The Little Green Grammar Book Mark Tredinnick.2010-10 What really goes on inside a sentence? What is your subject, and where is your verb, and what is its tense, and where is your modifier, and why does it matter? Where do you need a comma, and where do you not? Why are dashes and semicolons so misunderstood? When is it which and when is it that? In The Little Green Grammar Book, Mark Tredinnick asks and answers the tough grammar questions - big and small - with the same verve and authority readers encountered in The Little Red Writing Book. The Little Green Grammar Book does for grammar what The Little Red Writing Book did for style. It will have you writing like a writer in no time.

Introduction to Paleobiology and the Fossil Record Michael J. Benton,David A. T. Harper.2013-04-25 This book presents a comprehensive overview of the science of the history of life. Paleobiologists bring many analytical tools to bear in interpreting the fossil record and the book introduces the latest techniques, from multivariate investigations of biogeography and biostratigraphy to engineering analysis of dinosaur skulls, and from homeobox genes to cladistics. All the well-known fossil groups are included, including microfossils and invertebrates, but an important feature is the thorough coverage of plants, vertebrates and trace fossils together with discussion of the origins of both life and the metazoans. All key related subjects are introduced, such as systematics, ecology, evolution and development, stratigraphy and their roles in understanding where life came from and how it evolved and diversified. Unique features of the book are the numerous case studies from current research that lead students to the primary literature, analytical and mathematical explanations and tools, together with associated problem sets and practical schedules for instructors and students. “..any serious student of geology who does not pick this book off the shelf will be putting themselves at a huge disadvantage. The material may be complex, but the text is extremely accessible and well organized, and the book ought to be essential reading for palaeontologists at undergraduate, postgraduate and more advanced levels—both in Britain as well as in North America.” Falcon-Lang, H., Proc. *The Elite Leadership Course* Garry McCarthy.2021-05-26 The only authentic account of Lord Rowallan's ruthlessly unorthodox methods of leadership development at the Royal Military Academy Sandhurst. This is a brilliant account of how leadership is made. - Andy McNab This is the true story of 21 young men desperately trying to survive the most brutal leadership course of modern times. A throw back to the Highland Fieldcraft Training Center, the revolutionary brain child of Lord Rowallan during the Second World War, this fascinating insight explains the extraordinary lengths Sandhurst goes to in pursuit of generating the world's greatest military leaders. No one could have known that the intensity of their training was coincidentally little more than a prelude to a decade of war in Afghanistan and Iraq where attrition rates became comparable to those reached during the Second World War. This captivating story is full of emotion brought on by physical and mental endeavor that leads to success and failure. This intimate and revealing story of camaraderie is the first of its kind. But learning how to lead subordinates during the darkest of hours, living in the most austere of environments comes at a price. Unconventional and at times controversial, this is the only authentic account of life in Rowallan Company Sandhurst at a time when the world teetered on the brink of war with insurgents and dictators armed with weapons of mass destruction.

*Confessions of an IT Manager* Phil Factor. 2009 Phil Factor is a legend in his own runtime. Scurrilous, absurd, confessional and scathing by turns, *Confessions of an IT Manager* targets the idiocy, incompetence and overreach of the IT management industry from vantage point all the way up and down the greasy pole. Phil Factor (real name withheld to protest the guilty) has over 20 years experience in the IT industry, specializing in database-intensive applications. For withering insight into the human weaknesses and farcical levels of ineptitude that bring IT projects to their knees, plus occasional escapes into burnished pastiche and cock-a-leg doggerel there is no funnier, more illuminating commentary on the IT crowd.

*Reading behind Bars* Jill Grunenwald. 2019-07-02 In December 2008, twentysomething Jill Grunenwald graduated with her master's degree in library science, ready to start living her dream of becoming a librarian. But the economy had a different idea. As the Great Recession reared its ugly head, jobs were scarce. After some searching, however, Jill was lucky enough to snag one of the few librarian gigs left in her home state of Ohio. The catch? The job was behind bars as the prison librarian at a men's minimum-security prison. Talk about baptism by fire. As an untested twentysomething woman, to say that the job was out of Jill's comfort zone was an understatement. She was forced to adapt on the spot, speedily learning to take the metal detectors, hulking security guards, and colorful inmates in stride. Over the course of a little less than two years, Jill came to see past the bleak surroundings and the orange jumpsuits and recognize the humanity of the men stuck behind bars. They were just like every other library patron—persons who simply wanted to read, to be educated and entertained through the written word. By helping these inmates, Jill simultaneously began to recognize the humanity in everyone and to discover inner strength that she never knew she had. At turns poignant and hilarious, *Reading behind Bars* is a perfect read for fans of *Orange is the New Black* and *Shakespeare Saved My Life*.

**Sport in Capitalist Society** Tony Collins. 2013-04-12 Why are the Olympic Games the driving force behind a clampdown on civil liberties? What makes sport an unwavering ally of nationalism and militarism? Is sport the new opiate of the masses? These and many other questions are answered in this new radical history of sport by leading historian of sport and society, Professor Tony Collins. Tracing the history of modern sport from its origins in the burgeoning capitalist economy of mid-eighteenth century England to the globalised corporate sport of today, the book argues that, far from the purity of sport being 'corrupted' by capitalism, modern sport is as much a product of capitalism as the factory, the stock exchange and the unemployment line. Based on original sources, the book explains how sport has been shaped and moulded by the major political and economic events of the past two centuries, such as the French Revolution, the rise of modern nationalism and imperialism, the Russian Revolution, the Cold War and the imposition of the neo-liberal agenda in the last decades of the twentieth century. It highlights the symbiotic relationship between the media and

sport, from the simultaneous emergence of print capitalism and modern sport in Georgian England to the rise of Murdoch's global satellite television empire in the twenty-first century, and for the first time it explores the alternative, revolutionary models of sport in the early twentieth century. *Sport in a Capitalist Society* is the first sustained attempt to explain the emergence of modern sport around the world as an integral part of the globalisation of capitalism. It is essential reading for anybody with an interest in the history or sociology of sport, or the social and cultural history of the modern world.

**Forms that Work** Caroline Jarrett, Gerry Gaffney. 2009-03-02 *Forms that Work: Designing Web Forms for Usability* clearly explains exactly how to design great forms for the web. The book provides proven and practical advice that will help you avoid pitfalls, and produce forms that are aesthetically pleasing, efficient and cost-effective. It features invaluable design methods, tips, and tricks to help ensure accurate data and satisfied customers. It includes dozens of examples - from nitty-gritty details (label alignment, mandatory fields) to visual designs (creating good grids, use of color). This book isn't just about colons and choosing the right widgets. It's about the whole process of making good forms, which has a lot more to do with making sure you're asking the right questions in a way that your users can answer than it does with whether you use a drop-down list or radio buttons. In an easy-to-read format with lots of examples, the authors present their three-layer model - relationship, conversation, appearance. You need all three for a successful form - a form that looks good, flows well, asks the right questions in the right way, and, most important of all, gets people to fill it out. Liberally illustrated with full-color examples, this book guides readers on how to define requirements, how to write questions that users will understand and want to answer, and how to deal with instructions, progress indicators and errors. This book is essential reading for HCI professionals, web designers, software developers, user interface designers, HCI academics and students, market research professionals, and financial professionals. \*Provides proven and practical advice that will help you avoid pitfalls, and produce forms that are aesthetically pleasing, efficient and cost-effective. \*Features invaluable design methods, tips, and tricks to help ensure accurate data and satisfied customers. \*Includes dozens of examples -- from nitty-gritty details (label alignment, mandatory fields) to visual designs (creating good grids, use of color). \*Foreword by Steve Krug, author of the best selling *Don't Make Me Think!*
