From Arabia to the Pacific Robin Dennell.2020-05-12 Drawing upon invasion biology and the latest archaeological, skeletal and environment evidence, *From Arabia to the Pacific* documents the migration of humans into Asia, and explains why we were so successful as a colonising species. The colonisation of Asia by our species was one of the most momentous events in human evolution. Starting around or before 100,000 years ago, humans began to disperse out of Africa and into the Arabian Peninsula, and then across southern Asia through India, Southeast Asia and south China. They learnt to build boats and sail to the islands of Southeast Asia, from which they reached Australia by 50,000 years ago. Around that time, humans also dispersed from the Levant through Iran, Central Asia, southern Siberia, Mongolia, the Tibetan Plateau, north China and the Japanese islands, and they also colonised Siberia as far north as the Arctic Ocean. By 30,000 years ago, humans had colonised the whole of Asia from Arabia to the Pacific, and from the Arctic to the Indian Ocean as well as the European Peninsula. In doing so, we replaced all other types of humans such as Neandertals and ended five million years of human diversity. Using interdisciplinary source material, *From Arabia to the Pacific* charts this process and draws conclusions as to the factors which made it possible. It will be invaluable to scholars of prehistory, and archaeologists and anthropologists interested in how the human species moved out of Africa and spread throughout Asia.

EASYUNI Ultimate University Guide 2014 EasyUni Sdn Bhd.2014-07-02 Hi there! It's nice to present you once again with another 'hot' issue of easyuni. On 11 June this year, we launched the unifrens social platform, an extension to easyuni's existing vision of providing comprehensive and accurate information to students about colleges and universities. This is another milestone in the history of easyuni as one of Asia's most popular education portals, committed to helping students with their higher education plans. unifrens is a social platform which allows students, searching for universities and colleges with similar interests, to connect with each other to help them make unbiased and community-driven decisions about their higher education. It also allows them to connect with students who are currently enrolled at universities who can tell them about their experiences about a particular city, country, university or a course. unifrens is something we had been planning for a while to complement our current family of tools for students. We always knew that our users would love it as they want more community-driven information instead of promotional content from universities and "study abroad" consultants. I believe this feature will democratise the way information about specific courses, countries or institutions is presented and this can only mean good news for students and their parents visitors, as it helps them make more informed decisions about which course, institution or country to pick. Students can also pose questions to their groups, which will be answered by experts and the community. The feature is still in its beta stage but has gained massive traction with over 100,000 users already registered and assigned to groups. Exciting, isn't it? The issue you're holding now has so much to offer as well. So, read every page and fill yourself with all the knowledge needed to make informed decisions about your higher education.

Bank Exam Pedia Bharath Seeman.2015-02-17 In this present era of competition, every competitive examination consists of 5 sections Quantitative Aptitude, Reasoning, General English, Computer Science and General Awareness related to banking industry. After teaching more than 18,000 students in 28 years, we have seen a lot of students spending their time practicing aptitude and reasoning alone. But the students who cleared the exam would definitely say the above method of practicing would not help because merely passing in Aptitude and Reasoning sections will not help. Students should also think about the other sections and overall cut off. We know a lot of students who cleared all the sections but failed to clear the overall cut off. In fact, Practicing GK and English is the only way to raise the overall cut-off. So, we have decided to dedicate this entire magazine just for General Awareness & Banking awareness. We sincerely believe that students who practice the next 100 pages would secure 40 marks from the Banking awareness section. We thank Google Play for publishing our e-magazine on their mobile platform. We also thank our students who assisted to bring this magazine out.

The Rise of Tamil Separatism in Sri Lanka Gnanapala Welhengama, Nirmala Pillay.2014-03-05 Among the examples of civil wars, armed secessionist movements and minority uprisings in the world today, many involve conflict between a minority group's aim for political self-determination, and the nation state's resistance to any diminution of sovereignty. With the expansion of the international regime of human rights, minority groups have reconceptualised their struggle with the understanding that a minority which is linguistically, religiously or ethnically distinctive is entitled to self-determination if their aspirations cannot be met. This book explores the relationship between minority rights, self-determination and secession within international law, by contextualising these issues in a detailed case study of the rise of Tamil separatism in Sri Lanka. Welhengama and Pillay show how Tamil communalism hardened into secession and assess whether the Sri Lankan government has met its obligations with respect to the right to self-determination short of secession. Focusing on the legal and human rights arguments for secession by the Tamil community of the North and East of Sri Lanka, the book demonstrates how the language of international law and international human rights played a major role in the development of the arguments for secession. Through a close examination of the case of the Tamil's secessionist movement the book presents valuable insights into why modern nation states find themselves threatened by separatist claims and bids for independence based on ethnicity.

***Garland of Visions* Jinah Kim.2021-02-16** *Garland of Visions* explores the generative relationships between artistic intelligence and tantric vision practices in the construction and circulation of visual knowledge in medieval South Asia. Shifting away from the traditional connoisseur approach, Jinah Kim instead focuses on the materiality of painting: its mediums, its visions, and especially its colors. She argues that the adoption of a special type of manuscript called pothi enabled the material translation of a private and internal experience of seeing into a portable device. These mobile and intimate objects then became important conveyors of many forms of knowledge—ritual, artistic, social, scientific, and religious—and spurred the spread of visual knowledge of Indic Buddhism to distant lands. By taking color as the material link between a vision and its artistic output, *Garland of Visions* presents a fresh approach to the history of Indian painting.
