Le Corbusier Talks with Students Le Corbusier.1999-12 First published in France in 1943 and translated for English-speaking readers in 1961, *Le Corbusier Talks with Students* presents advice and commentary from the master of modernism for young architects-to-be. In chapters ranging from *Disorder* to *The Construction of Dwellings* to *A Research Workshop*, Le Corbusier discusses his views on architectural history and offers opinions on the future of the profession, while touching on his own projects for the Villa Savoye, the Cité Universitaire, and the Radiant City. Topics such as architecture's role in our directionless society; the balance between spiritual values and technical factors; and the importance of space, proportion, and color are explored by this renowned architect, and still resonate today, almost 50 years later. Our reprint of this classic text is a facsimile of the 1961 edition, now available as an affordable paperback.

National Systems of Innovation Bengt-Åke Lundvall.2010 'National Systems of Innovation' presents a new perspective on the dynamics of the national and the global economy. Its starting point is that the international competitiveness of nations is founded on innovation. Which role do different parts of the national system play in determining the long-term dynamics of the economy? What is happening to the coherence of national systems of innovation in an era characterised by far-reaching internationalisation and globalisation? These and other issues are addressed in this volume. Available for the first time in paperback, the book is an invaluable resource for scholars and policy-makers.

The New Production of Knowledge Michael Gibbons.1994-09-09 In this provocative and broad-ranging work, the authors argue that the ways in which knowledge - scientific, social and cultural - is produced are undergoing fundamental changes at the end of the twentieth century. They claim that these changes mark a distinct shift into a new mode of knowledge production which is replacing or reforming established institutions, disciplines, practices and policies. Identifying features of the new mode of knowledge production - reflexivity, transdisciplinarity, heterogeneity - the authors show how these features connect with the changing role of knowledge in social relations. While the knowledge produced by research and development in science and technology is accorded central concern, the

Collective Intelligence Pierre Levy.1999-12-10 The number of travelers along the information superhighway is increasing at a rate of 10 percent a month. How will this communications revolution affect our culture and society? Pierre Lévy shows how the unfettered exchange of ideas in cyberspace has the potential to liberate us from the social and political hierarchies that have stood in the way of mankind's advancement. Anthropologist, historian, sociologist, and philosopher, Lévy writes with a depth of scholarship and imaginative insight rare among media critics. At once a profound historical analysis of the development of human culture and a blueprint for the future, *Collective Intelligence* is a visionary work.

The Useless Servants Rolando Hinojosa.1993-01-01 In *The Useless Servants*, award-winning author Rolando Hinojosa captures the obscenity and pointlessness of war in the pages of a Korean War journal written by his fictional everyman, Rafe Buenrostro. Drawing from his own experiences, Hinojosa probes the mind of this Texas country boy who suddenly finds himself in an unknown country fighting in an undeclared war for an unknown reason. Meeting and befriending an unending

stream of people who are gone as suddenly as they appear, Rafe alternately fears for his life and is bored to death. Dehumanized by the horrors that surround him, Rafe latches onto the one thing that offers hope for survival: his diary. He records his observations laconically and without emotion in a routine geared to survival and to becoming more effective in the performance of his grisly duty as an artilleryman. Hinojosa is successful in building suspense and irony as much by what is unsaid, unrecorded in the diary, as by what is expressed. In *The Useless Servants*, Hinojosa departs from his usual genre, the generational novels that chronicle the human comedy in an imaginary region on the Texas-Mexico border. He sets aside the usual theme of inter-ethnic and interpersonal conflict to confront a painful chapter in his own life, placing Rafe Buenrostro, one of his alter egos, in a far more serious drama lived on the edge of sanity on the frontier between physical survival and spiritual destruction.

The Hacker Ethic Pekka Himanen.2009-03-12 You may be a hacker and not even know it. Being a hacker has nothing to do with cyberterrorism, and it doesn't even necessarily relate to the open-source movement. Being a hacker has more to do with your underlying assumptions about stress, time management, work, and play. It's about harmonizing the rhythms of your creative work with the rhythms of the rest of your life so that they amplify each other. It is a fundamentally new work ethic that is revolutionizing the way business is being done around the world. Without hackers there would be no universal access to e-mail, no Internet, no World Wide Web, but the hacker ethic has spread far beyond the world of computers. It is a mind-set, a philosophy, based on the values of play, passion, sharing, and creativity, that has the potential to enhance every individual's and company's productivity and competitiveness. Now there is a greater need than ever for entrepreneurial versatility of the sort that has made hackers the most important innovators of our day. Pekka Himanen shows how we all can make use of this ongoing transformation in the way we approach our working lives.

Critique of Information Scott Lash.2002-01-21 This penetrating book raises questions about how power operates in contemporary society. It explains how the speed of information flows has eroded the separate space needed for critical reflection. It argues that there is no longer an 'outside' to the global flows of communication and that the critique of information must take place within the information itself. The operative unit of the information society is the idea. With the demise of depth reflection, reflexivity through the idea now operates external to the subject in its circulation through networks of humans and intelligent machines. It is these ideas that make the critique of information possible. This book is a major testament to the prospects of culture, politics and theory in the global information society.

Community Translation Mustapha Taibi,Uldis Ozolins.2016-02-25 Investigating an important field within translation studies, Community Translation addresses the specific context, characteristics and needs of translation in and for communities. Traditional classifications in the fields of discourse and genre are of limited use to the field of translation studies, as they overlook the social functions of translation. Instead, this book argues for a classification that cuts across traditional lines, based on the social dimensions of translation and the relationships between text producers and audiences. Community Translation discusses the different types of texts produced by public authorities, services and individuals for communities that need to be translated into minority languages, and the socio-cultural issues that surround them. In this way, this book demonstrates the vital role that community translation plays in ensuring communication with all citizens and in the empowerment of minority language speakers by giving them access to information, enabling them to participate fully in

society.

Translating Official Documents Roberto Mayoral Asensio.2014-07-16 Official translations are generally documents that serve as legally valid instruments. They include anything from certificates of birth, death or marriage through to academic transcripts or legal contracts. This field of translation is now as important as it is fraught with difficulties, for it is only in a few areas that the cultural differences are so acute and the consequences of failure so palpable. In a globalizing world, our official institutions increasingly depend on translations of official documents, but little has been done to elaborate the skills and dilemmas involved. Roberto Mayoral deals with the very practical problems of official translating. He points out the failings of traditional theories in this field and the need for revised concepts such as the virtual document, pragmatic constraints, and risk analysis. He details aspects of the social contexts, ethical norms, translation strategies, different formats, fees, legal formulas, and ways of solving the most frequent problems. Care is taken to address as wide a range of cultural contexts as possible and to stress the active role of the translator. This book is intended as a teaching text for the classroom, for self-learning, or for professionals who want to reflect on their practice. Activities and exercises are suggested for each chapter, and information is included on professional associations and societies across the globe.

The Age of Spiritual Machines Ray Kurzweil.2000-01-01 Ray Kurzweil is the inventor of the most innovative and compelling technology of our era, an international authority on artificial intelligence, and one of our greatest living visionaries. Now he offers a framework for envisioning the twenty-first century--an age in which the marriage of human sensitivity and artificial intelligence fundamentally alters and improves the way we live. Kurzweil's prophetic blueprint for the future takes us through the advances that inexorably result in computers exceeding the memory capacity and computational ability of the human brain by the year 2020 (with human-level capabilities not far behind); in relationships with automated personalities who will be our teachers, companions, and lovers; and in information fed straight into our brains along direct neural pathways. Optimistic and challenging, thought-provoking and engaging, *The Age of Spiritual Machines* is the ultimate guide on our road into the next century.

Rolando Hinojosa and the American Dream Joyce Glover Lee.1997 Rolando Hinojosa is a Texas writer with his sense of place centered in the Texas Valley, a world in itself and a place recognizable as a discrete community. But Hinojosa's work transcends the regional, transcends the Valley, transcends Texas, while it remains rooted in all three. Hinojosa is treated here from the perspective of his place in the mainstream of American literature and with his attempts to write works that speak to a large and more diverse audience, rather than from the perspective of his place within the world of Texas-Mexican literature. Joyce Lee does not neglect the regional aspects of Hinojosa's works, but puts them into the context of what they say about the vitality of American culture at large and about the Mexican culture's variations of the American Dream. Covers Hinojosa's full-length books-- Dear Rafe, Klail City, The Useless Servants, The Valley, Partners in Crime, and Rites and Witnesses --as well as his essays and articles.

Digital Libraries: International Collaboration and Cross-Fertilization Zhaoneng

Chen,Hsinchun Chen,Qihao Miao,Yuxi Fu,Edward Fox,Ee-peng Lim.2004-12-03 The International Conference on Asian Digital Libraries (ICADL) is an annual international forum that provides opportunities for librarians, researchers and experts to exchange their research results, innovative ideas, service experiences and state-- the-art developments in the field of digital libraries. Building on the success of the first six ICADL conferences, the 7th ICADL conference hosted by the Shanghai Jiao Tong University and the Shanghai Library in Shanghai, China aimed to further strengthen the academic collaboration and strategic alliance in the Asia- Pacific Region in the development of

digital libraries. The theme of ICADL 2004 was: Digital library: International Collaboration and Cross-fertilization, with its focus on technology, services, management and localization. The conference began with an opening ceremony and the conference program featured 9 keynote speeches and 5 invited speeches by local and international experts. During the 3-day program, 40 research paper presentations were given in 3 parallel sessions. The conference also included 6 tutorials and an exhibition. The conference received 359 submissions, comprising 248 full papers and 111 short papers. Each paper was carefully reviewed by the Program Committee members. Finally, 44 full papers, 15 short papers and 37 poster papers were selected. On behalf of the Organizing and Program Committees of ICADL 2004, we would like to express our appreciation to all authors and attendees for participating in the conference. We also thank the sponsors, Program Committee members, supporting organizations and helpers for making the conference a success. Without their efforts, the conference would not have been possible.

All the Difference in the World Natalie Melas. 2007 This book is about culture and comparison. Starting with the history of the discipline of comparative literature and its forgotten relation to the positivist comparative method, it inquires into the idea of comparison in a postcolonial world. Comparison was Eurocentric by exclusion when it applied only to European literature, and Eurocentric by discrimination when it adapted evolutionary models to place European literature at the forefront of human development. This book argues that inclusiveness is not a sufficient response to postcolonial and multiculturalist challenges because it leaves the basis of equivalence unquestioned. The point is not simply to bring more objects under comparison, but rather to examine the process of comparison. The book offers a new approach to the either/or of relativism and universalism, in which comparison is either impossible or assimilatory, by focusing instead on various forms of “incommensurability”—comparisons in which there is a ground for comparison but no basis for equivalence. Each chapter develops a particular form of such cultural comparison from readings of important novelists (Joseph Conrad, Simone Schwartz-Bart), poets (Aimé Césaire, Derek Walcott), and theorists (Edouard Glissant, Jean-Luc Nancy).

The Wisdom of Crowds James Surowiecki. 2005-08-16 In this fascinating book, New Yorker business columnist James Surowiecki explores a deceptively simple idea: Large groups of people are smarter than an elite few, no matter how brilliant—better at solving problems, fostering innovation, coming to wise decisions, even predicting the future. With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, and biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives, select our leaders, run our companies, and

think about our world.

Thinking Spanish Translation Sándor G. J. Hervey, Ian Higgins, Louise M. Haywood. 1995 Thinking Spanish Translation is a comprehensive and revolutionary 20-week course in translation method offering a challenging and entertaining approach to the acquisition of translation skills. It has been fully and successfully piloted at the University of St. Andrews. Translation is presented as a problem-solving discipline. Discussion, examples and a full range of exercise work enable students to acquire the skills necessary for a broad range of translation problems. Examples are drawn from a wide variety of material from technical and commercial texts to poetry and song. Thinking Spanish Translation is essential reading for advanced undergraduates and postgraduate students of Spanish. The book will also appeal to a wide range of language students and tutors through the general discussion of principles, purposes and practice of translation.

The History of the Social Sciences since 1945 Roger E. Backhouse, Philippe Fontaine. 2010-05-24 This compact volume covers the main developments in the social sciences since the Second World War. Chapters on economics, human geography, political science, psychology, social anthropology, and sociology will interest anyone wanting short, accessible histories of those disciplines, all written by experts in the relevant field; they will also make it easy for readers to make comparisons between disciplines. A final chapter proposes a blueprint for a history of the social sciences as a whole. Whereas most of the existing literature considers the social sciences in isolation from one other, this volume shows that they have much in common; for example, they have responded to common problems using overlapping methods, and cross-disciplinary activities have been widespread.
