College Algebra Jay Abramson. 2018-01-07
College Algebra provides a comprehensive exploration of algebraic principles and meets scope and sequence requirements for a typical introductory algebra course. The modular approach and richness of content ensure that the book meets the needs of a variety of courses. College Algebra offers a wealth of examples with detailed, conceptual explanations, building a strong foundation in the material before asking students to apply what they've learned. Coverage and Scope In determining the concepts, skills, and topics to cover, we engaged dozens of highly experienced instructors with a range of student audiences. The resulting scope and sequence proceeds logically while allowing for a significant amount of flexibility in

instruction. Chapters 1 and 2 provide both a review and foundation for study of Functions that begins in Chapter 3. The authors recognize that while some institutions may find this material a prerequisite, other institutions have told us that they have a cohort that need the prerequisite skills built into the course. Chapter 1: Prerequisites Chapter 2: Equations and Inequalities Chapters 3-6: The Algebraic Functions Chapter 3: Functions Chapter 4: Linear Functions Chapter 5: Polynomial and Rational Functions Chapter 6: Exponential and Logarithm Functions Chapters 7-9: Further Study in College Algebra Chapter 7: Systems of Equations and Inequalities Chapter 8: Analytic Geometry Chapter 9: Sequences, Probability and Counting Theory

Mathematics for Machine Learning Marc Peter Deisenroth,A. Aldo Faisal,Cheng Soon Ong.2020-04-23 The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

Things Fall Together Skylar Tibbits.2021-06-15 From the visionary founder of the Self-Assembly Lab at MIT, a manifesto for the dawning age of active materials Things in life tend to fall apart. Cars break down. Buildings fall into disrepair. Personal items deteriorate. Yet today's researchers are exploiting newly understood properties of matter to program materials that physically sense, adapt, and fall together instead of apart. These materials open new directions for industrial innovation and challenge us to rethink the way we build and collaborate with our environment. *Things Fall Together* is a provocative guide to this emerging, often mind-bending reality, presenting a bold vision for harnessing the intelligence embedded in the material world. Drawing on his pioneering work on self-assembly and programmable material technologies, Skylar Tibbits lays out the core, frequently counterintuitive ideas and strategies that animate this new approach to design and innovation. From furniture that builds itself to shoes printed flat that jump into shape to islands that grow themselves, he describes how matter can compute and exhibit behaviors that we typically associate with biological organisms, and challenges our fundamental assumptions about what physical materials can do and how we can interact with them. Intelligent products today often rely on electronics, batteries, and complicated mechanisms. Tibbits offers a different approach, showing how we can design simple and elegant material intelligence that may one day animate and improve itself—and

along the way help us build a more sustainable future. Compelling and beautifully designed, Things Fall Together provides an insider's perspective on the materials revolution that lies ahead, revealing the spectacular possibilities for designing active materials that can self-assemble, collaborate, and one day even evolve and design on their own.

Letters to a Starseed Rebecca Campbell. 2021-05-18 An inspirational guide for understanding your soul and discovering why it chose to incarnate at the moment it did. From the author of *The Starseed Oracle*, Rebecca Campbell, a writer, mystic, devotional creative, and visionary who supports hundreds of thousands of people to connect with their soul and weave the sacred back into their everyday life. “A leading voice in spirituality, Rebecca's work is deep and illuminating.” — *Soul and Spirit Magazine* AN ENCOURAGING BOOK TO HELP YOU REMEMBER WHO YOU ARE AND TO PLANT YOURSELF HERE Tap into the cosmic nature of your soul, discover your purpose and commit to being here on Earth. *Letters to a Starseed* asks the biggest questions that mystics and philosophers through the ages have been asking: What is the soul, where did it originate and why have we chosen to come here at this time? *YOUR SOUL HAD A DREAM, YOUR LIFE IS IT*. This is a book for those who at times feel misplaced in the world; those who have always felt a remembering of some other place without quite knowing what that place really is. As a planet, we are waking up to the fact that the ancient prophecies and warnings from the elders and wise ones are no longer predictions, but our waking reality. They are not just coming or even near ... we are living them right now. What we do now matters to the future of this planet. And we all have a role to play. Some *Letters to a Starseed* Chapter Titles include: · Who Are We and Where Did We Come From? · The

Moment of Your Birth · What Is a Starseed? · Ancient Stars in Our Bones · Reaching Back to the Ancients · Here We Are · Returning · The Longing for Home · I Remember · Why Did You Come Here? · There Must Be More Than This · Why Did You Choose to Come? · We All Have a Role to Play, but Only We Know What · Our Role Is · There You Are · I Have Music in My Heart · Finding Our Ground · Starseed Roles · Plant Yourself Here · How to Feel More at Home on Earth · The Challenge of Being Human · Incarnation · The Original Severing · Plant Yourself Here We are living in a time between myths and stories, and are currently re-weaving the fabric of life on Earth. Throughout this book, Rebecca shares insights and experiences illuminating the connection between our souls, the Earth and the cosmos, to encourage you to commit fully to your incarnation, embrace your human experience and plant yourself here. “Throughout the book you’ll find two prompts, which will support you on your journey as you read. “In many chapters, you’ll find Soul Inquiry prompts that will help you hear the calls of your soul as you journey through the book. “In some chapters, you’ll also find activations. These are here to support you in activating and integrating energies and healing within you, from your soul to your cells. “My hope for this book is that it supports, comforts, and inspires you to remember who you truly are and why you chose to be here at this pivotal moment in the story of humanity. To commit fully to being here and being present to your life on Earth at this time. “To encourage you to play the note that you came here to play, without waver. “Do you remember why you’ve come?” Love, Rebecca x
