**Financial Stability Monitoring** Tobias Adrian.2015 We present a forward-looking monitoring program to identify and track the sources of systemic risk over time and to facilitate the development of preemptive policies to promote financial stability. We offer a framework that distinguishes between shocks, which are difficult to prevent, and vulnerabilities, which amplify shocks. Building on substantial research, we focus on leverage, maturity transformation, interconnectedness, complexity, and the pricing of risk as the primary vulnerabilities in the financial system. The monitoring program tracks these vulnerabilities in four areas: the banking sector, shadow banking, asset markets, and the nonfinancial sector. The framework also highlights the policy trade-off between reducing systemic risk and raising the cost of financial intermediation by taking preemptive actions to reduce vulnerabilities.

**Globalisation and Education** Bob Lingard.2020-10-28 This collection focuses on education policy in the context of globalisation and draws together influential research dealing with the interplay between education policy and globalisation. Globalisation and neo-liberalism in relation to education policy are addressed, as is the impact of the global financial crisis, the recent rise of ethno-nationalism and progressive challenges to neo-liberal hegemony. A number of chapters deal with the new spatialities instantiated by globalisation's new technology, and consider the implications for education policy. Also discussed are global policy actors (such as the OECD, EU and edu-businesses) in education policy; the significance of international large scale assessments to an emergent global policy field; refugees and education; English language policy and globalisation; off-shore schools; and the importance of affect in policy in the context of globalisation. The collection closes with two methodological contributions that consider the implications of globalisation in today's critical education policy analysis. The collection is brought together in a substantial introduction that traverses the literature and research on globalisation and education policy and also situates the chapters and approaches in the collection within the field. The chapters in this book were originally published as articles in various Taylor and Francis journals.

*Transforming the Workforce for Children Birth Through Age 8* National Research Council,Institute of Medicine,Board on Children, Youth, and Families,Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success.2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young

children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
