Darknet J. D. Lasica.2008-05-02 An indispensable primer for those who want to protect their digital rights from the dark forces of big media. -Kara Swisher, author of aol.com The first general interest book by a blogger edited collaboratively by his readers, Darknet reveals how Hollywood's fear of digital piracy is leading to escalating clashes between copyright holders and their customers, who love their TiVo digital video recorders, iPod music players, digital televisions, computers, and other cutting-edge devices. Drawing on unprecedented access to entertainment insiders, technology innovators, and digital provocateurs-including some who play on both sides of the war between digital pirates and entertainment conglomerates-the book shows how entertainment companies are threatening the fundamental freedoms of the digital age.

Ambivalence Towards Convergence Tanja Storsul,Dagny Stuedahl.2007 The book shows a variety of understandings related to the concept of convergence, at the same time as it reflects on the analytical advantage of the concept. The contributions discuss the impact of media digitalization and to what degree the prospects of convergence are realized. The studies range from studies of institutional and regulatory change within media and cultural institutions, to analyses of communicative genres and social practices related to digital media.

Greenwebeconomics Davide Reina,Silvia Vianello.2011-09-13T00:00:00+02:00 Mentre i media continuano a guardare alla vecchia economia delle grandi banche e delle multinazionali globalizzate, c'è una nuova economia che si sta diffondendo attraverso la rete globale di internet, che si ispira al principio green del fare il massimo utilizzando il minimo e che è già leader nell'unico vero indicatore economico che conterà in futuro: il brain capital. Questa nuova economia, la GreenWebEconomics, è più egualitaria, democratica e intelligente di quella vecchia, la GreyEconomics. Il libro descrive i tratti salienti della GreenWebEconomics, esamina quelle aree dell'impresa e del management in cui più profondi sono i cambiamenti indotti, e illustra come essa potrebbe radicalmente cambiare due mercati simbolo della GreyEconomics: l'automobile e la casa. Ma la GreenWebEconomics è anche un cambiamento epocale e antropologico, che modifica la nostra società alla radice e che ci richiede una diversa prospettiva rispetto ai valori del profitto, dell'impresa e del lavoro. In quanto tale, essa è la nuova frontiera e l'orizzonte a cui dobbiamo guardare se ci sentiamo responsabili, per dirla con le parole di Marguerite Yourcenar, della bellezza del mondo.

Pervasive Information Architecture Andrea Resmini,Luca Rosati.2011-03-23 Pervasive Information Architecture explains the 'why' and 'how' of pervasive information architecture (IA) through detailed examples and real-world stories. It offers insights about trade-offs that can be made and techniques for even the most unique design challenges. The book will help readers master agile information structures while meeting their unique needs on such devices as smart phones, GPS systems, and tablets. The book provides examples showing how to: model and shape information to adapt itself to users' needs, goals, and seeking strategies; reduce disorientation and increase legibility and way-finding in digital and physical spaces; and alleviate the frustration associated with choosing from an ever-growing set of information, services, and goods. It also describes relevant connections between pieces of information, services and goods to help users achieve their goals. This book will be of value to practitioners, researchers, academics, and students in user experience design, usability, information architecture, interaction design, HCI, web interaction/interface designer, mobile application design/development, and information design. Architects and industrial designers moving into the digital realm will also find this book helpful. Master agile information structures while meeting the unique user needs on such devices as smart phones, GPS systems, and tablets Find out the 'why' and 'how' of pervasive information architecture (IA) through detailed examples and real-world stories Learn about trade-offs that can be made and techniques for even the most unique design challenges

We Are Smarter Than Me Barry Libert,Jon Spector.2008 Wikinomics and The Wisdom of Crowds identified the phenomena of emerging social networks, but they do not confront how businesses can profit from the wisdom of crowds. WE ARE SMARTER THAN ME by Barry Libert and Jon Spector, Foreword by Wikinomics author Don Tapscott, is the first book to show anyone in business how to profit from the wisdom of crowds. Drawing on their own research and the insights from an enormous community of more than 4,000 people, Barry Libert and Jon Spector have written a book that reveals what works, and what doesn't, when you are building community into your decision making and business processes. In We Are Smarter Than Me, you will discover exactly how to use social networking and community in your business, driving better decision-making and greater profitability. The book shares powerful insights and new case studies from product development, manufacturing, marketing, customer service, finance, management, and beyond. You'll learn which business functions can best be accomplished or supported by communities; how to provide effective moderation, balance structure with independence, manage risk, define success, implement effective metrics, and much more. From tools and processes to culture and leadership, We Are Smarter than Me will help you transform the promise of social networking into a profitable reality.

Big Ideas Don Tapscott.2021-10-27 Don Tapscott, one of the world's great thinkers on the Internet, became Chancellor of his alma mater, Trent University, in 2013. Over the next 6 years, he spoke to students about all kinds of things--designing their lives, the value of a Liberal arts education, how to thrive in the digital age, how to be resilient. Those delightful speeches have been compiled in this book. It also includes articles in Harvard Business Review, the Globe and Mail, and other journals about his ground-breaking ideas on the impact of the blockchain on higher education, the dark side of the digital economy, and the challenge that awaits young people graduating from university.

Zero Comments Geert Lovink.2013-10-31 In Zero Comments, internationally renowned media theorist and 'net critic' Geert Lovink revitalizes worn out concepts about the Internet and interrogates the latest hype surrounding blogs and social network sites. In this third volume of his studies into critical Internet culture, following the influential Dark Fiber and My First Recession, Lovink develops a 'general theory of blogging.' He unpacks the ways that blogs exhibit a 'nihilist impulse' to empty out established meaning structures. Blogs, Lovink argues, are bringing about the decay of traditional broadcast media, and they are driven by an in-crowd dynamic in which social ranking is a primary concern. The lowest rung of the new Internet hierarchy are those blogs and sites that receive no user feedback or 'zero comments'. Zero Comments also explores other important changes to Internet culture, as well, including the silent globalization of the Net in which the West is no longer the main influence behind new media culture, as countries like India, China and Brazil expand their influence and looks forward to speculate on the Net impact of organized networks, free cooperation and distributed aesthetics.

High Concept Justin Wyatt.2010-07-22 Steven Spielberg once said, I like ideas, especially movie ideas, that you can hold in your hand. If a person can tell me the idea in twenty-five words or less, it's going to make a pretty good movie. Spielberg's comment embodies the essence of the high concept film, which can be condensed into one simple sentence that inspires marketing campaigns, lures audiences, and separates success from failure at the box office. This pioneering study explores the development and dominance of the high concept movie within commercial Hollywood filmmaking since the late 1970s. Justin Wyatt describes how box office success, always important in Hollywood, became paramount in the era in which major film studios passed into the hands of media conglomerates concerned more with the economics of filmmaking than aesthetics. In particular, he shows how high concept films became fully integrated with their marketing, so that a single phrase (Just when you thought it was safe to go back in the water...) could sell the movie to studio executives and provide copy for massive advertising campaigns; a single image or a theme song could instantly remind potential audience members of the movie, and tie-in merchandise could generate millions of dollars in additional income.

Macrowikinomics. Riavviare il sistema: dal business al mondo Don Tapscott,Anthony D. Williams.2010

Who Knows Ann Cavoukian,Don Tapscott.1997 Imagine a world where every detail of our lives can be known to others at the click of a mouse. In business and at home, that world is here. This shocking new book reveals precisely how the new technology is already invading our confidentiality and privacy. Fortunately, it also tells how we can protect ourselves from the innovations of cyberspace from being used as weapons against us in the 21st century.

Culture Jam Kalle Lasn.2000-11-07 America is no longer a country but a multimillion-dollar brand, says Kalle Lasn and his fellow culture jammers.

The founder of Adbusters magazine, Lasn aims to stop the branding of America by changing the way information flows; the way institutions wield power; the way television stations are run; and the way the food, fashion, automobile, sports, music, and culture industries set agendas. With a courageous and compelling voice, Lasn deconstructs the advertising culture and our fixation on icons and brand names. And he shows how to organize resistance against the power trust that manages the brands by uncooling consumer items, by dermarketing fashions and celebrities, and by breaking the media trance of our TV-addicted age. A powerful manifesto by a leading media activist, Culture Jam lays the foundations for the most significant social movement of the early twenty-first century -- a movement that can change the world and the way we think and live.

Avevamo la luna Michele Mezza.2015-07-01T00:00:00+02:00 Il vero '68 italiano? Un'anticipazione del 2013? Sono le ipotesi che avanza il libro di Michele Mezza a proposito degli anni tra il 1962 e il 1964. Un triennio in cui le prospettive di un cambiamento di ruolo e di status del paese potevano realmente mutare. L'autore si chiede se non fu proprio nelle more di quella occasione mancata che si consumò l'ambizione della sinistra italiana di poter governare questo paese. In quel faticoso triennio si alternarono molte lune. Dalla stagione di Kennedy al Concilio di papa Giovanni XXIII, dai Beatles e i Rolling Stones alle prime forme di sapere produttivo dell'Olivetti, all'annuncio della rivoluzione giovanile. Mezza descrive quegli anni in Italia come una straordinaria opportunità che ci fu strappata di mano. Un buco nero che ancora abbiamo dinanzi in questi mesi. Ogni capitolo è sorretto dalla testimonianza di un opinion leader che riflette sulle occasioni di ieri e i problemi di oggi: Giuseppe De Rita e Franco Ferrarotti, Alfredo Reichlin e monsignor Luigi Bettazzi, Claudio Martelli e Elserino Piol... Un libro corale e multimediale. Nelle sue pagine troverete infatti anche filmati e link digitali. Grazie ai codici a barre di seconda generazione, i QR code, con uno smartphone potrete arricchire la lettura con film, fotografie o controllare testi e citazioni direttamente dai siti che li ospitano. Il libro diventa così una vera piattaforma cross mediale.

Viaggio nell'innovazione. Dentro gli ecosistemi del cambiamento globale Roberto Panzarani.2019-05-07 Per acquisire una conoscenza efficace, quella più determinante per mettere in atto i cambiamenti, imprenditori e manager devono muoversi, devono viaggiare e visitare i luoghi dove nasce e si mantiene l'innovazione. Il libro parla di viaggi alla scoperta di ecosistemi che favoriscono il germogliare delle idee e delle loro applicazioni. Qui l'apprendimento presuppone la fatica e la gioia del viaggio che è di per sé un atto innovativo rispetto alla nostra quotidianità e alla nostra zona di comfort. Ma il viaggio e la visita a questi luoghi - aziende, parchi tecnologici, università, centri di ricerca, incubatori - costituiscono un formidabile acceleratore per la conoscenza di nuovi modelli di business e organizzativi che in breve tempo ci raggiungono modificando le nostre abitudini aziendali e i nostri mercati. Con la velocità esponenziale con cui i cambiamenti evolvono, diventa fondamentale apprendere per tempo questi nuovi modelli, interiorizzarli e agirli nella nostra realtà prima che sia troppo tardi. Non basta studiare tutto ciò a tavolino; si può davvero apprendere solo andando a visitare i luoghi dove le cose accadono: dalla Silicon Valley alla Chilecon Valley, dalla Israel Valley all'Indian city of Bangalore, dal Cambridge Science Park al Science Park Berlin Adlershof e tanti altri micro luoghi dell'innovazione, innescando un processo conoscitivo che non può prescindere dal contatto fisico e dall'emozione. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 10.0px Arial}

Design Anarchy Kalle Lasn.2006 Adbusters' Design Anarchy is a visual call to arms to resist the commercialization of everything from motherhood to masochism, and has spawned a new genre of Reactionary Advertising. Each of the hundreds of images in this volume, many paired with notes, commentary and poetry, provokes thought and feeling. It is this feeling, this emotional conversation with the page that fuels Adbusters' vision: to prevent the deadening of society, everyman, us, me. You.

In the Facebook Aquarium Ippolita.2015-11-12 In their new work research collective Ippolita provides a critical investigation of the inner workings of Facebook as a model for all commercial social networks. Facebook is an extraordinary platform that can generate large profit from the daily activities of its users. Facebook may appear to be a form of free entertainment and self-promotion but in reality its users are working for the development of a new type of market where they trade relationships. As users of social media we have willingly submitted to a vast social, economic and cultural experiment. By critically examining the theories of Californian right-libertarians, Ippolita show the thread connecting Facebook to the European Pirate Parties, WikiLeaks and beyond. An important task today is to reverse the logic of radical transparency and apply it to the technologies we use on a daily basis.

Digital Capital Don Tapscott, Alex Lowy, David Ticoll.2000 The industrial-age corporation is crumbling. The new form of wealth creation is the business web, and the new basis of wealth is digital capital.

MacroWikinomics Don Tapscott, Anthony D. Williams.2010 Evaluates the ways in which the global marketplace has significantly changed in recent years, revealing how wikinomics philosophies can be applied to everything from government and finance to education and health care.

Media Competition and Coexistence John W. Dimmick.2002-12-18 This volume considers how media firms, as well as entire industries, exist and persist over time despite what often seems to be intense competition for such resources as audiences and advertisers. Addressing competition within and among media organizations and industries, including broadcasting, cable, and the Internet, author John W. Dimmick studies the media industries through the niche theory lens, developed by bioecologists to explain competition and coexistence. He examines the targets of the different media--audience, advertisers, money--and how they compete, using examples from a variety of studies. Each chapter incorporates relevant economic constructs into the analytic framework. This approach includes the use of economics of scale to explain selection and firm mortality in newspapers and movie theaters; the application of the transaction costs concept to explicate the rise of advertising agencies; the employment of the strategic group concept in analyzing the niche breadth strategy; and the measurement of gratifications-utilities. A comprehensive overview of the determinants of media competition and coexistence, *Media Competition and Coexistence: The Theory of the Niche* offers unique insights for scholars, students, researchers, and practitioners in media economics, management, and business.

The Naked Corporation Don Tapscott, David Ticoll.2003-10-07 Welcome to the world of the naked corporation. Transparency is revolutionizing every aspect of our economy and its industries and forcing firms to rethink their fundamental values. We are in an extraordinary age where businesses must make themselves clearly visible to shareholders, customers, employees, partners, and society. Financial data, employee grievances, internal memos, environmental disasters, product weaknesses, international protests, scandals and policies, good news and bad; all can be seen by anyone who knows where to look. Don Tapscott, bestselling author and one of the most sought after strategists and speakers in the business world, is famous for seeing into the future and pointing out both its forest and its trees. David Ticoll, visionary researcher, columnist, and consultant, has identified countless breakthrough trends at the intersection of technology and business strategy. These two longtime collaborators now offer a brilliant guide to the new age of openness. In *The Naked Corporation*, they explain how the new transparency has caused a power shift toward customers, employees, shareholders, and other stakeholders; how and where information has exploded; and how corporations across many industries have seized on transparency not as a challenge but as an opportunity. Drawing on such examples as Shell Oil's reinvention of itself as an environmentally focused business, to Johnson & Johnson's longstanding and carefully nurtured reputation as a company worthy of trust—as well as little-known examples from pharmaceuticals, insurance, high technology, and financial services—Tapscott and Ticoll offer invaluable advice on how to lead the new age, rather than simply react to it. *The Naked Corporation* is a book for managers, employees, investors, customers, and anyone who cares about the future of the corporation and society.

Office Automation Don Tapscott.2013-11-21 Every pioneer takes large risks, hoping that the new frontier he seeks will provide the benefits of independence and good fortune. Don Tapscott is such a pioneer in the area of office automation. He has been a true pioneer, having entered the field in its early days and taken the risk of working not in technology, which was fashionable, but in the field of the problems of organizations, which was less fashionable, but in many ways more important. The utilization of computers for data processing, accounting, inventory, and other bread and butter applications is now well entrenched in our society and culture. The process of designing such systems tends to focus on the needs of the company and the constraints of the equipment, leading to efficient systems with little tolerance for the variety of people who must use or interface with them. Within the office automation area, these methods do not work nearly as well. The frequency and amount of human interaction in the office environment, and the wide variety of situations and reactions there in, demands a different design methodology.

Pervasive Games Markus Montola,Jaakko Stenros,Annika Waern.2009-06-12 Games are no longer confined to card tables and computer screens. Emmy award winning games like The Fallen Alternate Reality Game (based on the ABC show) or The Lost Experience (based on the CBS hit show)-are pervasive games in that they blur traditional boundaries of game play. This book gives game designers the tools they need to create cutting edge pervasive games.

The Inner History of Devices Sherry Turkle.2011-09-30 Memoir, clinical writings, and ethnography inform new perspectives on the experience of technology; personal stories illuminate how technology enters the inner life. For more than two decades, in such landmark studies as *The Second Self* and *Life on the Screen*, Sherry Turkle has challenged our collective imagination with her insights about how technology enters our private worlds. In *The Inner History of Devices*, she describes her process, an approach that reveals how what we make is woven into our ways of seeing ourselves. She brings together three traditions of listening—that of the memoirist, the clinician, and the ethnographer. Each informs the others to compose an inner history of devices. We read about objects ranging from cell phones and video poker to prosthetic eyes, from Web sites and television to dialysis machines. In an introductory essay, Turkle makes the case for an “intimate ethnography” that challenges conventional wisdom. One personal computer owner tells Turkle: “This computer means everything to me. It's where I put my hope.” Turkle explains that she began that conversation thinking she would learn how people put computers to work. By its end, her question has changed: “What was there about personal computers that offered such deep connection? What did a computer have that offered hope?” *The Inner History of Devices* teaches us to listen for the answer. In the memoirs, ethnographies, and clinical cases collected in this volume, we read about an American student who comes to terms with her conflicting identities as she contemplates a cell phone she used in Japan (“Tokyo sat trapped inside it”); a troubled patient who uses email both to criticize her therapist and to be reassured by her; a compulsive gambler who does not want to win steadily at video poker because a pattern of losing and winning keeps her more connected to the body of the machine. In these writings, we hear untold stories. We learn that received wisdom never goes far enough.

The Architecture of Intelligence Derrick De Kerckhove.2001 A refreshingly unconventional look at architecture and the World Wide Web. Using Vitruvius' classical text *De Architectura* as a starting point, De Kerckhove begins a journey into the exciting world of the Internet. On the one hand he explores the architecture of this revolutionary medium, on the other, he considers the wide-ranging opportunities which the IT world offers for architectonic design, revealing how this new medium for communication is as much based on tradition as on innovation. Derrick de Kerckhove is the Director of the McLuhan Institute and Professor at the University of Toronto. His research into the effects of innovative technology on human communication, of new media on traditional culture have gained worldwide recognition.
