Breeding Plantation Tree Crops: Tropical Species Shri Mohan Jain,P.M. Priyadarshan.2008-10-08 Tree species are indispensable to support human life. Due to their long life cycle and environmental sensitivity, breeding trees to suit day-to-day human needs is a formidable challenge. Whether they are edible or industrial crops, improving yield under optimal, sub-optimal and marginal areas calls for uni?ed efforts from the s-entistsaroundtheworld. Whiletheuniquenessofcoconutaskalpavriksha(Sanskrit- meaning tree-of-life) marks its presence in every continent from Far East to South America, tree crops like cocoa, oil palm, rubber, apple, peach, grapes and walnut prove their environmental sensitivity towards tropical, sub-tropical and temperate climates. Desert climate is quintessential for date palm. Thus, from soft drinks to breweries to beverages to oil to tyres, the value addition offers a spectrum of pr-ucts to human kind, enriched with nutritional, environmental, ?nancial, social and trade related attributes. Taxonomically, tree crops do not con?ne to a few families, but spread across a section of genera, an attribute so unique that contributes immensely to genetic biodiversity even while cultivated at the commercial scale. Restorative Gardens Nancy Gerlach-Spriggs, Richard Enoch Kaufman, Sam Bass Warner. 1998-01-01 Restorative gardens for the sick, which were a vital part of the healing process from the Middle Ages to the early twentieth century, provided ordered and beautiful settings in which patients could begin to heal, both physically and mentally. In this engaging book, a landscape architect, a physician, and a historian examine the history and role of restorative gardens to show why it is important to again integrate nature into the institutional--and largely factorylike--settings of modern health care facilities. In this unique book, Nancy Gerlach-Spriggs, Dr. Richard Enoch Kaufman, and Sam Bass Warner, Jr., unfold their argument by presenting the history of restorative gardens and studies of six American health care centers that cherish the role of their gardens in the therapeutic process. These institutions are examined in detail: community hospitals in Wausau, Wisconsin, and Monterey, California; a full-care mental institution in Philadelphia; a nursing home in Queens; a facility for rehabilitative medicine in New York City; and a hospice in Houston. In their comprehensive review the authors suggest that contemporary scientific understanding clearly recognizes the beneficial physiological effects of garden environments on patients' well-being. The book ends with a plea to make gardens--rather than the shopping mall atria so often seen in newly renovated hospitals--a vital part of the medical milieu.

Urban Agriculture Europe Frank Lohrberg, Lilli Licka, Lionella Scazzosi, Axel Timpe. 2016 How can agriculture contribute to the sustainable development of European cities? How can agriculture and horticulture create vital urban spaces that have new social and ecological qualities and are also economically viable? Urban Agriculture Europe is the first comprehensive, transdisciplinary publication about urban agriculture in Europe. Apart from well-known examples of urban food gardens in Western European metropolises, this volume also studies innovative forms of periurban agriculture, bringing in experiences in Eastern and Southern Europe. The contributions approach urban agriculture from the point of view of social science, the economy, agricultural ecology, and spatial planning and address the role of citizens, involved parties, and politics, as well as operational models and planning tools. Case studies from Barcelona, Dublin, Geneva, Milan, Sofia, Warsaw, and the Ruhr Metropolis allow a comparative view of European practice. Statements from involved parties and guidance for cities and regions round off the publication.--Page 4 of cover.

Happiness Thich Nhat Hanh.2005-07-20 Thich Nhat Hanh's central teaching is that, through mindfulness, we can learn to live in the present moment instead of in the past and in the future. It's only way to truly develop peace, both in one's self and in the world. Now, for the first time, all of Thich Nhat Hanh's key practices are collected in one accessible and easy-to-use volume. Happiness is structured to introduce those new to Buddhist teachings as well as for more experienced practitioners, Happiness is the quintessential resource of mindfulness practices. Integrating these practices into daily life allows the reader to begin to cultivate peace and joy within him/herself, leading to solidity and freedom from fear, misunderstanding, and suffering. With the practices offered in Happiness Thich Nhat Hanh encourages the reader to learn to do all the things they do in daily life with mindfulness; to walk, sit, work, eat, and drive, with full awareness of what they are doing. It can bring about a shift towards one of the principles of engaged Buddhism, a shift towards practicing mindfulness in every moment of the day and not just while 'formally' meditating. Thich Nhat Hanh encourages his readers to try to be intelligent and skillful in their practice, approaching every aspect of the practice with curiosity and a sense of search. It's important to practice with understanding and not just for the form and appearance. Enjoy your practice with a relaxed and gentle attitude, with an open mind and receptive heart.

As a building material, straw excels in the areas of cost-effectiveness and energy efficiency. This practical guide has been written by the most experienced straw bale builder in the UK. It gives details of all the main construction methods, and includes: * bale specifications * plans * walls and foundations * doors and windows * plastering * building regulations and planning permission * frequently asked questions * construction drawings. This fully revised and updated edition includes new construction drawings, standard details for best practice design, examples of off-the-peg drawings for small buildings such as summer-houses and studios, and designs for affordable houses. Sustainable food planning: evolving theory and practice Andr  Viljoen,Johannes S.C. Wiskerke.2012-03-30 With over half the world's population now deemed to be urbanised, cities are assuming a larger role in political debates about the security and sustainability of the global food system. Hence, planning for sustainable food production and consumption is becoming an increasingly important issue for planners, policymakers, designers, farmers, suppliers, activists, business and scientists alike. The rapid growth of the food planning movement owes much to the fact that food, because of its unique, multi-functional character, helps to bring people together from all walks of life. In the wider contexts of global climate change, resource depletion, a burgeoning world population, competing food production systems and diet-related public health concerns, new paradigms for urban and regional planning capable of supporting sustainable and equitable food systems are urgently needed. This book addresses this urgent need. By working at a range of scales and with a variety of practical and theoretical models, this book reviews and elaborates definitions of sustainable food systems, and begins to define ways of achieving them. To this end 4 different themes have been defined as entry-points into the discussion of 'sustainable food planning'. These are (1) urban agriculture, (2) integrating health, environment and society, (3) food in urban design and planning and (4) urban food governance.

Healing Gardens Clare Cooper Marcus,Marni Barnes.1999-06-15 Although the healing qualities of nature have been recognized and relied on for centuries as a valuable part of convalescence, recent history has seen nature's therapeutic role virtually eclipsed by the technological dominance of modern medicine. As the twentieth century comes to a close and the medical community reacknowledges the importance of the environment to recovery, the healing garden is emerging as a supplement to drug- or technology-based treatments. Healing Gardens celebrates this renewed interest in nature as a catalyst for healing and renewal by examining the different therapeutic benefits of healing gardens and offering essential design guidance from experts in the field. Unique and comprehensive, Healing Gardens provides up-to-date coverage of research findings, relevant design principles and approaches, and best practice examples of different types of healing gardens. It begins by exploring what current research reveals about the connection between nature, human stress reduction, and medical outcomes. It then presents case studies and design guidelines for outdoor spaces in medical settings that include general, psychiatric, and children's hospitals as well as hospices, nursing homes, and Alzheimer's facilities. Historical information, literature reviews, and studies on use are included for each type of outdoor space covered, offering important insights into what works in healing gardens-and what doesn't. Generously supplemented with photographs, site plans, anecdotes, and more, Healing Gardens is an invaluable practical guide for landscape architects and others involved in creating and maintaining medical facilities, and an extremely useful reference for those responsible for patient care. A unique and comprehensive look at the therapeutic effects and design of healing gardens For more and more people, the shortest road to recovery is the one that leads through a healing garden. Combining up-to-date information on the therapeutic benefits of healing gardens with practical design guidance from leading experts in the field, Healing Gardens is an important resource for landscape architects and others working in this emerging area. With the help of site plans, photographs, and more, it presents design guidelines and case studies for outdoor spaces in a range of medical settings, including: * Acute care general hospitals. * Psychiatric hospitals. * Children's hospitals. * Nursing homes. * Alzheimer's facilities. * Hospices.

Happy Teachers Change the World Thich Nhat Hanh,Katherine Weare.2017-06-06 Happy Teachers Change the World is the first official, authoritative manual of the Thich Nhat Hanh/Plum Village approach to mindfulness in education. Spanning the whole range of schools and grade levels, from preschool through higher education, these techniques are grounded in the everyday world of schools, colleges, and universities. Beginning firmly with teachers and all those working with students, including administrators, counselors, and other personnel, the Plum Village approach stresses that educators must first establish their own mindfulness practice since everything they do in the classroom will be based on that foundation. The book includes easy-to-follow, step-by-step techniques perfected by educators to teach themselves and to apply to their work with students and colleagues, along with inspirational stories of the ways in which teachers have made mindfulness practice alive and relevant for themselves and their students across the school and out into the community. The instructions in Happy Teachers Change the World are offered as basic practices taught by Thich Nhat Hanh, followed by guidance from educators using these practices in their classrooms, with ample in-class interpretations, activities, tips, and instructions. Woven throughout are stories from members of the Plum Village community around the world who are applying these teachings in their own lives and educational contexts.

Words and Your Heart Kate Jane Neal.2017-12-26 This book is about your heart (the little bit inside of you that makes you, you!) The words we listen to can affect how we feel. Some words can do amazing things and make us happy. And some words can really hurt us (we all know what sort of words those are). Our words have power, and we can choose to use them to make the world a better place. Simple, direct, and emotive, Words and Your Heart's message is that words have extraordinary power-to harm and to heal, to create and to destroy, and to spread love.

How to Relax Thich Nhat Hanh.2015-09-18 How to Relax is part of The Mindfulness Essentials series of how-to titles by Zen Master Thich Nhat Hanh, introducing beginners and reminding seasoned practitioners of the essentials of mindfulness practice. Pocket-sized, with original two color illustrations by Jason DeAntonis, How to Relax shows how critical it is to regularly interrupt the hub-bub and routine of our lives to stop, relax mindfully, and recharge. Thich Nhat Hanh says that when we relax, we become calm water, and we will reflect reality as it is. If we're not calm, the image we reflect will be distorted. When the image is distorted by our

minds, it's not the reality, and it causes lots of suffering. Relaxation is essential for accessing the tranquility and joy that lead to increased personal well-being. With sections on healing, relief from nonstop thinking, transforming unpleasant sounds, solitude, being peace, and more, How to Relax includes meditations you can do to help you achieve the benefits of relaxation no matter where you are. Scientific studies indicate that meditation contributes tremendously to well-being, general health, and longevity. How to Relax is a unique gift for those who want a simple guide to achieving deep relaxation, controlling stress, and renewing mental freshness and clarity, appropriate for those practicing in any spiritual tradition, whether seasoned practitioners or new to meditations. With fifteen two color drawings by celebrated artist Jason DeAntonis.

An Introduction to the Historiography of Science Helge Kragh.1987 This book introduces the methodological and philosophical problems with which modern history of science is concerned, offering a comprehensive and critical review through description and evaluation of significant historiographical viewpoints. Incorporating discussion of key problems in general historical writing, with examples drawn from a range of disciplines, this non-elementary introduction bridges the gap between general history and history of science. Following a review of the early development of the history of science, the theory of history as applied to science history is introduced, examining the basic problems which this generates, including problems of periodisation, ideological functions, and the conflict between diachronical and anachronical historiography. Finally, the book considers the critical use, and analysis, of historical sources, and the possibility of the experiential reconstruction of history. Aimed primarily at students, the book's broad scope and integration of historical, philosophical and scientific matters will interest philosophers, sociologists and general historians, for whom there is no alternative introduction to the subject at this level.

Reconciliation Thich Nhat Hanh.2006-10-09 Based on Dharma talks by Zen Master Thich Nhat Hanh and insights from participants in retreats for healing the inner child, this book is an exciting contribution to the growing trend of using Buddhist practices to encourage mental health and wellness. Reconciliation focuses on the theme of mindful awareness of our emotions and healing our relationships, as well as meditations and exercises to acknowledge and transform the hurt that many of us experienced as children. The book shows how anger, sadness, and fear can become joy and tranquility by learning to breathe with, explore, meditate, and speak about our strong emotions. Reconciliation offers specific practices designed to bring healing and release for people suffering from childhood trauma. The book is written for a wide audience and accessible to people of all backgrounds and spiritual traditions.

Semantics for Descriptions François Rastier,Marc Cavazza,Anne Abeillé.2002 In our multimedia age, text description presents many conceptual problems: texts, as cultural objects, cannot be interpreted without descriptions of genre, communicative conditions, and language, which positivist approaches have proved unable to provide. Semantics for Descriptions addresses itself as much to linguists as to computer scientists, arguing that rational hermeneutics can offer better descriptive methods by allowing the theoretical and practical conditions of text interpretation to be defined.
