Essentials of Facial Growth Donald H. Enlow, Mark G. Hans. 1996 Authored by the foremost experts in the field, this compact reference serves the student and clinician by relating basic science to successful treatment planning. It demonstrates how the best instrument in dental medicine is often the practitioner's knowledge of the body's biologic growth principles. Donald H. Enlow, MS, PhD, the acknowledged pioneer and research leader in facial growth study for the past twenty years, provides comprehensive insights into normal and abnormal craniofacial growth and development. His colleague, Mark G. Hans, DDS, MSD, contributes a concrete understanding of the importance of these concepts in clinical practice. It delves into the interrelationships between soft tissue and skeletal growth, and examines the impact of function upon development. And it stresses the ways in

which these biological principles and concepts affect treatment planning, selection, results, relapse, tooth movement, and nonbiological prosthetic implants during growth. Detailed illustrations make key concepts and developmental processes simple to grasp, and a user-friendly organization allows for quick comprehension and convenient referral.

Dental Erosion Adrian Lussi, Thomas Jaeggi. 2011 As the clinical occurrence of caries has declined and dietary habits have changed in recent decades, attention has shifted toward dental erosion, or tooth demineralization that is not the result of bacteria but rather a multifaceted process involving dietary habits, salivary flow rate, and other physical and mental health factors. This book provides a comprehensive overview of dental erosion, focusing in particular on its diagnosis, risk assessment, prevention, and treatment. The authors detail how to recognize dental erosion through the basic erosive wear examination; how to conduct a thorough risk assessment with a dietary questionnaire, health history, and measurement of salivary flow rate; how to plan appropriate restorative treatment based on the severity of the erosion, providing recommendations for specific instruments and materials to be used; and how to prevent and/or reduce further erosion after treatment through dietary alterations, dental hygiene measures, and even drug treatments or surgical measures. With ample case studies illustrating the many different presentations of dental erosion and with step-by-step restorative procedures detailing treatment, this book presents the information necessary to diagnose and treat dental erosion in clinical practice. A must-have for the student and practicing clinician alike.

Quarrel & Quandary Cynthia Ozick. 2011-10-05 In her new collection of essays, Cynthia Ozick, everywhere acclaimed as a critic, novelist, and storyteller, examines some of the world's most illustrious writers and their work, tackles compelling contemporary literary and moral issues, and looks into the wellsprings of her own lifelong engagement with literature. She writes--quarrelsomely--about Crime and Punishment, about William Styron's *Sophie's Choice*, about the Book of Job. She inquires into the subterranean dispositions and quandaries of Kafka and Henry James. She discusses the difficulties inherent in the translation of great books, whether into film or into another language. She explores what she calls the selfishness of art and courts controversy with her views on *The Diary of Anne Frank* and its transformation for the stage. Her reflections on the rights of history and the rights of imagination tap a profound concern for truth in regard to the Holocaust. She considers the shifting splendors of New York City, past and present. And she revisits her youth more deeply and with more feeling--and comedy--than ever before, in essays that reveal some of the formative experiences of her life as a writer. *Quarrel & Quandary* is a literary event and a cause for celebration.

Dental Implant Prosthetics - E-Book Carl E. Misch. 2004-09-20 This new book focuses on dental implants used in conjunction with other prosthetic devices in the general dentist's office, designed to help the partially or completely edentulous patient recover normal function, esthetics, comfort, and speech. Step-by-step procedures guide practitioners through challenging clinical situations and assist them in refining their technique. The information in this practical, highly illustrated book reflects the latest in continued research, diagnostic tools, treatment planning, implant designs, materials, and techniques. Prosthetic devices covered in this include complete dentures, bridges, overdentures, and various dental implant systems. A comprehensive chapter covering immediate load implants teaches dentists how to provide an edentulous patient with implants the same day surgery is performed. A thorough discussion of preimplant prosthodontic considerations takes the practitioner through the vital assessment steps necessary to plan treatment. Considerations for assessing the restorability of teeth adjacent to potential implant sites include abutment size, crown-root ratio, endodontic status, root configuration, tooth position, parallelism, root surface area, caries, and periodontal status. Fixed treatment planning options for the completely edentulous mandibular arches expands treatment options available to dentists, helping them to treat more patients. Material thoroughly explores the three dimensional concept of available bone and the implant treatment options for each type of bone anatomy, which enables practitioners to treat patients at any stage of edentulism. Comparisons of the periodontal indices for a natural tooth and an osseointegrated implant alert clinicians to fundamental differences in the support system. Basic biomechanics are discussed, demonstrating how these principles also relate to the scientific rationale for contemporary and future dental implant designs. A comprehensive discussion of bone density in an edentulous site explains this determining factor in treatment planning, implant design, surgical approach, healing time, and initial progressive bone loading during prosthetic reconstruction.
