The Flavors of Modernity Gian-Paolo Biasin.2017-03-14 From Rabelais's celebration of wine to Proust's madeleine and Virginia Woolf's boeuf en daube in *To the Lighthouse*, food has figured prominently in world literature. But perhaps nowhere has it played such a vital role as in the Italian novel. In a book flowing with descriptions of recipes, ingredients, fragrances, country gardens, kitchens, dinner etiquette, and even hunger, Gian-Paolo Biasin examines food images in the modern Italian novel so as to unravel their function and meaning. As a sign for cultural values and social and economic relationships, food becomes a key to appreciating the textual richness of works such as Lampedusa's *The Leopard*, Manzoni's *The Betrothed*, Primo Levi's *Survival in Auschwitz*, and Calvino's *Under the Jaguar Sun*. The importance of the culinary sign in fiction, argues Biasin, is that it embodies the oral relationship between food and language while creating a sense of materiality. Food contributes powerfully to the reality of a text by making a fictional setting seem credible and coherent: a Lombard peasant eats polenta in *The Betrothed*, whereas a Sicilian prince offers a monumental macaroni timbale at a dinner in *The Leopard*. Similarly, Biasin shows how food is used by writers to connote the psychological traits of a character, to construct a story by making the protagonists meet during a meal, and even to call attention to the fictionality of the story with a metanarrative description. Drawing from anthropology, psychoanalysis, sociology, science, and philosophy, the author gives special attention to the metaphoric and symbolic meanings of food. Throughout he blends material culture with observations on thematics and narrativity to enlighten the reader who enjoys the pleasures of the text as much as those of the palate. The Medieval Heritage of Mexico Luis Weckmann.1992 This book examines the medieval legacy that influences life in Spanish-speaking North America to the present day. Focusing on the period from 1517?the expedition of Hernandez de Cordoba?to the middle of the seventeenth century, Weckmann describes how explorers, administrators, judges, and clergy introduced to the New World a culture that was essentially medieval. That the transplanted culture differentiated itself from that of Spain is due to the resistance of the indigenous cultures of Mexico.

Hellenistic Poetry Barbara Hughes Fowler.1990 An accomplished poet and classical scholar, Barbara Hughes Fowler brings Hellenistic poetry to life for the contemporary reader. Her selections engage us with the full range of Hellenistic poetic genres, styles, themes, and moods. The anthology includes Fowler's new translation of the entire *Argonautica* of Apollonius of Rhodes, and eight of Theocritus' *Idylls*, including the beautiful, sensuous description of late summer in *Idyll VII* and the shrewdly comical description of two young matrons venturing into the noisy streets of Alexandria in *Idyll XV*. There are translations of four hymns of Callimachus, as well as poems by Aratus, Bion, Herodas, Moschus, Pseudo-Moschus, and a substantial selection from the Greek Anthology. An ideal companion to her recently published book, *The Hellenistic Aesthetic*, Barbara Fowler's *Hellenistic Poetry* is both a major contribution to classical studies and an invitation to all interested readers to discover the beauty and richness of Hellenistic poetry.

An Economic History of the English Garden Roderick Floud.2019-11-07 'Roderick Floud's ground-breaking study of the history, money, places and personalities involved in British gardens over the past 350 years gives fascinating insight into why gardening is part of this country's soul.' Michael Heseltine, Deputy Prime Minister (1996-1997) 'Thousands of books have been written about the history of British gardens but Roderick Floud, one of Britain's most distinguished economic historians, asks new and important questions: how much did gardens cost to build and maintain, and where did the money come from? Superbly researched, it is full of information which will surprise both economists and gardeners. The book is fun as well as edifying: Floud shows us gardens grand and humble, and introduces us gardeners, plantsmen and technologies in wonderful varieties.' Jane Humphries, Centennial Professor, London School of Economics At least since the seventeenth century, most of the English population have been unable to stop making, improving and dreaming of gardens. Yet in all the thousands of books about them, this is the first to address seriously the question of how much gardens and gardening have cost, and to work out the place of gardens in the economic, as well as the horticultural, life of the nation. It is a new kind of gardening history. Beginning with the Restoration of Charles II in 1660, Roderick Floud describes the role of the monarchy and central and local government in creating gardens, as well as that of the (generally aristocratic or plutocratic) builders of the great gardens of Stuart, Georgian and Victorian England. He considers the designers of these gardens as both artists and businessmen - often earning enormous sums by modern standards, matched by the nurserymen and plant collectors who supplied their plants. He uncovers the lives and rewards of working gardeners, the domestic gardens that came with the growth of suburbs and the impact of gardening on technical developments from man-made lakes to central heating. AN ECONOMIC HISTORY OF THE ENGLISH GARDEN shows the extraordinary commitment of money as well as time that the English have made to gardens and gardening over three and a half centuries. It reveals the connections of our gardens to the re-establishment of the English monarchy, the national debt, transport during the Industrial Revolution, the new industries of steam, glass and iron, and the built environment that is now all around us. It is a fresh perspective on the history of England and will open the eyes of gardeners - and garden visitors - to an unexpected dimension of what they do.

Science in the Kitchen and the Art of Eating Well Pellegrino Artusi.2003-12-27 First published in 1891, Pellegrino Artusi's *La scienza in cucina e l'arte di mangiar bene* has come to be recognized as the most significant Italian cookbook of modern times. It was reprinted thirteen times and had sold more than 52,000 copies in the years before Artusi's death in 1910, with the number of recipes growing from 475 to 790. And while this figure has not changed, the book has consistently remained in print. Although Artusi was himself of the upper classes and it was doubtful he had ever touched a kitchen utensil or lit a fire under a pot, he wrote the book not for professional chefs, as was the nineteenth-century custom, but for middle-class family cooks: housewives and their domestic helpers. His tone is that of a friendly advisor - humorous and nonchalant. He indulges in witty anecdotes about many of the recipes, describing his experiences and the historical relevance of particular dishes. Artusi's masterpiece is not merely a popular cookbook; it is a landmark work in Italian culture. This English edition (first published by Marsilio Publishers in 1997) features a delightful introduction by Luigi Ballerini that traces the fascinating history of the book and explains its importance in the context of Italian history and politics. The illustrations are by the noted Italian artist Giuliano Della Casa.

Letters to Milena Franz Kafka.2015-11-03 In no other work does Franz Kafka reveal himself as in *Letters to Milena*, which begins as a business correspondence but soon develops into a passionate but doomed epistolary love affair. Kafka's Czech translator, Milena Jesenská, was a gifter and charismatic twenty-three-year-old who was uniquely able to recognize Kafka's complex genius and his even more complex character. For thirty-six-year-old Kafka, she was a living fire, such as I have never seen. It was to Milena that he revealed his most intimate self and, eventually, entrusted his diaries for safekeeping.

Bread of Dreams Piero Camporesi.1996-11-15 In a rich and engaging book that illuminates the lives and attitudes of peasants in preindustrial Europe, Piero Camporesi makes the unexpected and fascinating claim that these people lived in a state of almost permanent hallucination, drugged by their very hunger or by bread adulterated with hallucinogenic herbs. The use of opiate products, administered even to infants and children, was widespread and was linked to a popular mythology in which herbalists and exorcists were important cultural figures. Through a careful reconstruction of the everyday lives of peasants, beggars, and the poor, Camporesi presents a vivid and disconcerting image of early modern Europe as a vast laboratory of dreams. Camporesi is as much a poet as a historian. . . . His appeal is to the senses as well as to the mind. . . . Fascinating in its details and compelling in its overall message.—Vivian Nutton, *Times Literary Supplement* It is not often that an academic monograph in history is also a book to fascinate the discriminating general reader. *Bread of Dreams* is just that.—Kenneth McNaught, *Toronto Star* Not religion but bread was the opiate of the poor, Mr. Camporesi argues. . . . Food has always been a social and mythological construct that conditions what we vainly imagine to be matters of personal taste. Our hunger for such works should tell us that food is not only good but essential to think and to read as if our lives depended on it, which they do.—Betty Fussell, *New York Times Book Review*

The Historian and Film Paul Smith.1976-01-29 Film is increasingly engaging the attention of students of history at all levels. In its manifold forms from the newsreel to the 'feature', it is a major source of evidence for, and an important influence upon, contemporary history, and a vivid means of bringing the recent past to life. For earlier periods, it provides a medium in which the often widely dispersed visual evidences of the past can be brought together for the student. It offers the historian a new form in which to interpret and present his subject, and, as television has shown, it is by far the most important vehicle for the presentation of history to mass audiences. The analysis of its content and impact and the exploration of its uses are especially fitted to bring history into an interdisciplinary relationship with other fields, from sociology to the visual arts.

Asylums Erving Goffman.2017-09-08 A total institution is defined by Goffman as a place of residence and work where a large number of like-situated, individuals, cut off from the wider society for an appreciable period

of time, together lead an enclosed, formally administered round of life. Prisons serve as a clear example, providing we appreciate that what is prison-like about prisons is found in institutions whose members have broken no laws. This volume deals with total institutions in general and, mental hospitals, in particular. The main focus is, on the world of the inmate, not the world of the staff. A chief concern is to develop a sociological version of the structure of the self. Each of the essays in this book were intended to focus on the same issue--the inmate's situation in an institutional context. Each chapter approaches the central issue from a different vantage point, each introduction drawing upon a different source in sociology and having little direct relation to the other chapters. This method of presenting material may be irksome, but it allows the reader to pursue the main theme of each paper analytically and comparatively past the point that would be allowable in chapters of an integrated book. If sociological concepts are to be treated with affection, each must be traced back to where it best applies, followed from there wherever it seems to lead, and pressed to disclose the rest of its family.

The Global Coffee Economy in Africa, Asia, and Latin America, 1500-1989 William Gervase Clarence-Smith, Steven Topik.2003-06-16 Coffee beans grown in Brazil, Colombia, Vietnam, or one of the other hundred producing lands on five continents remain a palpable and long-standing manifestation of globalization. For five hundred years coffee has been grown in tropical countries for consumption in temperate regions. This 2003 volume brings together scholars from nine countries who study coffee markets and societies over the last five centuries in fourteen countries on four continents and across the Indian and Pacific Oceans, with a special emphasis on the nineteenth and early twentieth centuries. The chapters analyse the creation and function of commodity, labour, and financial markets; the role of race, ethnicity, gender, and class in the formation of coffee societies; the interaction between technology and ecology; and the impact of colonial powers, nationalist regimes, and the forces of the world economy in the forging of economic development and political democracy.

How the Other Half Lives Jacob A. Riis.2011 Jacob Riis's famed 1890 photo-text addressed the problems of tenement housing, immigration, and urban life and work at the beginning of the Progressive era. David Leviatin edited this complete edition of *How the Other Half Lives* to be as faithful to Riis's original text and photography as possible. Uncropped prints of Riis's original photographs replace the faded halftones and drawings from photographs that were included in the 1890 edition. Related documents added to the second edition include a stenographic report of one of Riis's lantern-slide lectures that demonstrates Riis's melodramatic techniques and the reaction of his audience, and five drawings that reveal the subtle but important ways Riis's photographs were edited when they were reinterpreted as illustrations in the 1890 edition. The book's provocative introduction now addresses Riis's ethnic and racial stereotyping and includes a map of New York's Lower East Side in the 1890s. A new list of illustrations and expanded chronology, questions for consideration, and selected bibliography provide additional support.
