The Issues of Illegal Immigration and its Solutions in the Minority-Border Regions in Yunnan Province, China Gang Luo.2023-02-11 This book analyzes the governance of illegal immigrants in ethnic areas along China's southwest border. Since China is not an immigrant country and lacks an immigrant culture, the goals of law enforcement departments are limited to sanfeirenyuan (three types of illegal persons: illegal immigrants, illegal residents, and illegal employees). The transformation of sanfeirenyuan, an issue that has plagued China for many years, into an "illegal immigration" governance issue that is of general concern to the international community, has led to fundamental changes in research methods and research topics. The research presented here makes the issue China now faces part of global issues; by using the "worldview on China's issues" to assess current problems, it can also show how "China's solutions can be applied to global issues." The unique feature of this book is that it approaches the issue of illegal immigration as an unconscious crisis. Accordingly, it holds substantial value in terms of exploring the theoretical basis of and governance methods for maintaining national security in the context of globalization, as well as the early warning mechanisms and crisis management in the context of China's national security. Since China has a long southwest border, the stability and security of border ethnic areas have long played a decisive role in the stability and security of the country as a whole: if the frontiers are stable, the country enjoys enhanced security. Consequently, investigating the governance mechanism for illegal immigrants in the ethnic areas of the southwest border is of considerable practical relevance. This book offers a valuable asset for researchers in related fields and can be used as a reference book for students of national security. It also benefits practitioners in relevant management departments.

Computers Helping People with Special Needs Klaus Miesenberger,Joachim Klaus,Wolfgang Zagler,Arthur Karshmer.2008-07-04 Welcome to the proceedings of ICCHP 2008. We were proud to welcome participants from more than 40 countries from all continents to ICCHP. The International Programme Committee, encompassing 102 experts from all over the world, selected 150 full and 40 short papers out of 360 abstracts submitted to ICCHP. Our acceptance rate of about half of the submissions, demonstrates the scientific quality of the programme and in particular the proceedings you have in your hands. An impressive group of experts agreed to organize "Special Thematic Sessions" (STS) for ICCHP 2008. The existence of these STS sessions helped to bring the meeting into sharper focus in several key areas of assistive technology. In turn, this deeper level of focus helped to bring together the state-of-the-art and mainstream technical, social, cultural and political developments. Our keynote speaker, Jim Fruchterman from BeneTech, USA highlighted the importance of giving access to ICT and AT at a global level. In another keynote by Harold Thimbleby, Swansea University, UK, the role of user-centred design and usability engineering in assistive technology and accessibility was addressed. And finally, a combination keynote and panel discussion was reserved for WAI/WCAG2.0, which we expect to be the new reference point for Web accessibility from the summer of 2008 and beyond.
