Environmental Nanotechnology Nandita Dasgupta, Shivendu Ranjan, Eric Lichtfouse. 2018-05-15 This book presents the environmental benefits of nanomaterials in agriculture, water purification and nanomedicine. Nanotechnology will modify the environment both in a positive and negative way. On the one hand, new nanomaterials are promising for reducing greenhouse gases, cleaning toxic wastes and building alternative energy sources. On the other hand, some toxic nanoparticles enter and disrupt ecosystems. Therefore, research should focus on the sustainable use of nanomaterials to avoid environmental contamination. This volume is the first of several volumes on Environmental Nanotechnology, which will be published in the series Environmental Chemistry for a Sustainable World.

Mediating Xenophobia in Africa Dumisani Moyo, Shepherd Mpofo.2020-11-24 This book brings together contributions that analyse different ways in which migration and xenophobia have been mediated in both mainstream and social media in Africa and the meanings of these different mediation practices across the continent. It is premised on the assumption that the media play an important role in mediating the complex intersection between migration, identity, belonging, and xenophobia (or what others have called Afrophobia), through framing stories in ways that either buttress stereotyping and Othering, or challenge the perceptions and representations that fuel the violence inflicted on so-called foreign nationals. The book deals with different expressions of xenophobic violence, including both physical and emotional violence, that target the foreign Other in different African countries.
