Managerial Accounting Ronald W. Hilton. 2008 The emphasis of this book is on teaching students to use accounting information to best manage an organization. Each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter.

Managerial Accounting Ray H. Garrison, Eric W. Noreen, Peter C. Brewer. 2008 This text identifies the three functions managers must perform within their organisations - plan operations, control activities, and make decisions - and explains what accounting information is necessary for these functions, how to collect it, and how to interpret it.

Managerial Accounting Michael W. Maher, Clyde P.

Stickney, Roman L. Weil. 2004 This classic text for MBA programs

offers balanced coverage of concepts, methods, and uses of managerial accounting with an increasingly strong emphasis on management decision-making. This approach helps focus on concepts and managerial uses of financial information rather than techniques of cost accounting. The current edition emphasizes international issues, strategic effects of decisions, ethics, and new management accounting trends. Also emphasized are process improvement, integration of financial reporting issues for management decision-making, and application of managerial accounting tools to the emerging service sector, government, and nonprofits in examples and problem material.

Managerial Accounting for Managers Eric Noreen, Peter Brewer, Ray Garrison. 2007-11-12 Managerial Accounting for Managers, 1/e by Noreen/Brewer/Garrison is based on the market-leading text, Managerial Accounting, by Garrison, Noreen and Brewer. The Noreen book was created to serve customers who do not wish to teach the financial accounting-oriented content that is included in the Garrison book. Of our three books (the Brewer book, the Garrison book, and the Noreen book), the Noreen book is the most pure management accounting textbook. The other two books have greater amounts of financial accounting content. N/B/G, 1e is geared towards professors who love Garrison's market-leading managerial accounting content, but have been bothered by the debits and credits included in the book. It includes the same great coverage of managerial accounting topics such as Relevant Costs for Decision Making, Capital Budgeting Decisions, and Segment Reporting and Decentralization without the journal entries. The job-order costing chapter has been extensively rewritten to remove all journal entries. There is not one journal entry included in the entire book. Furthermore, the chapters dealing with process costing, the statement of cash flows, and financial statement analysis have been dropped to enable professors to focus their attention on the bedrocks of managerial accounting—planning,

control, and decision making. It is important to emphasize that the same great content from Garrison is included in Noreen. More specifically, the following chapters/appendices are exactly the same in the two books:
