Simulations for Personnel Selection Michael Fetzer, Kathy Tuzinski.2013-08-13 This book provides a comprehensive and state-of-the-art overview of simulation development, technologies, and implementation, including real-world examples and results followed by a preview of what's on the horizon that will further revolutionize the industry. More than a handful of books have been written on the use of simulations for training purposes, but this book focuses solely on simulations in employee selection contexts (e.g., hiring, promotion), making it a truly unique and valuable resource for both practitioners and academics. The science and practice of employee selection has advanced at a steady pace over the past two or three decades. However, recent advancements in both technology and assessment methods have been the catalyst for an evolutionary leap in the use of simulations in this area.

A Kind of Genius Sam Roberts.2009-03-03 In *A Kind of Genius*, Sam Roberts offers a window onto Herb Sturz's extraordinary life's work. Sturz began his long career in social entrepreneurship by reforming the bail system and founding the Vera Institute of Justice. He served as New York City's Deputy Mayor for Criminal Justice under Ed Koch and then as Chairman of the City Planning

Commission. He moved on to establish affordable inner-city housing and programs for at-risk individuals. But Sturz has, to date, largely eschewed the public's eye. Roberts pays tribute to Sturz's inspirational legacy of accomplishment. His initiatives have consistently provided solutions to our most challenging problems. Here, for the first time, his astonishing story is told in full.

Organizational Effectiveness Ivan T. Robertson, Militza

Callinan, Dave Bartram. 2003-10-17 Organizational Effectiveness:

The Role of Psychology examines psychological approaches in organizations, not from the more common perspective of their impact on individuals, but in relation to how the work of

psychologists impacts on the overall effectiveness of the

organization. It also provides a critical review of what psychology has to offer; the way psychologists choose the problems they address, work with others, and evaluate and demonstrate the

impact they have. Robertson, Callinan and Bartram have brought together leading researchers and practitioners in work and

organizational psychology. Each chapter provides a review of

current knowledge, practice, issues and future directions in their own area of expertise, with a focus on contributions and

implications for organizational functioning and the wider arena of managerial thinking. This book is for anyone interested in

understanding the complex relations between individual, group

and organisational performance and effectiveness. It is a valuable

and challenging resource for advanced students and practitioners

of occupational psychology, organizational behaviour, HRM, and psychological consultancy in organizations.

Library of Congress Subject Headings Library of Congress.2011 **Public Access ICT across Cultures** Francisco J

Proenza.2015-05-29 A systematic assessment of the impact of public access to computers and the Internet, with findings from developing countries in South America, Asia, and Africa. Shared public access to computers and the Internet in developing countries is often hailed as an effective, low-cost way to share the benefits of digital technology. Yet research on the economic and social effects of public access to computers is lacking. This volume offers the first systematic assessment of the impact of shared public access in the developing world, with findings from ten countries in South America, Asia, and Africa. It provides evidence that the benefits of diversified participation in digital society go beyond providing access to technology. Public access venues—most often Internet cafés in cities and state-run telecenters in rural areas—are places for learning, sharing, working, empowerment and finding opportunities. The book documents the impact of public access on individuals, on society and networks, and on women. Chapters report findings and examine policy implications of research on such topics as users' perceptions of the benefits of Internet café use in Jordan; ICT job training in Rwanda; understanding user motivations and risk factors for overuse and Internet addiction in China; the effect of technology use on social inclusion among low-income urban youth in Argentina; productive uses of technologies by grassroots organizations in Peru; use of technology by migrant ethnic minority Burmese women in Thailand to maintain ties with their culture and their family and friends; and women's limited access to the most ubiquitous type of venue, cybercafés, in practically all
