**The Substance of Hope** Jelani Cobb. 2020-10-13 A trenchant and timeless examination of the still-contested meanings of President Barack Obama's election, from a preeminent scholar of race, politics, and American history—with a new introduction by the author. When voters in 2008 chose the United States' first black president, some Americans hailed the event as a sign that the nation had, at long last, transcended its bloody history of racial inequality. Obama's victory was indescribably momentous, but if the intervening years proved anything, it is that we never leave history entirely behind. Indeed, this may be the ultimate lesson of the Obama era. First published in 2010, *The Substance of Hope* is acclaimed historian Jelani Cobb's meditation on what Obama's election represented, an insightful investigation into the civil rights movement forces that helped produce it, and a prescient inquiry into how American society does—and does not—change. In penetrating, elegant prose, Cobb teases apart the paradoxes embodied in race and patriotism, identity and citizenship, progress and legacy. Now reissued with a new introduction by the author, reflecting on how the seismic impact of the Obama presidency continues to shape America, *The Substance of Hope* is an indelible work of history and cultural criticism from one of our most singular voices.

**Civilization** Niall Ferguson. 2011-11-01 From the bestselling author of *The Ascent of Money* and *The Square and the Tower* “A dazzling history of Western ideas.” —*The Economist* “Mr. Ferguson tells his story with characteristic verve and an eye for the felicitous phrase.” —*Wall Street Journal* “[W]ritten with vitality and verve . . . a tour de force.” —*Boston Globe* Western civilization's rise to global dominance is the single most important historical phenomenon of the past five centuries. How did the West overtake its Eastern rivals? And has the zenith of Western power now passed? Acclaimed historian Niall Ferguson argues that beginning in the fifteenth century, the West developed six powerful new concepts, or “killer applications”—competition, science, the rule of law, modern medicine, consumerism, and the work ethic—that the Rest lacked, allowing it to surge past all other competitors. Yet now, Ferguson shows how the Rest have downloaded the killer apps the West once monopolized, while the West has literally lost faith in itself. Chronicling the rise and fall of empires alongside clashes (and fusions) of civilizations, *Civilization: The West and the Rest* recasts world history with force and wit. Boldly argued and teeming with memorable characters, this is Ferguson at his very best.

With the debacle of a failing South Vietnamese invasion of Northern Laos as background, A Shepherd to Fools tells the harrowing tale of a covert Hatchet Team of US soldiers and Montagnard mercenaries. They are ordered to find and capture or kill a band of American deserters, called Longshadows, before the world learns of their paralyzing rebellion. An earlier attempt to capture them failed disastrously, the facts of it buried. Captain Hugh Englander commands the Hatchet Team. He is a humorless bastard, sneering and discourteous to every regular army soldier. He cares little for the welfare of his own men and nothing for the lives of the deserters. The conflict between him and Captain David Weisman, the artillery officer assigned to the mission for artillery support, threatens to tear the team apart. Deep in the Laotian jungle, the team is caught in a final, horrific battle facing an enemy armed with Sarin nerve gas, the "worst of the worst" of the war's clandestine weapons.

*Language, Music and Gesture: Informational Crossroads* Tatiana Chernigovskaya, Polina Eismont, Tatiana Petrova.2021-08-23 This book brings together selected revised papers representing a multidisciplinary approach to language, music, and gesture, as well as their interaction. Among the number of multidisciplinary and comparative studies of the structure and organization of language and music, the presented book broadens the scope with the inclusion of gesture problems in the analyzed spectrum. A unique feature of the presented collection is that the papers, compiled in one volume, allow readers to see similarities and differences in gesture as an element of non-verbal communication and gesture as the main element of dance. In addition to enhancing the analysis, the data on the perception and comprehension of speech, music, and dance in regard to both their functioning in a natural situation and their reflection in various forms of performing arts makes this collection extremely useful for those who are interested in human cognitive abilities and performing skills. The book begins with a philosophical overview of recent neurophysiological studies reflecting the complexity of higher cognitive functions, which references the idea of the baroque style in art being neither linear nor stable. The following papers are allocated into 5 sections. The papers of the section "Language-Music-Gesture As Semiotic Systems" discuss the issues of symbolic and semiotic aspects of language, music, and gesture, including from the perspective of their notation. This is followed by the issues of Language-Music-Gesture Onstage and interaction within the idea of the World as a Text. The papers of "Teaching Language and Music" present new teaching methods that take into account the interaction of all the cognitive systems examined. The papers of the last two sections focus on issues related primarily to language: The section Verbalization Of Music And Gesture considers the problem of describing musical text and non-verbal behavior with language, and papers in the final section Emotions In Linguistics And Ai-Communication Systems" analyze the ways of expressing emotions in speech and the problems of organizing emotional communication with computer agents.

**Working on Mars** William J. Clancey. 2012 Beginning in 2004, a team of geologists and other planetary scientists did field science in a dark room in Pasadena, exploring Mars from NASA's Jet Propulsion Laboratory (JPL) by means of the remotely operated Mars Exploration Rovers (MER).

Clustered around monitors, living on Mars time, painstakingly plotting each movement of the rovers and their tools, sensors, and cameras, these scientists reported that they felt as if they were on Mars themselves, doing field science. The MER created a virtual experience of being on Mars. This book examines how the MER has changed the nature of planetary field science. NASA cast the rovers, Spirit and Opportunity, as robotic geologists, and ascribed machine initiative to remotely controlled actions. Clancey argues that the actual explorers were not the rovers but the scientists, who imaginatively projected themselves into the body of the machine to conduct the first overland expedition of another planet. The author investigates how the design of the rover mission enables field science on Mars, explaining how the scientists and rover engineers manipulate the vehicle and why the programmable tools and analytic instruments work so well for them.
