

The Power Of Just Doing Stuff How Local Action Can

American Immanence Michael S. Hogue. 2018-04-24 The Anthropocene marks the age of significant human impact on the Earth's ecosystems, dramatically underscoring the reality that human life is not separate from nature but an integral part of it. Culturally, ecologically, and socially destructive practices such as resource extraction have led to this moment of peril. These practices, however, implicate more than industrial and economic systems: they are built into the political theology of American exceptionalism, compelling us to reimagine human social and political life on Earth. *American Immanence* seeks to replace the dominant American political tradition, which has resulted in global social, economic, and environmental injustices, with a new form of political theology, its dominant feature a radical democratic politics. Michael S. Hogue explores the potential of a dissenting immanent tradition in American religion based on philosophical traditions of naturalism, process thought, and pragmatism. By integrating systems theory and concepts of vulnerability and resilience into the lineages of American immanence, he articulates a political theology committed to democracy as an emancipatory and equitable way of life. Rather than seeking to redeem or be redeemed, Hogue argues that the vulnerability of life in the Anthropocene calls us to build radically democratic communities of responsibility, resistance, and resilience. *American Immanence* integrates an immanent theology of, by, and for the planet with a radical democratic politics of, by,

and for the people.

Change Everything Christian Felber.2015-06-11 Is it possible for businesses to have a bottom line that is not profit and endless growth, but human dignity, justice, sustainability and democracy? Or an alternative economic model that is untainted by the greed and crises of current financial systems? Christian Felber says it is. Moreover, in *Change Everything* he shows us how. The Economy for the Common Good is not just an idea, but has already become a broad international movement with thousands of people, hundreds of companies, and dozens of communities and organizations participating, developing and implementing it. Published in English for the first time, this is a remarkable blueprint for change that will profoundly influence debates on reshaping our economy for the future.

Food Sovereignty and Land Grabbing Gabriele Proglgio.2023-06-21 This book focuses on the relationship between food sovereignty and land grabbing. Adopting a multidisciplinary approach, the book deals with various aspects concerning the rush for land, and the subsequent popular and indigenous resistance in different parts of the world. Each contribution deals with a specific case study, shedding light on central issues surrounding extractivism and resistance by local and indigenous communities. This volume is an editorial project born “from below” - more specifically, during an intense cultural exchange among people coming from many countries, such as the Netherlands, the USA, Brazil, the UK, and Italy. In this sense, the book serves to problematize food sovereignty from many perspectives, and is an example of a new pedagogical approach to research.

Natural Catastrophe Brian Elliott.2016-10-26 Brian Elliott persuasively argues that climate change is not a natural phenomenon but a political phenomenon: a symptom of neoliberal governance. This helps us to understand how, across wealthy liberal democracies, environmental concern has

increasingly been framed as a consumer responsibility issue rather than as a matter of structural social-political transformation. Thinking of a world truly beyond climate change requires us to reimagine the state beyond its current neoliberal configuration. Elliott argues that, in order to achieve this, environmental politics in the west needs to renew the Marxist challenge to the global market's benign production of social utility and construct a new non-apocalyptic politics of nature.

Advancements in the Philosophy of Design Pieter E. Vermaas, Stéphane Vial. 2018-03-02 This volume presents 25 essays on the philosophy of design. With contributions originating from philosophy and design research, and from product design to architecture, it gives a rich spectrum of state of the art research and brings together studies on philosophical topics in which design plays a key role and design research to which philosophy contributes. Coverage zooms in on specific and more well-known design disciplines but also includes less-studied disciplines, such as graphic design, interior architecture and exhibition design. In addition, contributors take up traditional philosophical issues, such as epistemology, politics, phenomenology and philosophy of science. Some essays cover philosophical issues that emerge in design, for instance what design can do in addressing societal problems, while other essays analyze main-stream philosophical issues in which design is part of the argument, as for instance abduction and aesthetics. Readers will discover new research with insightful analyses of design research, design thinking and the specificity of design. Overall, this comprehensive overview of an emerging topic in philosophy will be of great interest to researchers and students.

Climate Cultures in Europe and North America Thorsten Heimann, Jamie Sommer, Margarethe Kusenbach, Gabriela Christmann. 2022-07-28 Bringing together scholarly research by climate experts working in different locations and social science disciplines, this book offers insights into how

climate change is socially and culturally constructed. Whereas existing studies of climate cultural differences are predominantly rooted in a static understanding of culture, cultural globalization theory suggests that new formations emerge dynamically at different social and spatial scales. This volume gathers analyses of climate cultural formations within various spaces and regions in the United States and the European Union. It focuses particularly on the emergence of new social movements and coalitions devoted to fighting climate change on both sides of the Atlantic. Overall, *Climate Cultures in Europe and North America* provides empirical and theoretical findings that contribute to current debates on globalization, conflict and governance, as well as cultural and social change. This book will be of great interest to students and scholars of climate change, environmental policy and politics, environmental sociology, and cultural studies.

Education for Sustainability Stephen Sterling, John Huckle. 2014-08-07 Now with new Introduction and additional new chapter. At a time when polls suggest that a majority of young British people believe that the future will offer a worse quality of life than the present, it is becoming imperative that children are introduced to principles of sustainability through the educational system from an early age, and that these principles are regularly reinforced and built upon. The government's own Panel on Sustainable Development has called for a 'comprehensive strategy for environmental and training', and NGOs frequently point to education as a key policy instrument in the transition to sustainable development. This is the first book published in Britain to provide an overview of the theory and practice of these issues. It brings together contributions from environmental educators working in the formal and informal sectors and in continuing education, and provides perspectives on the philosophy, politics and pedagogy of education for sustainability, as well as case studies and pointers towards good practice. Part I establishes some initial perspectives on sustainability,

education and the role of NGOs; the potential for education for sustainability in the formal and informal sectors is assessed in Parts II and III; Part IV discusses its development as part of the greening of business and local government; and Part V looks at the way forward.

Social Enterprise in Western Europe Jacques Defourny, Marthe Nyssens. 2021-04-12 In the last two decades, the quest for a widely accepted definition of social enterprise has been a central issue in a great number of publications. The main objective of the ICSEM Project on which this book is based was to show that the social enterprise field would benefit much more from linking conceptualisation efforts to the huge diversity of social enterprises than from an additional and ambitious attempt at providing an encompassing definition. Starting from a hypothesis that could be termed the impossibility of a unified definition, the ICSEM research strategy relied on bottom-up approaches to capture the social enterprise phenomenon in its local and national contexts. This strategy made it possible to take into account and give legitimacy to locally embedded approaches, while simultaneously allowing for the identification of major social enterprise models to delineate the field on common grounds at the international level. *Social Enterprise in Western Europe* - the third volume in a series of four ICSEM-based books on social enterprise worldwide - will serve as a key reference and resource for teachers, researchers, students, experts, policy makers, journalists and others who want to acquire a broad understanding of the social enterprise and social entrepreneurship phenomena as they emerge and develop in this region.

Urban Environmental Education Review Alex Russ, Marianne E. Krasny. 2017-06-06 *Urban Environmental Education Review* explores how environmental education can contribute to urban sustainability. Urban environmental education includes any practices that create learning opportunities to foster individual and community well-being and environmental quality in cities. It

fosters novel educational approaches and helps debunk common assumptions that cities are ecologically barren and that city people don't care for, or need, urban nature or a healthy environment. Topics in Urban Environmental Education Review range from the urban context to theoretical underpinnings, educational settings, participants, and educational approaches in urban environmental education. Chapters integrate research and practice to help aspiring and practicing environmental educators, urban planners, and other environmental leaders achieve their goals in terms of education, youth and community development, and environmental quality in cities. The ten-essay series Urban EE Essays, excerpted from Urban Environmental Education Review, may be found here: naaee.org/eeepro/resources/urban-ee-essays. These essays explore various perspectives on urban environmental education and may be reprinted/reproduced only with permission from Cornell University Press.

Global Handbook of Quality of Life Wolfgang Glatzer, Laura Camfield, Valerie Møller, Mariano Rojas. 2015-01-22 This handbook provides a comprehensive historical account of the field of Quality of Life. It brings together theoretical insights and empirical findings and presents the main items of global quality of life and wellbeing research. Worldwide in its scope of topics, the handbook examines discussions of demographic and health development, the spread of democracy, global economic accounting, multi-item measurement of perceived satisfaction and expert-assessed quality of life and the well-being of children, women and poor people. It looks at well-being in specific regions, including North and Sub-Saharan Africa, Asia, South America and Eastern and Western Europe. In addition to contributions by leading and younger authors, the handbook includes contributions from International Organizations about their own work with respect to social reporting.

Social Sustainability, Past and Future Sander van der Leeuw.2020-02-13 A novel, integrated approach to understanding long-term human history, viewing it as the long-term evolution of human information-processing. This title is also available as Open Access.

Making is Connecting David Gauntlett.2018-05-21 SECOND UPDATED EDITION, WITH THREE ALL-NEW CHAPTERS The first edition of Making is Connecting struck a chord with crafters, YouTubers, makers, music producers, artists and coders alike. David Gauntlett argues that through making things, people engage with the world and create connections with each other. Online and offline, we see that people want to make their mark, and to make connections. This shift from a 'sit-back-and-be-told culture' to a 'making-and-doing culture' means that a vast array of people are exchanging their own ideas, videos, and other creative material online, as well as engaging in real-world crafts, music projects, and hands-on experiences. Drawing on evidence from psychology, politics, philosophy, and economics, Gauntlett shows that this everyday creative engagement is necessary and essential for the happiness and survival of modern societies. This fully revised second edition includes many new sections as well as three brand new chapters on creative processes, do-it-yourself strategies, and platforms for creativity.

Climate Crisis and the Democratic Prospect Frank Fischer.2017 Can contemporary democratic governments tackle climate crisis? Some argue that democracy has to be a central part of a strategy to deal with climate change. Others argue that experience shows it not to be up to the challenge in the time frame available-that it will require a stronger hand, even a form of eco-authoritarianism. A question that does not lend itself to an easy assessment, this volume seeks to out and assess the competing answers. While the book supports the case for environmental democracy, it argues that establishing and sustaining democratic practices will be difficult during the global climate turmoil

ahead, especially in the face of state of emergencies. This inquiry undertakes a search for an appropriate political-ecological strategy for preserving a measure of democratic governance during hard times. Without ignoring the global dimensions of the crisis, the analysis finds an alternative path in the theory and practices participatory environmental governance embodied in a growing relocalization movement, and global eco-localism generally. Although such movements largely operate under the radar of the social sciences, the media and the political realm generally, these vibrant socio-ecological movements not only speak to the crisis ahead, but are already well established and thriving on the ground, including ecovillages, eco-communes, eco-neighborhoods, and local transition initiatives. With the help of these ideas and projects, the task is to influence the discourse of environmental political theory in ways that can be of assistance to those who will face climate crisis in its full magnitude.

How Everything Can Collapse Pablo Servigne, Raphaël Stevens. 2020-03-27 What if our civilization were to collapse? Not many centuries into the future, but in our own lifetimes? Most people recognize that we face huge challenges today, from climate change and its potentially catastrophic consequences to a plethora of socio-political problems, but we find it hard to face up to the very real possibility that these crises could produce a collapse of our entire civilization. Yet we now have a great deal of evidence to suggest that we are up against growing systemic instabilities that pose a serious threat to the capacity of human populations to maintain themselves in a sustainable environment. In this important book, Pablo Servigne and Raphaël Stevens confront these issues head-on. They examine the scientific evidence and show how its findings, often presented in a detached and abstract way, are connected to people's ordinary experiences - joining the dots, as it were, between the Anthropocene and our everyday lives. In so doing they provide a valuable guide

that will help everyone make sense of the new and potentially catastrophic situation in which we now find ourselves. Today, utopia has changed sides: it is the utopians who believe that everything can continue as before, while realists put their energy into making a transition and building local resilience. Collapse is the horizon of our generation. But collapse is not the end - it's the beginning of our future. We will reinvent new ways of living in the world and being attentive to ourselves, to other human beings and to all our fellow creatures.

Political Education in the Anthropocene Nathanaël Wallenhorst, Renaud Hétier, Jean-Philippe Pierron, Christoph Wulf. 2023-11-22 This book articulates an educational theory as well as a political theory of the Anthropocene. Divided into three sections it addresses educational anthropology, cultures and institutions, and educational recommendations in the Anthropocene. Topics covered in the volume measure the impact of the idea of the Anthropocene on the type of anthropology that underlies education and on a phenomenology of relationship. It links the notion of the Anthropocene with cultures and institutions so as not to 'smooth out' or erase the latter. Finally, it presents proposals and recommendations for educational practices. The work advocates rethinking education as an essential component in ensuring the sustainability of human life in society - by proposing to go beyond the approach of education for sustainable development or environmental education. The work also brings together empirical contributions in which proposals are elaborated for programs, pedagogical devices and experiments relating to the preparation of the future in the field of education. This volume is of interest to researchers of the Anthropocene.

Sustainability Principles and Practice Margaret Robertson. 2017-03-16 This new and expanded edition builds upon the first edition's accessible and comprehensive overview of the interdisciplinary field of sustainability. The focus is on furnishing solutions and equipping the student with both

conceptual understanding and technical skills for the workplace. Each chapter explores one aspect of the field, first introducing concepts and presenting issues, then supplying tools for working toward solutions. Techniques for management and measurement as well as case studies from around the world are provided. The second edition includes a complete update of the text, with increased coverage of major topics including the Anthropocene; complexity; resilience; environmental ethics; governance; the IPCC's latest findings on climate change; Sustainable Development Goals; and new thinking on native species and novel ecosystems. Chapters include further reading and discussion questions. The book is supported by a companion website with links, detailed reading lists, glossary, and additional case studies, together with projects, research problems, and group activities, all of which focus on real-world problem solving of sustainability issues. The textbook is designed to be used by undergraduate college and university students in sustainability degree programs and other programs in which sustainability is taught.

The Future is Degrowth Matthias Schmelzer, Andrea Vetter, Aaron Vansintjan. 2022-06-28 We need to break free from the capitalist economy. Degrowth gives us the tools to bend its bars. Economic growth isn't working, and it cannot be made to work. Offering a counter-history of how economic growth emerged in the context of colonialism, fossil-fueled industrialization, and capitalist modernity, *The Future Is Degrowth* argues that the ideology of growth conceals the rising inequalities and ecological destructions associated with capitalism, and points to desirable alternatives to it. Not only in society at large, but also on the left, we are held captive by the hegemony of growth. Even proposals for emancipatory Green New Deals or postcapitalism base their utopian hopes on the development of productive forces, on redistributing the fruits of economic growth and technological progress. Yet growing evidence shows that continued economic growth

cannot be made compatible with sustaining life and is not necessary for a good life for all. This book provides a vision for postcapitalism beyond growth. Building on a vibrant field of research, it discusses the political economy and the politics of a non-growing economy. It charts a path forward through policies that democratise the economy, “now-topias” that create free spaces for experimentation, and counter-hegemonic movements that make it possible to break with the logic of growth. Degrowth perspectives offer a way to step off the treadmill of an alienating, expansionist, and hierarchical system. A handbook and a manifesto, *The Future Is Degrowth* is a must-read for all interested in charting a way beyond the current crises.

Seed Libraries Cindy Conner. 2015-02-01 Community-based initiatives to preserve and protect our food supply Historically, seed companies were generally small, often family-run businesses. Because they were regionally based, they could focus on varieties well-suited to the local environment. A Pacific Northwest company, for example, would specialize in different cultivars than a company based in the Southeast. However the absorption of these small, independent seed businesses into large multinationals, combined with the advancement of biotechnology resulting in hybrids and GMO seeds, has led to a serious loss of genetic diversity. The public is now at the mercy of the corporations that control the seeds. In the past few years, gardeners have realized the inherent danger in this situation. A growing movement is striving to preserve and expand our stock of heritage and heirloom varieties through seed saving and sharing opportunities. *Seed Libraries* is a practical guide to saving seeds through community programs, including: Step-by-step instructions for setting up a seed library A wealth of ideas to help attract patrons and keep the momentum going Profiles of existing libraries and other types of seed saving partnerships Whoever controls the seeds controls the food supply. By empowering communities to preserve and protect the genetic diversity

of their harvest, Seed Libraries is the first step towards reclaiming our self-reliance while enhancing food security and ensuring that the future of food is healthy, vibrant, tasty, and nutritious. Cindy Conner is a permaculture educator, founder of Homeplace Earth and producer of two popular instructional gardening DVDs. She is also the author of *Grow a Sustainable Diet*.

Born on Third Base Chuck Collins. 2016-09-23 As inequality grabs headlines, steals the show in presidential debates, and drives deep divides between the haves and have nots in America, class war brews. On one side, the wealthy wield power and advantage, wittingly or not, to keep the system operating in their favor—all while retreating into enclaves that separate them further and further from the poor and working class. On the other side, those who find it increasingly difficult to keep up or get ahead lash out—waging a rhetorical war against the rich and letting anger and resentment, however justifiable, keep us from seeing new potential solutions. But can we suspend both class wars long enough to consider a new way forward? Is it really good for anyone that most of society's wealth is pooling at the very top of the wealth ladder? Does anyone, including the one percent, really want to live in a society plagued by economic apartheid? It is time to think differently, says longtime inequality expert and activist Chuck Collins. Born into the one percent, Collins gave away his inheritance at 26 and spent the next three decades mobilizing against inequality. He uses his perspective from both sides of the divide to deliver a new narrative. Collins calls for a ceasefire and invites the wealthy to come back home, investing themselves and their wealth in struggling communities. And he asks the non-wealthy to build alliances with the one percent and others at the top of the wealth ladder. Stories told along the way explore the roots of advantage, show how taxpayers subsidize the wealthy, and reveal how charity, used incorrectly, can actually reinforce extreme inequality. Readers meet pioneers who are crossing the divide to work together in new

ways, including residents in the author's own Boston-area neighborhood who have launched some of the most interesting community transition efforts in the nation. In the end, Collins's national and local solutions not only challenge inequality but also respond to climate change and offer an unexpected, fresh take on one of our most intransigent problems.

Environment and Society Magnus Boström, Debra J. Davidson. 2018-06-13 This book offers a critical analysis of core concepts that have influenced contemporary conversations about environment-society relations in academic, political, and civil circles. Considering these conceptualizations are currently shaping responses to environmental crises in fundamental ways, critical reflections on concepts such as the Anthropocene, metabolism, risk, resilience, environmental governance, environmental justice and others, are well-warranted. Contributors to this volume, working across a multitude of areas within environmental social science, scrutinize underlying worldviews and assumptions, asking a common set of key questions: What are the different concepts able to explain? How do they take into account society-environment relations? What social, cultural, or geo-political biases and blinders are inherent? What actions or practices do the concepts inspire? The transdisciplinary engagement and reflexivity regarding concepts of environment-society relations represented in these chapters is needed in all spheres of society—in academia, policy and practice—not the least to confront current tendencies of anti-reflexivity and denialism.

Women Activating Agency in Academia Alison L. Black, Susanne Garvis. 2018-04-17 Women Activating Agency in Academia seeks to create and expand safe spaces for scholarly, professional and personal stories and assemblages of agency. It provides readers with the opportunity to connect with the strategies women are using to navigate academe and the core values, linked to trust,

relationship, wellbeing and ethics of care, they live by. The collection offers the stories of women academics from around the globe and across disciplines and showcases their efforts to meaningfully listen and converse in order to resist self-audit and diminished identities. Reflections come from a range of responsive, personal and aesthetic techniques, including writing groups, guided autobiography, auto-ethnography, collective activism and slow scholarship. Chapters engage with themes and ideas such as agency, neoliberalism, ontological security, androcentricity, identity and collegial support, which manifest in unique ways for female academics. The focus in this volume is what really matters to women in the academy, as they share their efforts to 'be' themselves in their work, to 'care for themselves and others' and to 'count what isn't counted'. It aims to prove how collaborative storytelling and discussion can empower female academics to preserve and achieve these ambitions.

The Transition Handbook Rob Hopkins. 2008-02-25 Move from feeling anxious about the oil crisis to developing a positive vision and taking traction action to create a more self-reliant existence with this ground-breaking book. We live in an oil-dependent world, and have become reliant in a very short space of time, using vast reserves of oil in the process - and without planning for when the supply is not so plentiful. Most of us avoid thinking about what happens when the oil runs out (or becomes prohibitively expensive), but the reality may not be as bad as we think. The Transition Handbook shows how the inevitable and profound changes ahead could have a positive effect. Written by permaculture expert Rob Hopkins, he discusses the possibility of a rebirth of local communities, which will generate their own fuel, food and housing. These will encourage the development of local currencies, to keep money in the local area, and unleash a local 'skilling-up', so that people have more control over their lives. The growth in interest in the Transition model

continues to be exponential. There are now more than 35 formal Transition Initiatives in the UK, including towns, cities, islands, villages and peninsulas, with more joining as the idea takes off. With little proactivity at government level, communities are taking matters into their own hands and acting locally. If your community has not yet become a Transition Initiative, this upbeat guide, filled with beautiful black and white photographs, offers you the tools to get started. The Transition Handbook is the perfect manual to guide communities, as they begin this 'energy descent' journey.

From What Is to What If Rob Hopkins. 2019-10-15 “Big ideas that just might save the world”—The Guardian The founder of the international Transition Towns movement asks why true creative, positive thinking is in decline, asserts that it's more important now than ever, and suggests ways our communities can revive and reclaim it. In these times of deep division and deeper despair, if there is a consensus about anything in the world, it is that the future is going to be awful. There is an epidemic of loneliness, an epidemic of anxiety, a mental health crisis of vast proportions, especially among young people. There's a rise in extremist movements and governments. Catastrophic climate change. Biodiversity loss. Food insecurity. The fracturing of ecosystems and communities beyond, it seems, repair. The future—to say nothing of the present—looks grim. But as Transition movement cofounder Rob Hopkins tells us, there is plenty of evidence that things can change, and cultures can change, rapidly, dramatically, and unexpectedly—for the better. He has seen it happen around the world and in his own town of Totnes, England, where the community is becoming its own housing developer, energy company, enterprise incubator, and local food network—with cascading benefits to the community that extend far beyond the projects themselves. We do have the capability to effect dramatic change, Hopkins argues, but we're failing because we've largely allowed our most critical tool to languish: human imagination. As defined by social reformer John Dewey, imagination is the

ability to look at things as if they could be otherwise. The ability, that is, to ask What if? And if there was ever a time when we needed that ability, it is now. Imagination is central to empathy, to creating better lives, to envisioning and then enacting a positive future. Yet imagination is also demonstrably in decline at precisely the moment when we need it most. In this passionate exploration, Hopkins asks why imagination is in decline, and what we must do to revive and reclaim it. Once we do, there is no end to what we might accomplish. From What Is to What If is a call to action to reclaim and unleash our collective imagination, told through the stories of individuals and communities around the world who are doing it now, as we speak, and witnessing often rapid and dramatic change for the better.

The Power of Just Doing Stuff Rob Hopkins.2013

Postenvironmentalism Chiara Certomà.2016-11-07 This book presents a vibrant study of the rise, decline, and transformation of environmental thinking. The author's analysis moves from the proclaimed death of environmentalism toward the emerging theory and practices of postenvironmentalism in its manifold interpretations. Building upon current transformation of the relationship between science, technology, society and the environment, the book combines a theory-informed presentation of worldwide cases and crucial events in the history of environmentalism with a journey into scholarly explorations in order to answer the crucial question: where is environmental thinking heading?

Coming Back to Life Joanna Macy,Molly Young Brown.2014-11-11 Personal empowerment in the face of planetary despair

The Politics of Green Transformations Ian Scoones,Melissa Leach,Peter Newell.2015-01-09 Multiple 'green transformations' are required if humanity is to live sustainably on planet Earth. Recalling past

transformations, this book examines what makes the current challenge different, and especially urgent. It examines how green transformations must take place in the context of the particular moments of capitalist development, and in relation to particular alliances. The role of the state is emphasised, both in terms of the type of incentives required to make green transformations politically feasible and the way states must take a developmental role in financing innovation and technology for green transformations. The book also highlights the role of citizens, as innovators, entrepreneurs, green consumers and members of social movements. Green transformations must be both 'top-down', involving elite alliances between states and business, but also 'bottom up', pushed by grassroots innovators and entrepreneurs, and part of wider mobilisations among civil society. The chapters in the book draw on international examples to emphasise how contexts matter in shaping pathways to sustainability. Written by experts in the field, this book will be of great interest to researchers and students in environmental studies, international relations, political science, development studies, geography and anthropology, as well as policymakers and practitioners concerned with sustainability.

Children and Peace Nikola Balvin, Daniel J. Christie. 2019-10-20 This open access book brings together discourse on children and peace from the 15th International Symposium on the Contributions of Psychology to Peace, covering issues pertinent to children and peace and approaches to making their world safer, fairer and more sustainable. The book is divided into nine sections that examine traditional themes (social construction and deconstruction of diversity, intergenerational transitions and memories of war, and multiculturalism), as well as contemporary issues such as Europe's "migration crisis", radicalization and violent extremism, and violence in families, schools and communities. Chapters contextualize each issue within specific social

ecological frameworks in order to reflect on the multiplicity of influences that affect different outcomes and to discuss how the findings can be applied in different contexts. The volume also provides solutions and hope through its focus on youth empowerment and peacebuilding programs for children and families. This forward-thinking volume offers a multitude of views, approaches, and strategies for research and activism drawn from peace psychology scholars and United Nations researchers and practitioners. This book's multi-layered emphasis on context, structural determinants of peace and conflict, and use of research for action towards social cohesion for children and youth has not been brought together in other peace psychology literature to the same extent. *Children and Peace: From Research to Action* will be a useful resource for peace psychology academics and students, as well as social and developmental psychology academics and students, peace and development practitioners and activists, policy makers who need to make decisions about the matters covered in the book, child rights advocates and members of multilateral organizations such as the UN.

From Local Action to Global Networks: Housing the Urban Poor Prof Dr Peter Herrle, Dr Astrid Ley, Ms Josefine Fokdal. 2015-10-28 Over the past two decades it has become widely recognized that housing issues have to be placed in a broader framework recognizing that civil society in the form of Community Based Organizations (CBOs) and their allies are increasingly networking and emerging as strong players that cannot easily be overlooked. This book brings together different perspectives on multi-scalar approaches within the housing field and on grassroots' engagement with formal agencies including local government, higher levels of government and international agencies. By moving away from romanticizing local self-initiatives, it focuses on understanding the emerging potential once local initiatives are interlinked and scaled-up to transnational networks.

Cultures of the Countryside Veronica Sekules.2017-11-27 Cultures of the Countryside examines the relationship between the museum and the micro-cultures of the countryside. Offering an exploration of museums and heritage projects in the UK that have attempted to introduce new ways of engagement between localities, objects, and people, this book considers how museums, heritage initiatives, and art projects have dealt with pressing local and global socio-political issues relating to the environment and rural life, including changing demographics and rural practices, local environmental concerns, and global climate activism. Providing a thorough examination of the representation of competing histories, visions and politics, Sekules asks whether museums and heritage projects can engage actively in shaping cultures, as well as reflecting them. At the core of the analysis is an examination of the findings from a project in the UK's East Anglia, 'The Culture of the Countryside', from which emerged themes closely bound to different countryside landscapes, peoples and heritage. Aimed at practitioners and students alike, Cultures of the Countryside provides a unique insight into the roles of the museum and heritage projects in rural and environmental issues in the recent past, whilst also offering perspectives and recommendations for the future.

Leading the Inclusive City Hambleton, Robin.2014-11-24 Cities are often seen as helpless victims in a global flow of events and many view growing inequality in cities as inevitable. This engaging book rejects this gloomy prognosis and argues that imaginative place-based leadership can enable citizens to shape the urban future in accordance with progressive values - advancing social justice, promoting care for the environment and bolstering community empowerment. This international and comparative book, written by an experienced author, shows how inspirational civic leaders are making a major difference in cities across the world. The analysis provides practical lessons for local

leaders and a significant contribution to thinking on public service innovation for anyone who wants to change urban society for the better.

Emerging Economies and Challenges to Sustainability Arve Hansen, Ulrikke Wethal. 2014-10-10 The rise of emerging economies represents a challenge to traditional global power balances and raises the question of how we can combine sustainability with continued economic growth. Understanding this global shift and its impact on the environment is the paramount contemporary challenge for development-oriented researchers and policy makers alike. This book breaks new ground by combining scholarship on the role of emerging economies with research on sustainable development. The book investigates how the development strategies of emerging economies challenge traditional development theory and sustainability discourses. With regional introductions and original case studies from South Asia, East Asia, Latin America and Sub-Saharan Africa, it discusses how to conceptualise sustainable development in the global race for economic prosperity. What characterises the development strategies of emerging economies, and what challenges are these posing for global sustainable development? How can emerging economies shed light on the global challenges, dilemmas and paradoxes of the relationship between socio-economic improvements and environmental degradation? This book will be a valuable resource for researchers and postgraduates in development studies, geography, economics and environmental studies.

Re-Constructing the Global Network Economy Andrew Taylor, Adam Bronstone. 2022-10-07 This book looks at how to build more resilience into socio-economic networks within local communities. Understanding the relationships between attachment to place, complex systems and patterns of knowledge creation is not straightforward, but these relationships are emerging as the challenges that we face in bridging the gap between the social worlds that we inhabit and an emerging digital

world. These issues have been brought into even sharper focus through changes resulting from the COVID-19 pandemic. On the one hand, forced familiarity with communication technologies is driving globalisation forwards, whilst on the other, the crisis has created awareness of dependencies and heightened desires for more local solutions. Plenty of books have been written about the rise of digital networks and the decline of local communities. This book takes a radical approach by identifying how these trends fit together and provides examples of how digital networks can be made to work for the local as well as the global economy. Using a case study approach, the book offers a clear-sighted view of the role of relational capital in specific places and organisations and shows the transformational impact that they can have at a micro level. The book deliberately seeks to shake up preconceived ideas and is ideal for strategy practitioners and policy makers within governments and NGOs involved in connecting local to wider network economies.

Electricity Decentralization in the European Union Rafael Leal-Arcas.2023-07-10 Electricity Decentralization in the European Union: Towards Zero Carbon and Energy Transition, Second Edition examines progress in decentralization across the European Union, with each chapter focusing on developments and innovations in a specific country. Sections provide an overview of the current role and state of smart grids, the conceptualization of energy transition, and specific cases across all EU states. Across the chapters, regulatory frameworks are assessed to identify to what extent it is conducive to decentralization, with specific outcomes of decentralization covered in detail, including deployment of smart grids and meters, demand response, electric vehicles, and storage. The book highlights how specific EU member states are progressing towards deployment of these tools and technologies, along with the specific needs and regulatory barriers in each and recommendations for how regulation can be more encouraging. In addition, electricity

interconnections in the EU are considered as a vital step towards decentralization in order to boost energy security and energy efficiency. Finally, the book includes a detailed examination of data protection concerns that arise from the advent of new technologies that collect personal information, such as smart grids, assessing current regulation on data protection and identifying areas for improvement, as well as innovative finance options for sustainable energy. Analyzes the regulatory environment with regard to decentralization Explores new tools and technologies to facilitate decentralization, along with current progress in each Addresses barriers and suggests improvements across tools, technologies and regulations

Revolutionary Power Shalanda Baker.2021-01-14 In September 2017, Hurricane Maria hit Puerto Rico, completely upending the energy grid of the small island. The nearly year-long power outage that followed vividly shows how the new climate reality intersects with race and access to energy. The island is home to brown and black US citizens who lack the political power of those living in the continental US. As the world continues to warm and storms like Maria become more commonplace, it is critical that we rethink our current energy system to enable reliable, locally produced, and locally controlled energy without replicating the current structures of power and control. In *Revolutionary Power*, Shalanda Baker arms those made most vulnerable by our current energy system with the tools they need to remake the system in the service of their humanity. She argues that people of color, poor people, and indigenous people must engage in the creation of the new energy system in order to upend the unequal power dynamics of the current system. *Revolutionary Power* is a playbook for the energy transformation complete with a step-by-step analysis of the key energy policy areas that are ripe for intervention. Baker tells the stories of those who have been left behind in our current system and those who are working to be architects of a more just system. She

draws from her experience as an energy-justice advocate, a lawyer, and a queer woman of color to inspire activists working to build our new energy system. Climate change will force us to rethink the way we generate and distribute energy and regulate the system. But how much are we willing to change the system? This unique moment in history provides an unprecedented opening for a deeper transformation of the energy system, and thus, an opportunity to transform society. *Revolutionary Power* shows us how.

Design and Political Dissent Jilly Traganou.2020-10-27 This book examines, through an interdisciplinary lens, the relationship between political dissent and processes of designing. In the past twenty years, theorists of social movements have noted a diversity of visual and performative manifestations taking place in protest, while the fields of design, broadly defined, have been characterized by a growing interest in activism. The book's premise stems from the recognition that material engagement and artifacts have the capacity to articulate political arguments or establish positions of disagreement. Its contributors look at a wide array of material practices generated by both professional and nonprofessional design actors around the globe, exploring case studies that vary from street protests and encampments to design pedagogy and community-empowerment projects. For students and scholars of design studies, urbanism, visual culture, politics, and social movements, this book opens up new perspectives on design and its place in contemporary politics.

The Power of Just Doing Stuff Rob Hopkins.2013-06-13 Something is stirring. People around the world are deciding that the well-being of their community and its economy lies with them. They're people like you. They've had enough, and, rather than waiting for permission, they're rolling up their sleeves, getting together with friends and neighbours, and doing something about it. Whether they start small or big, they're finding that just doing stuff can transform their neighbourhoods and their

lives. *The Power of Just Doing Stuff* argues that this shift represents the seeds of a new economy - the answer to our desperate search for a new way forward - and at its heart is people deciding that change starts with them. Communities worldwide are already modelling a more local economy rooted in place, in well-being, in entrepreneurship, and in creativity. And it works. Packed with inspiring real-life examples of how to change things, this book ties in with the increasing focus on community action during tough economic times. This brilliant book is ideal for schools, community groups and campaigners as well as the general public and Transition groups.

Low Impact Living Paul Chatterton. 2014-08-21 This book is the inspirational story of one project that shows you how you can become involved in building and running your neighbourhood. The author, co-founder of Lilac (Low Impact Living Affordable Community), along with other members of the community and the project team, explains how a group of people got together to build one of the most pioneering ecological, affordable cohousing neighbourhoods in the world. The book is a story of perseverance, vision and passion, demonstrating how ordinary people can build their own affordable, ecological community. The book starts with the clear values that motivated and guided the project's members: sustainability, co-operativism, equality, social justice and self-management. It outlines how they were driven by challenges and concerns over the need to respond to climate change and energy scarcity, the limits of the 'business as usual' model of pro-growth economics, and the need to develop resources so that communities can determine and manage their own land and resources. The author's story is interspersed with vignettes on topics such as decision making, landscaping, finance and design. The book summarises academic debates on the key issues that informed the project, and gives technical data on energy and land issues as well as practical 'how-to' guides on a range of issues such as designing meetings, budget planning and community

agreements. Low Impact Living provides clear and easy to follow advice for community groups, practitioners, government, business and the development sector and is heavily illustrated with drawings and photographs from the architectural team.

Disaster Research and the Second Environmental Crisis James Kendra, Scott G. Knowles, Tricia Wachtendorf. 2019-04-04 The 50th anniversary of the Disaster Research Center of the University of Delaware provoked a discussion of the field's background, its accomplishments, and its future directions. Participants representing many disciplines brought new methods to bear on perennial problems relevant to effective disaster management and policy formation. However, new concerns were raised, stemming from the fact that we live today in a globally unfolding environmental crisis every bit as pressing and worrisome as that of the 1960s when the Disaster Research center was founded. This volume brings together ideas of participants from that workshop as well as other contributors. Topics include: the history and evolution of disaster research, innovations in disaster management, disaster policy, and ethical considerations of disaster research. Readers interested in science and technology, public policy, community action, and the evolution of the social sciences will find much of interest in this collection.

Inhabiting the Earth Martin Locret-Collet, Simon Springer, Jennifer Mateer, Maleea Acker. 2021-10-25 Over the last several decades, scholars and practitioners have progressively acknowledged that we cannot consider cities as the place where nature stops anymore, resulting in urban environments being increasingly appreciated and theorized as hybrids between nature and culture, entities made of socio-ecological processes in constant transformation. Spanning the fields of political ecology, environmental studies, and sociology, this new direction in urban theory emerged in concert with global concern for sustainability and environmental justice. This volume explores the notion that

connecting with nature holds the key to a more progressive and liberatory politics.

When people should go to the books stores, search creation by shop, shelf by shelf, it is truly problematic. This is why we allow the ebook compilations in this website. It will totally ease you to look guide **The Power Of Just Doing Stuff How Local Action Can** as you such as.

By searching the title, publisher, or authors of guide you essentially want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be every best place within net connections. The Power Of Just Doing Stuff How Local Action Can Introduction

In today's digital age, the availability of The Power Of Just Doing Stuff How Local Action Can books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of The Power Of Just Doing Stuff How Local Action Can books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of The Power Of Just Doing Stuff How Local Action Can books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By

accessing The Power Of Just Doing Stuff How Local Action Can versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, The Power Of Just Doing Stuff How Local Action Can books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with

no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing The Power Of Just Doing Stuff How Local Action Can books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for The Power Of Just Doing Stuff How Local Action Can books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books,

including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, The Power Of Just Doing Stuff How Local Action Can books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast

library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of The Power Of Just Doing Stuff How Local Action Can books and manuals for download and embark on your journey of knowledge?

FAQs About The Power Of Just Doing Stuff How Local Action Can Books

1. Where can I buy The Power Of Just Doing Stuff How Local Action Can books?

Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.

2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a The Power Of Just Doing Stuff How Local Action Can book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of

their work.

4. How do I take care of The Power Of Just Doing Stuff How Local Action Can books?

Storage: Keep them away from direct sunlight and in a dry environment.

Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.

5. Can I borrow books without buying them?

Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.

6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to

track books read, ratings, and other details.

7. What are The Power Of Just Doing Stuff How Local Action Can audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
