, preserve their marine-oriented identity, and articulate a traditional future.

Indigenous Water Rights in Law and Regulation Elizabeth Jane Macpherson. 2019-08-08 A detailed study of the engagement of state law with indigenous rights to water in comparative legal and policy contexts.

International Law: A Very Short Introduction Vaughan Lowe. 2015-11-26 Interest in international law has increased greatly over the past decade, largely because of its central place in discussions such as the Iraq War and Guantanamo, the World Trade Organisation, the anti-capitalist movement, the Kyoto Convention on climate change, and the apparent failure of the international system to deal with the situations in Palestine and Darfur, and the plights of refugees and illegal immigrants around the world. This Very Short Introduction explains what international law is, what its role in international society is, and how it operates. Vaughan Lowe examines what international law can and cannot do and what it is and what it isn't doing to make the world a better place. Focussing on the problems the world faces, Lowe uses terrorism, environmental change, poverty, and international violence to demonstrate the theories and practice of international law, and how the principles can be used for international co-operation.

*The Code of Hammurabi* Hammurabi. 2019-12-03 The Code of Hammurabi is a well-preserved Babylonian law code of ancient Mesopotamia, dating back to about 1754 BC. It is one of the oldest deciphered writings of significant length in the world. The sixth Babylonian king, Hammurabi, enacted the code, and partial copies exist on a man-sized stone stele and various clay tablets. The Code consists of 282 laws, with scaled punishments, adjusting an eye for an eye, a tooth for a tooth (*lex talionis*) as graded depending on social status, of slave versus free man. Nearly one-half of the Code deals with matters of contract, establishing, for example, the wages to be paid to an ox driver or a surgeon. Other provisions set the terms of a transaction, establishing the liability of a builder for a house that collapses, for example, or property that is damaged while left in the care of another. A third of the code addresses issues concerning household and family relationships such as inheritance, divorce, paternity, and sexual behavior. Only one provision appears to impose obligations on an official; this provision establishes that a judge who reaches an incorrect decision is to be fined and removed from the bench permanently. A few provisions address issues related to military service. Hammurabi ruled for nearly 42 years, c. 1792 to 1750 BC according to the Middle chronology. In the preface to the law, he states, Anu and Bel called by name me, Hammurabi, the exalted prince, who feared Marduk, the patron god of Babylon (*The Human Record*, Andrea & Overfield 2005), to bring about the rule in the land. On the stone slab there are 44 columns and 28 paragraphs that contained 282 laws. The laws follow along the rules of 'an eye for an eye'.

Across Oceans of Law Renisa Mawani.2018-08-17 In 1914 the British-built and Japanese-owned steamship Komagata Maru left Hong Kong for Vancouver carrying 376 Punjabi migrants. Chartered by railway contractor and purported rubber planter Gurdit Singh, the ship and its passengers were denied entry into Canada and two months later were deported to Calcutta. In *Across Oceans of Law* Renisa Mawani retells this well-known story of the Komagata Maru. Drawing on oceans as method—a mode of thinking and writing that repositions land and sea—Mawani examines the historical and conceptual stakes of situating histories of Indian migration within maritime worlds. Through close readings of the ship, the manifest, the trial, and the anticolonial writings of Singh and others, Mawani argues that the Komagata Maru's landing raised urgent questions regarding the jurisdictional tensions between the common law and admiralty law, and, ultimately, the legal status of the sea. By following the movements of a single ship and bringing oceans into sharper view, Mawani traces British imperial power through racial, temporal, and legal contests and offers a novel method of writing colonial legal history.

**The Nile** Gebre Tsadik Degefu.2003 The study focuses in particular on the Nile Basin, which has 10 riparian states sharing the waters of the Nile. As water scarcity and population is the #1 problem of the 21st century, a fair and equitable distribution of the available waters among the riparian states is a must. The book is divided into 4 parts: Diplomatic, History, Legal Analysis and developmental analysis.

The Socialist Republic of Vietnam and the Law of the Sea Epsy Cooke Farrell.2021-09-27 The Socialist Republic of Vietnam and the Law of the Sea analyzes Vietnam's policies on the law of the sea in relation to the country's overall foreign policy goals and its position at the center of the South China Sea geostrategic region. It examines Vietnam's claims in zones of maritime jurisdiction and its regulation of maritime activities in the context of the 1982 U.N. Convention on the Law of the Sea and against the backdrop of Vietnam's security interests, economic development, and regional leadership goals. The author explores Vietnam's maritime boundary disputes with its Southeast Asian neighbors and China and assesses their impact on regional stability. This is the first comprehensive study to trace the evolution of Vietnamese policy and participation in law of the sea development from the 1958 First U.N. Conference on the Law of the Sea to the present. The book provides the background essential to an understanding of Vietnam's current maritime relations and of the challenge to incorporate Vietnam into a stable regional order. Law of the sea specialists, Southeast Asia area specialists, and those interested in the development of Vietnam's hydrocarbon and fishery resources will find this a particularly valuable resource.

The Freedom of the Seas, Or, The Right which Belongs to the Dutch to Take Part in the East Indian Trade Hugo Grotius,Carnegie Endowment for International Peace. Division of International Law.2001 A classic treatise on international maritime law. Originally published: New York: Oxford University Press, 1916. xv, (xiv-xv, 79 pp. paged in duplicate (158 pp.)), 81-83 pp. (total 182 pp.) A translation of Grotius's *Mare Liberum*, with Latin and English on facing pages. This groundbreaking work was commissioned by the Dutch East India Company to dispute the monopoly on East Indian trade routes claimed by the Portuguese. It argues that the seas are international territory open to all nations, thus rejecting the idea that any area of the seas could belong to a country. An instant classic, it received a great deal of attention when it was published in 1609. Perhaps the most important reply is John Selden's *Mare Clausum* (1635), which defends British claims to sovereignty over the coastal waters of the British Isles.

**China's Maritime Disputes in the East and South China Seas** U.S.-China Economic and Security Review Commission.2014-04-18 Today's hearing will cover China's maritime disputes in the East and South China Seas. We'll examine the security, political, legal, and economic drivers of these disputes in our three panels today. The first panel will begin by discussing the broad security situation on the high seas. As China's maritime forces have become more capable over the past decade, Beijing has become more confident in its ability to assert its claims in the disputed areas. Beyond China's hard security concerns, however, other domestic, political, and legal elements shape China's policy in the East and South China Seas. Our second panel will consider popular nationalism as one of these elements. It has become a key driver of Chinese foreign policy as personality politics in Beijing has given way to a collective leadership seeking Party legitimacy. We'll conclude with a panel on how resources and economic drivers shape China's maritime disputes. Security of China's near seas is critical to the unimpeded flow of trade and imported energy resources. Though the natural resources in the East and South China Sea undoubtedly shape the security landscape, there appears to be a debate on the centrality of oil and gas resources to the dispute.

Historic Waters and Historic Rights in the Law of the Sea Clive Ralph Symmons.2019 This new edition discusses the important clarifications on historic maritime claims--particularly 'historic rights' (falling short of sovereignty); and the interaction of such rights with the Law of the Sea Convention resulting from the arbitral Award on the Merits of 2016 in *Philippines v. China*, and examines what is now left of the former customary law doctrine.

UN Convention on the Law of the Sea and the South China Sea Shicun Wu,Mark Valencia,Nong Hong.2016-03-09 Research on The United Nations Convention on the Law of the Sea (UNCLOS) is a valuable addition to understanding the political situation in the potentially volatile South China Sea region. This book covers topics such as baselines, historic title and rights, due regard and abuse of rights, peaceful use of the ocean, navigation regimes, marine scientific research, intelligence gathering, the UNCLOS dispute settlement system and regional common heritage. In search of varying viewpoints, the authors in this book come from multiple countries, including the Philippines, Australia, Ireland, Mainland China and Taiwan, the United States, and Indonesia, Singapore, UK and Germany. Ongoing events, such as the recent waves made by China in the East China Sea and increasing tensions between the South East Asian countries over the use of South China Sea, make this book especially pertinent.

Unsettled Waters Eric P. Perramond.2018-11-06 In the American West, water adjudication lawsuits are adversarial, expensive, and lengthy. *Unsettled Waters* is the first detailed study of water adjudications in New Mexico. The state envisioned adjudication as a straightforward accounting of water rights as private property. However, adjudication resurfaced tensions and created conflicts among water sovereigns at multiple scales. Based on more than ten years of fieldwork, this book tells a fascinating story of resistance involving communal water cultures, Native rights and cleaved identities, clashing experts, and unintended outcomes. Whether the state can alter adjudications to meet the water demands in the twenty-first century will have serious consequences.

The Oxford Handbook of the Law of the Sea Donald Rothwell,Alex G. Oude Elferink,Karen Nadine Scott,Tim Stephens.2015 Human activities have taken place in the world's oceans and seas for most of human history. With such a vast number of ways in which the oceans can be used for trade, exploited for natural resources and fishing, as well as concerns over maritime security, the legal systems regulating the rights and responsibilities of nations in their use of the world's oceans have long been a crucial part of international law. The United Nations Convention on the Law of the Sea comprehensively defined the parameters of the law of the sea in 1982, and since the Convention was concluded it has seen considerable development. This Oxford Handbook provides a comprehensive and original analysis of its current debates and controversies, both theoretical and practical. Written by over forty expert and interdisciplinary contributors, the Handbook sets out how the law of the sea has developed, and the challenges it is currently facing. The Handbook consists of forty chapters divided into six parts. First, it explains the origins and evolution of the law of the sea, with a particular focus upon the role of key publicists such as Hugo Grotius and John Selden, the gradual development of state practice, and the creation of the 1982 UN Convention. It then reviews the components which comprise the maritime domain, assessing their definition, assertion, and recognition. It also analyses the ways in which coastal states or the international community can assert control over areas of the sea, and the management and regulation of each of the maritime zones. This includes investigating the development of the mechanisms for maritime boundary delimitation, and the decisions of the International Tribunal for the Law of the Sea. The Handbook also discusses the actors and intuitions that impact on the law of the sea, considering their particular rights and interests, in particular those of state actors and the principle law of the sea institutions. Then it focuses on operational issues, investigating longstanding matters of resource management and the integrated oceans framework. This includes a discussion and assessment of the broad and increasingly influential integrated oceans management governance framework that interacts with the traditional law of the sea. It considers six distinctive regions that have been pivotal to the development of the law of the sea, before

finally providing a detailed analysis of the critical contemporary issues facing the law of the sea. These include threatened species, climate change, bioprospecting, and piracy. The Handbook will be an invaluable and thought-provoking resource for scholars, students, and practitioners of the law of the sea.

**The South China Sea Arbitration** Stefan Talmon, Bing Bing Jia. 2014-11-01 On 22 January 2013, the Republic of the Philippines instituted arbitral proceedings against the People's Republic of China (PRC) under the United Nations Convention on the Law of the Sea (UNCLOS) with regard to disputes between the two countries in the South China Sea (South China Sea Arbitration). On 19 February 2013, the PRC formally expressed its opposition to the institution of proceedings, making it clear from the outset that it will not have any part in these arbitral proceedings and that this position will not change. It is thus to be expected that over the next year and a half, the Tribunal will receive written memorials and hear oral submissions from the Philippines only. The Chinese position will go unheard. However, the Tribunal is under an obligation, before making its award, to satisfy itself not only that it has jurisdiction over the dispute, but also that the claims brought by the Philippines are well founded in fact and law (UNCLOS Annex VII, Article 9). This book aims to offer a (not the) Chinese perspective on some of the issues to be decided by the Tribunal and thus to assist the Tribunal in meeting its obligations under the Convention. The book does not set out the official position of the Chinese government, but is rather to serve as a kind of *amicus curiae* brief advancing possible legal arguments on behalf of the absent respondent. The book does not deal with the merits of the disputes between the Philippines and the PRC, but focuses on the questions of jurisdiction, admissibility and other objections which the tribunal will have to decide as a preliminary matter. The book will show that there are insurmountable preliminary objections to the Tribunal deciding the case on the merits and that the Tribunal would be well advised to refer the dispute back to the parties in order for them to reach a negotiated settlement. The book brings together scholars of public international law from mainland China, Taiwan and Europe united by a common interest in the law of the sea and disputes in the South China Sea.

**Historic Waters in the Law of the Sea** Clive Symmons. 2007-12-26 This work reassesses the doctrine, and status, of historic waters in the law of the sea, particularly in the light of recent developments, such as in *Alaska v. US* (2005), which case forms a continuous theme throughout the book. Detailed and critical examination is made of the alleged rules in international customary law on the topic, including matters such as burden of proof.

**Excessive Maritime Claims** J. Ashley Roach, Robert W. Smith. 2012-06-22 Now in a third, revised edition, *Excessive Maritime Claims* by J. Ashley Roach and Robert W. Smith is designed for law of the sea and maritime law specialists. Coverage includes current affairs in maritime law such as submarine cables, polar areas, environmental protection, sovereign immunity and sunken ships, and maritime law enforcement, maritime security, proliferation of weapons of mass destruction by sea, piracy, and protection of underwater cultural heritage.

**Maritime Boundary Delimitation: The Case Law** Alex G. Oude Elferink, Tore Henriksen, Signe Veierud Busch. 2018-03-15 The law of maritime delimitation has been mostly developed through the case law of the International Court of Justice and other tribunals. In the past decade there have been a number of cases that raise questions about the consistency and predictability of the jurisprudence concerning this sub-field of international law. This book investigates these questions through a systematical review of the case law on the delimitation of the continental shelf and the exclusive economic zone. Comprehensive coverage allows for conclusions to be drawn about the case law's approach to the applicable law and its application to the individual case. *Maritime Boundary Delimitation: The Case Law* will appeal to scholars of international dispute settlement as well as practitioners and academics interested in the law concerning the delimitation of maritime boundaries.

**The Secretary of the Interior's Standards for the Treatment of Historic Properties** Kay D. Weeks, Anne E. Grimmer. 1995 Provides guidance to historic building owners and building managers, preservation consultants, architects, contractors, and project reviewers prior to treatment of historic buildings.

**Historic Waters and Historic Rights in the Law of the Sea** Clive R. Symmons. 2019-03-27 This new edition discusses the important clarifications on historic maritime claims—particularly 'historic rights' (falling short of sovereignty); and the interaction of such rights with the Law of the Sea Convention resulting from the arbitral Award on the Merits of 2016 in *Philippines v. China*, and examines what is now left of the former customary law doctrine.

**The South China Sea** Bill Hayton. 2014-10-28 China's rise has upset the global balance of power, and the first place to feel the strain is Beijing's back yard: the South China Sea. For decades tensions have smoldered in the region, but today the threat of a direct confrontation among superpowers grows ever more likely. This important book is the first to make clear sense of the South Sea disputes. Bill Hayton, a journalist with extensive experience in the region, examines the high stakes involved for rival nations that include Vietnam, India, Taiwan, the Philippines, and China, as well as the United States, Russia, and others. Hayton also lays out the daunting obstacles that stand in the way of peaceful resolution. Through lively stories of individuals who have shaped current conflicts—businessmen, scientists, shippers, archaeologists, soldiers, diplomats, and more—Hayton makes understandable the complex history and contemporary reality of the South China Sea. He underscores its crucial importance as the passageway for half the world's merchant shipping and one-third of its oil and gas. Whoever controls these waters controls the access between Europe, the Middle East, South Asia, and the Pacific. The author critiques various claims and positions (that China has historic claim to the Sea, for example), overturns conventional wisdoms (such as America's overblown fears of China's nationalism and military resurgence), and outlines what the future may hold for this clamorous region of international rivalry.

**Springs of Texas** Gunnar M. Brune. 2002 This text explores the natural history of Texas and more than 2900 springs in 183 Texas counties. It also includes an in-depth discussion of the general characteristics of springs - their physical and prehistoric settings, their historical significance, and their associated flora and fauna.

**Layperson's Guide to Water Rights Law** Tom Hicks, Alf W. Brandt. 2013-12-10 The 28-page Layperson's Guide to Water Rights Law, recognized as the most thorough explanation of California water rights law available to non-lawyers, traces the authority for water flowing in a stream or reservoir, from a faucet or into an irrigation ditch through the complex web of California water rights. It includes historical information on the development of water rights law, sections on surface water rights and groundwater rights, a description of the different agencies involved in water rights, and a section on the issues not only shaped by water rights decisions but that are also driving changes in water rights. Includes chronology of landmark cases and legislation and an extensive glossary.

**The Sovereignty of the Sea** Thomas Wemyss Fulton. 1911

**Implementation of the United Nations Convention on the Law of the Sea** Dai Tamada, Keyuan Zou. 2021-04-02 This book analyses the implementation of the United Nations Convention on the Law of the Sea (UNCLOS) in the light of state practices of China and Japan. The special character of the book can be found in its structure of comparative analysis of the practices of China and Japan in each part. The focus is on historical aspects (Part I), implementation of the UNCLOS (Part II), navigation (Part III), mid-ocean archipelagos (Part IV), the marine environment (Part V), and dispute settlement (Part VI). By taking this approach, the book elucidates a variety of aspects of history, difficulties, problems, and controversies arising from the implementation of the UNCLOS by the two nations. Furthermore, contributors from China and Japan tend to show different perspectives on the UNCLOS, which, by clarifying the need for further debate, are expected to contribute to the continuing cooperation between the academics of the two states.
