Alone on the Colorado Harold H. Leich.2019 Leich wrote a rich and expressive account of his travels during the Depression--from riding the rails, floating over 200 miles of the Yellowstone River, and finally his attempt to run the Colorado River from its source to the Gulf of Mexico. His writing is wonderfully engaging and this is a grand adventure story to enjoy. He built a kayak and then a wooden boat to run the river. He is the first person known to have run the Colorado River from its source to his unplanned ending in Cataract Canyon. Although the trip ends there and he had to walk out from Hite, Utah, it was his ability to salvage his journal, camera, and film that allows for this wonderful account of his adventure--Provided by publisher.

The Art and Science of Trading Adam Grimes.2017-10-21 Companion book to the trading course, *The Art and Science of Trading*, available at MarketLife.com.

The Art and Science of Technical Analysis Adam Grimes.2012-05-31 A breakthrough trading book that provides powerful insights on profitable

technical patterns and strategies The Art and Science of Technical Analysis is a groundbreaking work that bridges the gaps between the academic view of markets, technical analysis, and profitable trading. The book explores why randomness prevails in markets most, but not all, of the time and how technical analysis can be used to capture statistically validated patterns in certain types of market conditions. The belief of the book is that buying and selling pressure causes patterns in prices, but that these technical patterns are only effective in the presence of true buying/selling imbalance. The Art and Science of Technical Analysis is supported by extensive statistical analysis of the markets, which will debunk some tools and patterns such as Fibonacci analysis, and endorse other tools and trade setups. In addition, this reliable resource discusses trader psychology and trader learning curves based on the author's extensive experience as a trader and trainer of traders. Offers serious traders a way to think about market problems, understand their own performance, and help find a more productive path forward Includes extensive research to validate specific money-making patterns and strategies Written by an experienced market practitioner who has trained and worked with many top traders Filled with in-depth insights and practical advice, The Art and Science of Technical Analysis will give you a realistic sense of how markets behave, when and how technical analysis works, and what it really takes to trade successfully.

Silence within and beyond Pedagogical Settings Eva Alerby.2020-09-15 This book explores the significance of silence within and beyond pedagogical contexts. Silence is a complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be experienced in a multitude of different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own? This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.

Service Cores Ken Yeang.2000 The Detail in Building series is an essential source of contemporary data covering the key elements of building design that form the vocabulary of current architecture. Previous titles include Staircases, Soft Canopies, Glass Canopies, Columns, Cable Nets and Wind Towers, and a publication on Balconies is currently in preparation. Each is clearly analysed, both historically and in terms of recent examples by key practices around the world. The combination of building context, design aesthetics and technical solution, as revealed in the case studies, is highly informative as well as unique in a field where specific technical quality of design detailing is often insufficiently exposed by the superficial presentation of designs. Service Cores, the seventh title in the series, deals with the internal vertical cores of buildings: the parts that contain the elevators, elevator-shafts, lobbies, staircases, mechanical, electrical and IT riser ducts, toilets and other components necessary both for environmental servicing and to provide access to the building's useable spaces. Initially associated mainly with skyscrapers and science buildings, service cores are becoming equally essential in the design of other highly-serviced building types, from laboratories and high-tech buildings to hotels, shopping malls and stadiums. The author discusses the historical treatment and development of service cores, and provides an outline guide to the considerations required in their design. This is supported by a series of case studies, featuring mainly skyscraper buildings from all over the world by

a range of architects of international renown.

The Future of Money Bernard A. Lietaer.2013-02-01 THE GLOBAL MONEY SYSTEM NO LONGER WORKS IN OUR BEST INTERESTS; WE NEED A SERIOUS OVERHAUL OF MONEY - AND OF OUR ATTITUDE TOWARDS IT. Based on the four mega-trends of monetary instability, global greying (an ageing global population), the information revolution, and climate change, Bernard Lietaer looks at different scenarios of what the world might be like in 2020. The Corporate Millennium: governments are disbanded, central banks become irrelevant and the world is run with Big Brother control by huge companies with their own currencies. CARING COMMUNITIES: after a monetary crash, people retreat into small, self-sustaining communities, like tribes. HELL ON EARTH: in which the breakdown of life as we know it is followed by a highly individualistic free-for-all, resulting in an ever more obscene gulf between rich and poor. SUSTAINABLE ABUNDANCE: envisages a world where we take better care of the environment, re-engage the poor and the unemployed in mainstream society and give back time and fulfilment to the over-worked, while providing the elderly with a high level of personal care. A society of sustainable abundance is achievable - but only if we are willing to re-think our money system and use money innovations that have already proven effective somewhere in the world today.
