Practical Project Management Meilir Page-Jones.1985 Practical Project Management is not just another management book, promising to divulge the latest secrets to successful project management. Nor is it merely a catalog of perennial woes and bad practices. Rather, it is a book full of fresh insights on what makes organizations effective, on how a project might be doomed to failure before it even starts, on what a manager can do to prevent disaster, on what managers need to understand in order to carry out their duties in a constantly changing environment, and on ways that a manager can motivate project members and users to achieve positive results. Clearly, a manager cannot run a successful project on theory alone: He or she needs practical recommendations, strategies, and procedures that can be adapted to the specific environment. With this book, Meilir Page-Jones provides the know-how, backing it up with humorous but no-less-real examples from his own experience. This exceptional handbook explores -- Why and how projects must serve overall corporate objectives -- How to organize and manage the project itself -- How to hire, train, promote, and dismiss the people you manage. The book contains all the insights, examples, illustrations, exercises, strategies, and procedures you'll need to run an effective, successful department.

Social Media for Project Management Johan Ninan.2022-11-17 The number of projects is increasing worldwide as traditional and repetitive tasks are carried out through automation. Projects being temporary and unique while being adopted globally across sectors presents a challenge for the effective management of environmental, economic, and social parameters. Projects are people centric and require the effective management of internal and external stakeholders. In the modern age, social media is seen as a tool that connects people across the world having significant implications on everyone's daily life. Social media is used for different purposes and encompasses multiple affordances as these are often free and also bring together people from different walks of life who tend to use them differently. However, the role of social media in managing projects is still under explored. In this edited book, multiple authors working on the application of social media in projects come together to craft an agenda for the future. First, the use of social media for internal stakeholders, such as managers and engineers, are discussed. Following this, the use of social media for external stakeholders, such as communities and project affected persons are discussed. Finally, the guidelines for education using social media and research using social media is discussed. Thus, the book brings together multiple authors to discuss how social media can be used in project settings to facilitate interactions and strategic conversations across hierarchical levels and geographic boundaries for diverse goals. The book is a valuable resource for all project management academics, researchers and practitioners who are interested in learning about the application of social

media in project settings.

Advances in Food and Non-Food Biomass Production, Processing and Use in Sub-Saharan Africa Daniel Callo-Concha, Hannah Jaenicke, Christine B. Schmitt, Manfred Denich. 2020-05-20 The bioeconomy concept aims to add sustainability to the production, transformation, and trade of biological goods. In this context, the international BiomassWeb project aimed to underpin the bioeconomy concept by applying the value web approach, which seeks to uncover complex interlinked value webs instead of linear value chains. The project also aimed to develop intervention options to strengthen and optimize the synergies and trade-offs among different value chains. The Special Issue "Advances in Food and Non-Food Biomass Production, Processing and Use in Sub-Saharan Africa: Toward a Basis for a Regional Bioeconomy" compiles 23 articles produced in this framework. The articles are grouped in four sections: the value web approach; the production side; processing, transformation and trade; and global views.
