The First Twelve Weeks of Gestation E.R. Barnea, J. Hustin, E. Jauniaux. 2012-12-06 Leading workers in the field of human reproduction provide both basic knowledge and useful practical information in this book about the most critical phase in the development of a new human being: the first twelve weeks of life. The period from fertilization and implantation to the end of the first trimester is still insufficiently understood and marks a new frontier. The knowledge necessary for applying our present diagnostic capabilities and for venturing into the problematic areas of fertilization technology and embryonic treatment is made easily available in this comprehensive textbook. The book is divided into two parts. The first presents basic information about physiology, anatomy, in vivo investigations, biochemistry and legal aspects. The second part focuses on pregnancy development, monitoring and the clinical diagnosis and management of disorders in the early stages of life. A full section is devoted to assisted conception and the newest possibilities in fertilization technologies, whereby the ethical aspects are also discussed.

Smart Learning Environments Maiga Chang, Yanyan Li. 2014-09-05 This book addresses main issues concerned with the future learning, learning and academic analytics, virtual world and smart user interface, and mobile learning. This book gathers the newest research results of smart learning environments from the aspects of learning, pedagogies, and technologies in learning. It examines the advances in technology development and changes in the field of education that has been affecting and reshaping the learning environment. Then, it proposes that under the changed technological situations, smart learning systems, no matter what platforms (i.e., personal computers, smart phones, and tablets) they are running at, should be aware of the preferences and needs that their users (i.e., the learners and teachers) have, be capable of providing their users with the most appropriate services, helps to enhance the users' learning experiences, and to make the learning efficient.

Handbook of CTG Interpretation Edwin Chandrachan. 2017-02-23 This practical manual promotes an evidence-based paradigm of fetal heart rate monitoring during labour, moving away from the traditional 'pattern-based' interpretation to physiology-based interpretation. Aimed at obstetricians and midwives, it is useful to all those involved in multiprofessional intrapartum care.

Hair and Hair Diseases Constantin E. Orfanos, Rudolf Happle. 2012-12-06 Hair is the subject of this book, including the anatomy of the hair follicle, developmental stages, analyzed by light and electron microscopy, hair ultrastructure, nerve and blood supply, specialized hairs and hair organs, and a review of the present techniques to cultivate hair follicle cells in vitro. In the clinical part several chapters describe the most important diseases and possibilities for treatment. Hair care products

and their toxicology are the subject of further sections. Extensive reviews of the antiandrogens, a most important group of drugs influencing hair growth, and of their clinical use in conditions such as androgenetic alopecias and hirsutism are included as well. Finally, surgical techniques for hair transplantation are discussed. This book is a standard textbook for everything pertaining to hair under normal and pathological conditions.

The Art and Science of Midwifery Louise Silverton.1993 This is a text for use on undergraduate and student diploma courses in midwifery. It prepares the midwife for utilizing research findings to determine practice. Where research findings indicate a preferred management approach this is suggested, in less clear cut situations a range of options are offered, with their advantages and disadvantages. Reference lists and selected bibliographies allow students to undertake further study.

Overcoming School Refusal Joanne Garfi.2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

Why Women? Bridget Dolan, Inez Gitzinger-Albrecht.1994 Bulimia and anorexia nervosa are now so prevalent that they affect more than 1 in 100 women in Western Europe. Yet only a handful of specialist treatment centres exists and little funding is available for research to combat these problems. Is this because the majority of those people affected are women? If eating disorders affected 1 in 100 men would more be done to eradicate them? This book explores some of the crucial psychological, behavioural, cultural, sexual and political factors which may contribute to the gender specificity of eating disorders.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Neonatal Intensive Care H.E. Ulmer, L. Wille, M. Obladen.2012-12-06 The significant strides made during the past decade in neonatal medicine are based largely upon the provision of intensive perinatal care to the parturient, her fetus, and the newborn. In addition to technologic advances in the bioelectric monitoring of the fetus and newborn, the introduction of noninvasive methods to monitor oxygenation, the pharmacologic manipulation of the ductus arteriosus and pulmonary vasculature, and the use of ultrasonographic diagnosis of congenital heart defects and other lesions, intensive efforts by neonatal specialists throughout the world have also contributed to the decline in neonatal and infant mortality. Professors Wille and Obladen have provided an authoritative manual outlining intensive care of newborns and the ways in which the science of neonatal medicine, the technology of the 1980s, and the art of application have resulted in the practice of neonatal intensive care at the Kinderklinik of the University of Heidelberg. The English translation resulted from the success of the German edition and will serve well the needs of the English-speaking student and practitioner of neonatal intensive care. T. Public Health and Epidemiology at a Glance Margaret Somerville, K. Kumaran, Rob Anderson.2016-06-15 First Prize in Public health in the 2017 BMA Medical Book Awards *Public Health and Epidemiology at a Glance* is a highly visual introduction to the key concepts and major

themes of population health. With comprehensive coverage of all the core topics covered at medical school, it helps students understand the determinants of health and their study, from personal lifestyle choices and behaviour, to environmental, social and economic factors. This fully updated new edition features: • More coverage of audit and quality improvement techniques • Brand new sections on maternal and child health, and health of older people • New chapters on social determinants of health and guideline development • Expanded self-assessment material This accessible guide is an invaluable resource for medical and healthcare students, junior doctors, and those preparing for a career in epidemiology and public health

Dry Chemistry O. Sonntag.1993-11-09 Dry chemistry has been accepted as an important technology in medical laboratories for many years. Many evaluations of this technology have been undertaken by reputable clinical laboratories, the results of which were excellent when compared with conventional wet chemistry analysis. This book contains a detailed overview of the current knowledge in the field of dry chemistry both in the physicians' office laboratories and large medical laboratories. The results from many evaluation studies are presented, as is data from interference studies which complete the descriptions of many dry chemistry methods. A detailed description of various commercially available dry chemistry systems such as Ektachem, Reflotron, Seralyzer, Cobas Ready, Drichem, Opus and Stratus are also included. This book effectively describes the current state-of-the-art technology and knowledge and succeeds in filling the gap in information in this important field of clinical chemistry science. Originally published as 'Trockenchemie' by Georg Thieme Verlag, Stuttgart, Dr. Sonntag has taken the opportunity of this translation to completely revise and update the contents of his book.

Alpine Biodiversity in Europe Laszlo Nagy,Georg Grabherr,Christian Körner,Desmond B.A. Thompson.2012-12-06 The United Nations Conference on the Environment and Development (UNCED), held in Rio de Janeiro in 1992, spawned a multitude of programmes aimed at assessing, managing and conserving the earth's biological diversity. One important issue addressed at the conference was the mountain environment. A specific feature of high mountains is the so-called alpine zone, i. e. the treeless regions at the uppermost reaches. Though covering only a very small proportion of the land surface, the alpine zone contains a relatively large number of plants, animals, fungi and microbes which are specifically adapted to cold environments. This zone contributes fundamentally to the planet's biodiversity and provides many resources for mountain dwelling as well as lowland people. However, rapid and largely man-made changes are affecting mountain ecosystems, such as soil erosion, losses of habitat and genetic diversity, and climate change, all of which have to be addressed. As stated in the European Community Biodiversity Strategy, the global scale of biodiversity reduction or losses and the interdependence of different species and ecosystems across national borders demands concerted international action. Managing biodiversity in a rational and sustainable way needs basic knowledge on its qualitative and quantitative aspects at local, regional and global scales. This is particularly true for mountains, which are distributed throughout the world and are indeed hot spots of biodiversity in absolute terms as well as relative to the surrounding lowlands.

Reconstructing Illness Anne Hunsaker Hawkins.1999 Serious illness and mortality, those most universal, unavoidable, and frightening of human experiences, are the focus of this pioneering study which has been hailed as a telling and provocative commentary on our times. As modern medicine has become more scientific and dispassionate, a new literary genre has emerged: pathography, the personal narrative concerning illness, treatment, and sometimes death. Hawkins's sensitive reading of numerous pathographies highlights the assumptions, attitudes, and myths that people bring to the

medical encounter. One factor emerges again and again in these case studies: the tendency in contemporary medical practice to focus primarily not on the needs of the individual who is sick but on the condition that we call disease. Pathography allows the individual person a voice—one that asserts the importance of the experiential side of illness, and thus restores the feeling, thinking, experiencing human being to the center of the medical enterprise. Recommended for medical practitioners, the clergy, caregivers, students of popular culture, and the general reader, *Reconstructing Illness* demonstrates that only when we hear both the doctor's and the patient's voice will we have a medicine that is truly human.

Digital Whoness Rafael Capurro, Michael Eldred, Daniel Nagel.2013-05-02 The first aim is to provide well-articulated concepts by thinking through elementary phenomena of today's world, focusing on privacy and the digital, to clarify who we are in the cyberworld — hence a phenomenology of digital whoness. The second aim is to engage critically, hermeneutically with older and current literature on privacy, including in today's emerging cyberworld. Phenomenological results include concepts of i) self-identity through interplay with the world, ii) personal privacy in contradistinction to the privacy of private property, iii) the cyberworld as an artificial, digital dimension in order to discuss iv) what freedom in the cyberworld can mean, whilst not neglecting v) intercultural aspects and vi) the EU context.

Solution-Focused Nursing Margaret McAllister.2006-10-24 Introduces an innovative approach to nursing practice. Solution-focused nursing is a practical philosophy which emphasizes change at three levels: the client, nursing and society. It teaches three principles: to be cautious of dominant paradigms, to focus not only on problems but solutions too, and to work with and for clients rather than on them.

Oxford Textbook of Anaesthesia Jonathan G. Hardman, Philip M. Hopkins, Michel M. R. F. Struys.2017-06-27 This definitive resource from the eminent Oxford Textbooks series, the Oxford Textbook of Anaesthesia addresses the fundamental principles, underpinning sciences and the full spectrum of clinical practice. It brings together the most pertinent research from on-going scientific endeavours with practical guidance and a passion to provide the very best clinical care to patients. This comprehensive work covers all aspects of anaesthesia; volume one addresses the fundamental principles and the basic sciences whose understanding is required for a logical, effective and evidence-based approach to practice. Volume two focuses on the clinical aspects of anaesthesia, including those aspects of intensive care and pain medicine that are required by all general anaesthetists as well as sections dedicated to procedures, surgical specialities, paediatrics, the conduct of anaesthesia outside the theatre, and concurrent disease. In 91 finely crafted and highly illustrated chapters, experts in anaesthesia review the supporting evidence and key techniques for the clinical management of specific conditions and patient groups. International contributors share their research and extensive experience to provide a wealth of practical advice for use in clinical situations in a global context. The Oxford Textbook of Anaesthesia will publish both in print and online on Oxford Medicine Online where it can be accessed via smartphone or similar devices and will be updated annually to reflect major changes in clinical practice. The print edition of the Oxford Textbook of Anaesthesia comes with a year's access to the online version. This essential reference tool supports all anaesthetists seeking an up-to-date and trustworthy account of all aspects of anaesthesia. It will be an indispensable guide to anaesthetists of all grades and subspecialty interest.

Birth Territory and Midwifery Guardianship Kathleen Fahy, Maralyn Foureur, Carolyn Hastie.2008-07-14 Midwives and other healthcare providers are grappling with the issue of rising intervention rates in childbirth and trying to identify ways to reverse the trend. It is increasingly accepted that intervention in childbirth has long-term consequences for women and their children. Birth Territory provides practical, evidence-based ideas for restructuring the birth territory to facilitate normal birth. Links new research findings to birth environments and outcomes. Describes

the elements of an ideal birthing environment. Suggests how to modify existing maternity services to achieve optimal results. Investigates the links between the experiences of women and babies, and outcomes. Explores the effects of legal and socio-political factors.

Internet Privacy Johannes Buchmann.2014-02-18 A thorough multidisciplinary analysis of various perspectives on internet privacy was published as the first volume of a study, revealing the results of the achatech project Internet Privacy - A Culture of Privacy and Trust on the Internet. The second publication from this project presents integrated, interdisciplinary options for improving privacy on the Internet utilising a normative, value-oriented approach. The ways in which privacy promotes and preconditions fundamental societal values and how privacy violations endanger the flourishing of said values are exemplified. The conditions which must be fulfilled in order to achieve a culture of privacy and trust on the internet are illuminated. This volume presents options for policy-makers, educators, businesses and technology experts how to facilitate solutions for more privacy on the Internet and identifies further research requirements in this area.

Hospitals in a Changing Europe Martin McKee, Judith Healy.2002 * What roles do hospitals play in the health care system and how are these roles changing? * If hospitals are to optimize health gains and respond to public expectations, how should they be configured, managed, and sustained? * What lessons emerge from experiences of changing hospital systems across Europe? Hospitals of the future will confront difficult challenges: new patterns of disease, rapidly evolving medical technologies, ageing populations, and continuing budget constraints. This book explores the competing pressures facing policymakers across Europe as they struggle to respond to these complex challenges. It argues that hospitals, as part of a larger health system, should focus on enhancing health outcomes while also responding to public expectations. Adopting a cross-national, cross-disciplinary perspective, the study assesses recent evidence on the factors driving hospital reform and the strategies used to improve organizational performance. It reviews the evidence from eastern as well as western Europe and combines academic research with real-world policy experience. It looks at the role of hospitals in enhancing health rather than simply processing patients. The book concludes that hospitals cannot be managed in isolation from society and the wider health system, and that policymakers have a responsibility to define the broader health care goals that hospitals should strive to meet. *Hospitals in a Changing Europe* synthesizes current evidence in a readable and accessible form for all practitioners, policy-makers, academics and graduate level students concerned with health reform.

Gendering European Integration Theory Gabriele Abels, Heather MacRae.2016-05-23 The authors engage a dialogue between European integration theories and gender studies. The contributions illustrate where and how gender scholarship has made creative use of integration theories and thus contributes to a vivid theoretical debate. The chapters are designed to make gender scholarship more visible to integration theory and, in this way stimulates the broader theoretical debates. Investigating the whole range of integration theory with a gender lens, the authors illustrate if and how gender scholarship has made or can make creative use of integration theories.

Eye Movement Desensitization and Reprocessing (EMDR) Therapy Francine

Shapiro.2017-11-20 The authoritative presentation of Eye Movement Desensitization and Reprocessing (EMDR) therapy, this groundbreaking book--now revised and expanded--has been translated into 10 languages. Originally developed for treatment of posttraumatic stress disorder (PTSD), this evidence-based approach is now also used to treat adults and children with complex trauma, anxiety disorders, depression, addictive behavior problems, and other clinical problems. EMDR originator Francine Shapiro reviews the therapy's theoretical and empirical underpinnings, details the eight phases of treatment, and provides training materials and resources. Vivid vignettes, transcripts, and reproducible forms are included. Purchasers get access to a webpage where they can download and print the reproducible materials in a convenient 8 1/2 x 11 size. New to This Edition *Over 15 years of important advances in therapy and research, including findings from clinical and neurophysiological studies. *New and revised protocols and procedures. *Discusses additional applications, including the treatment of complex trauma, addictions, pain, depression, and moral injury, as well as post-disaster response. *Appendices with session transcripts, clinical aids, and tools for assessing treatment fidelity and outcomes. EMDR therapy is recognized as a best practice for the treatment of PTSD by the U.S. Departments of Veterans Affairs and Defense, the International Society for Traumatic Stress Studies, the World Health Organization, the U.K. National Institute for Health and Care Excellence (NICE), the Australian National Health and Medical Research Council, the Association of the Scientific Medical Societies in Germany, and other health care associations/institutes around the world.

Evidence-Based Oncology Christopher B. Williams.2008-04-15 This is a book about using the best evidence to inform treatment decisions for people with cancer. It is written by oncologists for oncologists, using examples throughout to illustrate key points. The book starts off with a toolbox section, written in a way which will help those relatively new to the principles of evidence-based oncology to understand the key issues, and equip them with the basics of how to tell a good study from a bad one. The majority of the book then deals with an evidence-based summary of the common and important cancers in a structured and easy to read format around common patient scenarios and frequently asked questions. Whilst most of the evidence is based on randomised controlled trials, other studies are cited where appropriate eg when discussing adverse events. The unique accompanying book website will contain updates of new chapters and studies as they become available. Written by leading world figures in the evidence-based movement Includes free CD-ROM with PC eBook and sample PDA chapter Methodology of reviewing and appraising evidence discussed in the context of cancer management Clinical sections covering prevention and screening Chapters on treatment of the individual major cancers review the current best available evidence to most frequently asked questions Rigorously structured explicit searches, evidence of efficacy and harms, plus comment around clinical scenarios Free-access update website keeping the text current and live: www.evidbasedoncology.com

The New Midwifery Lesley Ann Page, Rona McCandlish. 2006-10-06 Practicing as a midwife today requires not only good clinical skills but also a broad understanding of the social and emotional changes a woman experiences before and after birth. This book combines scientific knowledge with the more intangible skills needed for sensitive communication to provide the best possible care to the mother and her family. The second edition of this celebrated text vividly explores the various skills and approaches that lead to successful midwifery practice and uses care stories to bring these to life. Provides a refreshingly new approach to key areas of midwifery practice in a way that brings practice to life. Illustrates and supports the fundamental changes currently taking place in midwifery around the world. Builds on the most up-to-date, evidence-based research to suggest guidelines for best practices. Explores the impact of parenthood and offers strategies for effectively supporting individuals during this period of transition. Includes care stories - case studies that highlight positive midwifery care and successful childbirth experiences. Offers contrasting stories from around the world, illustrating how maternity care in industrialized society differs from that in a non-industrial or third world environment. Provides up-to-date research and reference material.

Writing for Nursing and Midwifery Students Julio Gimenez. 2018-10-05 Combining a theoretical approach with practical activities, this book is invaluable for nursing and midwifery students and will help them to master the basics of writing at university. It equips students with the skills needed to examine cognitive processes such as reflection and critical thinking and includes essential information on referencing correctly and avoiding plagiarism. Going beyond the traditional essay, it provides support and guidance on producing care critiques, action plans, portfolios and journal article reviews alongside complex argumentative writing and undergraduate dissertation proposals. Written in an engaging and accessible style, this is a comprehensive writing toolkit for students of nursing, midwifery, health and social care. Suitable for students of all levels, it is ideal for use in class or for independent study. New to this Edition: - A new section on writing systematic reviews and responding to case studies for assessment purposes - Extended content on referencing, engaging with sources and critical and argumentative writing, featuring new examples and exercises

Sentinel Lymph Node Biopsy Hiram S. Cody. 2001-11-08 An intuitive, ingenious and powerful technique, sentinel lymph node biopsy has entered clinical practice with astonishing rapidity and now represents a new standard of care for melanoma and breast cancer patients, while showing great promise for the treatment of urologic, colorectal, gynecologic, and head and neck cancers. This text, written by international experts in the technique, provides a clear and comprehensive guide, presenting a detailed overview and discussing the various mapping techniques available and how these are applied in a number of leading institutions. This essential resource for surgical oncologists, pathologists, and specialists in nuclear medicine will also provide key information for those planning to start a sentinel lymph node program.

Evidence Based Midwifery Helen Spiby, Jane Munro. 2009-10-13 Evidence based practice is now widely accepted as a fundamental tenet of midwifery. The importance of evidence in defining midwifery policy and practice in the UK health system, and others, is acknowledged and enduring. While the development and evaluation of research in midwifery is well charted, the question of how such evidence is incorporated into practice has, to date, received less attention and discussion in the midwifery profession. Answering this need, Evidence Based Midwifery focuses on the dissemination

and use of evidence for midwifery practice, and explores midwives' experiences in using the evidence base to inform policy and enhance clinical practice. Written by a highly-regarded and diverse group from the UK and international midwifery community, Evidence Based Midwifery addresses issues of relevance to all midwives whether clinical practitioners or educators, students or supervisors, researchers or managers. Issues that influence evidence based midwifery are discussed, and topics covered include problem based learning, implementation of evidence based guidelines and the involvement of service users. Edited by founder members of the Evidence Based Midwifery Network International collaboration with contributions from the UK, Greece, Canada and the Netherlands Primary focus on the incorporation of evidence into midwifery practice Real-life examples throughout

Essential Midwifery Practice Denis Walsh, Soo Downe. 2009-11-09 Intrapartum care has undergone profound changes over the past 50 years.
