

# In Your Face The New Science Of Human Attraction

**Face Perception** Vicki Bruce, Andy Young. 2013-01-11 Human faces are unique biological structures that convey a complex variety of important social messages. Even strangers can tell things from our faces – our feelings, our locus of attention, something of what we are saying, our age, sex and ethnic group, whether they find us attractive. In recent years there has been genuine progress in understanding how our brains derive all these different messages from faces and what can happen when one or other of the structures involved is damaged. Face Perception provides an up-to-date, integrative summary by two authors who have helped develop and shape the field over the past 30 years. It encompasses topics as diverse as the visual information our brains can exploit when we look at faces, whether prejudicial attitudes can affect how we see faces, and how people with neurodevelopmental disorders see faces. The material is digested and summarised in a way that is accessible to students, within a structure that focuses on the different things we can do with faces. It offers a compelling synthesis of behavioural, neuropsychological and cognitive neuroscience approaches to develop a distinctive point of view of the area. The book concludes by reviewing what is known about the development of face processing and re-examines the question of what makes faces ‘special’. Written in a clear and accessible style, this is invaluable reading for all students and researchers interested in studying face perception and social cognition.

Messengers Stephen Martin, Joseph Marks. 2019-10-15 In the age of fake news, understanding who we trust and why is essential in explaining everything from leadership to power to our daily relationships. -Sinan Aral We live in a world where proven facts and verifiable data are freely and widely available. Why, then, are self-confident ignoramus so often believed over thoughtful experts? And why do seemingly irrelevant details such as a person's appearance or financial status influence whether or not we trust what they are saying, regardless of their wisdom or foolishness? Stephen Martin and Joseph Marks compellingly explain how in our uncertain and ambiguous world, the messenger is increasingly the message. We frequently fail, they argue, to separate the idea being communicated from the person conveying it, explaining why the status or connectedness of the messenger has become more important than the message itself. Messengers influence business, politics, local communities, and our broader society. And Martin and Marks reveal the forces behind the most infuriating phenomena of our modern era, such as belief in fake news and how presidents can hawk misinformation and flagrant lies yet remain.

Attraction Explained Viren Swami. 2015-12-22 How much does appearance matter in the formation of romantic relationships? Do nice guys always finish last? Does playing hard-to-get ever work? What really makes for a good chat-up line? When it comes to relationships, there's no shortage of advice from self-help 'experts', pick-up artists, and glossy magazines. But modern-day myths of attraction

often have no basis in fact or – worse – are rooted in little more than misogyny. In *Attraction Explained*, psychologist Viren Swami debunks these myths and draws on cutting-edge research to provide a ground-breaking and evidence-based account of relationship formation. At the core of this book is a very simple idea: there are no ‘laws of attraction’, no foolproof methods or strategies for getting someone to date you. But this isn’t to say that there’s nothing to be gained from studying attraction. Based on science rather than self-help clichés, *Attraction Explained* looks at how factors such as geography, appearance, personality, and similarity affect who we fall for and why.

**Face Value** Autumn Whitefield-Madrano. 2016-06-21 “A fascinating look” (The Boston Globe) at how we think and talk about beauty in the twenty-first century—and the unexpected and often positive way that beauty shapes our lives. For decades, we’ve thought of beauty as a negative influence in our lives. We feel insecure in the face of retouched, impossibly-perfect images. We worry primping and preening are a distraction and a trap. But in *Face Value*, journalist Autumn Whitefield-Madrano dispels this one-sided beauty myth and examines the relationship between appearance and science, social media, sex, friendship, language, and advertising to show how beauty actually affects us day to day. Through meticulous research and interviews with dozens of women across all walks of life, she reveals surprising findings, like wearing makeup can actually relax you, you can convince people you’re better looking just by tweaking your personality, and the ways beauty can be a powerful tool of connection among women. Provocative and empowering, it celebrates a relaxed brand of feminism, one in which it’s equally okay to feel fierce in your fake eyelashes and confident when going makeup-free. *Face Value* is “an immensely valuable work, one that seamlessly—and impressively—combines the tropes of the academic lit review and the memoir and the work of cultural criticism into an engaging, and timely, follow-up to *The Beauty Myth*” (The Atlantic).

*Critical Leadership Theory* Jennifer L.S. Chandler, Robert E. Kirsch. 2018-09-26 This book contributes five novel tenets for building a critical theory of leadership studies. Drawing from transdisciplinary insights, these tenets help shape the emerging field of inquiry. They also facilitate the examination of normative social processes that reinscribe hegemonic power relations — because much of what is accomplished in current leadership scholarship, teaching, and practice reinforces these power relations. The book begins by contrasting critical theory with positivist approaches to analyzing social phenomena, and what follows is an exploration of four broad disciplines using sub-components of leadership as an investigatory lens. The resulting five tenets are presented and discussed so that they may be picked up and used by scholars contributing to the developing field of critical

leadership studies.

The Ape that Understood the Universe Steve Stewart-Williams.2019-11-21 The Ape that Understood the Universe is the story of the strangest animal in the world: the human animal. It opens with a question: How would an alien scientist view our species? What would it make of our sex differences, our sexual behavior, our altruistic tendencies, and our culture? The book tackles these issues by drawing on two major schools of thought: evolutionary psychology and cultural evolutionary theory. The guiding assumption is that humans are animals, and that like all animals, we evolved to pass on our genes. At some point, however, we also evolved the capacity for culture - and from that moment, culture began evolving in its own right. This transformed us from a mere ape into an ape capable of reshaping the planet, travelling to other worlds, and understanding the vast universe of which we're but a tiny, fleeting fragment. Featuring a new foreword by Michael Shermer.

**The Face and Faciality in Medieval French Literature, 1170-1390** Alice Hazard.2021 Modern theoretical approaches throw new light on the concepts of face and faciality in the Roman de la Rose and other French texts from the Middle Ages.

**Nefertiti's Face** Joyce Tyldesley.2018-04-09 Little is known about Nefertiti, the Egyptian queen whose name means "a beautiful woman has come." She was the wife of Akhenaten, the pharaoh who ushered in the dramatic Amarna Age, and she bore him at least six children. She played a prominent role in political and religious affairs, but after Akhenaten's death she apparently vanished and was soon forgotten. Yet Nefertiti remains one of the most famous and enigmatic women who ever lived. Her instantly recognizable face adorns a variety of modern artifacts, from expensive jewelry to cheap postcards, t-shirts, and bags, all over the world. She has appeared on page, stage, screen, and opera. In Britain, one woman has spent hundreds of thousands of pounds on plastic surgery in hope

of resembling the long-dead royal. This enduring obsession is the result of just one object: the lovely and mysterious Nefertiti bust, created by the sculptor Thutmose and housed in Berlin's Neues Museum since before World War II. In *Nefertiti's Face*, Egyptologist Joyce Tyldesley tells the story of the bust, from its origins in a busy workshop of the late Bronze Age to its rediscovery and controversial removal to Europe in 1912 and its present status as one of the world's most treasured artifacts. This wide-ranging history takes us from the temples and tombs of ancient Egypt to wartime Berlin and engages the latest in Pharaonic scholarship. Tyldesley sheds light on both Nefertiti's life and her improbable afterlife, in which she became famous simply for being famous.

**Face Value** Alexander Todorov. 2017-06-06 The scientific story of first impressions—and why the snap character judgments we make from faces are irresistible but usually incorrect We make up our minds about others after seeing their faces for a fraction of a second—and these snap judgments predict all kinds of important decisions. For example, politicians who simply look more competent are more likely to win elections. Yet the character judgments we make from faces are as inaccurate as they are irresistible; in most situations, we would guess more accurately if we ignored faces. So why do we put so much stock in these widely shared impressions? What is their purpose if they are completely unreliable? In this book, Alexander Todorov, one of the world's leading researchers on the subject, answers these questions as he tells the story of the modern science of first impressions. Drawing on psychology, cognitive science, neuroscience, computer science, and other fields, this accessible and richly illustrated book describes cutting-edge research and puts it in the context of the history of efforts to read personality from faces. Todorov describes how we have evolved the ability to read basic social signals and momentary emotional states from faces, using a network of brain regions dedicated to the processing of faces. Yet contrary to the nineteenth-century

pseudoscience of physiognomy and even some of today's psychologists, faces don't provide us a map to the personalities of others. Rather, the impressions we draw from faces reveal a map of our own biases and stereotypes. A fascinating scientific account of first impressions, *Face Value* explains why we pay so much attention to faces, why they lead us astray, and what our judgments actually tell us. S=EX2 Pere Estupinyà.2016-08-25 You have in your hands the most rigorous, complete and readable book ever written about the fascinating science of human sexuality. This book goes beyond the well-worn sexual education advice and the usual evolutionist psychology. After *The Brain Snatcher*, Pere Estupinyà comes back with the first popular science book on sex aimed at a wide audience. While there are some tips for the more adventurous, there is also a wealth of new information to be discovered. Distancing himself from the many books on advice or techniques, Estupinyà brings sex to another dimension by combining popular beliefs and science. Do you want proof that our decision-making in the “heat of the moment” is less rational than we think? Did you know that mind and vagina each go their own way? Are you interested in learning about the effects of yoga on sexual pleasure? Did you know about the attempts in the 60s to “cure” homosexuals with electric shock therapy, the chemical analysis of female ejaculation, or the fundamental relationship between the sympathetic and parasympathetic nervous system? The author has spoken directly with asexual and intersexual individuals, fetishists, multi-orgasmic women, women who never have orgasms through penetration, and men who have no refractory period. He has also participated in sadomasochistic events; learned tantric techniques with a couple of coaches, spoken with porn performers at Barcelona's Bagdad, and attended workshops in which a woman teaches how to have orgasms with your mind and breathing. The result is an incredible miscellany of information that appeals to both the scientific community and the curious.

**The Mama's Boy Myth** Kate Stone Lombardi.2012-03-15 A New York Times contributor offers a radical reexamination of a hot-button issue of the mother and son relationship and advocates the end of the mama's boy taboo. New York Times contributor Kate Stone Lombardi unveils the surprisingly close relationship between mothers and sons. Mother after mother confessed to Lombardi that her husband, brothers, and even female friends and family criticize the fact that she is too close to her sons. Many of these women are often startled by the strong connection they feel with their sons; but rarely do they talk about it because society tells them to push their little boys away and not baby them with too much cuddling and comforting. It is as if there were an existing playbook-based on gender preconceptions dating back to Freud, Oedipus, and beyond-that prescribes the way mothers and their sons should interact. Lombardi's much-needed narrative is the first and only book to share truly revealing interviews with mothers who have close relationships with their sons, as well as interviews with these women's sons and husbands. Lombardi persuasively argues that the rise of the new male-one who is more emotionally intelligent and more sensitive without being less manly-is directly attributable to women who are rejecting the mama's boy taboo. Highlighting new scientific studies, *The Mama's Boy Myth* begins a fresh story-one that will be welcomed by mothers, fathers, and sons alike.

*The Case Against Free Will* David Lieberman.2016-01-26 Do judges' decisions depend on how long it is since they ate their lunch? Is the best place for a woman to seduce a man on a rickety bridge? Does free will really exist? This book explores how our genes and experiences determine our behaviour as well as discussing the implications determinism may have on personal responsibility and morality.

*The Case Against Reality: Why Evolution Hid the Truth from Our Eyes* Donald Hoffman.2019-08-13

Can we trust our senses to tell us the truth? Challenging leading scientific theories that claim that our senses report back objective reality, cognitive scientist Donald Hoffman argues that while we should take our perceptions seriously, we should not take them literally. From examining why fashion designers create clothes that give the illusion of a more “attractive” body shape to studying how companies use color to elicit specific emotions in consumers, and even dismantling the very notion that spacetime is objective reality, *The Case Against Reality* dares us to question everything we thought we knew about the world we see.

*AI Love You* Yuefang Zhou, Martin H. Fischer. 2019-07-17 Using an interdisciplinary approach, this book explores the emerging topics and rapid technological developments of robotics and artificial intelligence through the lens of the evolving role of sex robots, and how they should best be designed to serve human needs. An international panel of authors provides the most up-to-date, evidence-based empirical research on the potential sexual applications of artificial intelligence. Early chapters discuss the objections to sexual activity with robots while also providing a counterargument to each objection. Subsequent chapters present the implications of robot sex as well as the security and data privacy issues associated with sexual interactions with artificial intelligence. The book concludes with a chapter highlighting the importance of a scientific, multidisciplinary approach to the study of human - robot sexuality. Topics featured in this book include: The Sexual Interaction Illusion Model. The personal companion system, Harmony, designed by Realbotix™. *Couples in Conflict* Stephen J. Betchen.2022-08-31 In the first book of its kind, Dr. Stephen J. Betchen teaches established and training marriage and family therapists to recognize the complexity and contradictions of control struggles in couples and, uniquely, how to clinically treat these issues to create a harmonious, long relationship. Integrating conflict theory, psychodynamic systems work, and the basic principles of sex therapy, the book aims to help professionals recognize and assess control struggles in couples, detect and examine their origin, and offer techniques to help break the struggle and alleviate its associated symptoms. Chapters begin by defining control and where the origin of control comes from before exploring how these origins and other sociocultural factors impact how we choose our partners. The book's second half examines how clinicians should assess and treat couples with both sexual and nonsexual symptoms, how to avoid being caught in the control crossfire as a therapist, and how to terminate sessions and prevent relapses. Filled with case studies and useful interventions throughout, this book aims to help clinicians working with all couples across cultures and sexual orientations find a common ground. It is indispensable for training and graduate clinicians that work with couples, especially couples with sexual disorders.

In Your Face David Perrett.2017-09-16 In our daily lives, in our memories and fantasies, our mental worlds overflow with faces. But what do we really know about this most remarkable feature of the human body? Why do we have faces at all, and brains that are good at reading them? What do our looks say - and not say - about our personalities? And perhaps the most compelling question of all: Why are we attracted to some faces more than others? In Your Face is an engaging and authoritative tour of the science of facial beauty and face perception. David Perrett, the pre-eminent scholar in the field, reveals and interprets the most remarkable findings and in the process demolishes many popular myths, setting the record straight on what neuroscience and evolutionary psychology are teaching us about beauty. The record is more surprising and often more unsettling than you might think.

**Saving Face** Stephen Pattison.2016-04-01 Faces are all around us and fundamentally shape both everyday experience and our understanding of people. To lose face is to be alienated and experience shame, to be en faced is to enjoy the fullness of life. In theology as in many other disciplines faces, as both physical phenomena and symbols, have not received the critical, appreciative attention they deserve. This pioneering book explores the nature of face and enfacement, both human and divine. Pattison discusses questions concerning what face is, how important face is in human life and relationships, and how we might understand face, both as a physical phenomenon and as a series of

socially-inflected symbols and metaphors about the self and the body. Examining what face means in terms of inclusion and exclusion in contemporary human society and how it is related to shame, Pattison reveals what the experience of people who have difficulties with faces tell us about our society, our understandings of, and our reactions to face. Exploring this ubiquitous yet ignored area of both contemporary human experience and of the Christian theological tradition, Pattison explains how Christian theology understands face, both human and divine, and the insights might it offer to understanding face and enfacement. Does God in any sense have a physically visible face? What is the significance of having an enfacéd or faceless God for Christian life and practice? What does the vision of God mean now? If we want to take face and defacing shame seriously, and to get them properly into perspective, we may need to change our theology, thought and practice - changing our ways of thinking about God and about theology.

CEO Branding Marc Fetscherin.2015-06-19 CEO Branding advances our understanding of the importance and impact that CEOs have on companies. In recent years, there has been a growing body of interdisciplinary literature on this powerful aspect of branding, and Fetscherin has invited a leading panel of international scholars and practitioners to contribute original chapters in their area of expertise. The book introduces the concept of the CEO as a brand, and outlines the 4Ps of this branding mix - the CEO (person), personality, prestige (reputation), and performance. It discusses the CEO branding process, and demonstrates the many ways in which this 'human brand' affects the company in financial terms (such as performance, profit, and stock returns), as well as non-financial terms (reputation, trust, and firm strategy). The book also includes 'lessons learned' and many examples that illustrate how companies can measure and manage the CEO brand. This comprehensive, authoritative volume will give students, researchers, marketing and communication

managers, and CEOs themselves a thorough understanding of all aspects of the CEO brand. A must read for any CEO who is serious about developing, managing and measuring their own brand. For more information, visit [www.ceobranding.org](http://www.ceobranding.org)

**Faces Inside and Outside the Clinic** Tony McHugh. 2016-04-15 Drawing on studies of surface

topography, image editing, and diagnostic and surgical experience, *Faces Inside and Outside the Clinic* addresses the notion of 'truth' in what are considered to be 'right' and 'wrong' faces, whether in clinical cosmetic procedures or in specific sociocultural contexts outside the clinic. With attention to the manner in which the human face - and often the individual herself or himself as a consequence - is physically defined, conceptually judged, numerically measured and clinically analysed, this book reveals that on closer inspection, supposedly objective and evidential 'truths' are in fact subjective and prescriptive. Adopting a Foucauldian analysis of the ways in which 'normalising technologies' and 'techniques' ultimately preserve and expand upon an increasing array of 'abnormal' facial configurations, *Faces Inside and Outside the Clinic* shows that when determining 'right' and 'wrong' faces, what happens inside the clinic is inextricably linked to what happens outside the clinic - and vice versa. As such, it will be of interest to scholars and students of social, cultural and political theory, contemporary philosophy and the social scientific study of science, health and technology.

*The Psychology of Marriage* Carol Cronin Weisfeld, Glenn E. Weisfeld, Lisa M. Dillon. 2017-11-17

From their location in the heart of Detroit, Michigan, the Weisfelds' lab has reached out for thirty years to couples in long-term partnerships around the world. In living rooms of Detroit, London, Moscow, Beijing, and beyond, couples of all types and ages have shared their insights into adult romantic relationships. This book, *The Psychology of Marriage*, is a distillation of these findings, which have appeared in dozens of book chapters, journal articles, and conference presentations. The book also provides new systematic comparisons that offer insights into the mysteries of marriage and other committed relationships. Scholars, professional counselors, and family therapists will find a helpful framework for thinking about cultural similarities and differences in marital dynamics. Researchers will be introduced to a robust new instrument, the Marriage and Relationship

Questionnaire (MARQ), which can be used in heterosexual and same-sex couples in virtually any cultural setting, along with ethical guidelines for conducting this research. Anyone who is interested in why committed relationships work (or do not work) will find the book filled with compelling new insights.

Social Intelligence Daniel Goleman.2006-09-26 Emotional Intelligence was an international phenomenon, appearing on the New York Times bestseller list for over a year and selling more than five million copies worldwide. Now, once again, Daniel Goleman has written a groundbreaking synthesis of the latest findings in biology and brain science, revealing that we are “wired to connect” and the surprisingly deep impact of our relationships on every aspect of our lives. Far more than we are consciously aware, our daily encounters with parents, spouses, bosses, and even strangers shape our brains and affect cells throughout our bodies—down to the level of our genes—for good or ill. In *Social Intelligence*, Daniel Goleman explores an emerging new science with startling implications for our interpersonal world. Its most fundamental discovery: we are designed for sociability, constantly engaged in a “neural ballet” that connects us brain to brain with those around us. Our reactions to others, and theirs to us, have a far-reaching biological impact, sending out cascades of hormones that regulate everything from our hearts to our immune systems, making good relationships act like vitamins—and bad relationships like poisons. We can “catch” other people’s emotions the way we catch a cold, and the consequences of isolation or relentless social stress can be life-shortening. Goleman explains the surprising accuracy of first impressions, the basis of charisma and emotional power, the complexity of sexual attraction, and how we detect lies. He describes the “dark side” of social intelligence, from narcissism to Machiavellianism and psychopathy. He also reveals our astonishing capacity for “mindsight,” as well as the tragedy of those, like autistic children, whose

mindsight is impaired. Is there a way to raise our children to be happy? What is the basis of a nourishing marriage? How can business leaders and teachers inspire the best in those they lead and teach? How can groups divided by prejudice and hatred come to live together in peace? The answers to these questions may not be as elusive as we once thought. And Goleman delivers his most heartening news with powerful conviction: we humans have a built-in bias toward empathy, cooperation, and altruism—provided we develop the social intelligence to nurture these capacities in ourselves and others.

**Urban Experience and Design** Justin B. Hollander, Ann Sussman. 2020-10-15 Embracing a biological and evolutionary perspective to explain the human experience of place, *Urban Experience and Design* explores how cognitive science and biometric tools provide an evidence-based foundation for architecture and planning. Aiming to promote the creation of a healthier and happier public realm, this book describes how unconscious responses to stimuli, outside our conscious awareness, direct our experience of the built environment and govern human behavior in our surroundings. This collection contains 15 chapters, including contributions from researchers in the US, the UK, the Netherlands, France and Iran. Addressing topics such as the impact of eye-tracking analysis and seeing beauty and empathy within buildings, *Urban Experience and Design* encourages us to reframe our understanding of design, including the narrative of how modern architecture and planning came to be in the first place. This volume invites students, academics and scholars to see how cognitive science and biometric findings give us remarkable 21st-century metrics for evaluating and improving designs, even before they are built.

*Body Aesthetics* Sherri Irvin. 2016 This volume contains 16 original essays on the aesthetics of the body and bodily experience. Contributors in philosophy, sociology, dance, disability theory, race

studies, feminist theory, medicine and law explore topics from beauty and sexual attractiveness to national identity and the somatic aesthetics of racialised police violence.

The Artful Species Stephen Davies.2012-11-29 The Artful Species explores the idea that our aesthetic responses and art behaviors are connected to our evolved human nature. Our humanoid forerunners displayed aesthetic sensibilities hundreds of thousands of years ago and the art standing of prehistoric cave paintings is virtually uncontested. In Part One, Stephen Davies analyses the key concepts of the aesthetic, art, and evolution, and explores how they might be related. He considers a range of issues, including whether animals have aesthetic tastes and whether art is not only universal but cross-culturally comprehensible. Part Two examines the many aesthetic interests humans take in animals and how these reflect our biological interests, and the idea that our environmental and landscape preferences are rooted in the experiences of our distant ancestors. In considering the controversial subject of human beauty, evolutionary psychologists have traditionally focused on female physical attractiveness in the context of mate selection, but Davies presents a broader view which decouples human beauty from mate choice and explains why it goes more with social performance and self-presentation. Part Three asks if the arts, together or singly, are biological adaptations, incidental byproducts of nonart adaptations, or so removed from biology that they rate as purely cultural technologies. Davies does not conclusively support any one of the many positions considered here, but argues that there are grounds, nevertheless, for seeing art as part of human nature. Art serves as a powerful and complex signal of human fitness, and so cannot be incidental to biology. Indeed, aesthetic responses and art behaviors are the touchstones of our humanity.

**Adornment** Stephen Davies.2020-01-09 Elaborating the history, variety, pervasiveness, and

function of the adornments and ornaments with which we beautify ourselves, this book takes in human prehistory, ancient civilizations, hunter-foragers, and present-day industrial societies to tell a captivating story of hair, skin, and make-up practices across times and cultures. From the decline of the hat, the function of jewelry and popularity of tattooing to the wealth of grave goods found in the Upper Paleolithic burials and body painting of the Nuba, we see that there is no one who does not adorn themselves, their possessions, or their environment. But what messages do these adornments send? Drawing on aesthetics, evolutionary history, archaeology, ethology, anthropology, psychology, cultural history, and gender studies, Stephen Davies brings together African, Australian and North and South American indigenous cultures and unites them around the theme of adornment. He shows us that adorning is one of the few social behaviors that is close to being genuinely universal, more typical and extensive than the high-minded activities we prefer to think of as marking our species - religion, morality, and art. Each chapter shows how modes of decoration send vitally important signals about what we care about, our affiliations and backgrounds, our social status and values. In short, by using the theme of bodily adornment to unify a very diverse set of human practices, this book tells us about who we are.

**Social Psychology [2 volumes]** Randal W. Summers. 2016-12-12 This book provides an introduction to social psychology that covers its history, theories, and core concepts. It explains intrapersonal (how others influence our views about ourselves) and interpersonal (how we think about and act toward other people) applications of this discipline in today's society. Human beings are social by nature. Because of this, the people around us have a profound impact on how we think about ourselves and others—from our sense of self esteem to our opinions and attitudes to our interactions in a group setting. *Social Psychology: How Other People Influence Our Thoughts and*

Actions describes these subtle but powerful effects in our daily lives, offering a complete and balanced view of the topic. Readers will discover the history of social psychology, grasp its theories and core concepts, learn about important issues and debates related to this topic, and see how these ideas are directly applicable to therapy and other real-world situations. Chapters cover how an individual's self-concept is developed and the various social forces on it, how a social psychology experiment may be conducted, and examples of social psychology in everyday life, such as group dynamics and cultural phenomena. Readers will also see how social psychology plays a role in our criminal justice system, including in the context of the prison system population; in the cultural issues associated with Latino and Native American populations; in our social collective concern about mass shootings, epidemics, and terrorism; and in the dynamics, processes, and tactics of a nationwide presidential election campaign seeking to influence the masses.
