Handbook of Water Analysis, Third Edition Leo M.L. Nollet,Leen S. P. De Gelder.2013-07-29 Extensively revised and updated, Handbook of Water Analysis, Third Edition provides current analytical techniques for detecting various compounds in water samples. Maintaining the detailed and accessible style of the previous editions, this third edition demonstrates water sampling and preservation methods by enumerating different ways to measure chemical and radiological

characteristics. It gives step-by-step descriptions of separation, residue determination, and clean-up techniques. See What's New in the Second Edition: Includes five new chapters covering ammonia, nitrates, nitrites, and petroleum hydrocarbons, as well as organoleptical and algal analysis methodology. Compares older methods still frequently used with recently developed protocols, and examines future trends. Features a new section regarding organoleptical analysis of water acknowledging that ultimately the consumers of drinking water have the final vote over its quality with respect to odor, flavor, and color. The book covers the physical, chemical, and other relevant properties of various substances found in water. It then describes the sampling, cleanup, extraction, and derivatization procedures, and concludes with detection methods. Illustrated with procedure flow charts and schematics, the text includes numerous tables categorizing methods according to type of component, origin of the water sample, parameters and procedures used, and application range. With contributions from international experts, the book guides you through the entire scientific investigation starting with a sampling strategy designed to capture the real-world situation as closely as possible, and ending with an adequate chemometrical and statistical treatment of the acquired data. By organizing data into more than 300 tables, graphs, and charts, and supplementing the text with equations and illustrations, the editors distill a wealth of knowledge into a single accessible reference.

Seeing from Above Mark Dorrian,Frédéric Pousin.2013-10-03 The view from above, or the 'bird's-eye' view, has become so ingrained in contemporary visual culture that it is now hard to imagine our world without it. It has risen to pre-eminence as a way of seeing, but important questions about its effects and meanings remain unexplored. More powerfully than any other visual modality, this image of 'everywhere' supports our idea of a world-view, yet it is one that continues to be transformed as technologies are invented and refined. This innovative volume, edited by Mark Dorrian and Frederic Pousin, offers an unprecedented range of discussions on the aerial view, covering topics from sixteenth-century Roman maps to the Luftwaffe's aerial survey of Warsaw to Google Earth.

Underpinned by a cross-disciplinary approach that draws together diverse and previously isolated material, this volume examines the politics and poetics of the aerial view in relation to architecture, art, film, literature, photography and urbanism and explores its role in areas such as aesthetics and epistemology. Structured through a series of detailed case studies, this book builds into a cultural history of the aerial imagination.

Die Spur Des Dschingis-Khan (Science-Fiction Klassiker) Hans Dominik.2018-04-23 Hans Dominik (1872-1945) war ein deutscher Science-Fiction- und Sachbuchautor, Wissenschaftsjournalist und Ingenieur (Elektrotechnik, Maschinenbau). Der erste utopische Roman Die Macht der Drei erschien 1922 als Fortsetzungsroman in der Woche und wurde im selben Jahr in Buchform herausgegeben. Der große Erfolg, der sich danach einstellte, machte Dominik in weiten Kreisen des deutschen Leserpublikums bekannt. In schneller Folge erscheinen weitere Zukunftsromane. Dominik ist einer der bedeutendsten Pioniere der Zukunftsliteratur in Deutschland. Seine Science-Fiction-Erzählungen erfreuen sich seit Anfang des vorigen Jahrhunderts bis in die Gegenwart großer Beliebtheit. Sie wurden in hohen Auflagen gedruckt und werden bis heute immer wieder neu aufgelegt. Neben Science Fiction hat Dominik auch Sachbücher und Artikel mit technisch-wissenschaftlichem Inhalt geschrieben. Aus dem Buch: Das Haus hier war das Verwaltungsgebäude der großen, von den europäischen Staaten mit einem Milliardenkapital begründeten Siedlungsgesellschaft, die den Überschuß der europäischen Bevölkerung seit zehn Jahren in Asien ansiedelte. Auf meilenweiten Ländereien, die vordem unfruchtbare Steppen, nach der Erfindung des Dynotherms bestes Ackerland geworden waren. Hier in Berlin war der Hauptsitz dieser großen internationalen und mit staatlichen Hoheitsrechten ausgestatteten Gesellschaft. Ihr Arbeitsgebiet lag in Asien. Dort reichte es vom Kaspischen Meer bis zu den Grenzen des chinesischen Reiches. Dort dampften die Hochalpen unter der Wirkung des Dynotherms.

The Nazis Piotr Uklanski.1999 Piotr Uklanski, a New York based artist, has put together a most surprising and at the same time simple series of pictures. With them he has created an art book consisting of 160 portraits of movie actors playing Nazis. This volume is as much about history as it is about the industry of entertainment. In 1998, The Observer, London, wrote about these compelling and at the same time enstranging portraits: If you are an actor, chances are that you will play a Nazi, or at least a cruel German officer in the Second World War. How do you make yourself look the part? First comes the matter of expression. Mug up on verbal cliches: 'ice-cold eyes', 'thin, compressed lips', with if possible, 'the hint of cynical smile playing around the corners of the mouth'. An 'air of cold command', rigid jaw muscles denoting 'utter ruthlessness', a tiny flare of nostrils to suggest unspeakable depths of sadism. Fine! Now put on the gear: the tunic with its collar-tabs of SS lightning flashes, the tall black cap with eagle, swastika and death's head. Stunning! Now all you need is that gargling accent unlike any noise ever uttered by a real German.

Down from Olympus Suzanne L. Marchand.2020-06-30 Since the publication of Eliza May Butler's Tyranny of Greece over Germany in 1935, the obsession of the German educated elite with the ancient Greeks has become an accepted, if severely underanalyzed, cliché. In Down from Olympus, Suzanne Marchand attempts to come to grips with German Graecophilia, not as a private passion but as an institutionally generated and preserved cultural trope. The book argues that nineteenth-century philhellenes inherited both an elitist, normative aesthetics and an ascetic, scholarly ethos from their Romantic predecessors; German neohumanists promised to reconcile these intellectual commitments, and by so doing, to revitalize education and the arts. Focusing on the history of classical archaeology, Marchand shows how the injunction to imitate Greek art was made the basis

for new, state-funded cultural institutions. Tracing interactions between scholars and policymakers that made possible grand-scale cultural feats like the acquisition of the Pergamum Altar, she underscores both the gains in specialized knowledge and the failures in social responsibility that were the distinctive products of German neohumanism. This book discusses intellectual and institutional aspects of archaeology and philhellenism, giving extensive treatment to the history of prehistorical archaeology and German orientalism. Marchand traces the history of the study, excavation, and exhibition of Greek art as a means to confront the social, cultural, and political consequences of the specialization of scholarship in the last two centuries.

Kosmos: A Portrait of the Russian Space Age .2001-11 The inherent contradictions of the Space Age -- the mixture of technologies high and low, of nostalgia and progress, of pathos and promise -- are revealed in *Kosmos*, Adam Bartos's astonishing photographic survey of the Soviet space program. Bartos's fascination with this subject led him to seek out places like the bedroom where Yuri Gagarin slept the night before his history-making flight into space, located in the Baikonur Cosmodrome, the one-time top-secret space complex in the Kazakh desert. *Kosmos* presents 94 of Bartos's photographs, rich with the incongruities of the history, science, culture, and politics of the Space Age.

New Geographies of Race and Racism Caroline Bressey.2016-04-29 In recent years geographers interested in ethnicity, 'race' and racism have extended their focus from examining geographies of segregation and racism to exploring cultural politics, social practice and everyday geographies of identity and experience. This edited collection illustrates this new work and includes research on youth and new ethnicities; the contested politics of 'race' and racism; intersections of ethnicity, religion and 'race' and the theorisation and interrogation of whiteness. Case studies from the UK and Ireland focus on the intersections of 'race' and nation and the specificities of place in discourses of racialisation and identity. A key feature of the book is its engagement with a range of methodological approaches to examining the significance of race including ethnography, visual methodologies and historical analysis.
