Root Causes of Suicide Terrorism Ami Pedahzur.2006-09-27 This highly topical new study clearly shows how there are at least two reasons to question the central role that is assigned to religion, in particular Islam, when explaining suicide terrorism. suicide terrorism is a modern phenomenon, yet Islam is a very old religion. Except for two periods in the twelfth and eighteenth centuries, suicide was never part of Islamist beliefs and behaviours. Actually, Islam clearly forbids suicide, hence, the argument that Islamic religious beliefs are the main cause of suicide terrorism is inherently dubious many suicide attacks have been carried out by secular organizations with little connection to fundamentalist Islam: Palestinian Fatah; the Popular Front for the Liberation of Palestine; and the Kurdish Workers Party. Moreover, one of the organizations that has employed this strategy devastatingly and regularly is the LTTE (Liberation Tigers of Tamil Elam). Not only are members of this organization not Muslim, most of them are not religious at all. This superb new book contains essays by some of the world's leading scholars of terrorism and political violence. It is essential reading for students of terrorism, political science and Middle Eastern politics, and useful to students of social psychology, theology and history.

Fake Meds Online Alexandra Hall, Georgios A. Antonopoulos. 2017-11-24 This book provides a timely criminological investigation into the rapidly growing sale of fake medicines online. Some estimates suggest that the fake medicine trade has now overtaken marijuana and prostitution as the world's largest market for criminal traffickers. This increase has been particularly apparent in the context of various evolutionary phases in information and communications technologies, and the Internet now acts as the main avenue through which this criminal market is expanding. Thus far - despite growing concern and media attention - this extensive, extremely profitable, and ultimately life-threatening online market is yet to be fully explored. Drawing on the authors' own criminological investigation of both the supply and demand sides in the United Kingdom, this study offers the first in-depth and empirically-grounded analysis of the online trade in illicit medicines. Founded on rigorous research, and bolstering a rich area for debate, this book will be of particular interest for scholars of criminology and technology studies.

Pediatric Psychopharmacology Lawrence Scahill, Christopher Kratochvil. 2010-12-14 When the first edition of *Pediatric Psychopharmacology* published in 2002, it filled a void in child and adolescent psychiatry and quickly establishing itself as the definitive text-reference in pediatric psychopharmacology. While numerous short, clinically focused paperbacks have been published since then, no competitors with the scholarly breadth, depth, and luster of this volume have emerged. In the second edition, Christopher Kratochvil, MD, a highly respected expert in pediatric psychopharmacology, joins the outstanding editorial team led by Dr. Martin and Dr. Scahill. In the new edition, the editors streamline the flow of information to reflect the growth in scientific data since the first edition appeared. The overall structure of the book remains the same, with major sections on underlying biology; somatic interventions; assessment and treatment; and special considerations.

Inside The Black Vault Greenewald Jr..2019-04-08 The evidence in this book may not ultimately give you the “smoking gun” you are looking for on your journey, but I guarantee it will give you a box of bullets when you find it. In 1996, John Greenewald, Jr. began researching the secret inner workings of the U.S. Government at the age of fifteen. He targeted such agencies as the CIA, FBI, Pentagon, Air Force, Army, Navy, NSA, DIA, and countless others. Greenewald utilized the Freedom of Information Act (FOIA) to gain access to more than two million pages of documents. This archive includes information relating to UFOs, the JFK Assassination, chemical, biological, and nuclear weapons, and top secret aircraft. He took the millions of pages, and over the course of more than two decades, has built an archive known around the world, as The Black Vault. Inside The Black Vault: The Government’s UFO Secrets Revealed takes you on a journey within the secret world of unidentified aerial phenomenon that has plagued the military since at least the 1940s. Declassified records prove that the UFO topic is one of the most highly classified and most elusive subjects the U.S. Government has ever dealt with. Each chapter explores various agencies and their documents, and Greenewald breaks down the meaning of why some of the most important documents are relevant to proving a massive cover-up. Along with declassified documents, Greenewald outlines the struggle it took him to get them. No other topic has proven so difficult, in more than 8,000 FOIA requests that he has filed. He explores why that might be and meets skeptics and debunkers head on, outlining why some of their more prominent rebuttals for it all cannot be true.

Skin Necrosis Luc Téot,Sylvie Meaume,Sadanori Akita,William J. Ennis,Veronique del Marmol.2015-03-16 In recent years, wound care has gained increasing recognition as a distinct medical specialty. An understanding of the complex mechanisms involved in wound healing facilitates efficient assessment and treatment of patients with wounds, and skin necrosis can be

considered the starting point in the entire healing process. This book is the first to discuss skin necrosis as a symptom related to a broad range of pathologies. Richly illustrated, it primarily provides therapeutic strategies and treatment algorithms for different clinical contexts. All chapters were written by renowned specialists in their respected fields and include detailed sample cases and essential take-home messages. In light of the highly interdisciplinary nature of wound management, Skin Necrosis offers an invaluable resource for wound care practitioners and health care professionals across the fields of surgery, dermatology, internal medicine, and nursing.

Striking Back Aaron J. Klein. 2007-01-09 The first full account, based on access to key players who have never before spoken, of the Munich Massacre and the Israeli response—a lethal, top secret, thirty-year-long antiterrorism campaign to track down the killers. 1972. The Munich Olympics. Palestinian members of the Black September group murder eleven Israeli athletes. Nine hundred million people watch the crisis unfold on television, witnessing a tragedy that inaugurates the modern age of terror and remains a scar on the collective conscience of the world. Back in Israel, Prime Minister Golda Meir vows to track down those responsible and, in Menachem Begin’s words, “run these criminals and murderers off the face of the earth.” A secret Mossad unit, code named Caesarea, is mobilized, a list of targets drawn up. Thus begins the Israeli response—a mission that unfolds not over months but over decades. The Mossad has never spoken about this operation. No

one has known the real story. Until now. Award-winning journalist Aaron Klein's incisive and riveting account tells for the first time the full story of Munich and the Israeli counterterrorism operation it spawned. With unprecedented access to Mossad agents and an unparalleled knowledge of Israeli intelligence, Klein peels back the layers of myth and misinformation that have permeated previous books, films, and magazine articles about the "shadow war" against Black September and other terrorist groups. Spycraft, secret diplomacy, and fierce detective work abound in a story with more drama than any fictional thriller. Burning questions are at last answered, including who was killed and who was not, how it was done, which targets were hit and which were missed. Truths are revealed: the degree to which the Mossad targeted nonaffiliated Black September terrorists for assassination, the length and full scope of the operation (far greater than previously suspected), retributive acts against Israel, and much more. Finally, Klein shows that the Israeli response to Munich was not simply about revenge, as is popularly believed. By illuminating the tactical and strategic purposes of the Israeli operation, *Striking Back* allows us to draw profoundly relevant lessons from one of the most important counterterrorism campaigns in history.

Offers new ways forward to deal with curriculum, faculty issues, enrollment, retention, graduation rates, campus facility usage, and a host of other urgent issues in higher

education Discusses a strategic model to ensure economic vitality at the traditional university
Contains novel insights into the kind of change that is necessary to move institutions of higher
education forward in innovative ways This book uncovers how the traditional university survives by
breaking with tradition, but thrives by building on what it's done best.

New Laws of Robotics Frank Pasquale.2020-10-27 AI is poised to disrupt our work and our lives. We can harness these technologies rather than fall captive to them—but only through wise regulation. Too many CEOs tell a simple story about the future of work: if a machine can do what you do, your job will be automated. They envision everyone from doctors to soldiers rendered superfluous by ever-more-powerful AI. They offer stark alternatives: make robots or be replaced by them. Another story is possible. In virtually every walk of life, robotic systems can make labor more valuable, not less. Frank Pasquale tells the story of nurses, teachers, designers, and others who partner with technologists, rather than meekly serving as data sources for their computerized replacements. This cooperation reveals the kind of technological advance that could bring us all better health care, education, and more, while maintaining meaningful work. These partnerships also show how law and regulation can promote prosperity for all, rather than a zero-sum race of humans against machines. How far should AI be entrusted to assume tasks once performed by humans? What is gained and lost when it does? What is the optimal mix of robotic and human interaction? *New Laws of Robotics* makes the case that policymakers must not allow corporations or engineers to answer these questions alone. The kind of automation we get—and who it benefits—will depend on myriad small decisions about how to develop AI. Pasquale proposes ways to democratize that decision making, rather than centralize it in unaccountable firms. Sober yet optimistic, *New Laws of Robotics* offers an inspiring vision of technological progress, in which human capacities and

expertise are the irreplaceable center of an inclusive economy.

Experiencing the State Lloyd I. Rudolph, John Kurt Jacobsen. 2010-03 This collection of essays by 13 well-known contributors departs from a conventional analysis of the state that universalizes and standardizes what the state is, does, and means. The contributors engage state and stateness as it is encountered in everyday life, ranging from village and urban life to big dams, war, torture, hospital treatment, cinema attendance, and art exhibitions. The essays locate the state in time, space, and circumstance so that it is contingent and evocative rather than definitive and authoritative. The study discusses formative discourses on the state, what we may think or say about the state, and what images are evoked by its various manifestations through social and cultural forms. This volume begins with a non-essentialist perspective on state formation, and concludes with an account of how the state is experienced in the post-9/11 world scenario, in India and South Asia, the US, Europe, including the former Soviet Union, and the Far East. The contributors include James C. Scott, Arundhati Roy, Sudipta Kaviraj, Lloyd I. Rudolph, Philip Oldenburg, and Paul R. Brass.

Terrorism in the Maghreb Anneli Botha. 2008 Terrorism on the African continent is a complex and emotional topic. One of the primary reasons for this is that a historical introspection for any country, or its people, that has been confronted with a conflicting past can only be described as 'sensitive'. In addition to international developments and challenges, domestic circumstances predominately fuel domestic terrorism. It will therefore be a mistake to assess the threat of terrorism in any country in historic isolation. This is particularly true when one tries to assess and understand the 'renewed' threat of terrorism in Algeria, Morocco and Tunisia. This monograph will attempt to place the threat and implication of the name change announcement of the Salafist Group for Combat and Preaching (GSPC) to al-Qa'eda in the Land of the Islamic Maghreb (AQLIM) in context, with the primary focus

on events in 2007. The name change in itself implied that the original domestic group had transnational ambitions, but what influenced this development and what would the consequences be? Although this development led to immediate and extensive international interest in the Maghreb, it became clear that most assessments focused on the now, without appreciating the historical complexities that ultimately led to this development.

Unmanned Aviation Laurence R. Newcome.2004 Newcome traces the family tree of unmanned aircraft all the way back to their roots as aerial torpedoes, which were the equivalent of today's cruise missiles. He discusses the work of leading aerospace pioneers whose efforts in the area of unmanned aviation have largely been ignored by history.

The Macron Leaks Operation Jean-Baptiste Jeangène Vilmer.2019-05-06

Benchmarking Public Procurement 2016 World Bank Group.2015-11-12 Public procurement accounts for around one-fifth of global gross domestic product (GDP). Given its size the public procurement market can improve public sector performance, promote national competitiveness, drive domestic economic growth, and boost economic development. Launched at the request of the G20 Anti-Corruption Working Group, Benchmarking Public Procurement presents actionable indicators to help countries identify and monitor policies and regulations that impact how private sector companies do business with the government in 77 economies. The Benchmarking Public Procurement 2016 report is organized under two parts: the public procurement life cycle and the complaint and reporting mechanisms indicators. Data was gathered using standardized questionnaires distributed to expert contributors in each economy. The project builds on the Doing Business methodology and aims to promote evidence-based decision making by governments and shed light over areas where few empirical data have been presented so far.

Robot Ethics Patrick Lin, Keith Abney, George A. Bekey. 2014-01-10 Prominent experts from science and the humanities explore issues in robot ethics that range from sex to war. Robots today serve in many roles, from entertainer to educator to executioner. As robotics technology advances, ethical concerns become more pressing: Should robots be programmed to follow a code of ethics, if this is even possible? Are there risks in forming emotional bonds with robots? How might society—and ethics—change with robotics? This volume is the first book to bring together prominent scholars and experts from both science and the humanities to explore these and other questions in this emerging field. Starting with an overview of the issues and relevant ethical theories, the topics flow naturally from the possibility of programming robot ethics to the ethical use of military robots in war to legal and policy questions, including liability and privacy concerns. The contributors then turn to human-robot emotional relationships, examining the ethical implications of robots as sexual partners, caregivers, and servants. Finally, they explore the possibility that robots, whether biological-computational hybrids or pure machines, should be given rights or moral consideration. Ethics is often slow to catch up with technological developments. This authoritative and accessible volume fills a gap in both scholarly literature and policy discussion, offering an impressive collection of expert analyses of the most crucial topics in this increasingly important field.

Cystogenesis Jong Hoon Park, Curie Ahn. 2016-10-12 Autosomal Dominant Polycystic Kidney Disease (ADPKD) is a highly prevalent hereditary renal disorder in which fluid-filled cysts are appeared in both kidneys. Main causative genes of ADPKD are PKD1 and PKD2, encoding for polycystin-1 (PC1) and polycystin-2 (PC2) respectively. Those proteins are localized on primary cilia and function as mechanosensor in response to the fluid flow, translating mechanistic stimuli into calcium signaling. With mutations either of PKD1 or PKD2, hyper-activated renal tubular epithelial cell proliferation is

observed, followed by disrupted calcium homeostasis and aberrant intracellular cyclic AMP (cAMP) accumulation. Increased cell proliferation with fluid secretion leads to the development of thousands of epithelial-lined, fluid-filled cysts in kidneys. It is also accompanied by interstitial inflammation, fibrosis, and finally reaching end-stage renal disease (ESRD). In human ADPKD, the age at which renal failure typically occurs is later in life, however no specific targeted medications are available to cure ADPKD. Recently, potential therapeutic targets or surrogate diagnostic biomarkers for ADPKD are proposed with the advances in the understanding of ADPKD pathogenesis, and some of them were attempted for clinical trials. Herein, we will summarize genetic and epi-genetic molecular mechanisms in ADPKD progression, and overview the currently available biomarkers or potential therapeutic reagents suggested.

Debating Orientalism Anna Bernard, David Attwell. 2013-06-13 Edward Said continues to fascinate and stir controversy, nowhere more than with his classic work *Orientalism*. *Debating Orientalism* brings a rare mix of perspectives to an ongoing polemic. Contributors from a range of disciplines take stock of the book's impact and appraise its significance in contemporary cultural politics and philosophy.

Doing Business in 2004 Simeon Djankov, Caralee McLiesh, Michael U. Klein. 2004 A co-publication of the World Bank, International Finance Corporation and Oxford University Press

Podocytopathy Z.-H. Liui, J.C. He. 2014-05-16 The podocyte is a key cell that forms the last barrier of the kidney filtration unit. One of the most exciting developments in the field of nephrology in the last decade has been the elucidation of its biology and its role in the pathophysiology of inherited and acquired glomerular disease, termed podocytopathy. In this publication, world-renowned experts summarize the most recent findings and advances in the field: they describe the unique biological

features and injury mechanisms of the podocyte, novel techniques used in their study, and diagnosis and potential therapeutic approaches to glomerular diseases. Due to its broad scope, this publication is of great value not only for clinical nephrologists and researchers, but also for students, residents, fellows, and postdocs.

A Chance to Make History Wendy Kopp.2012-02-28 The founder of Teach for America details the lessons learned during the organization's twenty-year existence and explains how the achievement gap in U.S. education can be closed.

Poverty and Shared Prosperity 2020 World Bank.2020-12-23 This edition of the biennial Poverty and Shared Prosperity report brings sobering news. The COVID-19 (coronavirus) pandemic and its associated economic crisis, compounded by the effects of armed conflict and climate change, are reversing hard-won gains in poverty reduction and shared prosperity. The fight to end poverty has suffered its worst setback in decades after more than 20 years of progress. The goal of ending extreme poverty by 2030, already at risk before the pandemic, is now beyond reach in the absence of swift, significant, and sustained action, and the objective of advancing shared prosperity—raising the incomes of the poorest 40 percent in each country—will be much more difficult. *Poverty and Shared Prosperity 2020: Reversals of Fortune* presents new estimates of COVID-19's impacts on global poverty and shared prosperity. Harnessing fresh data from frontline surveys and economic simulations, it shows that pandemic-related job losses and deprivation worldwide are hitting already poor and vulnerable people hard, while also shifting the profile of global poverty to include millions of 'new poor.' Original analysis included in the report shows that the new poor are more urban, better educated, and less likely to work in agriculture than those living in extreme poverty before COVID-19. It also gives new estimates of the impact of conflict and climate change, and how they overlap. These results are important for targeting policies to safeguard lives and livelihoods. It shows how some countries are acting to reverse the crisis, protect those most vulnerable, and

promote a resilient recovery. These findings call for urgent action. If the global response fails the world's poorest and most vulnerable people now, the losses they have experienced to date will be minimal compared with what lies ahead. Success over the long term will require much more than stopping COVID-19. As efforts to curb the disease and its economic fallout intensify, the interrupted development agenda in low- and middle-income countries must be put back on track. Recovering from today's reversals of fortune requires tackling the economic crisis unleashed by COVID-19 with a commitment proportional to the crisis itself. In doing so, countries can also plant the seeds for dealing with the long-term development challenges of promoting inclusive growth, capital accumulation, and risk prevention—particularly the risks of conflict and climate change.

Unconquerable Nation Brian Michael Jenkins.2006 The author presents a clear-sighted and sobering analysis of where we are today in the struggle against terrorism. Jenkins, an internationally renowned authority on terrorism, distills the jihadists' operational code and outlines a pragmatic but principled approach to defeating the terrorist enterprise. We need to build upon our traditions of determination and self-reliance, he argues, and above all, preserve our commitment to American values.

Hepatic and Biliary Cancer Harold J. Wanebo.1987

Pandemic Exposures Fassin Didier,Marion Fourcade.2021-11 An illuminating, indispensable analysis of a watershed moment and its possible aftermath. For people and governments around the world, the onset of the COVID-19 pandemic seemed to place the preservation of human life at odds with the pursuit of economic and social life. Yet this naive alternative belies the complexity of the entanglements the crisis has created and revealed not just between health and wealth but also around morality, knowledge, governance, culture, and everyday subsistence. Didier Fassin and

Marion Fourcade have assembled an eminent team of scholars from across the social sciences to reflect on the myriad ways SARS-CoV-2 has entered, reshaped, or exacerbated existing trends and structures in every part of the globe. The contributors show how the disruptions caused by the pandemic have both hastened the rise of new social divisions and hardened old inequalities and dilemmas. An indispensable volume, *Pandemic Exposures* provides an illuminating analysis of this watershed moment and its possible aftermath.

Palliative Care and Ethics Timothy E. Quill, Franklin G. Miller. 2014 Hospice is the premiere end of life program in the United States, but its requirement that patients forgo disease-directed therapies and that they have a prognosis of 6 months or less means that it serves less than half of dying patients and often for very short periods of time. Palliative care offers careful attention to pain and symptom management, added support for patients and families, and assistance with difficult medical decision making alongside any and all desired medical treatments, but it does not include a comprehensive system of care as is provided by hospice. The practice of palliative care and hospice is filled with sometimes overt (requests for hastened death in an environment where such acts are legally prohibited) and other times covert (the delay in palliative care referral because the health care team believes it will undermine disease directed treatment) ethical issues. The contributors to this volume use a series of case presentations within each chapter to illustrate some of the palliative care and hospice challenges with significant ethical dimensions across the three overarching domains: 1) care delivery systems; 2) addressing the many dimensions of suffering; and 3) difficult decisions near the end of life. The contributors are among the most experienced palliative care, hospice and ethics scholars in North America and Western Europe. Each has been given relatively free reign to address what they feel are the most pressing ethical challenges within their domain, so

a wide range of positions and vantage points are represented. As a result, the volume provides a very diverse ethical exploration of this relatively young field that can deepen, stretch, and at times confront any simple notion of the challenges facing patients, their families, professional caregivers, and policy makers.

Liver Immunology M. Eric Gershwin, John M. Vierling, Michael P. Manns. 2013-11-19
Liver Immunology: Principles and Practice, Second Edition begins with important information about the epidemiology and mortality of liver disease worldwide. This information is followed by chapters related to basic immunology, application of liver immunology for diagnosis, and several excellent

chapters that provide a solid foundation for understanding immune-mediated liver disease, including those associated with the biliary tree. A chapter on non-hepatic manifestations of immune mediated liver disease helps provide context for how these diseases affect the patient overall. In addition, chapters discuss various discrete immunologically-mediated infectious liver disorders including those related to bacteria, parasites, and all of the classic viruses. Chapters on the traditional autoimmune liver diseases -- primary biliary cirrhosis, autoimmune hepatitis, primary sclerosing cholangitis as well as overlap syndrome - are also included. The breadth of this comprehensive second edition is highlighted by chapters on alcoholic liver disease, non-alcoholic fatty liver disease, and drug-induced liver disease, among others. This invaluable new edition ends with a forward-looking view of future directions and how the field might meet the challenge of refractory patients. Developed by a renowned group of authors, *Liver Immunology: Principles and Practice, Second Edition* will again serve as a comprehensive textbook by providing an excellent overview for this rapidly evolving field. It greatly adds to the understanding of the pathogenesis of these diseases, while also providing novel insights that can be harnessed into helping improve the care of patients afflicted with various immune-mediated diseases. This volume will again be a must-read for clinicians at all levels, investigators and students.

Postcolonialism Cross-Examined Monika Albrecht. 2019-06-19 Taking a strikingly interdisciplinary and global approach, *Postcolonialism Cross-Examined* reflects on the current status of postcolonial studies and attempts to break through traditional boundaries, creating a truly comparative and genuinely global phenomenon. Drawing together the field of mainstream postcolonial studies with post-Soviet postcolonial studies and studies of the late Ottoman Empire, the contributors in this volume question many of the concepts and assumptions we have become

accustomed to in postcolonial studies, creating a fresh new version of the field. The volume calls the merits of the field into question, investigating how postcolonial studies may have perpetuated and normalized colonialism as an issue exclusive to Western colonial and imperial powers. The volume is the first to open a dialogue between three different areas of postcolonial scholarship that previously developed independently from one another: • the wide field of postcolonial studies working on European colonialism, • the growing field of post-Soviet postcolonial/post-imperial studies, • the still fledgling field of post-Ottoman postcolonial/post-imperial studies, supported by sideways glances at the multidirectional conditions of interaction in East Africa and the East and West Indies.

Postcolonialism Cross-Examined looks at topics such as humanism, nationalism, multiculturalism, nostalgia, and the Anthropocene in order to piece together a new, broader vision for postcolonial studies in the twenty-first century. By including territories other than those covered by the postcolonial mainstream, the book strives to reframe the “postcolonial” as a genuinely global phenomenon and develop multidirectional postcolonial perspectives.
