American Psychiatric Association Practice Guidelines American Psychiatric Association.1996 The aim of the American Psychiatric Association Practice Guideline series is to improve patient care. Guidelines provide a comprehensive synthesis of all available information relevant to the clinical topic. Practice guidelines can be vehicles for educating psychiatrists, other medical and mental health professionals, and the general public about appropriate and inappropriate treatments. The series also will identify those areas in which critical information is lacking and in which research could be expected to improve clinical decisions. The Practice Guidelines are also designed to help those charged with overseeing the utilization and reimbursement of psychiatric services to develop more scientifically based and clinically sensitive criteria.

Taurine John B. Lombardini, Stephen W. Schaffer, Junichi Azuma.2012-12-06 The underlying philosophy of these two symposia on taurine remains the same as all those that have been held previously: the best way to remain current in the subject matter is to talk directly with the investigators at the forefront of the field. Thus, we brought together some 50 individuals from 11 different countries who have keen interests and active research programs in the many-faceted areas of taurine research. The meetings were held on October 8-10, 1991, in an elegant setting in a resort area at Orange Beach, Alabama, approximately 50 miles outside of Mobile on the Gulf Coast. The meetings were programmed as two separate Symposia held sequentially. The first symposia on October 8 was devoted exclusively to taurine research in the cat, primarily in the area of nutrition, and entitled The Waltham Symposium on Taurine and Cat Nutrition. The second symposia on October 9 and 10 was open to all fields of taurine research and was entitled International Taurine Symposium: New Dimensions on its Mechanisms of Actions. If the philosophy of these meetings was to bring both experts and novices together in a discussion and presentation of current taurine research, then the major purpose of the Proceedings is to document the current research efforts and to present an objective summary of where the taurine field stands today and where the focus will be in the future.

Something from the Oven Laura Shapiro.2005-03-29 Author of the forthcoming *What She Ate: Six Remarkable Women and the Food That Tells Their Stories* (Summer 2017) In this captivating blend of culinary history and popular culture, the award-winning author of *Perfection Salad* shows us what happened when the food industry elbowed its way into the kitchen after World War II, brandishing canned hamburgers, frozen baked beans, and instant piecrusts. Big Business waged an all-out campaign to win the allegiance of American housewives, but most women were suspicious of the new foods—and the make-believe cooking they entailed. With sharp insight and good humor, Laura Shapiro shows how the ensuing battle helped shape the way we eat today, and how the clash in the kitchen reverberated elsewhere in the house as women struggled with marriage, work, and domesticity. This unconventional history overturns our notions about the '50s and offers new thinking on some of its fascinating figures, including Poppy Cannon, Shirley Jackson, Julia Child, and Betty Friedan.

Exercise and Health Research Magnus D. Johansen.2007 In the last 50 years significant numbers of men and women take little exercise in the course of their occupation. The computer keyboard, the rise of private transport, the world by television, household 'labour saving' devices mean that with the minimal of physical effort people work and play. The benefits of doing regular exercise include a reduced risk of: heart disease, stroke, bowel cancer, breast cancer, osteoporosis, and obesity. In addition, many people feel better in themselves during and after exercise. Regular exercise is also thought to help ease stress, anxiety, and mild depression. This new book presents recent significant research from around the world dealing with various aspects and impacts of exercise as related to health.

The Reconnection Eric Pearl.2011-04 Why are prominent doctors and medical researchers all over the world interested in the extraordinary healings reported by the patients of Dr. Eric Pearl? What does it mean when these patients report the sudden disappearance of afflictions such as cancers, AIDS-related diseases, and cerebral palsy? And what does it mean when people who interact with Dr. Pearl report a sudden ability to access this healing energy not just for themselves, but for others, too? What is this phenomenon? Well, you might have to reconsider everything you've read up until now about conventional healing. The "new" frequencies of healing described by Dr. Pearl transcend "technique" entirely and bring you to levels beyond those previously accessible to anyone, anywhere. This book takes you on Dr. Pearl's journey from the discovery of his ability to facilitate healings, to his well-deserved reputation as the instrument through which this process is being introduced to the world. But most important, *The Reconnection* reveals methods you can use to personally master these new healing energies.

Organisational Capital Ahmed Bounfour.2008-12-04 There is much debate as to how companies carry out their activities in the context of new information and communication technologies influencing organizations to decentralize and develop new managerial practises including outsourcing and networking. Recent theories have emphasized the importance of organization as a key component for building corporate competitive advantage and scholars have looked at this from a range of perspectives including in relation to intangible assets, human capital, work training and the process dimension. Yet the concept of organisational capital as such - in spite of its indubitable relevance and attractiveness- is still to be clarified until now. In this book the subject is approached in four ways. Firstly from an analytical perspective: what is the status of organisational capital as a concept and how is the defined; secondly from a ontological perspective: what type of (implicit) orders can be designed and implemented around organisations; thirdly from the measurement perspective: what kind of frameworks and what type of metrics can be prototyped; and finally the implementation perspective: how should organizations integrate the organisational capital perspective in the definition and implementation of their strategies for resources' allocation. The book provides the first multifaceted and international effort from a broad perspective, aiming at clarifying the concept of organisational capital and determining its analytical and operational implications.

Le diabète... exactement ! Christian Brun.2014-03-12 « Ce que tu ne peux faire en une fois, fais-le en dix. Ce que tu ne peux réussir en dix fois, fais-le en cent. » - Confucius Comme le cancer, l'infarctus, la dépression nerveuse et l'artériosclérose, le diabète est une maladie de civilisation des temps modernes. On compte aujourd'hui 2 fois plus de diabétiques qu'il y a 25 ans, et cette affection est la première cause de cécité en France. Plusieurs éléments sont en cause : l'alimentation trop riche, trop grasse et trop sucrée, la sédentarité, les stress de plus en plus importants et surtout mal acceptés, donc mal gérés ! Est-il possible, par des conseils

d'hygiène fondamentaux, d'alimentation, de relaxation, de thérapies, etc., d'améliorer la vie des diabétiques, d'éviter ou de retarder leur descente vers l'injection d'insuline ? Autant de questions auxquelles l'auteur répond de manière simple et pédagogique. De plus, il propose une approche globale des modes et des différents mécanismes de cette maladie, ainsi qu'une stratégie naturopathique relevant du bon sens et de la logique. La seconde partie de l'ouvrage apporte des mesures élémentaires d'alimentation et des méthodes de biothérapies naturelles à la portée de chacun.

Arthroses, arthrites et rhumatismes Christian Brun. 2013-09-18 L'arthrose, l'arthrite, les lumbagos, les sciatiques et tous les rhumatismes constituent certainement l'un des maux les plus courants de notre siècle et les plus mal vécus, car quelque peu énigmatiques... L'auteur, naturopathe expérimenté, s'interroge. Et si l'acidisme humoral était la cause première de tous ces problèmes articulaires ? Ce peut-il que cela soit l'expression, la manifestation corporelle d'émotions non exprimées et refoulées, engrammées dans nos cellules depuis la naissance ? Dans la mesure où cette hypothèse s'entend, nous serions alors prisonniers de nos réactions et comportements quotidiens. Savoir décoder ce que le corps exprime par les douleurs et/ou raideurs rhumatismales serait un bon moyen d'y remédier... L'auteur explique le fonctionnement de l'organisme, détaille chaque pathologie rhumatismale pour la différencier des autres, revient sur leurs origines et propose des mesures anti-rouille et des moyens naturels, relevant du bon sens, pour soulager, atténuer, remédier aux douleurs tout simplement : exercice physique, alimentation, hydratation, réflexologie, argilothérapie, ostéopathie, acupuncture... Un livre-clé pour retrouver naturellement confort et mieux-être au quotidien ! Christian Brun, après avoir été l'assistant de P.-V. Marchesseau, a complété sa formation par des études en psychothérapie, aromathérapie, massages et iridologie. Il exerce la naturopathie et enseigne cette discipline au sein de différents organismes de formation professionnelle en France et à l'étranger. Il est l'auteur de nombreux livres dont *Le cholestérol... exactement !*, *Le diabète exactement !*, *Au diable la varice !* et *Vous avez dit prostate ?* (Éd. Jouvence).

Livestock in a Changing Landscape, Volume 2 Pierre Gerber, Harold A. Mooney, Jeroen Dijkman, Shirley Tarawali, Cees de Haan. 2010-01-29 The rapidly changing nature of animal production systems, especially increasing intensification and globalization, is playing out in complex ways around the world. Over the last century, livestock keeping evolved from a means of harnessing marginal resources to produce items for local consumption to a key component of global food chains. Livestock in a Changing Landscape offers a comprehensive examination of these important and far-reaching trends. The books are an outgrowth of a collaborative effort involving international nongovernmental organizations including the United Nations Food and Agriculture Organization (UN FAO), the International Livestock Research Institute (ILRI), the Swiss College of Agriculture (SHL), the French Agricultural Research Centre for International Development (CIRAD), and the Scientific Committee for Problems of the Environment (SCOPE). Volume 1 examines the forces shaping change in livestock production and management; the resulting impacts on landscapes, land use, and social systems; and potential policy and management responses. Volume 2 explores needs and draws experience from region-specific contexts and detailed case studies. The case studies describe how drivers and consequences of change play out in specific geographical areas, and how public and private responses are shaped and implemented. Together, the volumes present new, sustainable approaches to the challenges created by fundamental shifts in livestock management and production, and represent an essential resource for policy makers, industry managers, and academics involved with this issue

Équilibre psycho-biologique & oligo-aliments Carl C. Pfeiffer, Pierre Gonthier.1983 Contre le stress, les troubles nerveux et les maladies de terrain, le lecteur en quête de mieux vivre dispose désormais d'un traité de médecine naturelle scientifique. Cet ouvrage approfondit l'oligothérapie classique, remet en question la faveur accordée au cuivre, à l'aluminium et au phosphore, et insiste sur le maître rôle d'éléments tels que le zinc, le manganèse et la vitamine B6. On y trouvera, grâce à la prise en compte des plus récents travaux américains et allemands, la somme des connaissances et des pratiques actuelles en oligo et vitaminothérapie. Comment corriger les nombreux troubles physiques et psychiques résultant d'un déséquilibre biochimique aujourd'hui mesurable ? Carl Pfeiffer et Pierre Gonthier exposent les moyens ultra-modernes (spectrométrie à absorption atomique, profil biologique informatisé) de poser un diagnostic. Ils privilégient, en matière de traitements, les correctifs d'ordre nutritionnel et biologique. Des tables inédites donnent, sous une forme commode, la classification minérale et vitaminique des aliments. Un index détaillé des signes et symptômes facilite l'utilisation pratique de l'ouvrage. Une bibliographie développée et un glossaire complètent ce traité de la nouvelle oligothérapie.
